Overview

This document provides information to Issuers and servicers about Ginnie Mae's requirements for monthly pool and loan level reporting. Its focus is specifically on "post origination and settlement" pool (and loan package) and loan-level Single-Family and Multifamily reporting.

Other Documentation Required

1. Monthly Reporting Certification –RSA Token For each monthly reporting period, each Issuer is required to certify the monthly pool and loan data reported to Ginnie Mae. This certification must be completed using the Monthly Reporting Certification screen located within RFS, and an RSA Token (See Chapter 4 and Chapter 17 of the MBS Guide).
2. MyGinnieMae and Ginnie Mae Enterprise Portal (GMEP) documentation and Registration forms. See Appendix III-29 of the MBS Guide.

RFS Pool Accounting Exception Feedback (PA-EF) User Guide

Additional information for correct monthly loan and pool processing can be found in the RFS PA-EF User Guide. Section 4 of the User Guide includes definitions for Exception Feedback Severity Levels and RFS Issuer Submission Options.

Record Layout Structure

Ginnie Mae RFS accepts six upload record formats. These upload files are used by Issuers for their monthly pool administration reporting to Ginnie Mae. These six types of records may be included for monthly loan and pool reporting:

- H – Header Issuer Record
This mandatory record is a control record. This record is always present in the submission file.
- P – Pool Record
This record contains data elements related to the Ginnie Mae pool, including the Security RPB; one record reports on one pool. A file would typically have one pool record for each pool reported by the Issuer. It is not mandatory that a submission file always have Pool Records.
- L – Loan Record
This loan-level record contains data elements related to the loans associated with the pool records (one record for each loan). A file would have one loan record for each loan reported by the Issuer. It is not mandatory that a submission file always have Loan Records.
- S – Sensitive Loan Record
This loan level record contains "static" information and personally identifiable information (PII). It is only reported if there is a change to the data or if there is a

reporting exception message that requires correction of the data. A file would typically have relatively few or no Sensitive Loan Records.

- V – Various Loan Record
This loan record contains various other “static” information related to the loan. It is only reported if there is a change to the data that was initially submitted or if there is a reporting exception message that requires correction of the data. Selected fields in this record are controlled fields. A file typically would have relatively few or no Various Loan Records.
- T – Trailer Issuer Record
This mandatory record is a control record. This record is always present in the submission file. This record contains summarization numbers from other records. This record also contains a flag to indicate that the Issuer’s submission of data is complete.

All submission files must have a header record, trailer record and some number of individual records depending on the Issuer data for that particular submission. Typically, a single submission file would contain a header, all of the individual records as applicable for the reporting period, and a trailer record. For follow-up submissions and corrections, the submission file may have a header, any combination of detail records, and a trailer. Multiple files can be submitted during the reporting period.

Multiple Issuer data can be submitted in a single submission. In this case, the submission file must have a header, detail records, and trailer for each different Issuer’s data. The submission file would have multiple sets of headers, detail records, and trailers for the number of Issuers whose data is being reported.

File Naming Convention

The file naming convention for a submission file that contains data for only one Issuer ID is as follows:

rfsyyyymmss.iiii where:

- “rfs” is constant
- “yyyymm” is the reporting year/month
- “ss” is a file sequence number; the default value is 01; if needed this number should be incremented by one for every subsequent file submitted during the same reporting period. (For example, if an Issuer submits four files during a given reporting period, the valid formats would be rfsyyyymm01.iiii, rfsyyyymm02.iiii, rfsyyyymm03.iiii, and rfsyyyymm04.iiii).
- “iiii” is the Issuer ID # for the Issuer

Additionally, the file naming convention for a submission file that contains data for more than one Issuer ID is:

rfsyyyymmss.iiim where:

- “iiii” is the Issuer ID # for any of the Issuers represented in the file.
(For example, if a single submission file contains data for Issuer with Issuer ID#'s 9997, 9998, and 9999, the valid formats would be any of the following:
rfsyyyymmss.9997m, rfsyyyymmss.9998m, or rfsyyyymmss.9999m).
- “m” is constant.

