Administration for Children and Families  
Office of Community Services (OCS)**

**Instructions for Completion of the Quarterly Performance and Management  
Report  
for the Low Income Household Water Assistance Program (LIHWAP)**

---

**The Paperwork Reduction Act of 1995**

This information collection (OMB Control No. **xxxx-xxxx**; Expiration Date: **mm/dd/yyyy**) is conducted in accordance with the Low Income Household Water Assistance Program (LIHWAP) statute (Public Law 116-260). Information received from this collection provides data to the Administration and Congress in its oversight of recipients' performance in administering the LIHWAP program.

Public reporting burden for this information collection (the *LIHWAP Quarterly Performance and Management Report*) is estimated to be an average burden of 52 hours per respondent. The estimates include the time for reviewing instructions, and gathering, editing, maintaining, and reporting the data.

The responses to this information collection are required in order to obtain LIHWAP data in accordance with the [LIHWAP Terms and Conditions](#). This information collection is required of all recipients that receive LIHWAP funds.

This information is not considered confidential; therefore, no additional safeguards are considered necessary beyond what is customarily applied to routine government information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

LIHWAP data is submitted through the *LIHWAP Quarterly Performance and Management Report* reporting form. The complete set of instructions for reporting the required data is available in the next section of this document.

## OVERVIEW

The LIHWAP Quarterly Performance and Management Report is a tool for HHS to learn about the implementation of LIHWAP, including successes, challenges, needs, and innovations, in somewhat real time. The quarterly reports will focus on services provided to households during the reporting period, connections with water vendors, achievements, challenges, and training and technical assistance needs.

LIHWAP Laws and Regulations and the LIHWAP Terms and Conditions are available on the following web links:

### **LIHWAP Laws and Regulations**

<https://www.acf.hhs.gov/ocs/law-regulation/lihwap-laws-and-regulations>

### **LIHWAP Terms and Conditions**

[https://www.acf.hhs.gov/sites/default/files/documents/ocs/Attachment%20A\\_LIHWAP%20Terms%20and%20Conditions\\_State%20Signature%20Block.pdf](https://www.acf.hhs.gov/sites/default/files/documents/ocs/Attachment%20A_LIHWAP%20Terms%20and%20Conditions_State%20Signature%20Block.pdf)

On May 8, 2020, HHS notified recipients that 98.5 percent of the available LIHWAP funding will be released to recipients, and published a [Dear Colleague Letter \(DCL\) 2021-05 LIHWAP Funding Release](#). The DCL notified recipients that LIHWAP recipients must track, account for, and report on, the LIHWAP Consolidated Appropriations Act funding separate from the American Rescue Plan Act of 2021 funding.

## GENERAL INSTRUCTIONS

An Excel workbook entitled the *LIHWAP Quarterly Performance and Management Report* has been developed for states, territories, and tribes to report LIHWAP data for all four quarters. Recipients are required to submit their quarterly data submissions using the Excel workbook.

**Reporting Periods and Quarterly Report Due Dates** - The *LIHWAP Quarterly Performance and Management Report* will be due one month after the end of each quarter (quarters are based on the federal fiscal year).

FY 2022 (October 1, 2021 – September 30, 2022) reporting periods:

Quarter 1: Implementation – December 31, 2021 (**Report due on January 31, 2022**)

Quarter 2: January 1, 2022 – March 31, 2022 (**Report due on April 29, 2022**)

Quarter 3: April 1, 2022 – June 30, 2022 (**Report due on July 29, 2022**)

Quarter 4: July 1, 2022 – September 30, 2022 (**Report due on October 31, 2022**)

**Data Consistency** - The data will be checked for consistency against the type of LIHWAP assistance that recipients report in their *LIHWAP Model Plan*, and with the data reported in each recipient's *LIHWAP Annual Report*.

### **Key Definitions**

**Arrearage and Rate Reduction** - For the purposes of LIHWAP, an *arrearage* refers to an unpaid past due bill for household drinking water and/or wastewater utility services while *rate reduction* refers to a full or partial payment of a currently due bill charged to a household for drinking water or wastewater services. Both payments may include payments of standard reconnection fees, charges, and penalties. However, these fees should be standard fees consistent with the existing and ongoing business practices of the water utility (rather than a special fee charged to LIHWAP households). Recipients have discretion in determining whether these costs are included in the maximum benefit level or are in addition to the maximum benefit level.

**Household** - The unit for LIHWAP counting is the household, not the head of household or persons in the households. LIHWAP defines the term "household" as "any individual or group of individuals who are living together as one economic unit for whom residential drinking water and/or wastewater services are customarily purchased in common or who make undesignated payments for those services in the form of

rent.” Household members are those individuals who comprise the household unit.

