National Public Education Financial Survey (NPEFS) 2019-2021: Common Core of Data (CCD)

Appendix E1

Documentation of New Web Application

OMB# 1850-0067 v.21

National Center for Education Statistics (NCES)

August 2021

The web application for the NPEFS data collection decreases the paperwork burden of the state respondents and our data analysts. The application provides respondents with tools to review their data and helps decrease keying errors. We continuously make upgrades to the web application based on feedback received from respondents. The application integrates all parts of NPEFS data collection:

- Fiscal data plan
- Crosswalk module
- Current year submission
- Prior year revisions
- Digital or hard copy confirmation by designated authorized official
- Frequently asked questions
- Awards criteria for early submission of clean data
- NPEFS and Crosswalk reports available after survey submission
- Enhanced edits of NPEFS data before survey submission
- Enhanced form printing capability
- Help screens
- Imputation review (acceptance and denial options)
- Reporting instructions and a user guide in PDF format

The web application is designed to assist respondents and analysts. The survey application includes displays of prior year data and built-in data validity checks. The reporting instructions, user guide, and online help text answers many questions respondents may have about completing the survey online. Within the NPEFS web application, our respondents, analysts, and sponsor can view and print the survey data, and we can easily track the states' survey submissions and re-submissions and provide technical assistance to support states in responding to the survey.

The U.S. Census Bureau is upgrading the web application for FY 2021. This upgrade will utilize new technologies to improve the user experience and make the site more secure. The upgrade necessitates updates to user guides and documentation which will walk the respondent through the process for using the web application to submit NPEFS data. The comprehensive user guide provides respondents with step-by-step instructions for entering data into the NPEFS form, using the crosswalk application to complete the NPEFS form, responding to the fiscal data plan, signing the submission, and making revisions to prior year data. The functions performed by the application will be the same as those in the current application; however, the process for completing each task has been streamlined and the experience improved. Help text for each data item has been developed which contains the reporting instructions plus additional information from the NCES Accounting Handbook¹ to make reporting instructions easier to find.

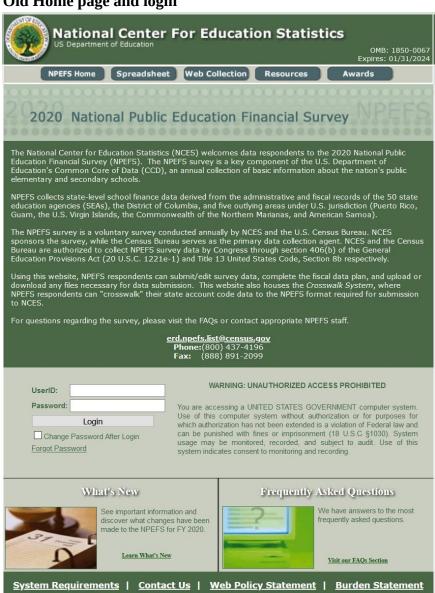

This appendix includes screenshots of the current application versus the new web application. Following that is a listing of the item help text available to respondents within the web application. Finally, the appendix includes the user guide providing instructions and resources to data users on how to use the web application.

The screenshots contained in this Appendix display the current year as FY 2020 and the prior year as FY 2019; however, the web application will not be in production until the collection opens for the FY 2021 collection. The fiscal years are set in the application for testing purposes only. The fiscal years in the

Old main page

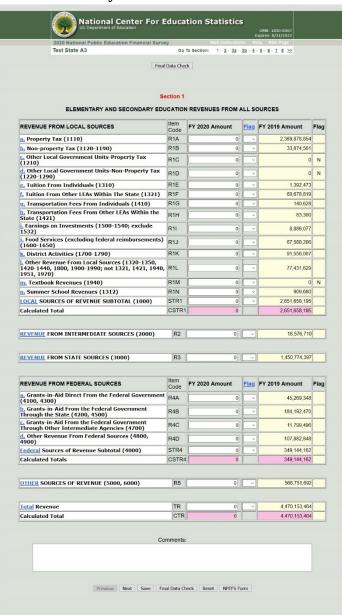

With the new web application, the status of submission (not started, not submitted, submitted, signed, unchanged from original) will be above the link that the respondent will use to complete the necessary step. The status is also color coded with a green bar if the step is complete, a red bar if actions are required, and a gray bar for optional actions.

In the old web application, the user had to read the status and the next steps and then chose the appropriate link from the left navigation bar. Only the links relevant at that step would display.

