Figure 48 Beyond public services, enforcing civil rights laws was considered the second most important
motivator, but not a topmost reason to fill out the census66

Executive Summary

The 2020 Census Barriers, Attitudes, and Motivators Study Survey (2020 CBAMS Survey) was conducted by the U.S. Census Bureau's Communications Research and Analytics Team (CRAT) and Team Young & Rubicam (Team Y&R) to provide an evidentiary foundation for the 2020 Census Integrated Partnership and Communications (IPC) operation. The primary goal of the IPC is to develop a research-based communications plan with the objective of motivating self-response to the decennial census. The 2020 CBAMS Survey used self-administered mail and internet data collection modes and covered a range of topics related to respondents' knowledge of and attitudes toward the 2020 Census. The results from the nearly 17,500 survey respondents highlight variation in barriers, attitudes, and motivators related to census participation across demographic characteristics and will serve as a key input to Team Y&R in the creative development of the 2020 Census communications campaign.

This is the final report for the 2020 CBAMS Survey. It explores key topline and group-level results from the survey. Below are key findings from the 2020 CBAMS Survey organized by research question.

Who intends to respond to the census, what mode (i.e., paper or online form) do they prefer, and how long do they think it will take to fill out the form? (Section 5.1)

- Fewer than seven in ten householders said they intend to fill out the census form.
 - Sixty-seven percent of householders reported they were "extremely likely" or "very likely" to fill out a census form.
 - Younger, less educated, and non-Hispanic (NH) Asian and NH small-sample races (i.e., American Indians, Alaska Natives, Native Hawaiians, Pacific Islanders, and people who are of multiple or other races) were least likely to report their intention to respond to the 2020 Census.
- Most householders either preferred to fill out online forms or had no preference between filling out online or paper forms
 - Thirty-two percent of people said they would prefer to fill out a paper form in the 2020 Census.
 - Older and less educated householders were more likely to prefer to fill out a paper form than younger and more educated householders.
- Most people thought filling out the 2020 Census form would take longer than 12 minutes.

Where do gaps in knowledge about the census exist? (Section 5.2)

- Many people were unfamiliar with the census, and there were misconceptions about
 its purpose and process. Only 33 percent of respondents reported that they were
 "extremely familiar" or "very familiar" with the census. Younger, less educated, and NH
 Asians tended to be less familiar with the census than other groups.
- **Knowledge about the uses of the census was uneven.** Most people knew the census is used to determine changes in the U.S. population and that it determines a state's

- number of representatives in Congress, but there were misconceptions about other uses. For instance, 10 percent of people incorrectly believed the census is used to locate people living in the country without documentation, and another 37 percent said they "do not know" if it is used this way.
- Knowledge about the census was uneven across demographic characteristics. Levels of knowledge about the census were lowest among those with less than a high school diploma, non-proficient internet users, and NH Black/African Americans.

What barriers would prevent people from completing the census? (Section 5.3)

- The analysis revealed **five barriers** that might prevent people from participating in the census:
 - Concerns about data privacy and confidentiality. Roughly a quarter of respondents were concerned about the confidentiality of answers to the 2020 Census, but racial and ethnic minorities were significantly more concerned about confidentiality than NH Whites.
 - Fear of repercussions. Roughly a quarter of respondents were concerned their answers to the 2020 Census would be used against them. NH Asians, householders not proficient in English, and those born outside of the U.S. were the most concerned.
 - Distrust in all levels of government. Distrust in government was high for everyone, with the highest levels of distrust among NH small-sample races, NH Whites, NH Blacks, people born in the United States, and people who are proficient in English.
 - A lack of efficacy. Many did not feel it matters whether they are personally counted in the 2020 Census. Young people were the least likely to believe it matters if they are counted.
 - Belief that completing the census could not benefit them personally. Across almost all demographic characteristics, more people predicted that answering the census could bring benefits to their community than to them personally.

What would potentially motivate people to complete the census? (Section 5.4)

- Funding for public services was a top motivator across groups, yet less than half of respondents knew that the census is used to determine community funding.
 - Householders thought funding for public services was the single most important reason to fill out the census.
 - Hospitals and healthcare, fire departments, police departments, and roads and highways were identified as the most important public services across all groups.
 - When community-oriented uses of census information (i.e., determining funding for public services in the community, contributing to a better future for the community, and providing information for local government to plan for changes in the community) were combined into a single measure, community-oriented motivators were most popular with those who were younger, non-white, not English proficient, and less educated.

 Only 45 percent of respondents knew that the census is used to determine how much government funding communities receive.

The survey results presented in this document will be used by the IPC's communication campaign to make informed decisions about strategies to increase self-response to the 2020 Census. Data on the attitudes, barriers, knowledge, and motivators of the population as a whole will inform the broad approach and message of the campaign, while information on group differences will be used to develop targeted messaging and advertising.

1. Introduction

The goal of the 2020 Census Integrated Communications Campaign (ICC) is to encourage self-response in the 2020 Census through a research-based communications campaign. Similar to when the Census was preparing for the 2010 enumeration in 2008, in Spring 2018 the Census Bureau's Communications Research and Analytics Team (CRAT) and Team Y&R conducted a survey called the 2020 Census Barriers, Attitudes, and Motivators Study Survey (2020 CBAMS Survey). The 2020 CBAMS Survey was designed to understand attitudes and behaviors that relate to census participation across demographic characteristics. The survey was designed to provide inputs for two related research projects aimed at informing and enhancing the quality of audience-specific messaging for the 2020 Census communications campaign. The first project, detailed in this report, provides insight into Americans' attitudes about participation in the census, including how attitudes toward the census vary across certain groups of people. The second project, detailed in a separate forthcoming report, uses survey responses as input to the selection of census mindsets derived through segmentation.

The 2020 CBAMS Survey was administered by mail and internet between February 20, 2018 and April 17, 2018 to a sample of households across all 50 states and the District of Columbia. Adults (i.e., 18 years or older) were eligible to take the survey, which was offered in both English and Spanish. Each household received a prepaid incentive and up to five mailings inviting them to participate in the survey. Approximately 17,500 people responded to the survey, which was then weighted to be representative of all householders² in the United States ages 18 and older.

As is detailed in this report, the 2020 CBAMS Survey responses were used to compare barriers, attitudes, knowledge, and motivators related to participation in the 2020 Census across demographic characteristics, with a focus on differences across race, age, gender, education, and country of birth. Specifically, the 2020 CBAMS Survey was used to answer the following research questions:

¹ A full list of all acronyms and abbreviations used in the report is available in Appendix C.

² The term "householder," as defined by the U.S. Census Bureau, refers to the person (or one of the people) in whose name the housing unit is owned or rented (maintained) or, if there is no such person, any adult member, excluding roomers, boarders, or paid employees.

- 1. Who intends to respond to the 2020 Census?
- 2. Where do gaps in knowledge about the census exist?
- 3. What barriers would potentially prevent people from completing the 2020 Census?
- 4. What would potentially motivate people to complete the 2020 Census?

Throughout the report, the key results of the univariate and bivariate analyses performed to answer these questions are reported in the text and graphs. The research methodology is discussed in greater detail in Section 3, and results are detailed in Section 5. In compliance with U.S. Census Bureau standards, only bivariate relationships that meet a significance level of at least α =0.10 and reflect the largest group differences are included in the text of the report. The point estimates and standard errors for all results, including those not discussed in the text, are available in Appendix A.

A separate forthcoming report details how answers to the 2020 CBAMS Survey were used to identify six mindsets that reflect shared attitudes about, and knowledge and perceptions of, the decennial census. The geographic distribution of respondents with these six mindsets was then used to determine the distribution of mindsets among groupings of census tracts, referred to as segments. Communications professionals will use the mindset composition, geographic segments, and media usage data to create tailored messages and develop a media plan to guide and justify messaging content and media buys.

The 2020 CBAMS Survey was also supplemented with qualitative focus groups designed to help the research team understand the attitudes of small demographic groups or groups that were otherwise difficult to reach with the survey. Although this document does not fully describe the results from the 2020 CBAMS focus groups, which are fully detailed in their own forthcoming report, there are a few notable similarities and differences in the findings from the focus groups and survey. Both the qualitative and quantitative data suggested that the chief barrier to participation in the 2020 Census is a lack of understanding of the purpose and process of the census. The focus groups revealed that a lack of understanding is associated with several negative attitudes toward the census, including apathy, privacy concerns, fear of repercussions, and general distrust of government. In the quantitative survey data, certain demographic characteristics, including low levels of education, being young, and being of racial or ethnic minority groups, are related to low levels of intent to self-respond to the decennial census

The focus group and survey research also revealed common motivators, or reasons respondents may want to respond to the 2020 Census. The qualitative and quantitative data both indicate that, although there are important differences across demographic groups, funding for public services — such as hospitals, schools, and roads — is a key motivator across

³ The 2020 CBAMS Focus Groups were conducted among 11 audiences: American Indian and Alaska Native, Black or African American, Chinese – Cantonese and Mandarin, Low Internet Proficiency, Middle Eastern and Northern African, Native Hawaiian and Pacific Islander (NHPI), Rural, Spanish (Puerto Rico), Spanish (U.S. Mainland), Vietnamese, and Young and Mobile.

groups. Focus groups, in particular, showed that participants might be persuaded of the importance and purpose of the census if they make the connection between completing a census form and the possibility of an increase in funding or support for their community, notably in support of critical community institutions, organizations, and services. In turn, this may boost self-response for the 2020 Census.

2. Background

2.1 CBAMS I

The Census Bureau first conducted a Census Barriers, Attitudes, and Motivators Survey (CBAMS I) in 2008 to understand barriers, attitudes, knowledge, and motivators related to the 2010 Census. The survey resulted in 4,064 interviews completed using dual-frame telephone (i.e., landline and cellphone) and in-person data collection modes. The sample design stratified census tracts by American Indian reservations; areas with high-Hispanic population density; areas with high-Asian population density; rural and economically disadvantaged areas; large designated market areas (DMAs) with high, medium, and low hard-to-count scores; mid-size DMAs with high, medium, and low hard-to-count scores; small DMAs with high, medium, and low hard-to-count scores; and cellphone users. Incentives consisted of \$10 to in-person respondents regardless of whether they completed the survey and \$10 Amazon gift certificates to cellphone respondents who participated. The final weighted response rate was 37.9 percent.

U.S. Census Bureau researchers also used the 2008 CBAMS Survey results to identify mindsets, which were then matched back to the Census Bureau's geographic audience segments for use by the 2010 Census Integrated Communications and Partnership Program. The tract-level audience segmentation process grouped tracts based on underlying demographic characteristics such as race and age. The communications contractor, DraftFCB, and the Census Bureau used the tract-level segmentation to help allocate the media budget among media markets and media channels (e.g., TV, print, digital). The segmentation helped determine how to reach the largest number of people within each audience (Wroblewski, 2012).

⁵ A designated market area (DMA) is a region of the country whose residents all receive the same or similar radio and television programming. This designation is used by Nielsen Media Research to conduct television and radio audience measurements.

2.2 CBAMS II

In 2011, the Census Bureau conducted the second Census Barriers, Attitudes, and Motivators Survey (CBAMS II).⁶ In addition to identifying barriers, attitudes, knowledge, and motivators surrounding the 2010 Census, the survey also measured attitudes toward potential Census Bureau administrative record usage (e.g., Tax Identification or Social Security numbers) and phone and internet use in general. The 4,071 respondents participated by landline, cellphone, or face-to-face interview. The sample design was virtually the same as for CBAMS I, including the stratification of tracts. Ten-dollar incentives were only offered to in-person qualified respondents regardless of whether they completed the survey. The AAPOR Response Rate 3 (RR3)⁷ for CBAMS II was 33.6 percent.

Using items common to both CBAMS I and CBAMS II, Census Bureau researchers used the results of CBAMS II to examine changes in the original five mindsets identified by CBAMS I. They looked in particular at changes in the number of people who shared a particular mindset and in the levels of awareness and knowledge of the census. Then a latent class analysis was conducted to identify new attitudinal mindsets, incorporating additional variables found only in CBAMS II.

2.3 2020 CBAMS Survey Climate

The climate in which the 2020 CBAMS Survey was conducted is important context for interpreting the results of the survey, particularly the low percentage of people who said they intend to respond to the 2020 Census, and assessing potential challenges for the upcoming 2020 Census. The current climate is quite difficult for conducting government survey research for at least three reasons: (1) trust in many public institutions is declining, (2) trust in government is declining, and (3) survey response rates are declining. Before discussing these challenges, it is worth considering the 2020 CBAMS Survey results in the context of past CBAMS surveys.

The CBAMS surveys were not created to be analyzed as a time series dataset, or with the intention to allow for exact comparisons due to changes in mode, questionnaire, sampling design, and the final sample itself. Because of these differences, the point estimates from different CBAMS surveys should never be directly compared. For context only, it is worth noting that 85 percent of CBAMS I respondents, taking the survey in 2008, said they would "definitely" or "probably" respond to the 2010 Census. As discussed in Section 5.1, just 67 percent of respondents who participated in the 2020 CBAMS Survey in 2018 said they were "very likely" or "extremely likely" to respond to the 2020 Census. These two numbers are not directly

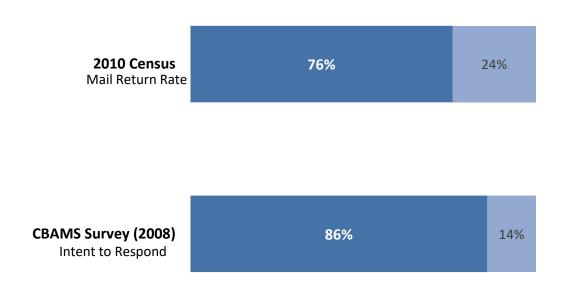

⁶ The full ICF Macro (2012) *Census Barriers, Attitudes, and Motivators Survey II Final Report* can be found at https://www2.census.gov/programs-surveys/decennial/2010/program-management/5-review/cpex/2010-memo-205.pdf

⁷ See American Association for Public Opinion Research (2016) for information on how an AAPOR RR3 response rate is calculated.

comparable due to inconsistencies in the question response options, and the other differences discussed above, but the low intention to respond to the 2020 Census may be a signal of the challenges to response in the upcoming 2020 Census.

The fact that many people who participated in the 2020 CBAMS Survey said they were not "very likely" or "extremely likely" to respond to the upcoming decennial census is particularly troubling because stated intent to respond is often over-reported compared to actual response behavior (Aizen, 1991; Letourneau, 2012). As Figure 1 demonstrates, this was the case in the 2010 Census, where the pre-nonresponse follow up (NRFU) mail return rate was 76 percent (Letourneau, 2012) – 10 points lower than measured in the 2008 CBAMS Survey. The low levels of intent to respond observed in the 2020 CBAMS Survey may be shaped by current challenges of conducting government surveys, and may signal that self-response could be a challenge in the 2020 Census.

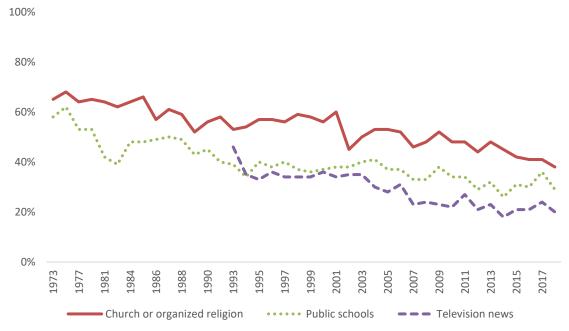

Figure 1
2010 Census mail return rate and reported intent to respond rate from CBAMS I

Note: The point estimate for the CBAMS Survey conducted in 2008 reflects the percentage of those who said they would "definitely" or "probably" respond to the 2010 Census.