*Recipient* - A Recipient is defined as the LIHWAP lead agency for a state, territory, or tribe. Recipient is synonymous with grantee, a term used previously in OCS communications.

*Subrecipient* - A Subrecipient is an organization that receives a portion, or sub-award, of the LIHWAP grant funding (usually through a contract or grant) from the LIHWAP lead agency for a state, territory, or tribe. While the LIHWAP lead agency retains responsibility and accountability for all activities carried out under the grant award, the state, territory, or tribe may select sub-recipient organizations to serve as local administering agencies who are subject to all terms and conditions of the award.

*Unduplicated Household Counts* - Recipients are required to report “unduplicated counts” of LIHWAP assisted households for each type of LIHWAP assistance provided each quarter. Unduplicated counts mean that households are only counted once for each specific data variable.

## SECTION-BY-SECTION INSTRUCTIONS

**Recipient Information** – Include all of the information being requested (i.e., name, phone number, and email address) for the individual who is filling out the quarterly data report/the person who should be contacted if OCS has questions concerning the report.

### **Section I: Total Households Assisted**

This question requires the recipient to report the total number of unduplicated households assisted, across all service areas, during the quarter. An assisted household is one that applied for and received LIHWAP assistance. Households that have applied for a LIHWAP benefit but have not received one by the end of the quarter should be counted in the quarter(s) that the household actually receives their benefit(s). An unduplicated count of households means that households are to be counted only once regardless of the types of LIHWAP assistance received. For example, even if a household receives assistance with restoring their services and reducing the rate charged to them, for this particular question, the household would only be counted once.

\*Quarters two, three, and four will include a section for “Total Cumulative Households Assisted,” this number will be automatically calculated based on the information the recipient provided in prior quarterly reports.

### **Section II: Assistance Provided by Service Type**

This section includes three questions that focus on the type of LIHWAP assistance provided to each household by service type. Each question is a two-prong question. For each type of LIHWAP assistance provided, recipients should report the number of households assisted by both the type of assistance provided and the service type (definitions of “type of assistance” and “type of service” are included below). Given that households could have received multiple types of assistance, recipients are required to report unduplicated counts of the number of households assisted by the type of assistance and service received. Households that received multiple types of assistance should be included in the count of households for each relevant assistance type. For example, a household receiving assistance with restoring their water services and reducing the rate charged to them on their water bill is to be counted once under each applicable service (see example below under *Assisted Household Scenarios* for additional directions on how to report unduplicated counts for the types of assistance and the types of services provided).

### **Unduplicated Household Counts**

Unduplicated counts will help us obtain an accurate sense of the reach of household assistance and the specific ways in which households are being served.

Section I asks for an unduplicated count of the total number of households served. In this case each household is only counted once, even if the household received more than one type of LIHWAP service. This count will help OCS quantify the unique number of households reached by LIHWAP.

Section II, on the other hand, asks for an unduplicated count of the number of households assisted **by the type of assistance and service received** (i.e., a household receiving two different LIHWAP services such as assistance with the restoration of services and the reduction of rates charged to the household) should be counted once under each applicable service type in Section II. This information will help us understand how many houses are served for each particular service type and assistance type.

The three main **types of assistance** a household could receive are:

1. Restoration of services – households that were disconnected that received assistance to have drinking water and/or wastewater services restored.
2. Prevention of disconnection of services – households that received assistance that prevented drinking and/ or wastewater services from being disconnected.
3. Reduction of rates charged – households that received assistance to reduce the rates charged to them on their water bill to help ensure affordable drinking water and/or wastewater services.

The three main **types of services** a household could receive are:

1. **Water and/or Wastewater Services** – assistance with only water and/or wastewater services. In these instances, water and wastewater services are itemized on the beneficiaries’ water bill. The majority of households should receive this service.
2. **Multiple Services** – assistance with both water/wastewater services and other non-water services. In these instances, due to the inability to obtain an itemized list of charges on the water bill, households receive assistance with their entire bill, which could include non-water services, in order to restore services or prevent the disconnection of services. This service should be provided in rare circumstances, as recipients should be working with water vendors to ensure they are only paying for water and wastewater related services and fees.
3. **Other Water Services** – assistance with other water services as outlined in the recipient’s grantee implementation plan, which may include limited water delivery services, specialized wastewater disposal services, or an annual tax to the tribe for support services, such as a membership tax. Recipients providing assistance with “other water services” should include a list of these services under the section that states: *If other services were paid for with LIHWAP funds, please explain.*

### Assisted Household Scenarios

Below are five example households to help illustrate how to accurately report unduplicated counts for the types of assistance and the types of services provided to households.

