

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. In this round, last week's additional questions are removed; non-substantive additions include updates to "reasons for waiting" answer categories, and new questions on vaccine mandates and incentives, sources of information, cost concerns, and other factors that may influence vaccine readiness. This request does not impact the total burden hours proposed for the CET in the initial submission.