For each submission file received, a functional acknowledgement file is produced to provide the Issuer feedback on the status of the submission file. The functional acknowledgement file naming convention is:

fayyyymmss.9999 where:

- fa is constant
- yyyymm is the reporting period
- ss is the file sequence number
- 9999 is the Issuer ID #

A sample Issuer Monthly Report and the set of file failure conditions and instructions for proper record processing are listed at the end of this appendix.

RFS Exception Severity Level Definitions

The table below explains the severity levels and correction timeframes for resolving monthly reporting exceptions in RFS. See MBS Guide Chapter 17 for additional information.

Severity Level	Correction Timeframe	Severity Description
E	<p>Corrections to Pool and Loan Records as applicable; corrections on these exceptions are due no later than the 4th business day.</p> <p>Corrections to Various and Sensitive record exceptions are due no later than the 10th business day.</p>	Record cannot be processed – Exceptions must be addressed in order to complete monthly reporting; resubmit data as applicable to the particular RFS message. Exceptions can occur on any Pool, Loan, Sensitive, or Various records.
C	Corrections must be addressed by the 4 th business day. The severity level, “C”, is only associated with Pool and Loan reporting.	Generally, these are exceptions related to remittance and/or disclosure data. These only occur on data related to Pool reporting and/or Loan reporting.
H	Corrections should be addressed by the 10 th business day.	Exceptions related to Pool reporting and/or Loan reporting data.
M	Corrections should be addressed by the 10 th business day.	Single-Family Loan Matching and/or Suspense; corrections may require research, and therefore corrections could be made in the following reporting period.
L	Corrections should be addressed by the 10 th business day.	Exceptions can occur on any reporting of Pool, Loan, Sensitive, or Various records.

RFS Record Layout Formats

Each file layout is followed by the definitions of each field in the record layout. The definitions are numbered to correspond to the file layout. The definitions are followed by Exception Messages that may occur if business rules are not observed. Italicized Exception Messages result from inconsistencies between pool- and loan-level reporting. These exceptions may occur when the loans are summarized to the pool-level. The Ginnie Mae Investor Reporting Manual provides additional information related to RFS monthly reporting.

Unless otherwise noted in the “Remarks” column, fill character fields to the right with spaces and fill numeric fields to the left with leading spaces or zeroes. Decimal points are part of the field lengths – include decimal points for dollar amounts, interest and other rates. Use a leading hyphen or dash “-” to indicate negative numbers. Fields designated as signed in the record layout require a “+”, “-”, or “space” as the first character. The symbols “+”, “-”, and “space” are the only valid values; a space in a signed field implies positive. Only fields designated as signed fields in the layout allow a “+”, “-”, or “space” in the first character; non-signed fields must not be reported with a “-” in the first character of the field.

Loan Record Reporting Instructions

Note: Reporting Loans in the loan record: In RFS there is no separate reporting record for liquidations. The loan record is used to report one of two scenarios: a.) active loans or b.) active loans that are being liquidated in the current period. Do not report inactive loans from prior periods.

Instructions for reporting active Single-Family loans:

- Report data in fields 1 through 23, field 29, and fields 30 through 36.
- Report data in fields 30 through 32, when they become available on the issuer's servicing system, for the loan.
- Report data in fields 37 through 39 for adjustable loans when they become available on the issuer's servicing system, for the loan. Report all 3 fields in the same reporting period.
- RFS assumes that the loan record represents an active loan as of the end of the reporting period.

Instructions for reporting active Multifamily loans:

- Report data in fields 1 through 23.
- Report data in fields 30 through 32, except for CL/CS loans.
- Report data for fields 33, 34 and 36.
- RFS assumes that the loan record represents an active loan as of the end of the reporting period.

Instructions for reporting active Single-Family loans that are being liquidated in the current period:

- Report data in fields 1 through 29.
- Report data in fields 30 through 32, and fields 33 through 36 as applicable.
- Issuer must report a value in Field 25 - Removal Reason Code. This indicates to RFS that the Issuer is reporting a loan that is being liquidated.

- In Field 23 - Loan UPB, report the amount of the principal balance remaining on the loan after application of the last installment received from the mortgagor prior to the liquidation. Do not report zero unless the actual UPB is zero.