The first challenge is that trust in public institutions is decreasing. Gallup data, as shown in Figure 2, illustrate that confidence in public institutions such as public schools, TV news, and organized religion has decreased since the 1970s in the United States.⁸

Figure 2
Trust in public institutions over time

Source: Confidence in Institutions, Gallup, 2018: https://news.gallup.com/poll/1597/confidence-institutions.aspx

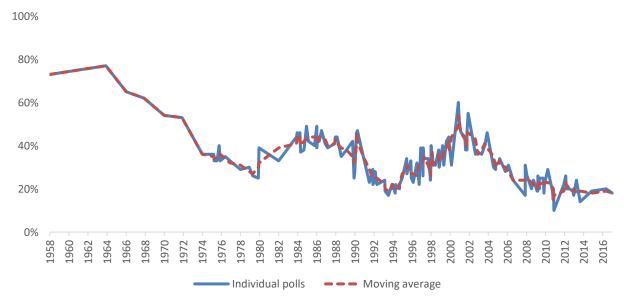

-

⁸ Trust has slightly increased or remained steady for the military, police, and big business.

Similarly, a Pew Research Center study based on data from a number of trend surveys finds that public trust in government is almost the lowest it has been since measurement began in 1958, as seen in Figure 3.

Figure 3

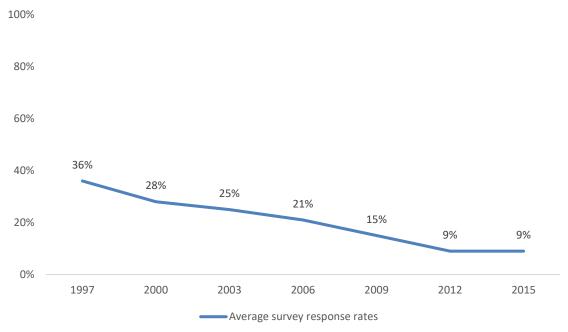

Trust in government over time

Source: Public Trust in Government: 1958-2017, Pew Research Center, December 14, 2017: http://www.people-press.org/2017/12/14/public-trust-in-government-1958-2017/

As shown in Figure 4, telephone survey response rates, as an illustration of the general trend in survey response rates, have declined sharply over the past 20 years. The average response rate is down from 15 percent in 2009, near the time when the last CBAMS survey was conducted, to 9 percent in 2016.

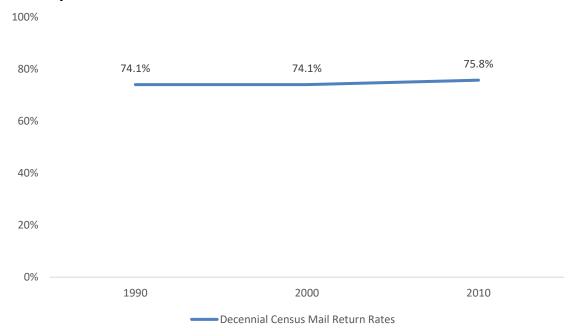

Figure 4
Telephone survey response rates over time

Source: What Low Response Rates Mean for Telephone Surveys, Pew Research Center, May 15, 2017: http://www.pewresearch.org/2017/05/15/what-low-response-rates-mean-for-telephone-surveys/

Despite these challenges, as Figure 5 shows, pre-nonresponse follow up (pre-NRFU) mail return rates for the decennial census have held steady over the past few decades. The pre-NRFU mail return rate refers to those census questionnaires that were submitted before households were directly contacted by the Census Bureau through nonresponse follow up (NRFU). This is the type of response, rather than assisted response through enumerators, that the ICC's campaign seeks to drive because it tends to occur earlier in the enumeration process and requires fewer resources. It is likely that the consistent pre-NRFU mail return rates can be, at least partially, attributed to the introduction of a paid media campaign leading up to the 2000 Census and an increase in mailings in the 2010 Census.

Figure 5
Census pre-NRFU mail return rates over time

Source: Mail Return Rates reflect returns after all processing is completed, so they include late mail returns, and are calculated only for occupied units. Letourneau (2012) Mail response/return rates assessment. Final report (2010 Census Planning Memoranda Series No. 198) for 2010.

3. Methodology

This section begins by outlining the major research questions that guide this report. We then detail various aspects of the sample design, survey instrument, data collection, response rate, noise injection, post-processing, and weighting. This section ends with a discussion of analysis techniques.

3.1 Research Questions

This report explores the following research questions:

- 1. Who intends to respond to the 2020 Census?
- 2. Where do gaps in knowledge about the census exist?
- 3. What barriers would potentially prevent people from completing the 2020 Census?
- 4. What would potentially motivate people to complete the 2020 Census?

3.2 Sample Design

The Communications Research and Analytics Team and Team Y&R, together constituting "the research team," designed the survey methodology outlined below. The 2020 CBAMS Survey used a national address-based sample covering U.S. households in all 50 states and the District of Columbia. The research team drew a sample of 50,000 household addresses from a 2017 Master Address File (MAF) extract provided by the Census Bureau's Geography Division to its Decennial Statistical Studies Division (DSSD). The MAF extract contains all address information for all known addresses in the United States. The MAF extract that was used to draw the survey sample excluded special places, group quarters, addresses in Puerto Rico, known addresses already sampled in recent Census Bureau surveys and tests, addresses in enumeration areas other than Type of Enumeration Area 1,10 and known bad or congressional refusal addresses. The MAF extract was supplemented with tract-level contact strategy information from DSSD and a bilingual assignment variable from the 2016 Planning Database. Mail materials asked for the adult who typically opens the mail to complete the questionnaire because this person would typically complete the census.

The MAF extract was stratified at the tract level by contact strategy (Internet First versus Internet Choice¹²) and by race and Hispanic origin – Asian and Other Small Race/Ethnicity Groups (OSREG), Black, Hispanic, all other races and ethnicities – to form eight strata in total:

⁹ A special place is an administrative entity containing one or more group quarters where people live or stay, such as a college or university, nursing home, hospital, correctional facility, or military installation or ship.

¹⁰ Type Enumeration Areas are assigned to every block in the United States to ensure cost effective and efficient enumeration of households. Type Enumeration Area 1 refers to self-response enumeration.

¹¹ Congressional refusal addresses have been pulled from the survey sample at the request of the Congressional Offices.

¹² Tracts that responded to the ACS by mail more than by internet and have at least one of the following additional attributes were considered Internet Choice: a.) is a low-responding tract when an Internet First strategy is used based on ACS self-response rates, b.) is a tract with a high older population, based on 2010-2014 ACS estimates, 3.) is a tract with low internet access based on June 2015 Federal Communications Commission data. Any tract missing ACS self-response rates were automatically designated Internet Choice. Otherwise, the tract was considered Internet First.

- Internet Choice/Asian or OSREG
- Internet Choice/Black
- Internet Choice/Hispanic
- Internet Choice/Other
- Internet First/Asian or OSREG
- Internet First/Black
- Internet First/Hispanic
- Internet First/Other

The sample design oversampled strata categorized as Internet Choice, OSREG, Black, and Hispanic in order to ensure a sufficient number of responses from minority groups.¹³ Weighted response rates by stratum are reported in Section 3.5. Each stratum was sorted by state, county, tract, and MAF ID before systematically drawing sampled units.

3.3 Survey Instrument

The 2020 CBAMS Survey questionnaire included questions from CBAMS I and II as well as modified versions of questions from benchmark surveys, such as the American National Election Studies, and questions deemed necessary by Team Y&R communications professionals. The questionnaire and mail materials were translated into Spanish under the guidance of the Decennial Translation Branch. Three percent of the complete responses received used a Spanish language questionnaire. The Census Bureau's Center for Behavioral Science Methods conducted cognitive interviewing and usability testing (Falcon et al., 2018 and Lykke & García, 2018). Four versions of the paper questionnaire were used that varied question and response option order. The internet instrument also randomized question and response option order.

Web versions of the survey instrument can be found in Appendix D, all four Mail versions of the survey instrument can found in Appendix E, and all mail material can be found in Appendix F.

3.4 Data Collection

On February 20, 2018, the Census Bureau's National Processing Center sent each sampled household an initial mailing inviting them to participate in the 2020 CBAMS Survey by mail or internet. A prepaid incentive of up to \$10 was included in the first mailing. Each stratum was assigned an incentive amount. Table 1 below shows how much incentive was provided for each stratum.¹⁴

¹³ Although these groups were oversampled, it is likely we did not reach the hardest to reach people in each group. The qualitative focus groups, referenced in the Introduction and detailed in a related report, were conducted to increase the representation of people who are difficult to reach with a survey.

¹⁴ Note that the survey did not use a controlled incentive experiment.

Table 1: 2020 CBAMS Survey Incentive Amount

Strata	Incentive Amount
Internet Choice/Asian or OSREG	\$10.00
Internet Choice/Black	\$10.00
Internet Choice/Hispanic	\$10.00
Internet Choice/Other	\$1.00
Internet First/Asian or OSREG	\$5.00
Internet First/Black	\$5.00
Internet First/Hispanic	\$5.00
Internet First/Other	\$1.00

Households in the internet-choice stratum also received a paper questionnaire, whereas households in the internet-first stratum did not receive a paper questionnaire until the fourth mailing. Bilingual questionnaires were sent to households flagged by the bilingual assessment variable provided by DSSD.

At the direction of the research team, the National Processing Center sent reminder letters and postcards to the full sample twice during data collection. Nonrespondents received reminder letters with an additional questionnaire regardless of contact strategy stratum. A final reminder postcard was sent to nonrespondents 15 days before data collection ended (April 17, 2018). Using five mailings with tailored internet first and internet choice contact strategies is consistent with the 2020 Census design. Table 2 outlines the 2020 CBAMS Survey schedule for mailing invitations and reminders.

Table 2: 2020 CBAMS Survey Mail Schedule

3	Sealed reminder postcard	Monday, Mar. 5	Sample
4	Reminder letter and	Monday, Mar.	Nonrespondents as
	questionnaire	19	of Feb. 27 at 9am
5	Sealed reminder postcard	Monday, Apr. 2	Nonrespondents as
			of Mar. 27 at 9am

3.5 Response Rate

The final weighted response rate for the 2020 CBAMS Survey was 39.4 percent. The research team developed a modified version of the AAPOR RR3 to calculate the final weighted response rate (American Association for Public Opinion Research, 2016). AAPOR RR3 is calculated by dividing the number of completed responses received by the sum of completed responses received, the eligible cases without a response, and an estimated portion of unknown eligibility

cases that are eligible.¹⁵ For the purposes of the 2020 CBAMS Survey, the RR3 formula was modified by combining partially completed responses and noncontacts¹⁶ as eligible noninterviews. Table 3 describes each disposition, its final unweighted and weighted frequencies, and the response rate formula used.

Table 3: 2020 CBAMS Survey Disposition and Frequencies

Disposition	Criteria	Unweighted frequency	Weighted frequency
Final complete	Web respondents (I): Reached sexual orientation item, answered at least 53 items	17,500	44,780,000
eligible	(not counting skip pattern questions), and		
interview	answered at least five of the six demographic		
	items (age, sex, education, race, Hispanic origin,		
	and owner or renter) used for weighting.		
	Mail respondents (I): Answered at least 53		
	items (not counting skip pattern questions) and		
	answered at least five of the six demographic		
	items (age, sex, education, race, Hispanic origin,		
-11 11 1	and owner or renter) used for weighting.		
Eligible non-	Web refusal (R): Started a web response but did	28,500	64,840,000
interviews	not meet the final complete criteria and is not a		
	mail complete.		
	Mail refusal (R): Not a web complete and either		
	returned a paper questionnaire that did not		
	meet the mail final complete criteria or		
	returned correspondence refusing to complete		
	the questionnaire.		
	Nonrespondents (NR): Not undeliverable-as-		
	addressed (UAA) for the first mailing and did not		
	submit a mail or internet response or UAA and		
Unknown	did not meet the criteria for unknown eligibility.	4.400	10 240 000
eligibility	Unknown eligible (UHUO): Nonrespondent addresses that received a UAA in the first	4,400	10,340,000
Cligibility	mailing and never responded in subsequent		
	mailings.		
Non eligible	Non Eligible: Under 18 and out-of-scope cases	N<15	33,000
	(group quarters, etc.).		

¹⁵ Eligible cases without a response include partial completes, refusals and non-contacts.

¹⁶ Noncontacts are unknown but potentially eligible cases that were not interviewed.

Disposition	Criteria	Unweighted	Weighted
		frequency	frequency
е	e: Estimated vacancy rate based on a 2013 American Community Survey (ACS) report. The value of e is 39.67 percent.	39.67%	39.67%
	By applying e to UHUO, the research team estimated 39.67 percent of nonrespondents who were UAAs on the first mailing as eligible noninterviews, and considered 60.33 percent of nonrespondents who were UAAs on the first mailing as vacant and thus not eligible.		
	All other UAAs were considered eligible noninterviews.		
RR3	$\frac{\sum I_{wt}}{\sum [(I_{wt}) + (R_{wt} + NR_{wt}) + e(UHUO_{wt})]}$	36.54%	39.40%

Note: The frequencies recorded above are rounded in accordance with DRB guidelines.

Table 4 shows weighted response rate by stratum.

Table 4: 2020 CBAMS Survey Weighted Response Rates by Stratum

Stratum	Response rate
Internet Choice/Asian or OSREG	31.28%
Internet Choice/Black	28.42%
Internet Choice/Hispanic	27.08%
Internet Choice/Other	37.93%
Internet First/Asian or OSREG	40.66%
Internet First/Black	30.82%
Internet First/Hispanic	29.71%
Internet First/Other	43.71%
Overall Weighted Response Rate	39.40%

Source: CBAMS Public Use Microdata Sample

The research team performed a nonresponse bias study by comparing the distribution of unweighted responses, weighted responses, ACS 2016 householder data used as weighting targets and additional demographic variables. Differences between the unweighted and weighted response from the ACS target did not exceed 10 percent. Results of the comparison and additional weighting information can be found in Appendix B.

3.6 CBAMS Public Use Microdata Sample (PUMS) Dataset

To ensure the confidentiality of all Title 13 publicly released data products, the Census Bureau's Disclosure Review Board (DRB) passed the original 2020 CBAMS Survey dataset through a disclosure avoidance system that imposes differential privacy on each survey question's response using the multinomial generalization of randomized response. This allowed the DRB to make available a Public Use Microdata Sample version of the original 2020 CBAMS survey data. The filter used a multivariate random response algorithm for categorical variables and Laplace additive noise infusion method for continuous variables with an epsilon parameter of seven. All report findings were derived from the approved PUMS version of the 2020 CBAMS Survey data set. As a result, the findings below include additional error from the disclosure avoidance processes.

3.7 Post-Processing

After data collection closed, Team Y&R merged datasets from both respective modes and cleaned the data following procedures that ensured consistency across modes and questionnaire versions. After the data passed through the privacy filter, the research team set combinations of responses that were invalid to missing and imputed all missing values.²²

3.8 Weighting

Completed cases were weighted using a three-step weighting process. The first step created base weights that accounted for each respondent's probability of selection, the second step adjusted for nonresponse within each stratum, and the third step used a post-stratification adjustment.