**Household A** received a LIHWAP benefit that both restored the household’s water services and reduced the rate charged on their next water bill. Household A receives water and wastewater services from the same vendor and has an itemized list that clearly shows the bill was only for water/waste water service.

**Household B** received a LIHWAP benefit that prevented the disconnection of their water and wastewater services, as the benefit paid for the household’s water, wastewater, and other non- water related charges that was overdue. Household B receives all of their water services on one bill that has one charge for all water and trash services.

**Household C** applied for a restoration of wastewater services benefit but has not received it yet.

**Household D** received a benefit that both restored the household’s wastewater service and reduced the rate charged on their wastewater bill. The household receives separate bills for water and wastewater services and the cost of each service is clearly stated in the bills.

**Household E** received a benefit that reduced a current bill for water delivery services because there is no other method to access safe drinking water.

**Table 1. Counting Unduplicated Numbers of Assisted Households for Each Type of LIHWAP Assistance, By Service Type**

	<i>Water and/or Wastewater</i>	<i>Multiple Services</i>	<i>Other Water Services</i>
Restoration of Services	Household A, Household D		
Prevention of Disconnection		Household B	
Reduction Rates Charged	Household A, Household D		Household E

In this scenario, there are four total unduplicated households that applied for and received assistance during the quarter (Household C did not receive assistance by the end of the quarter and should not be included in the report until LIHWAP assistance is provided). Therefore, in this scenario, “four” should be the answer to the question in section one on the total number of unduplicated households served. However, for section two of the quarterly report, we are examining unduplicated services by service type, which means that a household needs to be counted once for each type of service the household received. Based on scenarios described above, the answers to questions 1-3, in Section II of the report, would be as follows:

<b>II. Assistance Provided by Service Type</b>			
<b>Type of LIHWAP assistance for households</b>	<b>A. Water or Wastewater</b>	<b>B. Multiple Services</b>	<b>C. Other Water Services</b>
1. Restoration of services	2	0	1
2. Prevention of disconnection of services	0	1	0
3. Reduction of rates charged	2	0	0
<b>*If other services were paid with LIHWAP funds, please explain</b>			
<i>Response: One household received a benefit that paid for emergency water delivery.</i>			

### **Section III: LIHWAP Implementation Information**

This section includes five questions that focus on key aspects of implementation, including vendor and sub-recipient agreements, the program start date (i.e., the date the state, territory, or tribe started accepting applications for LIHWAP benefits), and the service areas covered by LIHWAP. Instructions for each question are included below. Also, please note that questions in this section of the quarterly report may change each quarter. When applicable, these changes are noted below.

#### **Questions in Section III for Quarter 1 and Quarter 2:**

- 1. Of the water vendors in your state, territory or tribe, how many vendors have you entered into an agreement with?**

For this question, recipients should report on the total number of water service vendors that they have established an agreement with.

- 2. If you have not entered into a vendor agreement with all vendors, please describe the barriers to execution below.**

Recipients should only answer this question if they have not entered into an agreement with all of the water and wastewater vendors in their service area. If this question applies to the recipient, the recipient should describe any barriers they are experiencing with regards to entering into agreements with vendors.

- 3. Have you begun to accept applications for LIHWAP?**

Recipients should answer “yes” or “no” to this question. If the recipient answers “yes” to this question, they should include the date the recipient or one of their subrecipients started accepting applications from households. If the recipient answers “no” to this question, they should include an estimated start date for accepting applications.

- 4. If you have not begun to accept applications for LIHWAP, please explain why below.**

Recipients should only answer this question if they have not begun to accept applications for LIHWAP. If this question applies to the recipient, the recipient should explain why they have not started accepting applications.

- 5. If you have started accepting applications, have all areas of your state, territory or tribe begun implementation? If no, please briefly explain your approach/plan for getting to full implementation, including which areas have not begun accepting applications and why.**

If the recipient has started accepting applications, the recipient should report if all areas of each state, territory, or tribe have begun implementation. If all areas have not begun implementation (i.e., the entire state, territory, or tribe), explain the approach the recipient will use to reach 100 percent implementation. If the recipient does not expect to reach 100 percent implementation at this time, the recipient should explain why 100 percent implementation is not currently feasible.

