## **Outline Specification**

## U.S. Department of Housing and Urban Development Office of Public and Indian Housing

OMB Approval No. 2577-0157 (Exp. 3/31/2020)

Public reporting burden for this collection of information is estimated to average 3 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. HUD may not conduct or sponsor, and you are not required to respond to a collection of information unless it displays a currently valid OMB control number. This information is collected under the authority of Section 6(c) of the U.S. Housing Act of I937. Housing Agencies (HAs) contract with architects to prepare outline specifications to establish quality and kind of materials and equipment for projects being developed, or proposed to be developed under the Low-Income Housing Program. HUD and the HA will use the information to determine that specified items comply with code and HUD standards and are appropriate in the project. The information will also serve as a basis for reaching all major decisions as to materials and methods of construction, finish, equipment, for making the estimated project construction cost Responses to the collection of information are required to obtain a benefit The information requested does not lend itself to confidentiality.

Local Authority or Developer:	Project Number:	,

Instructions: Describe all materials and equipment to be used. Include no alternate sheets if necessary to completely describe the work. The Cost Estimate will recog Certain parts of the work cannot be put in their proper classification until more inforn categories below, the following: main service and other stairs, treads, risers, handr between apartments and public spaces, utility conduits and tunnels, waterproofing an and accessory buildings; and off-site improvements required to serve the project suc	nize quality products and materials in en nation about their materials and construc- ails, balusters, etc.; sound insulation of and draining, utilities, and related insulation	xcess of acceptable minimums, when specified. tion is known; therefore describe, under suitable partitions and floors separating apartments and n; retaining walls; garages
1. General Requirements		
2. Site Work		
Type of Soil	Bearing Capacity	
ALL COLORS		
Material and thickness of fill and base course.		
Demolition: Construction of structures to be demolished and materials to be reused.		
Storm Drainage: Culverts, pipes, manholes, catch basins, downspout connection (dry we	ell, splash blocks, storm sewer).	
Site Preparation: Tree protection, surgery, wells, walls, topsoil stripping, clearing, grubb	ing, and rough grading.	
Curbs and Gutters: Type and material.		
Pavement: Material and thickness of base and wearing surface for drives, parking areas	streets allevs courts walks drying vards	and play areas. Steps, handrails, checkwalls
r avoing it. Matchai and thickness of base and wearing surface for drives, parking areas	, streets, alleys, courts, walks, drying yards	and play areas. Stops, Handrails, Shookwalls.
Equipment for Special Areas and Enclosures: Play equipment, benches, fences.		
— <del></del>		
Finish Grading: Approximate existing depth and method of improving topsoil. Extent of fin	nish grading.	
Lawns and Planting: Type, size, quantity and location of lawn seeded or sodded; ground	cover and hedge material, trees, shrubs, e	etc.

Concrete strength for external having reinforcing steel on	rior walls below and above grade, interior walls and partitions, piers, footings, column drawings. Location, size and material of footing drains and outlets.	s and girders. Size, thickness and location on drawings. Note portions
Structural system of concretype of construction is used	ete floors at basement, other floors and roof. Thickness of slabs and strength of cond d, list separately and state locations.	crete. Attached exterior concrete steps and porches. If more than one
Slab Perimeter Insulation:		
4. Masonry  Material and thickness of ex	xterior walls above and below grade, interior walls and partitions, fire walls, stair, hall and	elevator enclosures, chimneys, incinerators, veneer, sills, copings, etc.
5. Metals  Miscellaneous Iron	Material	Size
Access Doors	Waterial	Size
Area Gratings		
Lintels		
Fire Escapes		
Foundation Vents		
Structural Steels (Framing)	ar atwest wal avestors used \	
Structural Steel: (Framing	or structural system used.)	
6. Carpentry		
	of lumber to be used for floor, roof, exterior walls above grade and interior partition froestos siding, etc.).	aming, subfloor, sheathing, underlayment and exterior finish materials
Grade and species for inte	rior and exterior finish woodwork.	

3. Concrete

Thermal Insulation	Thickness	R-value & Type of Material	Method of Installation
Exterior Walls	THICKHESS	n-value a Type of Material	Method of Installation
Laterior Walls			
Ceiling Below Roof			
Roof			
Other			
Roofing: Roof covering materia	ls and method of application, weig	nt of shingles, numbers of felt plies, bitumen, etc.	
Sheet Metal: Material and weig	ht or gauge for flashings, copings,	gutters and downspouts, roof ventilators, scuppers, e	etc.
Caulking: (Materials and Location	ons)		
8. Doors, Windows and 0			
Windows and Frames: Type an	d Material. Special construction fea	atures or protective treatment.	
Glazing: Thickness, strength ar	nd grade of glass and method of gl	azing.	
Metal Curtain Walls:			
Doors and Frames: Exterior: Thickness, material ar	d type at all locations.		
Interior: Thickness, material an	d type for public halls and stairs, a	partments (entrance and interior), boiler rooms, fire de	oors and doors at other locations.
Finish Hardware: Material and	finish of exterior and interior lockse	ts, sliding and folding door hardware, window and ca	binet hardware, door closers, door knockers, numbers, etc.

Materials and method of waterproofing walls and slabs below grade, location, thickness or number of plies. Type of permanent protection of waterproofing (parging) if used. Method of dampproofing above grade. Flashing materials if other than sheet metal. Spandrel waterproofing.

7. Moisture Protection

Heating Load	Domestic Hot Water Load	Total	
Equipment: (Make & Model)			
Input (per hr.): Coal (lbs.)	Oil (gals.)	Gas (BTUH)	
Output (BTUH)			
Distribution System:			
Insulation: Type and thickness of insulation on heating equipment and distribution system			
Room Heating Units: Baseboard units, radiators, convectors, registers, etc.			
Solar Energy: Application	System		
Subsystem			
System Capacity			

15. Mechanical (Cont.)
Space Heaters: Type, make, model, location and output of heating systems such as wall heaters, floor furnaces and unit heaters.
Temperature Controls: Individual unit, zone, central, etc.
Ventilation: Location, capacity and purpose of ventilating fans.
Air Conditioning Unitary Equipment (Self Contained or packaged units.)
Calculated Load:
Equipment: Make, model, operating voltage and capacity in BTUH for each size serving individual rooms, apartment units, or zone.
Central System:
Calculated Load:
Equipment (Make, model capacity, etc., of compressor, cooling tower, water chillers, air handling equipment, and other components which make up the complete system.)
Utilities On-Site: Material for distribution system for all piped utilities.
Water Supply: Fire hydrants, yard hydrants, lawn sprinkler systems, exterior drinking fountains.
Gas:
Sanitary Sewerage: Treatment plants, pumping stations, manholes.
16. Electrical
Electrical Wiring: Type of wiring and load centers, number of circuits per unit, individual unit metering or project metering, spare conduit for future load requirements, radio or TV antenna systems. Show receptacles, light outlets, switches, power outlets, telephone outlets, door bells, fire alarm systems, etc., or drawings.
Electric Fixtures: Type for various locations.

16. Electrical (Cont.)
Electric light standards for lighting grounds, streets, courts, etc. Underground or overhead service.
All items of construction, equipment and finish, together with all incidentals, which are essential to the completion of the project will be provided whether or not specifically included in the exhibits and will be of a type, quality and capacity acceptable to HUD and appropriate to the character of the project.