The 2020 CBAMS Survey was a household-level survey designed to capture adults 18 years or older who typically open the mail for the household. Several combinations of weighting targets – census region, age group, homeowner or renter, gender, education, race, and Hispanic origin – were used as the control totals in the weighting process. Weighting targets were based on

¹⁸ Approved for release on August 13, 2018 with approval number CBDRB-FY18-422.

¹⁷ See Wang, Wu and Hu (2016).

¹⁹ Note the effective epsilon for each survey question is 1.03, not 7, when considering the "secrecy of the sample" as described by Li, Qardaji, and Su (2011). To calculate the privacy protection afforded by sampling, the average household sampling rate was inflated by the ratio of the largest to the smallest sampling rate using the final survey weights.

²⁰ Response rate calculations were derived from the original 2020 CBAMS dataset.

²¹ For a discussion of how to incorporate the differential privacy noise into the overall analysis see Avetisyan and Fox (2012), which derives the likelihoods and posterior distributions incorporating multinomial randomized response.

²² All missing values were imputed in SAS using PROC SURVEYIMPUTE with the hot deck option.

ACS 2016 householder data. Missing values for race and Hispanic origin, age group, gender, owner or renter, and education values were imputed.

Post-stratification weights were calculated using iterative proportional fitting (i.e., raking) to ensure that weighted demographic variables for respondents followed approximately the same distribution as the population targets. Nonresponse weights were used as the input weights. One final weight (as opposed to replicate weights) was created using a publicly available SAS raking macro. Census regions were identified by mailing address. The post-stratification weights were trimmed at the first and 99th percentile to avoid extreme weights.

More details about the weighting procedure, including how base weights and nonresponse adjustment weights were found, are available in Appendix B.

3.9 Analysis

The results discussed in this report are limited to findings from univariate and bivariate estimates. All point and variance estimates take into account the sample design and final weights. Variance estimates were calculated using the Taylor series approximation.

Bivariate tabulations compared dependent variables of interest across key independent variables. The independent variables measure the following demographic characteristics: age group,²³ gender, sexual orientation,²⁴ education level,²⁵ race and Hispanic origin,²⁶ country of birth,²⁷ English proficiency,²⁸ internet proficiency,²⁹ presence of children under 6 years old in

²³ Based on their birth year, each respondent was assigned to one of the following four age range categories: 18-34, 35-44, 45-64, or 65+.

²⁴ Based on response to the sexual orientation question, respondents were categorized as Straight, Sexual minority (gay, lesbian or bisexual), or Don't know/Something else.

²⁵ Based on their highest level of education, each respondent was assigned to one of the following four education categories: Less than high school diploma, High school graduates/no college, Some college or associate degree, or bachelor's degree or higher.

²⁶ Based on their response to race and Hispanic origin questions, each respondent was assigned to one of five race and Hispanic origin categories: Hispanic of any race or non-race, Non-Hispanic (NH) White only, NH Black/African American only, NH Asian only, or NH small-sample races (races with insufficient sample sizes to analyze, such as NH Native Hawaiian and Pacific Islander, NH American Indian and Alaska Native only, other races, and multiple races).

²⁷ Based on their reported place of birth, each respondent was assigned to one of two country of birth categories: those who were born in the U.S. and those were not born in the U.S.

²⁸ Based on their answer to the question "How well do you speak English?—(a) Very well (b) Well (c) Not well (d) Not at all"—respondents were assigned to one of two English proficiency categories: English proficient for those who reported speaking English "very well" and Not English proficient for those who reported speaking English "well," "not well," or "not at all."

²⁹ Based on their answers to the question "About how often do you use the Internet?—(a) Almost constantly (b) Several times a day (c) About once a day (d) Several times a week (e) Once a week (f) Less than once a week (g) Never"—respondents were assigned to one of two internet proficiency categories: Internet proficient for those whose self-reported use of the internet was "almost constantly," "several times a day," "about once a day," or "several times a week" and Not internet proficient for those who responded "less than once a week" or "never."

the household, and homeownership versus home rental. Many questions used a five-point Likert scale as response options. For questions using the Likert scale, differences between the top-two response options ("top-two box") were most often used to analyze outcomes of interest and were specified when analysis deviated from this format. All point estimates and standard errors are reported in Appendix A.

Hypothesis tests were performed pairwise on all combinations of pairs within a given independent variable using an alpha level of 0.10 with a Bonferroni adjustment.³⁰ Only the largest or most surprising statistically significant differences were reported for a given variable of interest. Sensitivity checks were performed to confirm that the results were not unique to the top-two box coding decision. These analysis parameters conform to Census Bureau quality standards (U.S. Census Bureau, 2013).

4. Limitations

There were several notable limitations to the 2020 CBAMS Survey that could increase the likelihood of errors in estimates and limit its usefulness to inform the IPC. These limitations include the following:

- The estimates and results from hypothesis tests were found using the noise-injected 2020 CBAMS PUMS. While limited, this noise intentionally introduced error that was not present in the original dataset to protect respondent privacy.
- Because a MAF extract was used to draw the sample, there are known coverage errors.
 For instance, Puerto Rico and remote Alaska were excluded from the sampling frame as were some addresses in the U.S. that had recently been sampled by the Census Bureau.
- Because of changes in data collection strategies and question wording from previous CBAMS Surveys, the results from the 2020 CBAMS Survey cannot be used to reliably gauge how certain measures have changed over time.
- This analysis of the 2020 CBAMS Survey data examines only univariate and bivariate distributions. Multivariate models were not employed to understand the marginal effects of multiple variables simultaneously on dependent variables of interest.
- Despite a careful questionnaire development process, the motivators and barriers measured in the 2020 CBAMS Survey may not be exhaustive. It is unknown whether other barriers and motivators would show larger effects.

Because multiple comparisons induce an increased likelihood of committing Type I errors, a Bonferroni correction was applied to each alpha value to ensure an accurate assessment of significance. To operationalize the Bonferroni adjustment, a p-value, p_i , for a given hypothesis test is adjusted by taking the product m^*p_i , where m is all combinations of pairs within a given independent variable for a given table. The null hypothesis is rejected using a Bonferroni adjustment if p-value $\leq \alpha/m$. It was operationalized by using: m^*p -value ≤ 0.1

- Results showing associations between barriers, attitudes, motivators, and knowledge
 may be associated with census self-response, but there is no evidence of a causal
 relationship.
- Results involving householders' intention to fill out a census form could be biased by the
 fact that responses were received only from those willing to fill out the 2020 CBAMS
 Survey; 2020 CBAMS Survey nonrespondents may be less willing to complete the census
 than respondents. Further, CBAMS also conducted focus groups to gain further insight
 into groups which are normally hard to enumerate with surveys.
- Willingness to complete the survey and attitudes toward the census for those who completed the survey could be influenced by the use of Census Bureau branded survey material.
- While the 2020 CBAMS Survey was in the field, news broke regarding the Census Bureau's intention to include a citizenship question on the 2020 Census form. As a result, a national debate arose over whether and by how much self-response response rates could change with the addition of a citizenship question. The 2020 CBAMS Survey cannot inform this debate because issues involving the citizenship question were not included in the questionnaire. However, the 2020 CBAMS Focus Group report provides data generated in focus group discussions on this topic.

5. Results

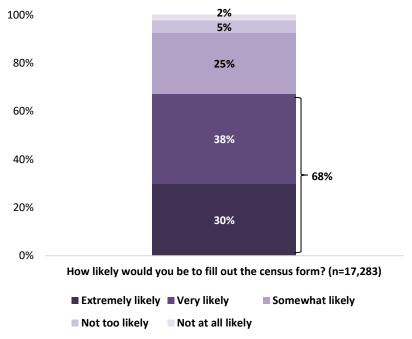

In this section we present the results to the four research questions, beginning by answering the question who intends to respond to the 2020 Census. We then examine gaps in knowledge about the purpose and uses of the census and how these gaps in knowledge vary across groups. In the final section, we detail a number of potential barriers to participation in the census before turning to potential motivators in the final section.

5.1 Who intends to respond to the census?

Fewer than seven in 10 householders reported a high likelihood of filling out a census form.

A key research objective for the 2020 CBAMS Survey was to gauge the public's intention to respond to the upcoming census. Fewer than seven in 10 householders reported a high likelihood of filling out a census form. As shown in Figure 6, 68 percent of householders reported that they were "extremely likely" or "very likely" to fill out the census form.³¹

Figure 6
Intent to respond to the census.

 ${\it (2) Appendix A reports the standard errors for all point estimates.}$

 $(3) \ All \ estimates \ reported \ in \ the \ bar \ were \ rounded \ to \ whole \ numbers \ so \ that \ the \ sum \ of \ estimates \ equals \ 100\%.$

Although a majority of householders said they planned to respond to the census, past research suggests that even individuals who report a commitment to participate may not follow through on their intention. Aizen (1991) argues that there is often a gap between a person's intended and actual behavior. Unforeseen costs and circumstances ultimately prevent some people from carrying out their intended behavior. This gap between intention and action is evident in past studies of census response patterns. In the case of the 2010 Census, 90 percent of the individuals who responded to the Census Continuing Tracking Survey by April 2010 reported

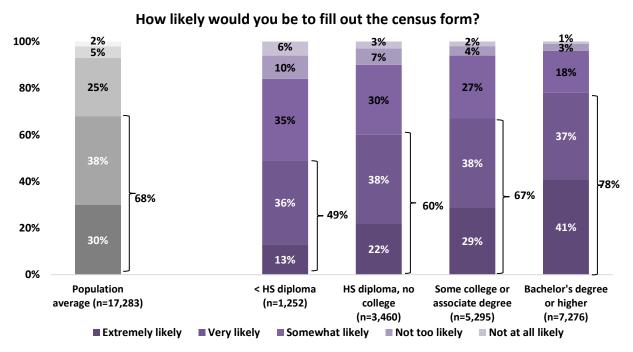

³¹ Note that 93 percent of householders responded that they were "somewhat likely", "very likely", or "extremely likely" to fill out the census form.

that they either had "already mailed back the form" or "definitely" intended to do so (Miller & Walejko, 2010). Yet, the pre-NRFU national mail return rate to the 2010 Census was only 75.8 percent (Letourneau, 2012). Similarly, the 2010 Census Integrated Communications Program Evaluation found that between 60 and 71 percent of those who reported they "definitely" or "probably" would participate in the census actual returned their Census form (Datta et al., 2012). As previous research showed, reported intent to respond to the census may not be a reliable predictor of actual response, and may be an overestimate of future response rates. Another driving factor for low levels of intent to respond could also be due to the worsening survey climate as described in Section 2.3. Regardless, this rate of intended response could be a cause for concern because the decennial census is intended to count every person in the United States.

Less educated respondents as well as those who were younger or NH Asian were the least likely to report intent to fill out the 2020 Census.

Fewer householders with less than a high school diploma (49 percent) reported being "extremely likely" or "very likely" to respond to the census than those with a bachelor's degree or higher (78 percent)—a 29-point gap in intent to respond. Figure 7 shows the variation in intent to respond across education levels and age groups.

Figure 7
Less educated householders were least likely to report their intention to respond to the 2020 Census.

Notes: (1) Unweighted sample sizes are in parentheses.

 $^{{\}it (2)} \ Appendix \ A \ reports \ the \ standard \ errors \ for \ all \ point \ estimates.$

⁽³⁾ All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

Younger householders reported a lower likelihood of responding to the census than older householders. There was a difference of 17 percentage points between householders 18 to 34 years old (54 percent) and those 45 years or older (71 percent or more) who reported being "extremely likely" or "very likely" to respond to the census. Figure 8 shows the distribution of the householders' intent to fill out a census form by age group.

Figure 8
Younger householders were least likely to report their intention to respond to the 2020 Census.

Source: 2020 CBAMS Public Use Microdata Sample

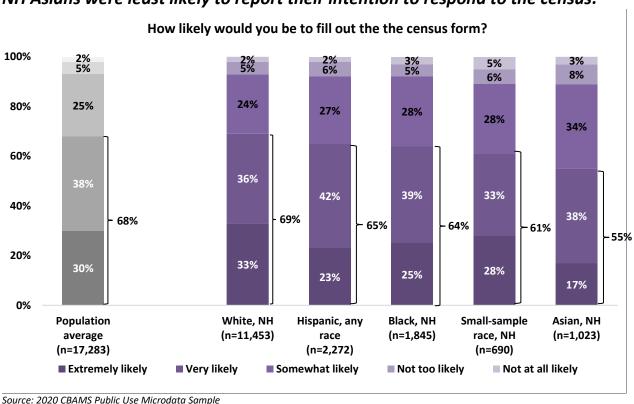

Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

(3) All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

Among racial and Hispanic origin groups, NH Asians and NH small-sample size races were least likely to report their intention to respond to the census (55 percent and 61 percent, respectably). As Figure 9 shows, NH Whites (69 percent) were most likely to report their intention to respond to the census. Hispanics (65 percent) and NH Blacks/African Americans (64 percent) were indistinguishable and fell between NH Asians and NH Whites.³² As was true in CBAMS I (U.S. Census Bureau, 2009), NH Asian respondents (55 percent) reported a lower intention to respond than other groups, including NH Whites (69 percent), who reported the highest rates of intent to respond. Although NH Asians were least likely to report their intention to respond to the census among other races, their actual response rates to the census were higher than all other race groups except NH Whites (Letourneau, 2012).

Figure 9 NH Asians were least likely to report their intention to respond to the census.

Notes: (1) Unweighted sample sizes are in parentheses.

There were also variations in respondents' reported intent to respond to the census based on their English proficiency, their proficiency in using the internet, and whether they rent or own

⁽²⁾ Appendix A reports the standard errors for all point estimates.

⁽³⁾ All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

³² Response options were grouped and examined in different ways as part of the sensitivity check. When intent to respond is measured as "not too likely" and "not at all likely," variations between race groups diminishes. NH Asians remains less likely to respond to the census when compared to NH Whites. However, there is no statistical difference between small-sample races and any other race groups. In addition, NH Whites are indistinguishable between other races Hispanic origin groups, except NH Asians.

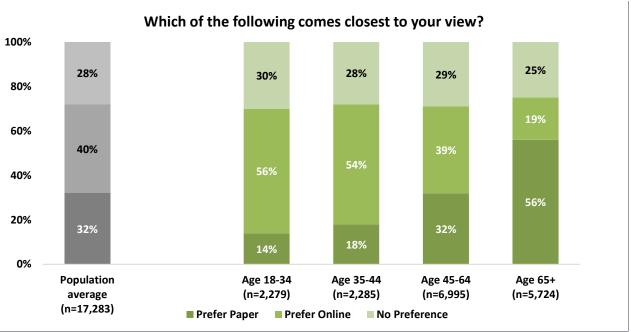

their home. Householders with English proficiency (i.e., those who speak English "very well") (68 percent) reported they were more likely to respond to the census compared to 55 percent of those without English proficiency. Similarly, 69 percent of householders with internet proficiency (i.e., those who use the internet at least once a week) reported being "extremely likely" or "very likely" to fill out a census form, compared to 54 percent of those without internet proficiency. Finally, homeowners (71 percent) were more likely to report a high likelihood of responding than renters (60 percent). Appendix A shows the differences in intent to respond among all demographic characteristics.

Older and less educated householders preferred to fill out the paper form.