Instructions for reporting active **Multifamily** loans that are being **liquidated** in the current period:

- Report data in fields 1 through 28.
- Issuer must report a value in Field 25 - Removal Reason Code. This indicates to RFS that the Issuer is reporting a loan that is being liquidated. Reason code 7 is not applicable for Multifamily loans.
- Report data in fields 30 through 32, except for CL/CS loans.

30. Scheduled UPB: The dollar amount of the current Unpaid Principal Balance of the loan amortized through the month following the current reporting period. The calculated scheduled (per the amortization schedule) unpaid principal balance of the mortgage as of the end of the reporting period. For a current loan the Scheduled UPB is generally equal to the actual principal balance of the mortgage amortized one month beyond the report period.. Prepaid or delinquent loans must be “normalized/amortized” to the Scheduled UPB (to the current period and then amortized one month beyond the report period. The balance can be zero, but not negative. The Scheduled UPB is a calculated amount, by the issuer, for reporting to RFS.

The Scheduled UPB calculations will differ depending on the last installment paid date reported in Field 12 of the Loan Record. Field 12 is to be used to determine the loan status:

- The loan is current, if Field 12 equals the Report Period
- The loan is delinquent if Field 12 is less than the Report Period, or
- The loan is prepaid (paid ahead) if Field 12 is greater than the Report Period

In the calculation sections below the term “UPB” (unpaid principal balance) is used to refer the principal balance of the loan. The calculations are intended to be functional and represent a guide for issuers/servicers. However, it is understood that issuers/servicers may have their own formulas that calculate the same result. It is the issuer/servicer responsibility to report the correct Schedule UPB for the loan.

Rounding Considerations in Calculating Scheduled UPB, Scheduled Monthly Principal Amount, or Scheduled Monthly Interest Amount

The output of the calculation of Scheduled UPB is dollars and cents; and the same for Scheduled Monthly Principal Amount or Scheduled Monthly Interest Amount—always dollars and cents. For dollar and cents rounding; look to the “thousandths decimal place”. If the number is 5 or more round up; if less than 5 round down. Issuers/servicers control their own specific formulas and intermediate calculations, if any, depending on their particular platform/servicing system. If the issuer needs to specify/configure a rounding rule or is using “factors” in the calculation; for such calculations carry the “rate” out to 8 decimal places. Issuers are responsible for their own servicing platforms and the calculations therein. It is the issuer’s responsibility to implement formulas to meet the requirements of this Appendix VI-19.

Two guiding rules for the Scheduled Monthly Principal Amount and Scheduled Monthly Interest Amount and Scheduled UPB Calculation are:

Scheduled Monthly Principal Amount (Field 31) + Scheduled Monthly Interest Amount (Field 32) = FIC (monthly P&I constant) Field 11

For Current Loan the Closing (Actual) UPB - Scheduled Monthly Principal Amount = Scheduled UPB

Calculation of the Scheduled UPB uses the monthly FIC (Field 11 of the Loan Record) also referred to as P&I constant. The calculations below are intended to be functional statements, as there are multiple formulas that can be used to arrive at the same result. It is up to the issuer/servicer to implement their specific formula.

IF THE LOAN IS **CURRENT** WHERE FIELD 12 EQUALS THE REPORT PERIOD CALCULATE THE SCHEDULED UPB:

1. (Current Actual UPB x Note Rate) divided by 12 = Interest Amount (gross interest amount)
2. FIC – Interest Amount = Principal Amount
3. Current Actual UPB (same amount used in step 1) – Principal Amount calculated in Step 2 = Scheduled UPB. This in effect amortizes one month beyond the Report Period

IF THE LOAN IS **DELINQUENT** WHERE FIELD 12 IS LESS THAN THE REPORT PERIOD CALCULATE THE SCHEDULED UPB:

1. Follow Step 1 above for each monthly installment delinquent. Bring the UPB to current (calculated UPB as of the Report Period)
2. Calculate the additional month using the formula above to amortize to one month beyond the Report Period

IF THE LOAN IS **PREPAID ONE MONTH** (PAID AHEAD) WHERE FIELD 12 IS ONE MONTH GREATER THAN REPORT PERIOD CALCULATE THE SCHEDULED UPB

1. No calculation necessary as the Scheduled UPB is the same as the actual UPB

IF THE LOAN IS **PREPAID MORE THAN ONE MONTH** (PAID AHEAD) WHERE FIELD 12 IS TWO OR MORE MONTHS GREATER THAN REPORT PERIOD CALCULATE THE SCHEDULED UPB

