Subtotal for Reporting Requirements					
5. Recordkeeping Requirements					
A. Familiarize with Regulatory Requirements	See 4A				
B. Plan activities	See 4B				
C. Implement activities	See 4B				

D. Develop record system	N/A				
E. Time to enter and transmit information:	1	365	365	1	365
- Records of operating parameters					
- Records of compliance inspections					
- Records of performance tests					
F. Time to train personnel	N/A				
G. Time for audits	N/A				
Subtotal for Recordkeeping Requirements					
Total Labor Burden and Costs (rounded) ^g					
Total Capital and O&M Cost (rounded) ^g					
GRAND TOTAL (rounded) ^g					

Assumptions:

^a While no sources are currently subject to the standard, for the purposes of this ICR, we have assumed that there is an estia subject to NSPS Subpart TTT since it is still in effect. We have assumed that there will be no new net growth for this industry.

^b This ICR uses the following labor rates: \$122.66 (technical), \$149.84 (managerial), and \$60.88 (clerical). These rates are Bureau of Labor Statistics, September 2020, “Table 2. Civilian workers, by occupational and industry group.” The rates are have been increased by 110 percent to account for the benefit packages available to those employed by private industry.

^c Since there are no new sources, the initial rule requirements do not apply (e.g. initial performance test using Method 12 for compliance demonstration).

^d Monitoring of operations includes: 1) implementation of Standard Operating Procedures (SOP) for operation and maintenance bag leak detection system does not alarm more than five percent of the time in any 6-month period, which we have assumed implement the monitoring and recordkeeping requirements; 2) a quarterly compliance tests for lead compounds; 3) and the the operators are given three options to comply including: daily checks for in-draft at all doorway openings using an anemometer the ventilation exhaust rate and damper positions at settings that result in an in-draft at each open doorway; or an alternative

^e We have assumed that sources will continue to submit semiannual reports.

^f We are assuming that sources will not be changing operating parameters even when sources may purchase new equipment.

^g Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

Part 63, Subpart TTT) (Renewal)

Table 2: Average Annual EPA Burden and Cost – NESHAP for Primary Lead Smelting (40 CF TTT) (Renewal)

Activity	(A) EPA person-hours per occurrence	(B) No. of occurrences per plant per year	(C) EPA person hours per plant per year (AxB)	(D) Plants per year ^a	(E) Technical person-hours per year (Cx D)	(F) Management person-hours per year (Ex0.05)
Initial notification ^c	2	1	2	0	0	0
Notification of performance test ^c	0.5	4	2	0	0	0
Notification of physical or Operational changes ^c	4	1	4	0	0	0
Semi-annual reports	10	2	20	1	20	1
Review quarterly test results	8	4	32	1	32	1.6
TOTAL (rounded)^d:						60

Assumptions:

^a While no sources are currently subject to the standard, for the purposes of this ICR, we have assumed that there is an av respondent currently operating in the United States since the NSPS Subpart TTT rule is still in effect. It is estimated that respondents will become subject to the regulation in the next three years based on information available on the sector.

^b This ICR uses the following labor rates: \$51.23 (technical), \$69.04 (managerial), and \$27.73 (clerical). These rates are Personnel Management (OPM), 2021 General Schedule, which excludes locality rates of pay. The rates have been increa account for the benefit packages available to government employees.

^c While no sources are currently subject to the standard, for the purposes of this ICR burden, we have not included an est initial rule requirements.

^d Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.