The 2020 CBAMS Survey sought to understand respondents' mode preferences when filling out the census form. This is particularly important because, for the first time, the Census Bureau intends to roll-out a large-scale online self-response option for the 2020 Census. According to the survey, most householders either preferred to fill out online forms (40 percent) or had no preference (28 percent) between filling out online or paper forms. Roughly one-third (32 percent) preferred to fill out a paper census form.

Differences in response mode preference are important because respondents who are unwilling or unable to respond to the 2020 Census online could face a barrier early in the data collection phase. As shown in Figure 10 and Figure 11, older and less educated householders overwhelmingly preferred to fill out a paper census form. Fifty-six percent of householders 65 and older preferred to fill out a paper census form compared to 32 percent of those age 45 to 64 and 14 percent of those age 18 to 34. Fifty-eight percent of householders without a high school diploma and 47 percent of householders with only a high school diploma prefer to fill out a paper census form.

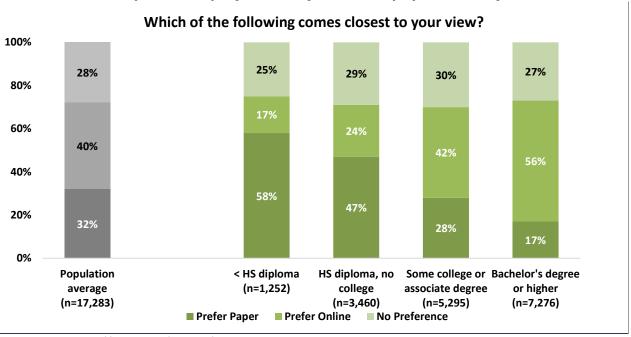

Figure 10
Older householders preferred to fill out the paper census form.

⁽²⁾ Appendix A reports the standard errors for all point estimates.

⁽³⁾ All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

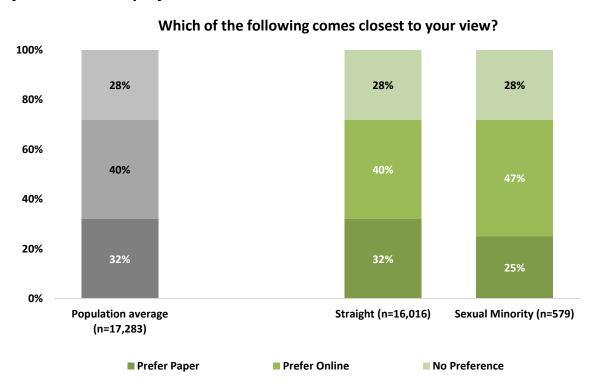

⁽²⁾ Appendix A reports the standard errors for all point estimates.

⁽³⁾ All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

Except for NH Blacks/African Americans and NH Asians, there were few meaningful differences between races with respect to form preference. NH Blacks/African Americans (44 percent) were most likely to prefer filling out a paper form while NH Asians (20 percent) were least likely to prefer filling paper forms.

Perhaps self-evident, individuals not proficient at using the internet were most likely to prefer filling out a paper census form (80 percent). Seventy-five percent of those who regularly use the internet preferred to use an online form or had no preference, indicating that not all proficient internet users prefer to fill out a census form online. Similarly, seventy-five percent of sexual minorities preferred online forms or had no preference, as shown in Figure 12. The estimates and standard errors for the differences in mode preference for each demographic characteristic are available in Appendix A.

Figure 12
Seventy-five percent of sexual minority respondents either preferred an online form or had no preference

Source: 2020 CBAMS Public Use Microdata Sample Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

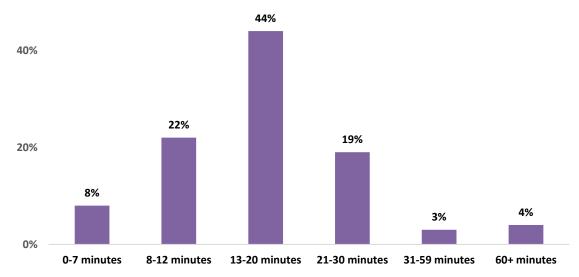

(3) All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

Most people thought filling out the 2020 Census form takes longer than twelve minutes.

The census form was designed to be quick and easy. To better understand the public's perception of the time burden to complete the 2020 Census, the 2020 CBAMS Survey asked respondents how long they thought it would take to fill out the 2020 Census form. If a large portion of respondents believed that filling out the census form would take much longer than is actually the case that could signal a challenge for the communications campaign to overcome. As shown in Figure 13, 70 percent of the respondents thought it would take longer than 12 minutes to complete a census form, indicating a large gap between the Census Bureau's expectation and the public's perception of how long it would take.

Estimated time to complete a 2020 Census form.

Based on your past experience or just your best guess, how long do you think it would take you personally to fill out the 2020 Census?

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

There were few meaningful differences among demographic characteristics in how long respondents thought it would take to complete the census. The largest differences were between age groups, with a 17-percentage point difference between householders age 35 to 44 (37 percent believed the census will take less than 12 minutes to complete) and householders age 65 and older (20 percent). Appendix A shows the differences among demographic characteristics in respondents' anticipated time to complete the census.

⁽²⁾ Appendix A reports the standard errors for all point estimates.

 $^{(3) \} All \ estimates \ reported \ in \ the \ bar \ were \ rounded \ to \ whole \ numbers \ so \ that \ the \ sum \ of \ estimates \ equals \ 100\%.$

5.2 Where do gaps in knowledge about the census exist?

Most people were not familiar with the census.

A key research objective for the 2020 CBAMS Survey was to gauge the public's level of familiarity with and knowledge of the census. As shown in Figure 14, only 33 percent of respondents reported that they were "extremely familiar" or "very familiar" with the U.S. census. A plurality of respondents (46 percent) said that they were only "somewhat familiar" with the census, and nearly a quarter (21 percent) said that they were "not too familiar" or "not at all familiar" with the census.

Figure 14
Familiarity with the census.

Notes: (1) Unweighted sample sizes are in parentheses.

⁽²⁾ Appendix A reports the standard errors for all point estimates.

⁽³⁾ All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

As Figure 15 demonstrates, the largest differences in familiarity with the census existed between householders without a high school diploma and those with a college degree. A 19-percentage point gap separated householders with less than a high school diploma (22 percent were "extremely familiar" or "very familiar" with the census) and those with a bachelor's degree or higher (41 percent).

Figure 15
More educated householders were more familiar with the census than less educated householders.

Source: 2020 CBAMS Public Use Microdata Sample

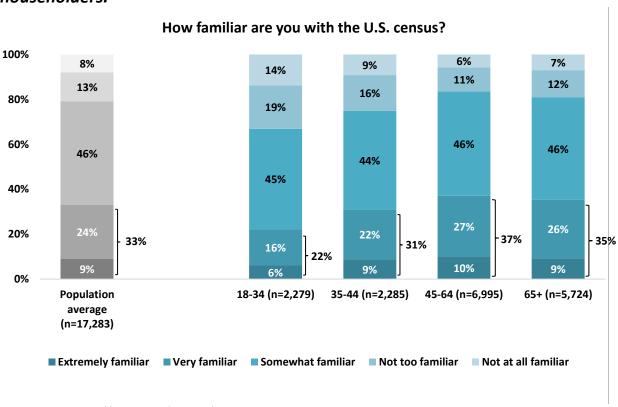

Notes: (1) Unweighted sample sizes are in parentheses.

⁽² Appendix A reports the standard errors for all point estimates.

⁽³⁾ All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

Figure 16 shows that fewer householders aged 18 and 34 were "extremely familiar" or "very familiar" with the census (22 percent) than those aged 45-64 (37 percent) and 65 or older (35 percent). This means there is a 15-point and 13-point gap in familiarity between the youngest and two oldest age groups. The percentage of householders aged 35 to 44 who are familiar with the census is firmly between the youngest and oldest groups at 31 percent.

Figure 16
Older householders were more familiar with the census than younger householders.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

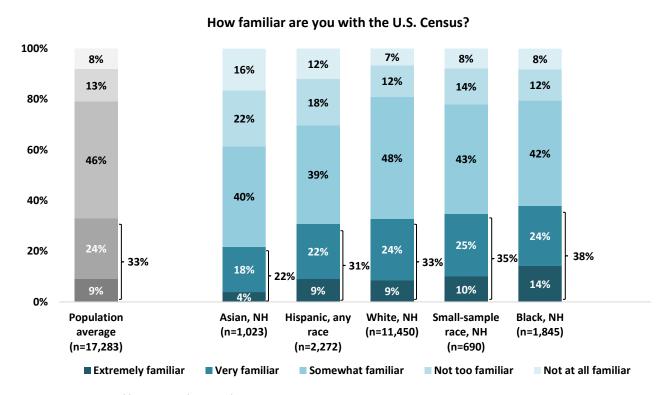

(2 Appendix A reports the standard errors for all point estimates.

(3) All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

³³ Householders aged 45-64 and aged 65+ are not statistically significant from each other, so although the point estimate is lower for 65+, these groups are statistically equivalent.

Among racial and Hispanic origin groups, NH Asians were least familiar with the census (22 percent responded "extremely familiar" or "very familiar"); NH Blacks/African Americans were the most familiar with the census (38 percent). Levels of familiarity were very similar among Hispanics (30 percent), NH Whites (33 percent), and NH small-sample size races (35 percent), falling between the levels for NH Asians and NH Blacks/African Americans.³⁴ Figure 17 shows levels of familiarity with the census by race and Hispanic origin.

Figure 17
NH Asians were least familiar with the census.

Source: 2020 CBAMS Public Use Microdata Sample

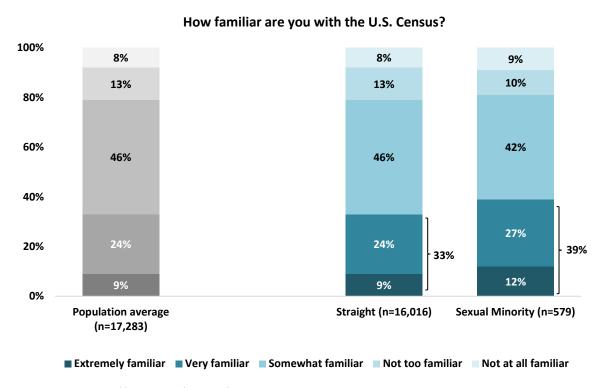

Notes: (1) Unweighted sample sizes are in parentheses.

⁽²⁾ Appendix A reports the standard errors for all point estimates.

³⁴ When familiarity is measured as "not too familiar" and "not at all familiar," NH Whites (19 percent), NH Blacks/African Americans (20 percent), and NH small-sample races (22 percent) had the smallest percentages of respondents who were not familiar with the census, and were statistically indistinguishable from one another. NH Asians (39 percent) remained the least familiar with the census.

There were also moderate differences in familiarity with the census based on householders' sexual orientation, proficiency in English, and proficiency in using the internet. As Figure 18 shows, sexual minorities (39 percent) were more familiar with the census than people who identified as "straight" (33 percent). A householder's ability to speak English "very well" also corresponded to a higher degree of familiarity with the census (34 percent) compared to their non-English-proficient counterparts (19 percent). Similarly, there was a 10 percentage-point gap between internet proficient respondents (34 percent) and those who were not proficient internet users (24 percent). Appendix A reports the point estimates and standard errors for all levels of familiarity with the census of these demographic characteristics.

Figure 18
Sexual minorities were more familiar with the census than straight respondents.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

⁽²⁾ Appendix A reports the standard errors for all point estimates.

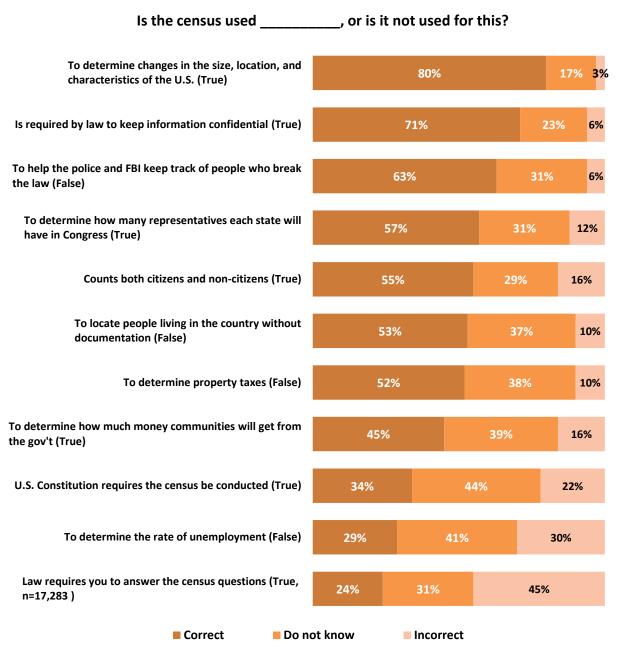

⁽³⁾ All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

Knowledge about the purpose and process of the census was uneven across uses and groups.

Respondents were asked to answer 11 true-or-false, knowledge-based questions about the census. (Seven were true and four were false.) Respondents' answers to these questions showed that they were knowledgeable about some of the purposes and processes of the census, but they also revealed that there were commonly held misconceptions. Two uses of the census were known by a majority of the respondents: determining the changes that have taken place in the size, location, and characteristics of the U.S. population (answered correctly by 80 percent) and that the Census Bureau is required by law to keep information confidential (71 percent).

However, people's misconceptions of the census ranged from the benign—30 percent falsely believed the census is used to determine the rate of unemployment—to the potentially problematic. For example, 10 percent of respondents believed the census is used to locate people living in the country without documentation, and another 37 percent "did not know" if it is used this way. Similarly, six percent believed the census helps the police and FBI keep track of people who break the law, and 31 percent were unsure whether or not the census is used this way. Figure 19 and Appendix A report the topline results for the 11 knowledge questions.

Figure 19
Most people knew that the census is used to determine changes in U.S. population, but there were misconceptions about other uses.

Source: CBAMS Public Use Microdata Sample

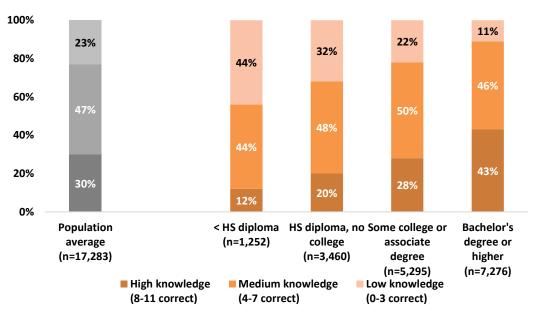

Note: (1) Appendix A reports the standard errors for all point estimates.

The largest differences in knowledge were between people of different education levels, followed by level of internet proficiency and race and Hispanic origin.

To better understand differences in knowledge of the census among demographic characteristics, the research team constructed knowledge categories of roughly equally sized "low," "medium," and "high" groupings and assigned each respondent to a category based on the number of questions they answered correctly.³⁵ Respondents who answered from zero to three of the 11 knowledge questions correctly were classified as "low knowledge," those who answered from four to seven questions correctly as "medium knowledge," and those who answered eight or more questions correctly as "high knowledge."

The largest gap in knowledge about the census was between people with different levels of education. Only 12 percent of people with less than a high school diploma correctly answered enough knowledge questions to be classified as "high knowledge," whereas 43 percent of people with at least a bachelor's degree were classified as "high knowledge"—a 31 percentage-point difference. Figure 20 shows the distribution of knowledge groups by education level.

Figure 20
Respondents with less than a high school diploma knew less about the census than respondents with higher levels of education.