New main page

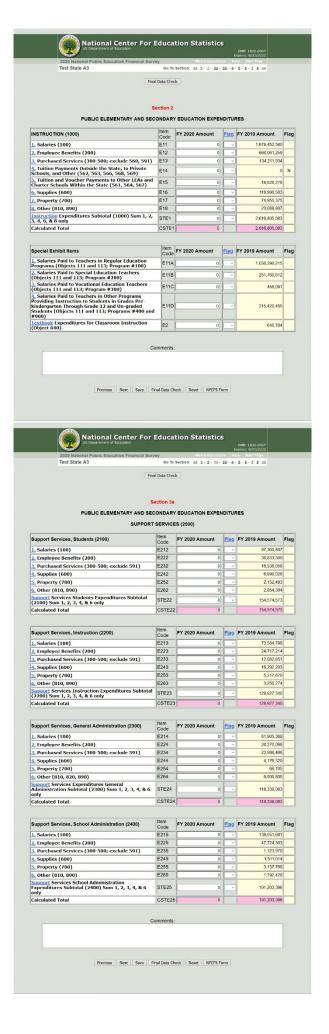

Old NPEFS "key data" form

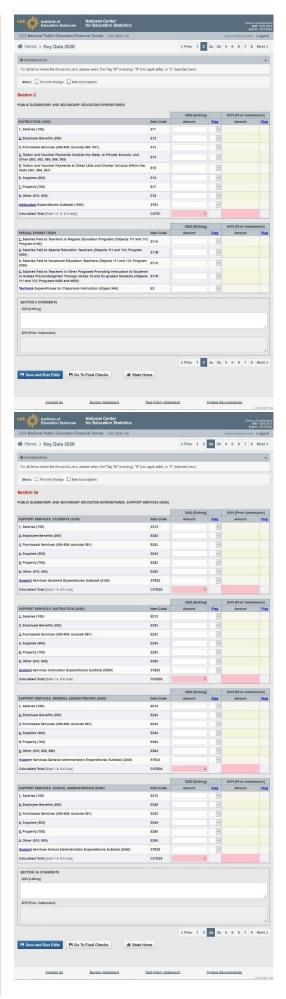

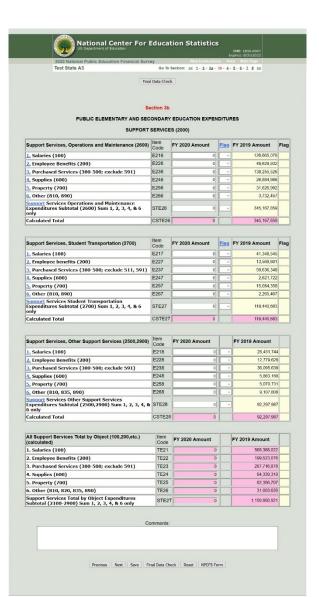

In the new web application, the form is the same; however, the new web application has an enhanced glossary and data edit checks.

