

Instructions for Completing Station Roster List

The purpose of this form is to provide information about each active volunteer station. Effort to provide complete and accurate data. "Active volunteer station" refers to a station project that has a current Memorandum of Understanding (MOU). It does not necessarily mean that all volunteers are currently placed at the station.

For each header item with a small red triangle in the upper right corner of the cell: if you hover over the cell and wait a few seconds ("hover"), a "pop-up" comment box, with further information, will appear.

Note that the spreadsheet will "scroll" up and down, leaving the column names and station names visible at all times.

Please do not change the location of each data item (e.g., moving cells and columns or removing cells or columns), as this standardized form will be combined with others from other stations to form a uniform database.

The formatting of the document is fixed, except for the ability to change the width of the columns and the height of the rows. This may make for easier entry of information, but makes printing the document somewhat unwieldy.

Please only submit this form as an Excel file. Do not change it to a PDF.

After completion of this list, please submit it as instructed in the Grant Application Instructions.

Please continue to keep your station roster contact information accurate, as you will be required to submit an updated list each year.

****Note:** Senior Corps will work with vendors of volunteer management software to provide the new format of this new volunteer station roster. The vendors may incorporate the ability to do a direct transfer of the data directly from your database to this Excel format.