Source: 2020 CBAMS Public Use Microdata Sample

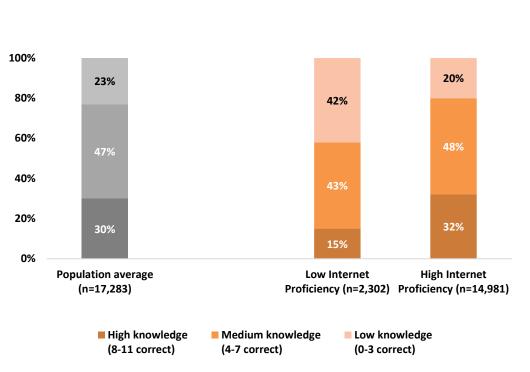

Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

³⁵ For additional research on how census knowledge varies across groups see García Trejo (2017) and García Trejo and Walejko (2018).

There were also significant knowledge differences between those with high and low internet proficiency. Thirty-two percent of internet-proficient respondents were classified as "high knowledge" compared to 15 percent of respondents who were not internet proficient—a 17-percentage-point difference. Figure 21 shows the distribution of knowledge groups by internet proficiency.

Figure 21
Respondents who are not internet proficient had lower levels of knowledge about the census than respondents who are internet proficient.

Source: 2020 CBAMS Public Use Microdata Sample (PUMS)

Notes: (1) Unweighted sample sizes are in parentheses.

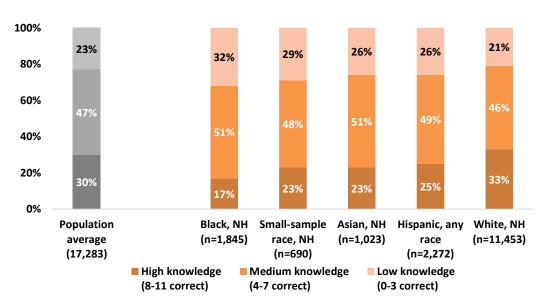

⁽²⁾ Appendix A reports the standard errors for all point estimates.

⁽³⁾ All estimates reported in the bar were rounded to the whole numbers so that the sum of estimates equals 100%.

There was a 16 percentage-point difference between the most knowledgeable and least knowledgeable race and Hispanic origin groups. NH Whites (33 percent) had the largest percentage of respondents classified as "high knowledge," and NH Blacks/African Americans (17 percent) had the lowest. Hispanics of any race or no race (25 percent), NH small-sample races (23 percent), and NH Asians (23 percent) had a statistically indistinguishable percentage of respondents classified as "high knowledge." Figure 22 shows the distribution of the knowledge groups by race and Hispanic origin.

Figure 22

NH Black/African Americans had lower levels of knowledge about the census than other race and Hispanic origin groups.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

 $(3) \ All \ estimates \ reported \ in \ the \ bar \ were \ rounded \ to \ whole \ numbers \ so \ that \ the \ sum \ of \ estimates \ equals \ 100\%.$

5.3 What barriers would prevent people from completing the census?

Roughly a quarter of people were concerned about the confidentiality of their answers to the 2020 Census.

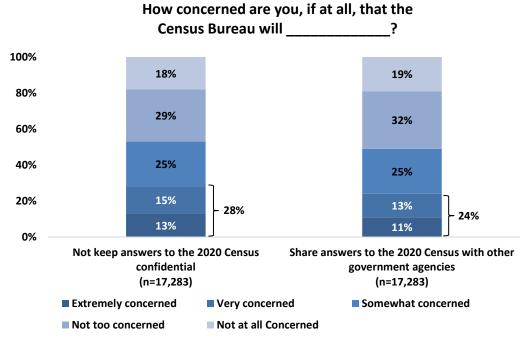

When asked how concerned they were that the Census Bureau would not keep answers to the 2020 Census confidential, 28 percent of respondents said that they were "extremely

³⁶ When knowledge is measured as "low knowledge," NH Blacks/African Americans (32 percent) and NH small-races (29 percent) have the highest percentage of respondents in the low knowledge category at statistically equal levels. NH Whites (21 percent) have a statistically significantly lower percentage of people in the "low knowledge" category than all other races.

concerned" or "very concerned," and another 25 percent responded that they were "somewhat concerned."

Respondents expressed similar levels of concern about the possibility that the Census Bureau might share answers to the 2020 Census with other government agencies. Twenty-four percent said they were "extremely concerned" or "very concerned" that the census will share their answers with other government agencies; another 25 percent said they were "somewhat concerned." Figure 23 shows the topline responses to questions about confidentiality concerns.

Figure 23
Concern about confidentiality of answers to the 2020 Census.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

 ${\it (2) Appendix A reports the standard errors for all point estimates.}$

 $(3) All \ estimates \ reported \ in \ the \ bar \ were \ rounded \ to \ whole \ numbers \ so \ that \ the \ sum \ of \ estimates \ equals \ 100\%.$

The largest gaps in concern about the confidentiality of answers were across race and Hispanic origin, education level, age, and level of English proficiency.

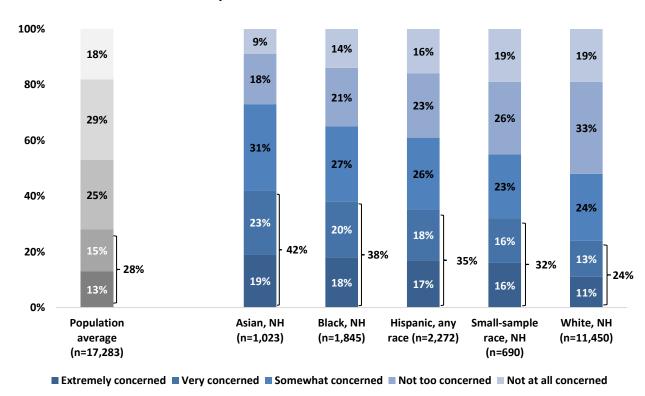

NH Asians (42 percent) and NH Blacks/African Americans (38 percent) were the most likely to be "extremely concerned" or "very concerned" that the Census Bureau would not keep answers to the 2020 Census confidential. The difference between the two groups is statistically indistinguishable.³⁷ These two groups, along with respondents from NH small-sample races (32

³⁷ When concern that answers will not be kept confidential is measured as "not too concerned" and "not at all concerned," NH Asians (27 percent) have a significantly smaller percentage of respondents who said they are "not too concerned" or "not at all concerned" than all other races. NH Whites (52 percent) remain the least concerned group.

percent) and Hispanics (35 percent), were significantly more likely to be concerned about confidentiality than NH Whites (24 percent). Figure 24 shows how each race and Hispanic origin groups responded to the confidentiality question.

Figure 24
All racial and Hispanic-origin groups were more concerned that the Census
Bureau would not keep their answers to the census confidential than NH Whites.

How concerned are you, if at all, that the Census Bureau will not keep answers to the 2020 Census confidential?

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses

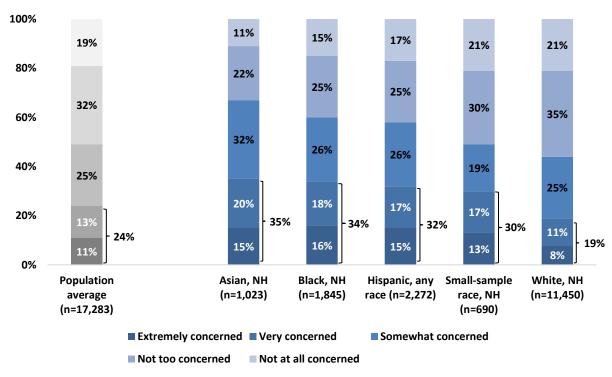

⁽²⁾ Appendix A reports the standard errors for all point estimates

⁽³⁾ All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%

At rates that are statistically equal to one another, NH Asians (35 percent), NH Blacks/African Americans (34 percent), Hispanics (32 percent), and NH small-sample races (30 percent) were also more concerned than NH Whites (19 percent) that their answers would be shared with other government agencies.³⁸ Figure 25 shows how race and Hispanic origin groups responded to the data sharing question.

Figure 25
All racial and Hispanic origin groups were more concerned that the Census
Bureau would share their answers with other government agencies than NH
Whites.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

 ${\it (2) Appendix A reports the standard errors for all point estimates.}$

(3) All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

Differences in concern across education levels were similar in size to those seen across race and Hispanic origin groups. People with less than a high school diploma were significantly more

³⁸ When concern that answers will be shared with other government agencies is measured as "not too concerned" and "not at all concerned," NH Asians (33 percent) have a significantly smaller percentage of respondents who said they were not concerned than all other races and people of Hispanic origins. NH Whites (56 percent) and NH small-sample races (51 percent) have the highest percentages of respondents who said they were not concerned at statistically equal rates.

concerned than those with higher levels of education that the Census Bureau would not keep their answers confidential (38 percent versus 22 percent) and that their answers might be shared with other government agencies (35 percent versus 18 percent).

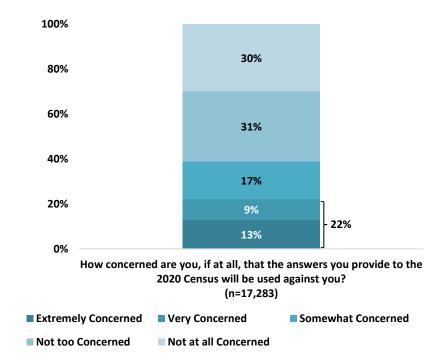

Concerns about confidentiality followed a similar pattern by age. Thirty-five percent of people 65 years old or older said they were "extremely concerned" or "very concerned" that the Census Bureau will keep their answers private, compared with only 19 percent of 18-34 year olds who said the same (16 percentage-point difference). Differences in concern across age groups is not as pronounced in the case of concern that answers will be shared with other government agencies. There is not a statistically significance difference in concern between 18-34 year olds (19 percent) and 35-44 (21 percent), and only a 10 and 8 percentage-point difference between these groups and people age 65 and older.

The rate of concern for people who are not proficient in English (37 percent) is 14 percentage points higher than the rate for those who are English proficient (23 percent). Appendix A reports responses by group for the confidentiality and data-sharing questions.

Nearly a quarter of respondents were "very concerned" or "extremely concerned" that their answers to the 2020 Census would be used against them.

As Figure 26 shows, when asked how concerned they were that the answers they provide to the 2020 Census would be used against them, 22 percent of respondents said that they were "extremely concerned" or "very concerned." Seventeen percent said that they were "somewhat concerned."

Figure 26
Fear of repercussions from answering the 2020 Census.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

 $(3) \ All \ estimates \ reported \ in \ the \ bar \ were \ rounded \ to \ whole \ numbers \ so \ that \ the \ sum \ of \ estimates \ equals \ 100\%.$

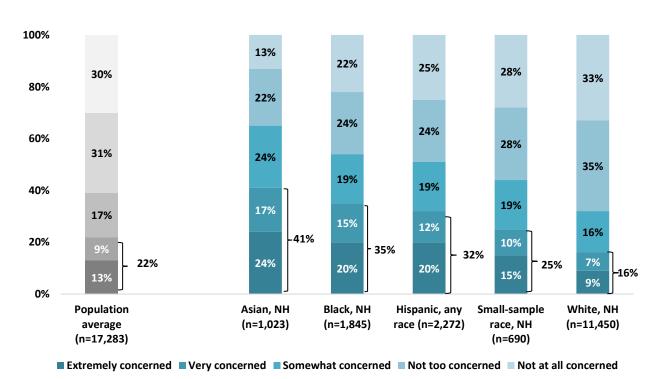

⁽²⁾ Appendix A reports the standard errors for all point estimates.

NH Asians, individuals not proficient in English, and those born outside the U.S. expressed the most concern that their answers to the 2020 Census would be used against them.

The largest differences in concern about repercussions from answering the 2020 Census were across racial and Hispanic origin groups. NH Asians (41 percent) had the largest percentage of respondents who said they were "extremely concerned" or "very concerned" that their answers to the 2020 Census would be used against them, followed by NH Blacks/African Americans (35 percent) and Hispanics (32 percent), and finally, people from NH small-sample races (25 percent). NH Whites (16 percent) were significantly less concerned than all other races that their answers would be used against them. Figure 27 shows the distribution of differences in levels of concern about repercussions by race and ethnicity.

Figure 27
All racial and Hispanic origin groups were more concerned their answers to the 2020 Census would be used against them than NH Whites.

Source: 2020 CBAMS Public Use Microdata Sample

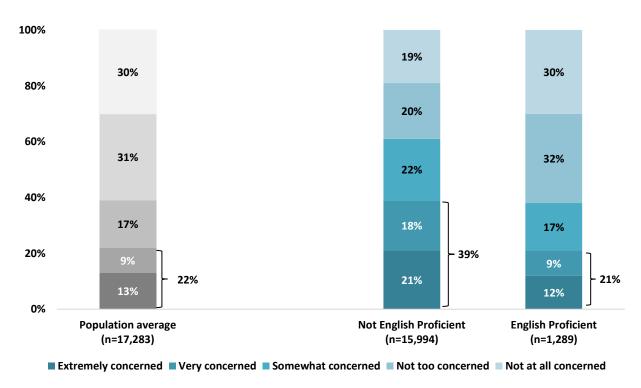

Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

Respondents' self-reported levels of English proficiency also related to their level of repercussion concerns. Thirty-nine percent of respondents who were not proficient in English reported that they were "extremely concerned" or "very concerned" that their answers would be used against them. Conversely, only 21 percent of English-proficient respondents reported the same level of concern. Figure 28 shows the distribution of responses by English proficiency.

Figure 28
Respondents who were not proficient in English were more concerned that their answers would be used against them than English proficient respondents.

Notes: (1) Unweighted sample sizes are in parentheses

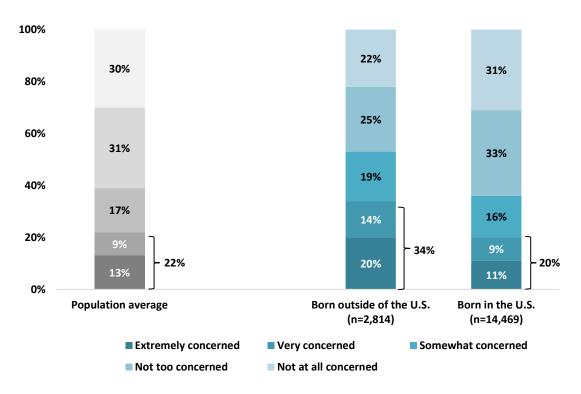

⁽²⁾ Appendix A reports the standard errors for all point estimates

⁽³⁾ All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%

Similarly, Figure 29 shows that people who were born outside the U.S. (34 percent) were significantly more concerned than those born in the U.S. (20 percent) that their answers to the census would be used against them. Appendix A contains all group estimates and standard errors for the repercussion question.

Figure 29
Respondents who were born outside the United States were more concerned that their answers would be used against them than those born in the United States.

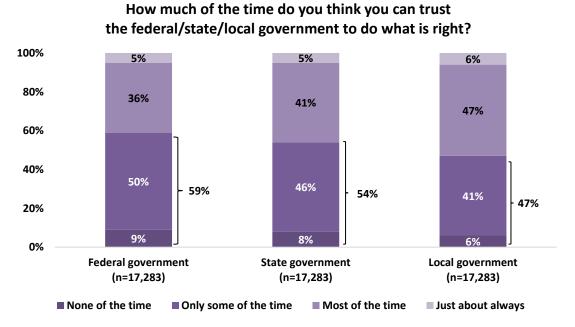

Source: 2020 CBAMS Public Use Microdata Sample Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

Distrust in all levels of government was high, with highest levels of distrust in the federal government.

