SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, announce the availability of a draft HCP and draft CatEx for activities associated with an application for an ITP under section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The ITP would authorize take of the Central California distinct population segment (DPS) of the California tiger salamander (*Ambystoma californiense*) incidental to activities associated with the subdivision of two adjoining parcels and construction of residential housing over a 23.5-acre project site adjacent to the City of Hollister in San Benito County, California. The site would be fully developed with single- and multi-family housing, rights of way for streets and utilities, and public open space lots. The applicant developed the draft HCP as part of their application for an ITP. The Service prepared a draft CatEx in accordance with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) to evaluate the potential effects to the natural and human environment resulting from issuing an ITP to the applicant. We invite public comment on all of these documents.

Background

The Service listed the Central California DPS of the California tiger salamander as threatened on August 4, 2004 (69 FR 47212). Section 9 of the ESA prohibits “take” of fish and wildlife species listed as endangered (16 U.S.C. 1538), where take is defined to include the following activities: “to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct” (16 U.S.C. 1532). The take prohibitions of Section 9 are extended to species listed as threatened at the discretion of the Secretary of the Department of the Interior.

Under section 10(a)(1)(B) of the ESA (16 U.S.C. 1539(a)(1)(B)), we may issue permits to authorize take of listed fish and wildlife species that is incidental to, and not the purpose of, carrying out an otherwise lawful activity. Regulations governing incidental take permits for threatened species are in the Code of Federal Regulations (CFR) at 50 CFR 17.32. Issuance of an ITP also must not jeopardize the existence of federally listed fish, wildlife, or plant species, pursuant to section 7 of the ESA and 50 CFR 402.02. The permittee would receive assurances under our “No Surprises” regulations (50 CFR 17.32(b)(5)).

The Service designated critical habitat for the Central California DPS of the California tiger salamander on August 23, 2005 (70 CFR 49380). The project site encompasses 2.3 acres of California tiger salamander critical habitat unit EB 15A, representing approximately .09 percent of this unit and .001 percent of critical habitat designated for the species rangewide. The area of critical habitat overlapping the project site is fragmented from the remainder of unit EB 15A by Fairview Road, which is moderately trafficked.

Proposed Activities

The applicant has applied for a permit for incidental take of the Central California DPS of the California tiger salamander. The take would occur in association with the construction of residential housing over a 23.5-acre project site adjacent to the City of Hollister in San Benito County, California.

The HCP includes avoidance and minimization measures for the Central California DPS of the California tiger salamander and mitigation for unavoidable loss of habitat. As mitigation, the applicant proposes to purchase credits from a Service-approved conservation bank. The Service in collaboration with the

applicant determined the required mitigation using a habitat model based on the methodology in *Calculating Biologically Accurate Mitigation Credits: Insights from the California tiger Salamander* (Searcy and Shaffer 2008). The method assigns a value to habitat that scales with the reproductive value of the individuals estimated to be occupying an area, which is a function of (1) distance to each known or potential breeding pond within dispersal distance of the site, and (2) surrounding land-use. A mitigation ratio of 1:1 (reproductive value lost: Reproductive value conserved) is then applied to determine the amount of mitigation required to offset impacts to California tiger salamander habitat based on the per-credit habitat value of mitigation credits at the chosen conservation bank.

SUPPLEMENTARY INFORMATION: Pursuant to the PRA, 44 U.S.C. 3501, *et seq.*, and 5 CFR 1320.5, all information collections, as defined in 5 CFR 1320.3, require approval by OMB. ONRR may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

As part of its continuing effort to reduce paperwork and respondent burdens, ONRR is inviting the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information in accordance with the PRA and 5 CFR 1320.8(d)(1). This helps ONRR to assess the impact of its information collection requirements and minimize the public’s reporting burden. It also helps the public understand ONRR’s information collection requirements and provide the requested data in the desired format.

ONRR is especially interested in public comments addressing the following:

- (1) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) The accuracy of ONRR’s estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;
- (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and
- (4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of response.

ONRR published a notice, with a 60-day public comment period soliciting comments on this collection of information, in the **Federal Register** on April 21, 2021 (86 FR 20708). ONRR received seven comments from companies regarding the 60-Day Notice. Two commenters stated their general agreement with the contents of the ICR. A third commenter stated that the company had recently issued its first Indian royalty payment in February and it is still getting familiar with ONRR’s reporting and payments processes. A fourth commenter stated that the company did not have any feedback in response to the 60-Day Notice. Three other commenters declined to provide any comments.