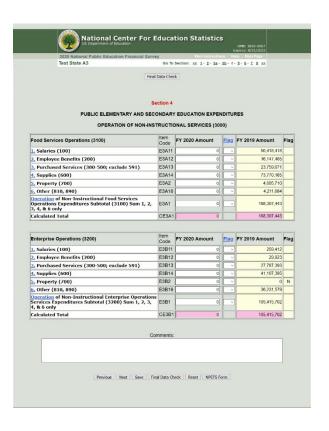

New NPEFS "key data" form

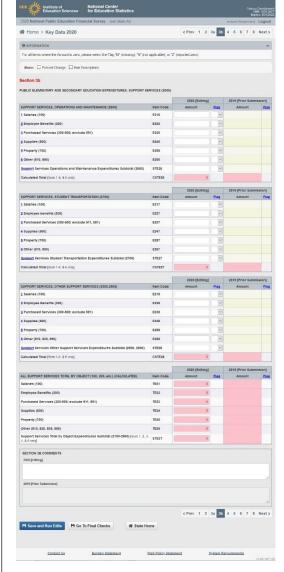

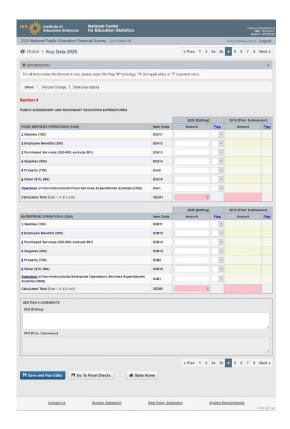

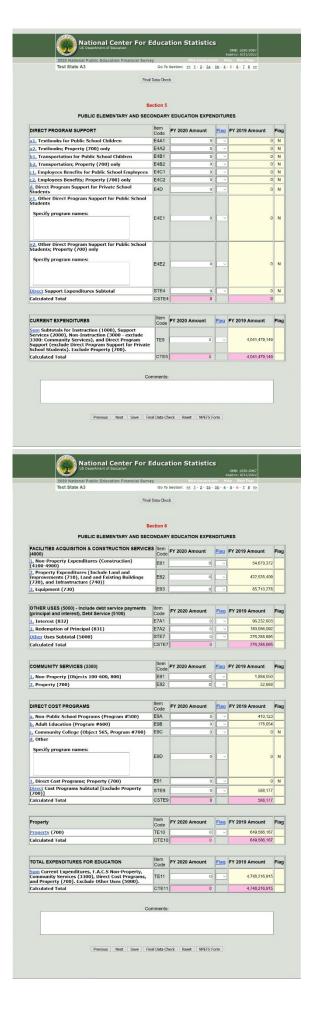

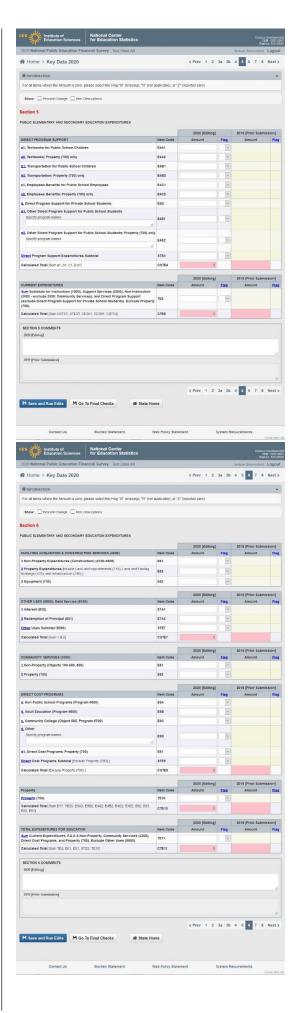

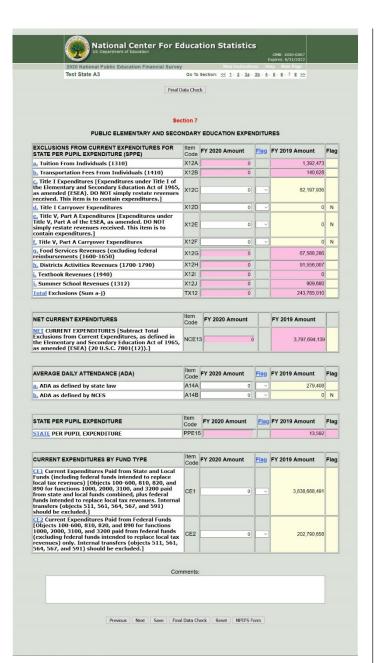

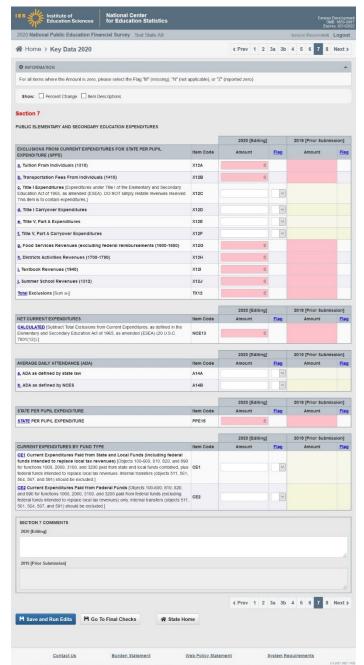

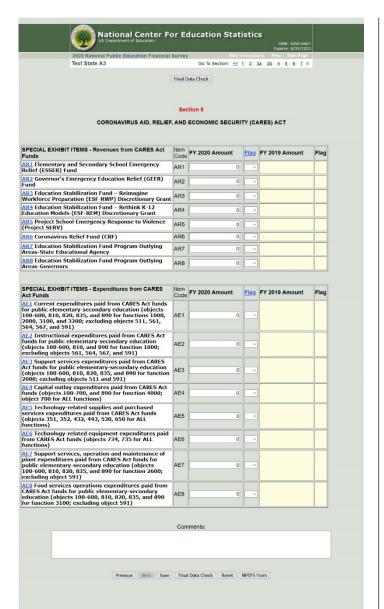

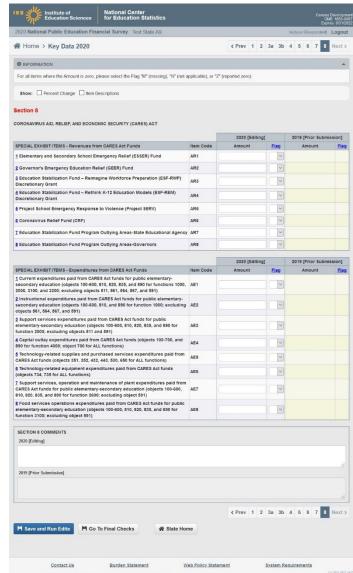

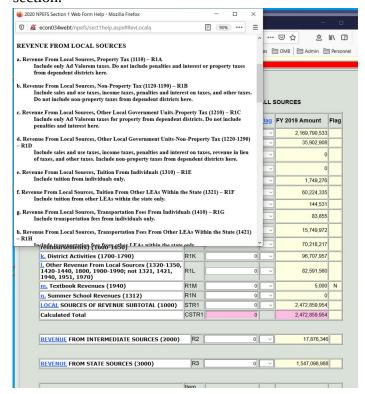