The decennial census is sponsored and conducted by a federal agency (i.e., the U.S. Census Bureau), so it is possible that participation in the census could be affected by trust in the government, especially the Federal government. Responses to the 2020 CBAMS Survey demonstrate that approximately three in five survey respondents (59 percent) said they trust the federal government to do what is right "only some of the time" or "none of the time." Rates of distrust were slightly lower for state and local governments, at 54 percent and 47 percent, respectively. As discussed in the Background (Section 2) of this report, these rates of distrust mirror those found in other public opinion surveys, such as the American National Election Studies, that show trust in the government has been declining in the U.S. for decades. Figure 30 and tables in Appendix A show the topline point estimates and standard errors for the three government trust questions on the 2020 CBAMS Survey.

Figure 30
Majorities did not trust federal and state governments to do what is right most of the time.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

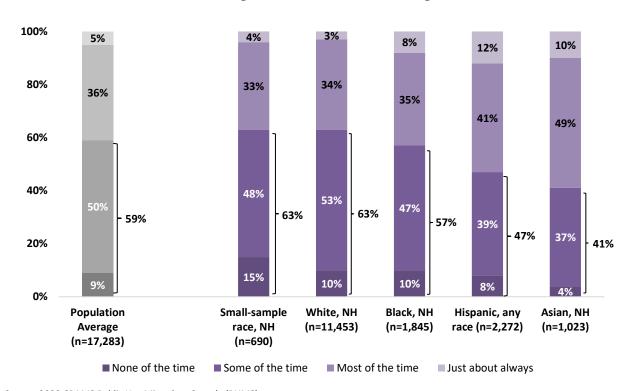

(2) Appendix A reports the standard errors for all point estimates.

There were clear differences in trust in government within race and Hispanic origin, birth country, and English proficiency groups.

NH small-sample races (63 percent) and NH Whites (63 percent) had significantly higher levels of distrust in the federal government than all other races. In the case of trust in their state governments, NH Whites (47 percent), small-sample races (59 percent), and NH Blacks/African Americans (54 percent) were equally distrusting. However, NH Whites (47 percent) are not as distrusting of their local governments as NH small-sample races (55 percent) and NH Blacks/African Americans (54 percent). Across all levels of government, Hispanics of any race and NH Asians reported significantly lower levels of distrust (i.e., higher levels of trust) in the government than all other race and Hispanic origin groups. These differences in trust between people of different races mirror the trends reported in the American National Election Studies (ANES) Time Series Study data (American National Election Studies, 2017). Figure 31 shows how each race and Hispanic origin group responded to the question on trust in the federal government.

Figure 31
NH Whites, NH small-sample races, and NH Blacks had the highest levels of distrust in the federal government, Hispanics, and NH Asians the lowest.

How much of the time do you think you can trust the FEDERAL government to do what is right?

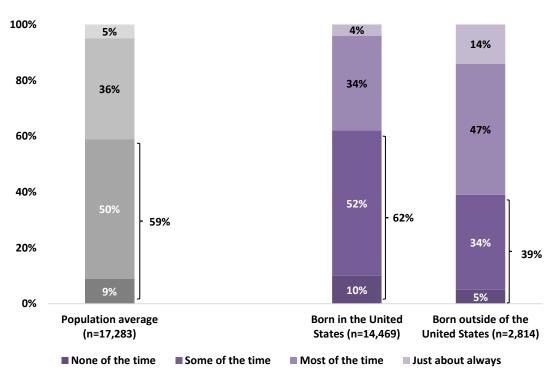

Source: 2020 CBAMS Public Use Microdata Sample (PUMS) Notes: (1) Unweighted sample sizes are in parentheses.

- (2) Appendix A reports the standard errors for all point estimates.
- (3) All estimates reported in the bar were rounded to the whole numbers so that the sum of estimates equals 100%.

People born in the U.S. were more distrusting of all levels of government than people born outside the U.S. Sixty-two percent of people born in the U.S. said that they distrusted the federal government compared to 39 percent of people born outside of the United States. The gap was similarly sized for distrust in the respondent's state government (22 points) and slightly smaller for local government (16 points). This finding is consistent with recent research that shows immigrants are more likely than native-born U.S. residents to trust the federal government (Baldassare, Bonner, Dykman, & Lopes, 2018). Figure 32 details how respondents born in and outside of the US reported trusting the federal government.

Figure 32
People born in the U.S. were more distrusting of the federal government than people born outside the U.S.

How much of the time do you think you can trust the FEDERAL government to do what is right?

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

⁽²⁾ Appendix A reports the standard errors for all point estimates.

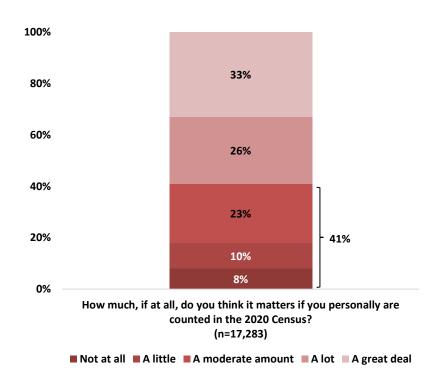

⁽³⁾ All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

Among respondents who are English proficient, 62 percent said they trusted the federal government "some of the time" (52 percent) or "none of the time" (10 percent), compared to 38 percent of respondents who are not proficient in English (34 percent "some of the time," 4 percent "none of the time")—a difference of 23 percentage points. The difference for trust in state government was 21 percentage points (56 percent for English proficient respondents, 36 percent for those not proficient in English); it was 12 percentage points (48 percent versus 36 percent) for trust in local government.

Many did not feel that it matters whether they are counted in the 2020 Census.

When survey respondents were asked if it matters whether they personally are counted in the 2020 Census, 41 percent said it matters "a moderate amount," "a little," or "not at all." Figure 33 reports the topline distribution of responses to the question measuring perceived efficacy of participation in the 2020 Census.

Figure 33
Perceptions of the efficacy of participating in the 2020 Census.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

⁽²⁾ Appendix A reports the standard errors for all point estimates.

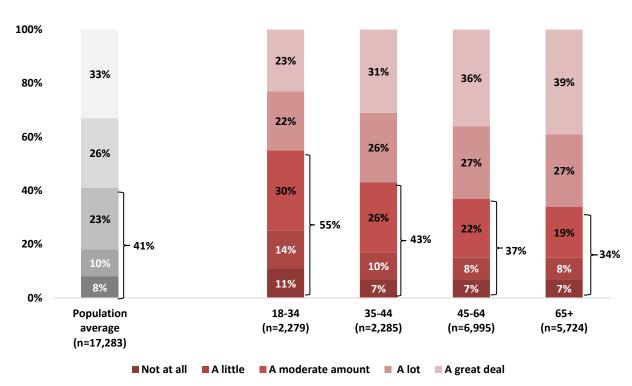

⁽³⁾ All estimates reported in the bar were rounded to the whole numbers so that the sum of estimates equals 100%.

The largest differences in perceptions of the efficacy of participating were across age and race groups.

The largest difference in perceptions of the importance of personally being counted in the census was between the young and old. As Figure 34 demonstrates, over half of people age 18 to 34 (55 percent) felt that it matters "not at all," "a little," or "a moderate amount." Only 34 percent of people age 65 and over expressed the same level of pessimism about the efficacy of participating.

Figure 34
Younger respondents were less likely to believe that participating in the census matters relative to older respondents.

Source: 2020 CBAMS Public Use Microdata Sample

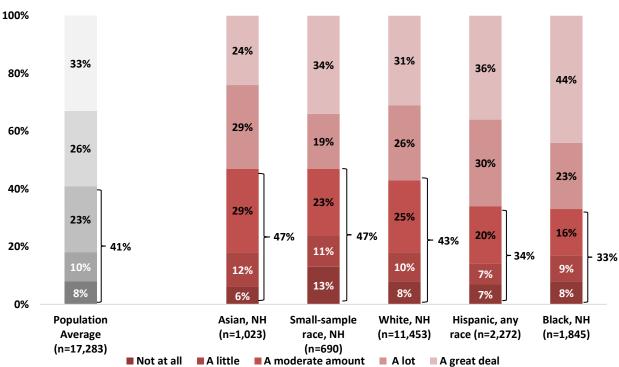

Notes: (1) Unweighted sample sizes are in parentheses.

 ${\it (2) Appendix A reports the standard errors for all point estimates.}$

When asked how much they thought it mattered if they were personally counted in the 2020 Census, NH Asians (47 percent), NH small-sample races (47 percent), and NH Whites (43 percent) responded at statistically equal levels that they felt it mattered "not at all," "a little," or "a moderate amount." All had significantly lower levels of efficacy than Hispanics (34 percent) and NH Blacks/African Americans (33 percent), only a third of whom tended to feel it mattered, at most, "a moderate amount" if they were counted in the 2020 Census. Figure 35 shows responses by race and ethnicity.

Figure 35
NH Asians, NH Whites, and NH small-sample races were least likely to say being counted in the 2020 Census mattered for them. NH Blacks and Hispanics were the most likely.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

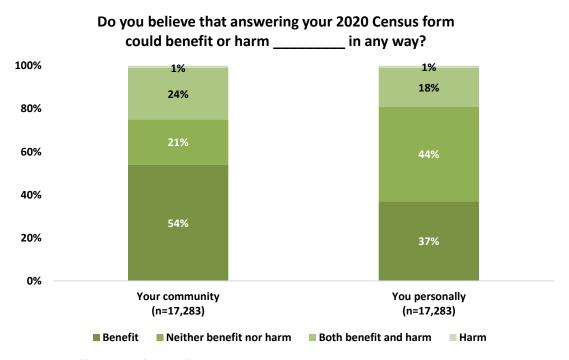

⁽²⁾ Appendix A reports the standard errors for all point estimates.

⁽³⁾ All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

More people predicted participating in the 2020 Census could benefit their community than them personally.

When asked whether they believed answering the 2020 Census could benefit or harm their community, a majority of people (54 percent) said that they believed the census would benefit their community. However, only 37 percent said they thought answering the census would benefit them personally. A plurality (44 percent) said they believed answering the 2020 Census would "neither benefit nor harm" them personally. Only one percent of respondents said they believed answering the census would harm their communities or harm them personally. Figure 36 and tables in Appendix A show topline estimates and standard errors for the questions on the potential effects of participation in the census.

Figure 36
A majority of people said that they believed the census could benefit their community, while a minority reported it could benefit them personally.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

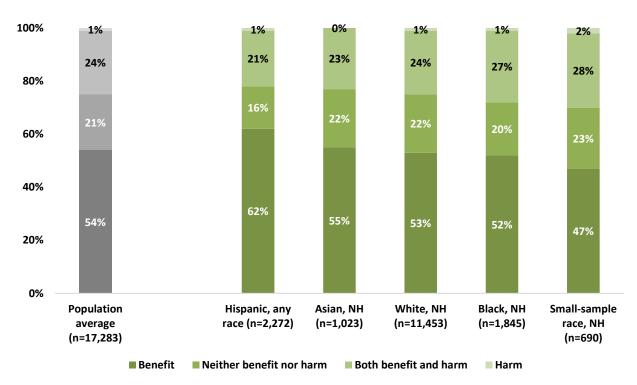

The largest group differences in perceived benefits or harm from participating in the census were across race and Hispanic origin groups.

In the case of potential effects on the respondent's *community*, a significantly higher percentage of Hispanics (62 percent) than any other race and Hispanic origin group said that answering the census could benefit their community. Conversely, people of NH small-sample races (47 percent) were significantly less likely than all other races to believe that answering the census could benefit their community.

There were smaller, yet statistically significant, differences in perceptions of the other potential effects (i.e., harm, neither benefit nor harm, and both benefit and harm) that participating in the 2020 Census could have on the community between race and Hispanic origin groups. Figure 37 shows how each race and Hispanic origin group responded.

Figure 37
Hispanics are the most likely race or Hispanic origin group to perceive potential benefits to their community from participating in the 2020 Census.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

 ${\it (2) Appendix A reports the standard errors for all point estimates.}$

There were large race and Hispanic origin group differences in perceptions of the *personal* effects of participating in the census. Again, Hispanics (48 percent) were significantly more likely than all other race and Hispanic origin groups to perceive a personal benefit from answering the 2020 Census. NH Whites (34 percent) and NH small-sample races (33 percent) were less likely than all other races to believe that answering the 2020 Census would benefit them personally.

A significantly larger percentage of NH Whites (48 percent) than all other races said answering the census would "neither benefit nor harm" them personally. On the other hand, NH Blacks/African Americans (23 percent) and people of NH small-sample races (23 percent) had the largest percentage of respondents who believed that participating in the 2020 Census could "both benefit and harm" them personally. Figure 31 shows how each race and ethnic group responded.

Figure 38
A larger percentage of NH Whites than any other race or Hispanic origin group said that answering the census could "neither benefit nor harm" them personally.

Do you believe that answering your 2020 Census form could benefit or harm you personally in any way?

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

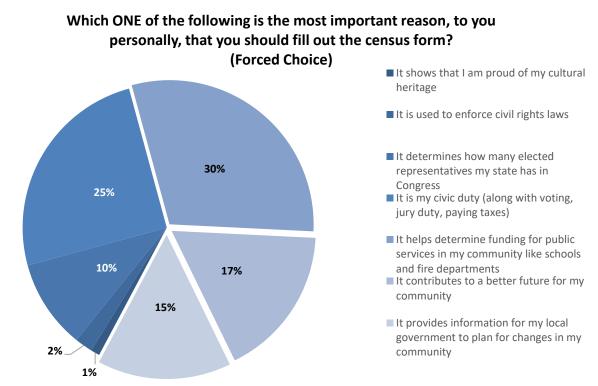

5.4 What would potentially motivate people to complete the census?

The 2020 CBAMS Survey asked a series of questions about different uses of census information in order to gauge which uses respondents found most important. The purpose was to identify content for the communications campaign that could motivate respondents to fill out the 2020 Census form. Motivators were examined by first asking respondents to indicate how important each of a series of uses was to them personally, followed by a single question in which respondents were forced to choose from that same series the most important reason to fill out the census.

Funding for public service was the most popular motivator.

When forced to choose the single most important use of the census, householders were most likely (30 percent) to choose "It helps determine funding for public services in my community." "It is my civic duty" was selected by 25 percent of householders, and "It is used to enforce civil rights laws" and "It shows that I am proud of my cultural heritage" each received two percent of responses or less. Figure 39 shows the result of the forced-choice question.

Figure 39
Forced-choice motivators.

Source: 2020 CBAMS Public Use Microdata Sample Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

Differences across demographic characteristics were minimal between each forced-choice option. The largest difference was among those who indicated civic duty was the most important reason to respond to the census: 12 percentage points separated Hispanics (16 percent) from NH Whites (28 percent) and respondents who speak English proficiently (26 percent) from those who do not speak English proficiently (14 percent).

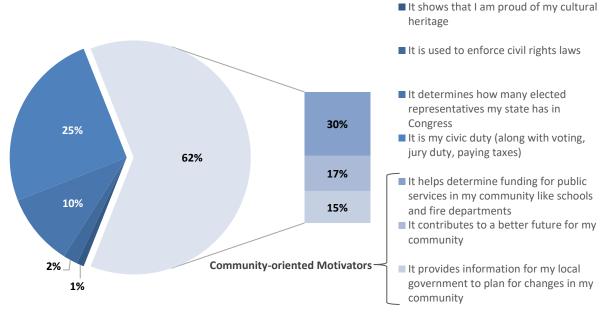

Community-oriented motivators were most popular with younger people, nonwhites, those who were not English proficient, and the less educated.