1. Follow Step 1 for a current loan but in the reverse order to amortized the loan UPB back to the month that is Report Period + One Month
2. Result is the Scheduled UPB

Exception Messages

- C-LOAN800 Scheduled UPB should be specified.
- E-LOAN801 Scheduled UPB must be numeric.
- E-LOAN802 Scheduled UPB must include a decimal point.
- H-LOAN803 Scheduled UPB should not be specified for CL/CS loans.
- C-LOAN804 Scheduled UPB should be greater than zero for unliquidated loans
- C-LOAN805 Scheduled UPB is not consistent with prior period Scheduled UPB and current period Scheduled Monthly Principal Amount.
- C-LOAN806 Scheduled UPB should be within tolerance of a calculated value based on prior period Scheduled UPB, Loan Interest Rate and Loan FIC for fixed rate loans.
- H-LOAN807 Scheduled UPB should be less than prior period Scheduled UPB.
- H-LOAN808 Scheduled UPB should be less than the Initial Loan UPB.

31. Scheduled Monthly Principal Amount: The calculated scheduled (per the amortization schedule) monthly principal amount for the mortgage as of the end of the reporting period. The Scheduled Monthly Principal Amount is equal to the principal due on the scheduled payment due on the mortgage amortized one month beyond the report period for a current loan. Prepaid or delinquent loans must be “normalized/amortized” to the Scheduled Monthly Principal Amount (to the current period and then amortized one month beyond the report period (consistent with Field 30 Scheduled UPB calculations)). The Scheduled Monthly Principal Amount is a calculated amount, by the issuer, for reporting to RFS. However, the Scheduled Monthly Principal Amount cannot be zero or negative. Do not use this field to reflect adjustments of any kind as this field is the principal component of Field 11 FIC (P&I constant).

Scheduled Monthly Principal Amount is calculated as follows: subtract the current month's scheduled UPB from the prior month's scheduled UPB.

Exception Messages

- C-LOAN810 Scheduled Monthly Principal Amount should be specified.
- E-LOAN811 Scheduled Monthly Principal Amount must be numeric.
- E-LOAN812 Scheduled Monthly Principal Amount must include a decimal point.
- H-LOAN813 Scheduled Monthly Principal Amount should not be specified for CL/CS loans.
- C-LOAN814 Scheduled Monthly Principal Amount should be greater than zero.
- C-LOAN815 Scheduled Monthly Principal Amount should be within tolerance of a calculated value based on Prior Scheduled UPB, Loan Interest Rate and Loan FIC for fixed rate loans.
- H-LOAN816 Scheduled Monthly Principal Amount should be greater than the prior period Scheduled Monthly Principal Amount.
- H-LOAN817 Scheduled Monthly Principal Amount plus Scheduled Monthly Interest Amount should equal the Loan FIC.

32. Scheduled Monthly Interest Amount: The calculated scheduled (per the amortization schedule) monthly interest amount for the mortgage as of the end of the reporting period. The Scheduled Monthly Interest Amount is generally equal to the interest due on the scheduled payment due on the mortgage amortized to one month beyond the report period for a current loan. Prepaid or delinquent loans must be “normalized/amortized” to the Scheduled Monthly Interest Amount (to the current period and then amortized one month beyond the report period (consistent with Field 30 Scheduled UPB calculations)). The Scheduled Monthly Interest Amount is a calculated amount, by the issuer, for reporting to RFS. However, the Scheduled Monthly Interest Amount cannot be zero or negative. Do not use this field to reflect adjustments of any kind as this field is the principal component of Field 11 FIC (P&I constant).

Scheduled Monthly Interest Amount is calculated as follows: $(\text{Prior Month's Scheduled UPB} \times \text{Note Rate}) \div 12$ gives the Scheduled Monthly Interest Amount.

33. Gross Service Fee Amount Collected: The dollar amount of servicing fee collected on the mortgage, for the report period. A dollar amount field, must be greater than zero (otherwise spaces or zeros per existing RFS instructions).

The gross service fee collected is based on actual collections of installment interest in the report period (as reported in Field 18 Installment Interest). It is the proportion of installment interest that the issuer takes as gross service fee (includes the Guaranty Fee).