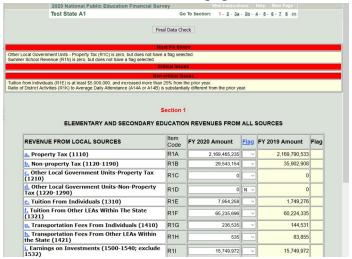

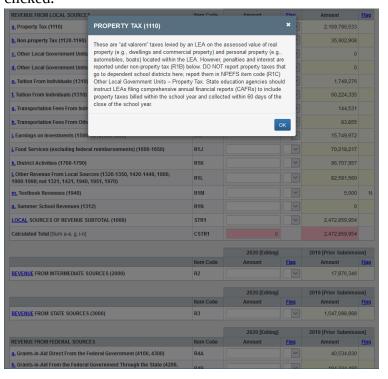

Old help (i.e. glossary) – opens a single page per section.

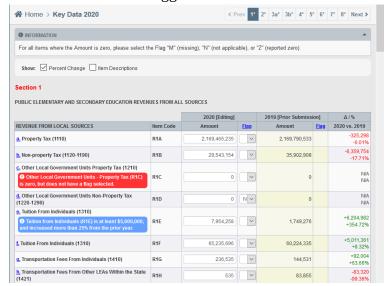

Old data edit checks – appeared at the top of the page. The user had to match the item code in text of the edit to the item code on the page.

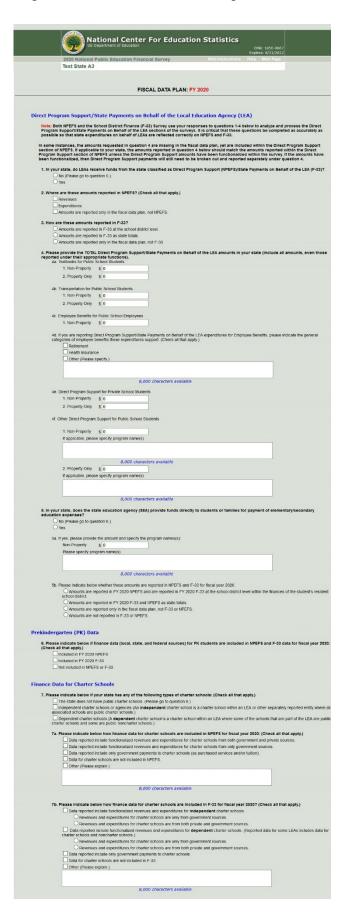

New help – opens a popup specific to the item that was clicked.