However, larger differences across demographic characteristics emerged when all of the community-oriented responses were combined into one category. Community-oriented motivators included determining funding for public services in the community (chosen by 30 percent of householders), contributing to a better future for the community (17 percent), and providing information for local government to plan for changes in the community (15 percent). Together, these three motivators made up 62 percent of the weighted responses (see Figure 40).

Figure 40
Forced-choice community-oriented motivators combined.

Which ONE of the following is the most important reason, to you personally, that you should fill out the census form?

(Forced Choice, Community-oriented Motivators Combined)

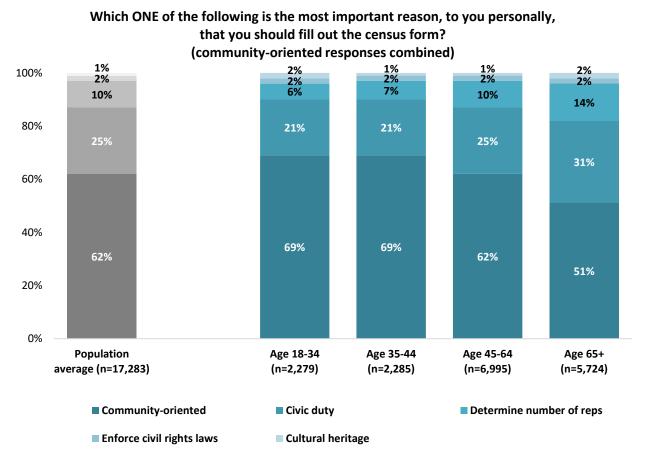

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

 ${\it (2) Appendix A reports the standard errors for all point estimates.}$

With community-oriented uses of census information combined, it becomes apparent that community-oriented motivators were most popular with younger, non-whites, those who were not English proficient, and less educated. As shown in Figure 41, nearly seven in ten householders (69 percent) in the 18-34 and 35-44 age groups indicated that a community-oriented use of the census was most important to them. Popularity in community-oriented uses of the census declines for older householders. About half (51 percent) of those 65 and older indicated that they believed community-oriented uses were the most important use of census information.

Figure 41
Community-oriented motivators were most popular with younger householders.

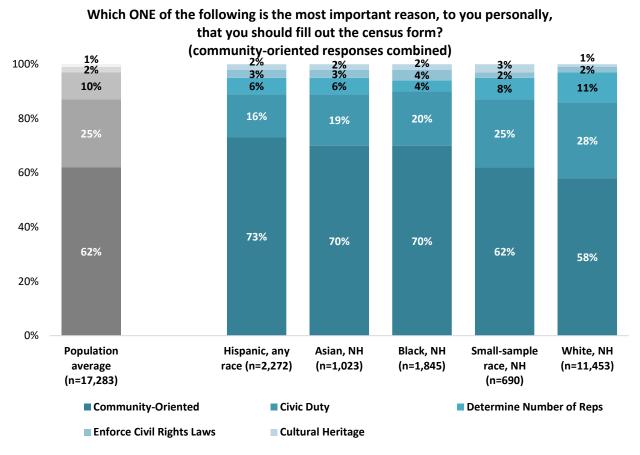

Source: 2020 CBAMS Public Use Microdata Sample (PUMS) Notes: (1) Unweighted sample sizes are in parentheses

(2) Appendix A reports the standard errors for all point estimates

NH Whites were the least likely (58 percent) among race and Hispanic origin demographic groups to choose a community-oriented use. Hispanics (73 percent) were most likely to specify a community-oriented use, followed by NH Asians (70 percent), NH Blacks/African Americans (70 percent), and NH small-sample races (62 percent). Figure 42 shows the distribution of community-oriented responses by race and Hispanic origin group.

Figure 42
Community-oriented motivators were most popular with people of Hispanic origin.

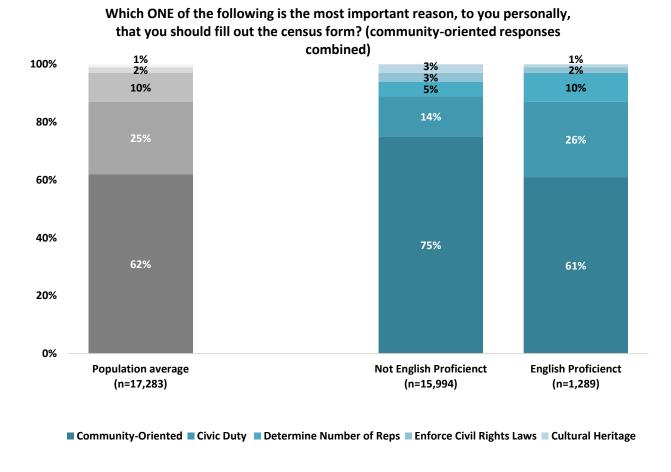

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

Figure 43 shows a 14 percentage-point gap separating English proficient respondents (61 percent) who chose a community-oriented motivator from non-English proficient respondents (75 percent) who chose a community-oriented motivator.

Figure 43
Community-oriented motivators were most popular with those not proficient in English.

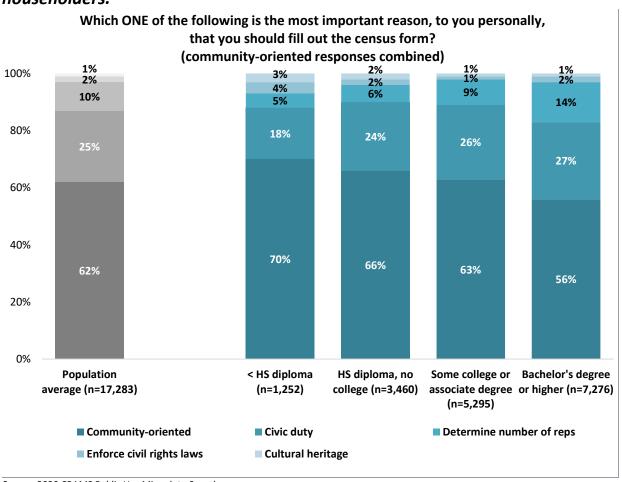

Source: 2020 CBAMS Public Use Microdata Sample Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

As Figure 44 demonstrates, a trend similar to what was found with age groups emerged for respondents' levels of education, in that community-oriented uses of the census resonated more with lower-educated respondents than with highly educated respondents. Householders with a high school diploma or less (70 percent) chose a community-oriented use of census information as the most important motivator compared to 56 percent of those with a college degree.

Figure 44
Community-oriented motivators were most popular with lower-educated householders.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

⁽²⁾ Appendix A reports the standard errors for all point estimates.

 $^{(3) \} All \ estimates \ reported \ in \ the \ bar \ were \ rounded \ to \ whole \ numbers \ so \ that \ the \ sum \ of \ estimates \ equals \ 100\%.$

In all four cases mentioned above, the demographic characteristic (i.e., age, race and Hispanic origin, English proficiency, and education level) that was least likely to specify a community-oriented reason to complete the census was among the most likely to indicate that the most important reason to participate in the census was either to fulfill their civic duty or determine the number of elected representatives their state received in Congress. For instance, fewer householders 65 or older than respondents of any other age group specified a community-oriented motivator, and they were the most likely to choose civic duty or determining the number of elected representatives as the most important use of the census. There is a bifurcation of respondents such that some demographic characteristics gravitated to community-oriented motivations and others gravitated to civic duty or determining the number of elected representatives as the most important reason to complete the census. Appendix A shows the weighted distribution of the forced-choice motivator for all demographic characteristics.

There was also a disconnect between knowledge about the census (as discussed in Section 5.2) and reasons people might participate in the census. Although a plurality of householders (30 percent) cited the census's role in determining funding for public services as the single most important reason to fill out the census, only 45 percent of respondents knew that the census is used to determine how much government funding communities receive. . Similarly, 25 percent cited civic duty as the top reason to participate in the census, yet only 25 percent knew that they were required by law to fill out the census form, and 66 percent did not know that the U.S. Constitution mandates that the census be conducted.

Not only are community-oriented uses of the census the strongest motivators overall, they are also strongest among those who reported they were least likely to respond. Among those who reported they were "somewhat likely," "not too likely," or "not at all likely" to respond to the census, 69 percent chose community-oriented uses as the most important reason to respond. The second most frequent use was fulfilling their civic duty (20 percent). In contrast, 58 percent of respondents who reported a high likelihood of responding to the census found a community-oriented use the most motivating, and 28 percent found civic duty the most motivating. Figure 45 shows the distribution of forced-choice motivation responses by reported likelihood to fill out the census form.

Figure 45
Community-oriented motivators are most important to those unlikely to fill out a census form.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

 $^{{\}it (2) Appendix A reports the standard errors for all point estimates.}$

When asked to rate the importance of each use of the census independently, respondents rated funding for public safety services and roads and highways as the most important.

As shown in Figure 46, when asked how important each motivator was separately, over 90 percent of householders rated public safety services – such as hospitals, fire departments, and police departments – and roads and highways as "extremely important" or "very important." Only six percentage points separated any key demographic characteristics, indicating that these four public services are seen as uniformly important among all householders.

Job training, public transportation, and daycare for children were among the least important public services, rated "extremely important" or "very important" by 61 percent, 57 percent, and 51 percent, respectively. Figure 46 shows the topline distribution for each public service.

Figure 46
Fire department, police department, hospitals, and roads and highways are the most important public services.

Notes: (1) Unweighted sample sizes are in parentheses.

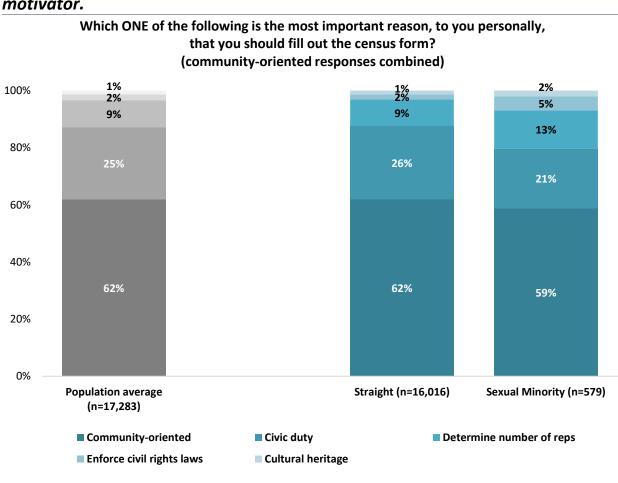

(2) Appendix A reports the standard errors for all point estimates.

(3) All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

After public safety services and roads and highways, enforcing civil rights laws was rated the next most important motivator in the isolated questions with 86 percent of respondents indicating that it was "extremely important" or "very important." At the same time, only two percent of respondents chose it as the most important reason to complete the census form in

the forced-choice version of the question. Of the demographic characteristics examined, sexual minorities were most likely to choose enforcing civil rights law as the most important motivator in the force-choice version of the motivator question (5 percent), which is three percentage points more than straights (see Figure 47). This gap could indicate enforcing civil rights laws is an issue that resonated with the public in general, but it may not be among the topmost motivators to complete the census form or respondents may not associate the enforcement of civil rights law with the census.

Figure 47
Sexual minorities are most likely to choose civil rights enforcement as a motivator.

Notes: (1) Unweighted sample sizes are in parentheses.

 ${\it (2) Appendix A reports the standard errors for all point estimates.}$

Figure 48 shows the topline results for motivators asked in isolation. Appendix A includes the distributions of responses by each group for each motivator questions asked in isolation.

Figure 48
Beyond public services, enforcing civil rights laws was considered the second most important motivator, but not a topmost reason to fill out the census.

Source: 2020 CBAMS Public Use Microdata Sample

Notes: (1) Unweighted sample sizes are in parentheses.

(2) Appendix A reports the standard errors for all point estimates.

(3) All estimates reported in the bar were rounded to whole numbers so that the sum of estimates equals 100%.

6. Conclusions

The U.S. Census Bureau's Communications Research and Analytics Team and Team Y&R conducted the 2020 CBAMS Survey to provide an evidentiary foundation for the 2020 Census Integrated Partnership and Communications program. The findings and insights described in this report serve as key building blocks for the 2020 IPC's communications campaign to motivate self-response in the decennial census.

Reponses to the 2020 CBAMS Survey revealed that fewer than seven in 10 householders plan to participate in the 2020 Census. This rate is cause for concern because the decennial census is designed to count every person in the United States, and actual response rates are often lower than intended response rates. This highlights the importance of understanding key census attitudes, barriers, and motivators as a way to avert low rates of self-response to the 2020 Census.

The 2020 CBAMS Survey also revealed that the public has low levels of familiarity with and knowledge about the census. What people knew about the census was largely limited to the fact that it is used to determine changes in the U.S. population and that it has bearing on the number of congressional representatives each state will have. People incorrectly believed, or were uncertain, that the census is used to keep track of people who are in the country without documentation or those who have committed a crime.

The largest barriers to participation in the 2020 Census were concerns about data confidentiality, concerns about repercussions from participating, pessimism about the efficacy of participating, and distrust in all levels of government. More people believed that responding to the 2020 Census would bring benefits to their community than believed it would benefit them personally. This focus on community benefits over personal benefits was also evident in people's reported motivations to participate in the census. A plurality of householders felt that "funding for public services," such as fire and police departments, hospitals, and roads and highways, was the most important reason to participate in the census.

Although community funding emerged as the top reason people said they would participate in the census, less than half of respondents knew that the census was used to determine community funding. This underscores the importance of the IPC's campaign to increase awareness and understanding of the benefits communities can receive from an accurate enumeration in the 2020 Census.

Creative strategists and multicultural partners constructing the IPC's communication campaign will use the data on intention to respond and the other attitudes and barriers described in this report to make informed decisions about a variety of aspects of the communications campaign. The overarching focus of the campaign will be to promote self-response through paid, earned, owned, and social communications. This will require people understand the purpose of the census and its value to their community, as well as the process for participation. This does not mean simply educating people, but also making sure to reframe census participation as easy, important, and desirable. It is vital that the campaign helps people understand the very specific ways that the census benefits their community and reassures them that participation is safe.

7. Acknowledgements

Contributions from Team Y&R were performed under the Integrated Communications Contract YA1323-16-CQ-0003/Order 7 for the 2020 Census awarded to Young & Rubicam. Any views expressed are those of the authors and not necessarily those of the U.S. Census Bureau or Young & Rubicam.

The results published in this paper have undergone disclosure avoidance review and were released with approval CBDRB-FY18-422 (approved August 13, 2018).

