Q54 This study also involves interviewing supervisors and caseworkers at your agency about their work and experiences. To help us select a random sample of supervisors, we would like to collect the names and contact information of the supervisors employed by your agency. We will then randomly select one or more supervisors from this list and offer them the opportunity to participate. Their participation will be completely voluntary, and their responses will be kept private.

During the interviews with supervisors, we will ask for the names and contact information of the caseworkers who report to them and use that list to randomly select one or more caseworkers who will be offered an opportunity to participate.