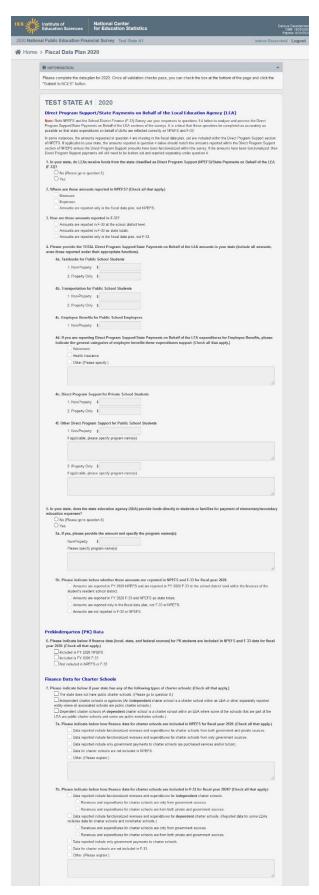

New data edit checks – the edit appears underneath the item which has been flagged.

Old Fiscal data plan – single page survey lacking skip patterns and item validation, often resulting in respondent errors and item nonresponse.

New Fiscal data plan – will automatically skip items that the respondent does not need to answer based on previous responses. Includes item validation for required items.

- R1A Property Tax (1110): These are "ad valorem" taxes levied by an LEA on the assessed value of real property (e.g., dwellings and commercial property) and personal property (e.g., automobiles, boats) located within the LEA. However, penalties and interest are reported under non-property tax (R1B) below. DO NOT report property taxes that go to dependent school districts here; report them in NPEFS item code (R1C) Other Local Government Units Property Tax. State education agencies should instruct LEAs filing comprehensive annual financial reports (CAFRs) to include property taxes billed within the school year and collected within 60 days of the close of the school year.

DO NOT include non-property taxes that go to dependent school districts; report them in (R1D).

A14A - ADA as defined by state law: When state laws or regulations define ADA or provide methods for calculating ADA, those definitions and methods must be used to report ADA in the NPEFS Survey. Survey respondents should become familiar with the laws and regulations regarding ADA in their states – as well as with instructions or rulings on ADA by the attorneys general of their states. Federal law requires states to report ADA exactly as mandated by their laws and regulations even if state requirements differ from those of NCES regarding attendance for remote learning, summer school attendance, partial-day attendance, excused absences, and other issues.

States should ensure that attendance was collected for each day that the school was in session, whether the instruction was inperson, remote, hybrid, virtual synchronous, or asynchronous. States should also maintain appropriate records of student attendance and identify in the fiscal data plan any student groups or dates that are excluded from the calculation. In light of the unique challenges caused by the national emergency related to the coronavirus disease 2019 (COVID-19) pandemic and in order to collect the most consistent and measurable data possible, states may instead choose to report under the Federal ADA definition for SY 2020-2021.

A14B - ADA as defined by NCES: NCES requests that states with no laws or regulations governing the determination of average daily attendance use the NCES definition of ADA: (i) the aggregate number of days of attendance of all students during a school year, divided by (ii) the number of days school is in session during that year [20 U.S.C. §7801(1)]. This definition requires every school or school district in a state to collect attendance every day it is in session and to record the number of days it is in session. The aggregate number of days of student attendance for each school or school district is divided by the number of days each school or school district is in session. To calculate the state total, add the figures for every school or school district in the state.

In light of the unique challenges caused by the national emergency related to the coronavirus disease 2019 (COVID-19) pandemic and in order to collect the most consistent and measurable data possible, states that have a temporary inability to report attendance may include in ADA data reporting those days for which attendance was collected preceding and subsequent to the interruption. States have the flexibility to report even if they are unable to report remote learning days from all schools or LEAs. States should ensure that attendance was collected for each day that the school was in session, whether the instruction was in-person, remote, hybrid, virtual synchronous, or asynchronous. States should also maintain appropriate records of student attendance and identify in the fiscal data plan any student groups or dates that are excluded from the calculation.

PPE15 - STATE PER PUPIL EXPENDITURE: SPPE is a key component in the formula for allocating Title I and other federal funds to states and school districts. The Title I amount and the details of the SPPE calculation are carefully scrutinized by the U.S. Department of Education and the U.S. Congress. This careful scrutiny includes routine audits by the U.S. Department of Education's Inspector General. For purposes of calculating SPPE, expenditures (including carryover) from certain federal grants as well as fees and other revenue from individuals must be subtracted from Current Expenditures. Federal law requires NCES to use net expenditures (expenditures minus exclusions) when calculating a per pupil expenditure for allocating federal

- grants to states. SPPE (PPE15) is calculated by dividing Net Current Expenditures (NCE13) by Average Daily Attendance (A14A or A14B).
