Pease Study Blood Draw and Urine Collection Form

Form Approved OMB No. 0923-XXXX Exp. Date xx/xx/201x

ATSDR estimates the average public reporting burden for this collection of information as 10 minutes per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB Control Number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0923-xxxx).

☐ Unable to collect			
9a. Date: _ / _ 9b. Time: : _			
9c. Code Partial/Inability to Collect (circle one)			
Reason for partial or inability to collect blood:			
 Pregnant Medical (e.g. patient frail, weak, lost consciousness) Refused Other (describe) 			
10. Interviewer/Phlebotomy Comment:			

NOTES: Care should be used in drawing blood from all subjects. Common adverse effects include bruising, bleeding, and fainting. Please ask all participants whether they prefer to lie down to have blood drawn.

Ask everyone if they tend to faint when giving blood. Suggest they sit down for five minutes after giving blood.

Fasting diabetic participants who use insulin will be given priority appointments for their blood draw.

Light snacks will be provided following blood collection.

See Protocol Attachment 14 (Manual of Operations) for further details on collecting blood samples.