Comments that you submit in response to this 30-Day Notice are a matter of public record. ONRR will include or summarize each comment in its request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask ONRR in your comment to withhold information from public review, ONRR cannot guarantee that it will be able to do so.

Abstract: (a) General Information: ONRR collects, accounts for, and verifies natural resource and energy revenues due to states, American Indians, and the U.S. Treasury. *See* U.S. Department of the Interior Departmental Manual, 112 DM 34.3 (Sept. 9, 2020). ONRR collects various information for this purpose. The information collections that ONRR covers in this ICR are found at 30 CFR part 1202, subparts C and J, which pertain to Indian oil and gas royalties; part 1206, subparts B and E, which govern the valuation of oil and gas produced from leases on Indian lands; and part 1207, which pertains to recordkeeping. These records are essential to ensure that Indian Tribes and individual Indian mineral owners receive all royalties and other revenues owed to the minerals removed from their lands. All data reported is subject to subsequent audit and adjustment.

(b) Information Collections: This ICR covers the paperwork requirements under 30 CFR parts 1202, 1206, and 1207 as follows:

(1) *Indian Oil:* Regulations at 30 CFR part 1206, subpart B, govern the valuation for royalty purposes of oil produced from Indian oil and gas leases (Tribal and allotted). These regulations require a lessee to file form ONRR–4110, *Oil Transportation Allowance Report*, when its oil transportation allowance includes costs incurred under non-arm’s-length or no-contract transportation situations. ONRR and Tribal audit personnel use the information collected on this form to help verify that the lessee correctly reported its transportation allowance within regulatory allowance limitations and reported and paid the correct amount of royalties.

(2) *Indian Gas:* Regulations at 30 CFR part 1206, subpart E, govern the valuation for royalty purposes of natural gas produced from Indian oil and gas leases (Tribal and allotted). These regulations require reporting on ONRR forms 4109, 4295, 4410, and 4411 as follows:

- A lessee must file form ONRR–4109, *Gas Processing Allowance Report*, when its processing allowance includes costs incurred under non-arm’s-length or no-contract processing situations. ONRR and Tribal audit personnel use the information collected on this form to verify that the lessee correctly reported its processing allowance within regulatory allowance limitations and reported and paid the correct amount of royalties.

- A lessee must file form ONRR–4295, *Gas Transportation Allowance Report*, when its gas transportation allowance includes costs incurred under non-arm’s-length or no-contract transportation situations. ONRR and Tribal audit personnel use the information collected on this form to verify that a lessee correctly reported its transportation allowance within regulatory allowance limitations and reported and paid the correct amount of royalties.

- A lessee must file form ONRR–4410, *Accounting for Comparison [Dual Accounting]*, to certify for an Indian oil and gas lease when dual accounting is not required (part A) or to make an election for actual dual accounting as defined in 30 CFR 1206.176 or alternative dual accounting as defined in 30 CFR 1206.173 when dual accounting is required (part B).

- A lessee uses form ONRR–4411, *Safety Net Report*, when it sells gas production from an Indian oil or gas lease in an ONRR-designated index zone beyond the first index pricing point. The safety net calculation establishes the minimum value, for royalty purposes, of natural gas production from Indian oil and gas leases. This reporting requirement helps ensure that Indian lessors receive all royalties due and aids ONRR compliance efforts.

(3) *Indian Oil and Gas*: Regulations at 30 CFR 1206.56(b)(2) and 1206.177(c)(2) and (c)(3) allow a lessee to submit form ONRR–4393, *Request to Exceed Regulatory Allowance Limitation*, to request to exceed the 50-percent-of-royalty-value-transportation-allowance limitation for Indian oil and gas leases. This form and other documentation required by the regulations provide ONRR with data necessary to approve or deny the request.

The requirement to report is mandatory for form ONRR–4410, *Accounting for Comparison [Dual Accounting]*, and for form ONRR–4411, *Safety Net Report*, when applicable. A lessee uses ONRR forms 4109, 4110, 4295, and 4393 in order to obtain the benefit of a transportation or processing allowance.