- 6. If applicable, have you executed agreements with all of your subrecipients? If no, please explain.**

If applicable (i.e., if the recipient is not administering the entire LIHWAP program themselves), the recipient should report if the recipient has executed agreements with all necessary subrecipients (including community action agencies, local, city, or county governments, or other non-profit organizations). If the recipient has not executed agreements with all subrecipients, the recipient should provide an explanation explaining why they have not executed all agreements.

#### **Changes to the Questions in Section III for Quarter 3:**

In quarter 3, the questions asked in this section is reduced to three. These questions require the recipient to identify if there are any changes to the vendor and subrecipient agreements or service area covered. Instructions for how to answer these questions are below.

- 1. Are there any changes in your agreements with water vendors from the previous quarters? Please explain any changes below.**

Report if there are any changes to the number of water service vendors reported in Q2 with which the recipient has an established agreement. If there are no changes to report, enter "Not applicable" for the response.

- 2. Are there any changes to which portions of your service area are accepting applications and implementing LIHWAP from Quarter 2? If so, please explain the changes. If not at 100 percent of implementation, please briefly explain your approach/plan for getting to full implementation, including which areas have not begun accepting applications and why.**

Recipients should report if there are any changes to the service area in their state, territory, or tribe that is accepting applications for LIHWAP benefits. For instance, has another region or subrecipient started accepting applications during the quarter that is being reported on? If there are no changes to report, enter "Not applicable" for the response.

- 3. If applicable, have you executed agreements with all of your subgrantees? If no, please explain.**

If applicable (i.e., if the recipient is not administering the entire LIHWAP program themselves), the recipient should report if the recipient has executed agreements with all necessary subrecipients (including, community action agencies, local, city, or county governments, or other non-profit organizations). If the recipient has not executed agreements with all subrecipients, the recipient should provide an explanation explaining why they have not executed all agreements.

#### **Changes to the Questions in Section III for Quarter 4:**

There are three questions that recipients should respond to in this section when reporting quarter 4 data. Instructions for how to answer these questions are below.

- 1. Are there any changes in your agreements with water vendors from the previous quarters? Please explain any changes below.**

Recipients should report if there are any changes to the number of water service vendors reported in quarter 3 with which the recipient has an established agreement. If there are no changes to report, enter “Not applicable” for the response.

**2. Are you still accepting applications for LIHWAP?**

The recipient should report if they or any of their subrecipients are still accepting LIHWAP applications.

**3. If you are still accepting applications, are there any changes to which portions of your service area are accepting applications and implementing LIHWAP from Quarter 3? If yes, please explain the changes.**

If the recipient is still accepting applications, the recipient should report on any changes to the information provided in quarter 3. This includes the areas of the state, territory, or tribe that has begun implementation or stopped accepting applications, including the reason why they stopped accepting LIHWAP applications. All changes should be explained using the open text field provided for this response.

### **Section IV: Performance Management**

Recipients are required to provide a brief narrative description for each of the four questions included in this section (\*there is a 5th question posed in quarter 4). Instructions for how to answer these questions are below.

**1. Describe up to three notable accomplishments achieved by LIHWAP implementation during the reporting period. Please include a participant success story, if applicable.**

Recipients should report on accomplishments that they believe are notable, including accomplishments related to implementation, partnerships, innovations, polices, procedures, outreach, and/or outcomes.

**2. Describe any challenges with LIHWAP implementation during the reporting period.**

Recipients should describe any challenges they have experienced with LIHWAP implementation and or administration.

**3. Are there additional unmet water and wastewater needs in your service area? If yes, please describe.**

Recipients should describe any unmet needs they are aware of. Unmet needs may include needs related to administering LIHWAP or the needs of beneficiaries.

**4. Do you have any training and/or technical assistance needs that you would like the Office of Community Services to offer support for?**

Recipients are encouraged to highlight any additional training and technical assistance they may need to successfully administer LIHWAP at the state and/or local level.

**5. (Quarter 4 only) Please list and describe up to three lessons learned during the first year of LIHWAP implementation.**

Recipients are encouraged to add information about their lessons learned planning for, implementing, and administering LIHWAP.

### **Section V: Remarks**

If the recipient has concerns about the reliability or the validity of the data they provided in the quarterly report, they should provide an explanation of these concerns in section V.

***Section VI: Certification***

This is where the authorizing official that is inputting the data in the *LIHWAP Quarterly Performance and Management Report* certifies that the information provided is true, complete, and accurate to the best of their knowledge. The authorizing official is required to provide their name, job title, and electronic or written signature. The report will be considered incomplete and not accepted unless this information is included. Recipients should submit their completed *LIHWAP Quarterly Performance and Management Report* to their LIHWAP program specialist by the due date outlined in these instructions.