Gross Service Fee Collected is calculated as follows: $\text{Installment Interest Collected (Field 18)} * (\text{"service fee rate"} / \text{"pool rate"}) = \text{Gross Service Fee Collected}$.

Do not repeat reporting each month, report only in the month that the ARM adjustment information becomes available. Report the ARM Adjustment Fields in the report period in which they become available in the issuer's servicing system. Otherwise report blank in these fields. (If there is a need to "correct" the fields, the standard RFS approach applies—report another "L" record and that replaces what was reported previously.)

Monthly Reporting Certification

After the Issuer's Monthly Reporting is complete, including corrections, the Issuer is required to complete and submit a Monthly Reporting Certification. This is accomplished by first reviewing the status of the Issuer's reporting to RFS via the Issuer Summary Screen. The Issuer will click on the Monthly Certification link displayed on the screen to complete and save a Monthly Reporting Certification for the reporting period. This requires an RSA token holder/user. Saving the Monthly Reporting Certification indicates that the Issuer agrees that the information displayed on the Issuer Summary screen is complete and accurate. See Chapter 17 of the MBS Guide.

For additional instructions, download the RFS Pool Accounting/Exception Feedback User Guide. Select **User Guide** from the top menu of the Exception Feedback module in RFS.

Considerations for Issuer Monthly Reporting via Data Files

- (1) A file may contain data from multiple Issuers.
- (2) All Pool, Loan, Sensitive, and Various records are associated with the Issuer identified in the Header record that precedes them and the Trailer record that follows them.
- (3) Pool, Loan, Sensitive and Various records can be in any order within the Header and Trailer records. For example, if an Issuer has 100 Pool records, 1000 Loan records, 500 Sensitive records, and 200 Various records to submit, those 1800 records can be in any order within the file's Header and Trailer records.
- (4) The entire file will be rejected if it fails any of the following:
 - Must pass an Anti-virus check
 - The file name is not valid.
 - “YYYYMM” does not match the current reporting period.
 - “SS” is not a file sequence number.
 - “III” is not a valid active Issuer id number.
 - “m” suffix is used for files that do not contain multiple Issuers.
 - The file content is not in ASCII format.
 - The first character in each record is not H, L, P, S, T, or V.
 - No Header record exists.
 - The Issuer ID in the Header record does not match the file name suffix (except m type suffixes).
 - The Reporting Period in the Header record does not match the current Reporting Period.
 - Record lengths are not consistent with the record type.
 - H record length is not 11 characters.
 - L record length is not between 294 and 388 characters for Single Family loans.
 - L record length is not between 294 and 360 characters for Multifamily loans.
 - P record length is not between 196 and 255 characters.
 - S record length is not between 141 and 401 characters.
 - V record length is not between 11 and 135 characters.
 - T record length is not 39 characters.
 - No Trailer record exists.
 - The Issuer ID in the Trailer record does not match the Issuer ID in the Header record.
 - The Reporting Period in the Trailer record does not match the current reporting period.
 - The Trailer record Pool Count does not match the actual number of “P” records.
 - The Trailer record Loan Count does not match the actual number of “L” records.
 - The Trailer record Sensitive Count does not match the actual number of “S” records.
 - The Trailer record Various Count does not match the actual number of “V” records.
- (5) The following must be adhered to in order to ensure proper processing:
 - Pad character fields with trailing spaces.

- Spaces or zeroes (with the properly placed decimal point) must be used for unreported numeric fields.
- Numeric fields must be padded with spaces or zeroes to the left of the value.
- A leading space in a signed field indicates a positive value.
- A leading space or “+” or “-” must be present when padding signed fields with zeroes.
- Dates are formatted month day year - MMDDYYYY.

(6) Should an Issuer not be ready to provide values for the fields added to the Loan and Various records upon implementation of the revised VI-19 reporting specification, they can still submit Loan and Various records with the previous length and format during a transition period. The system will process/edit the provided records accordingly.

For example, if a Loan record is provided that is comprised of only 294 characters, the system will not edit or provide exceptions for Fields 30 – 39. Similarly, if a Various record is provided that is only 125 characters long, the system will not edit or provide exceptions for Fields 26 and 27.