Table A.6 Responses to 2020 CBAMS Survey Knowledge Questions

Is the census used to	, or is it	not used for this?)
Knowledge Question	Answered Correctly	Answered Incorrectly	Answered Don't Know
The census is used to determine what changes			
have taken place in the size, location, and	80.31%	2.82%	16.88%
characteristics of the people in the United	(0.367)	(0.154)	(0.348)
States. [True]			
The Census Bureau is required by law to keep	71.33%	6.24%	22.43%
information confidential. [True]	(0.409)	(0.211)	(0.382)

The census is used to help the police and FBI keep track of people who break the law. [False]	63.17%	5.95%	30.88%
	(0.432)	(0.215)	(0.417)
The census is used to determine how many representatives each state will have in Congress. [True]	56.49%	12.20%	31.31%
	(0.440)	(0.301)	(0.418)
The census counts both citizens and non-citizens. [True]	55.38%	15.84%	28.77%
	(0.443)	(0.333)	(0.408)
The census is used to locate people living in the country without documentation. [False]	53.04%	10.00%	36.96%
	(0.441)	(0.271)	(0.432)
The census is used to determine property taxes. [False]	51.79%	9.92%	38.28%
	(0.441)	(0.274)	(0.435)
The census is used to determine how much money communities will get from the government. [True]	45.07%	16.26%	38.66%
	(0.439)	(0.332)	(0.435)
The U.S. Constitution requires the census be conducted. [True]	34.21%	21.54%	44.25%
	(0.415)	(0.366)	(0.442
The census is used to determine the rate of unemployment. [False]	29.31%	29.51%	41.17%
	(0.398)	(0.406)	(0.438)
The law requires you to answer the census questions. [True]	24.54%	44.84%	30.62%
	(0.377)	(0.440)	(0.416)

Table A.7 Differences in Knowledge by Group

Appendix B: Additional Weighting Specifications, Weighting Targets, Nonresponse Analysis

Base Weights

Base weights were defined as the inverse of the probability of selection for each case. The probability of selection was calculated as $\frac{n_h}{N_h}$, where n_h was the size of the sample drawn for strata h and N_h was the total number of households in strata h. The base weight was the inverse of the probability of selection, $\frac{N_h}{n_h}$. In order to estimate base weights from the Public use Microdata Sample dataset, mean base weights were calculated within each strata.

Nonresponse Weight Adjustment

There was also a nonresponse adjustment to account for varying response rates across strata. Respondents and nonrespondents were categorized into nonresponse adjustment cells within each strata. The nonresponse adjustment factors were calculated as $\frac{\sum w_c}{\sum w_{resp,c}}$, where the numerator was the sum of the base weights of all sampled records in a particular cell, c, and the denominator was the sum of the base weights of all responding records in that cell. The nonresponse-adjusted weight was the product of the base weight and the nonresponse adjustment:

$$\frac{N_h}{n_h} * \frac{\sum w_c}{\sum w_{resp,c}}$$

The weights above were the input weight for the third step in the weighting process, post-stratification weighting using iterative proportional fitting (i.e., raking. The combinations and levels of variables used in the raking procedure can be found in table B1 and B2 below.

Table B1: 2020 CBAMS Weighting Targets, Weighted and Unweighted Responses

OMB No.: 0607-0978 Approval Expires: 08/31/2020

Accessibility – Linked to webpage https://www.census.gov/about/policies/privacy/privacy-policy.html#par textimage 1 with the following language:

The Census Bureau is committed to making online forms and other public documents on its Internet server accessible to all. Currently, we are reviewing our web sites and making modifications to those pages, which are not in compliance with the Americans with Disabilities Act. We use Hypertext Markup Language (HTML) to create pages that are generally accessible to persons using screen-reading devices, and we are careful in our construction of HTML documents to ensure maximum accessibility. We include alternate text describing graphics.

Many Census Bureau Internet documents are in ASCII or HTML formats. These documents are accessible to persons using screen-reading software. We also have a large number of documents in Adobe Acrobat PDF (Portable Document Format) files. Currently, many people using screen-reading devices cannot read documents in PDF format, specifically those that were created from a scanned hard copy.

Adobe Systems, Inc. is producing various products designed to make Adobe Acrobat documents accessible to persons using screen-reading software. Adobe's <u>accessibility web pages</u> describe their efforts.

To allow us to better serve those with visual disabilities who are having difficulty accessing PDF documents; you may contact us directly for further assistance at 301-763-INFO (4636), 800-923-8282, or by submitting a request at ask.census.gov.

Privacy – Linked to webpage https://www.census.gov/privacy/ with the following language: We are committed to handling your information responsibly. Your information is kept confidential. This commitment applies to the individuals, households, and businesses that answer our surveys, and to those browsing our website.

Security – Linked to webpage [URL] with the following language:

Data are Encrypted at all Times

Our secure servers use Hypertext Transfer Protocol over Secure Socket Layer (HTTPS) to ensure the encrypted transmission of data between your browser and the U.S. Census Bureau. This means that instead of sending readable text over the Internet, both your browser and our servers encode (scramble) all text using a security key. That way, personal data sent to your browser and data you send back are extremely difficult to decode in the unlikely event of interception by an unauthorized party. As a result of this, your browser must be capable of using the required encryption protocol and strength in order to connect to our servers. If you cannot connect to our secure servers, please upgrade to a newer browser.

Third Party Identity Proofing

Our secure servers use a digital certificate (digital ID) issued by a trusted, third party Certificate Authority (CA) as proof of identity. The only way to be sure of a web site's authenticity is to view their digital ID. In this way, you can be assured that you are not being "spoofed" or tricked by an imposter. The digital ID will contain information such as the name of the organization that owns the web site, the site's registered internet name/address, and the name of the Certification Authority under which the digital ID was issued. The method for viewing a web site's Digital Certificate/ID varies depending on the web browser. Please see your browser's "Help" information for instructions on how to verify a web site's identity.

Burden – Linked to webpage [URL] with the following language:

How long will this survey take?

The Census Bureau estimates that, for the average household, this survey will take about 15 minutes to complete, including the time for reviewing the instructions and answers.

Page Title: Census_Introduction

Section Display Q1 (display Q1)

The U.S. census is the count of all the people who live in the United States. It happens every 10 years. It asks questions such as how many people live in your household, their age, race, and ethnicity. This survey is not the census. The next census is in 2020.

Section Display Q1 (display_Q1)

El Censo de los EE. UU. es el conteo de todas las personas que viven en los Estados Unidos. Se realiza cada 10 años. Este pregunta cuántas personas viven en su hogar, su edad, raza, y origen étnico. Esta encuesta no es el censo. El próximo censo se llevará a cabo en el 2020.

Section Q1 (familiarity)

How familiar are you with the U.S. census? Select only one answer.

- 1) Extremely familiar
- 2) Very familiar
- 3) Somewhat familiar
- 4) Not too familiar
- 5) Not at all familiar

Section Q1 Spanish (familiarity)

¿Qué tan familiarizado(a) está con el censo de los Estados Unidos? Seleccione solo una respuesta.

- 1) Extremadamente familiarizado(a)
- 2) Muy familiarizado(a)
- 3) Algo familiarizado(a)
- 4) No muy familiarizado(a)

5) Nada familiarizado(a)

Logic:

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

Section Q2 (participation1)

If the census were held today, how likely would you be to fill out the census form? *Select only one answer*.

- 1) Extremely likely
- 2) Very likely
- 3) Somewhat likely
- 4) Not too likely
- 5) Not at all likely

Section Q2 Spanish (participation1)

Si el censo se llevara a cabo hoy, ¿qué tan probable sería que usted llenara el formulario del censo? Seleccione solo una respuesta.

- 1) Extremadamente probable
- 2) Muy probable
- 3) Algo probable
- 4) No muy probable
- 5) Nada probable

Logic:

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

/* END PAGE */

/* START PAGE */

Page Title: Census_Participation

Section Q3 (participation2)

Thinking about most people you know, if the census were held today how likely would they be to fill out the census form? *Select only one answer*.

- 1) Extremely likely
- 2) Very likely
- 3) Somewhat likely
- 4) Not too likely
- 5) Not at all likely

Section Q3 Spanish (participation2)

Si el censo se llevara a cabo hoy, ¿qué tan probable sería que la mayoría de las personas que usted conoce llenaran el formulario del censo? *Seleccione solo una respuesta*.

- 1) Extremadamente probable
- 2) Muy probable
- 3) Algo probable
- 4) No muy probable
- 5) Nada probable

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

Section Q4 (participation3)

Based on your past experience or just your best guess, how long do you think it would take you personally to fill out the 2020 Census? *Please enter a number in minutes*.

_____ minutes

Section Q4 Spanish (participation3)

De acuerdo con su experiencia anterior o simplemente según sus cálculos, ¿cuánto tiempo cree que le tomaría a usted llenar el Censo del 2020? *Anote el número de minutos*.

_____ minutos

Logic:

- Open end numeric
- Range: 0 to 500
- If a respondent enters a number that falls outside of the above range, display the following message (soft edit):
 - o For English: "Please enter a number between 0 and 500."
 - o For Spanish: "Por favor ingrese un número entre 0 y 500."

Section Q5 (participation4)

How likely are you to encourage someone you know to fill out the 2020 Census form? *Select only one answer*.

- 1) Extremely likely
- 2) Very likely
- 3) Somewhat likely
- 4) Not too likely
- 5) Not at all likely

Section Q5 Spanish (participation4)

¿Qué tan probable es que usted anime a algún conocido a que llene el formulario del Censo del 2020? Seleccione solo una respuesta.

- 1) Extremadamente probable
- 2) Muy probable
- 3) Algo probable
- 4) No muy probable
- 5) Nada probable

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

/* END PAGE */

/* START PAGE */

Page Title: Internet_Usage1

Section Q6 (internet1)

About how often do you use the internet? Select only one answer.

- 1) Almost constantly
- 2) Several times a day
- 3) About once a day
- 4) Several times a week
- 5) Once a week
- 6) Less than once a week
- 7) Never

Section Q6 Spanish (internet1)

Aproximadamente, ¿con qué frecuencia usa usted internet? Seleccione solo una respuesta.

- 1) Casi constantemente
- 2) Varias veces al día
- 3) Alrededor de una vez al día
- 4) Varias veces a la semana
- 5) Una vez a la semana
- 6) Menos de una vez a la semana
- 7) Nunca

Logic:

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

Section Q7 (internet2)

Which devices do you often use to access the internet? Please select all that apply.

- 1) Desktop or laptop computer
- 2) Smartphone (for example an iPhone, Android, Blackberry)
- 3) Tablet computer (for example an iPad, Samsung Galaxy Tab, Kindle Fire)
- 4) I don't use the internet /* EXCLUSIVE */

Section Q7 Spanish (internet2)

¿Qué aparatos usa con mayor frecuencia para acceder a internet? Seleccione todas las que correspondan.

1) Computadora de escritorio o computadora portátil

- 2) Teléfono inteligente (Smartphone como iPhone, Android, Blackberry)
- 3) Tableta (como iPad, Samsung Galaxy Tab, Kindle Fire)
- 4) No uso internet /* EXCLUSIVE */

- Multiple responses permitted
- Do NOT rotate answer choices
- If respondents select response 4 ("I don't use the internet"/ "No uso internet"), other responses would be grayed out.

/* END PAGE */

/* START PAGE */

Page Title: Internet_Usage2

Section Q8 (internet3)

Which of the following comes closest to your view? Select only one answer.

- 1) I prefer to fill out paper forms instead of online forms
- 2) I prefer to fill out online forms instead of paper forms
- 3) I have no preference between completing online or paper forms /* DO NOT ROTATE */

Section Q8 Spanish (internet3)

¿Cuál de las siguientes frases se acerca más a su punto de vista? Seleccione solo una respuesta.

- 1) Prefiero llenar formularios impresos en vez de formularios por internet
- 2) Prefiero llenar formularios por internet en vez de formularios impresos
- No tengo preferencia entre llenar formularios por internet o impresos /* DO NOT ROTATE
 */

Logic:

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

/* END PAGE */

/* START PAGE */

Page Title: Use of Census1

Section Display Q9 (display_Q9)

The following questions are about the 2020 Census in general. There is no need to look up this information. As you understand it, will the 2020 Census be used in any of the following ways or not?

Section Display Q9 Spanish (display Q9)

Las siguientes preguntas son sobre el Censo del 2020 en general. No es necesario que busque esta información. Según lo que usted entiende, ¿el Censo del 2020 se usará de algunas de las siguientes maneras o no?

/* RANDOM ROTATE SERIES */

Section Q9 (use1)

Is the census used to decide how much money communities will get from the government, or is it not used for this? *Select only one answer.*

- 1) Yes, used for this
- 2) No, not used
- 3) Don't know

Section Q9 Spanish (use1)

¿El censo se usa para decidir cuánto dinero del gobierno recibirán las comunidades, o no se usa para este fin? Seleccione solo una respuesta.

- 1) Sí, se usa para esto
- 2) No, no se usa para esto
- 3) No lo sé

Logic:

- Only one response permitted
- Do NOT rotate answer choices

Section Q16 (use8)

Is the census used to determine the rate of unemployment, or is it not used for this? *Select only one answer.*

- 1) Yes, used for this
- 2) No, not used
- 3) Don't know

Section Q16 Spanish (use8)

¿El censo se usa para determinar la tasa de desempleo, o no se usa para este fin? Seleccione solo una respuesta.

- 1) Sí, se usa para esto
- 2) No, no se usa para esto
- 3) No lo sé

Logic:

- Only one response permitted
- Do NOT rotate answer choices

Section Q15 (use7)

Does the census count both citizens and non-citizens, or only citizens? Select only one answer.

- 1) Yes, used for counting both citizens and non-citizens
- 2) No, used only for counting citizens
- 3) Don't know

Section Q15 Spanish (use7)

¿El censo cuenta tanto a los ciudadanos como a quienes no son ciudadanos, o solo a los ciudadanos? Seleccione solo una respuesta.

- 1) Sí, se usa para contar tanto a los ciudadanos como a quienes no son ciudadanos
- 2) No, se usa para contar solo a los ciudadanos
- 3) No lo sé

- Only one response permitted
- Do NOT rotate answer choices

Section Q12 (use4)

Is the census used to determine property taxes, or is it not used for this? Select only one answer.

- 1) Yes, used for this
- 2) No, not used
- 3) Don't know

Section Q12 Spanish (use4)

¿El censo se usa para determinar los impuestos a la propiedad, o no se usa para este fin? Seleccione solo una respuesta.

- 1) Sí, se usa para esto
- 2) No, no se usa para esto
- 3) No lo sé

Logic:

- Only one response permitted
- Do NOT rotate answer choices

/* RANDOM ROTATE SERIES */

Page Title: Use_of_Census2

Section Q10 (use2)

Is the census used to decide how many representatives each state will have in Congress, or is it not used for this? *Select only one answer*.

- 1) Yes, used for this
- 2) No, not used
- 3) Don't know

Section Q10 Spanish (use2)

¿El censo se usa para decidir cuántos representantes tendrá cada estado en el Congreso, o no se usa para este fin? Seleccione solo una respuesta.

- 1) Sí, se usa para esto
- 2) No, no se usa para esto
- 3) No lo sé

Logic:

- Only one response permitted
- Do NOT rotate answer choices

Section Q13 (use5)

Is the census used to help the police and FBI keep track of people who break the law, or is it not used for this? *Select only one answer*.

- 1) Yes, used for this
- 2) No, not used
- 3) Don't know

Section Q13 Spanish (use5)

¿El censo se usa para ayudar a la policía y al FBI a mantener un registro de las personas que no cumplen la ley, o no se usa para este fin? Seleccione solo una respuesta.

- 1) Sí, se usa para esto
- 2) No, no se usa para esto
- 3) No lo sé

Logic:

- Only one response permitted
- Do NOT rotate answer choices

Section Q14 (use6)

Is the census used to locate people living in the country without documentation, or is it not used for this? *Select only one answer.*

- 1) Yes, used for this
- 2) No, not used
- 3) Don't know

Section Q14 Spanish (use6)

¿El censo se usa para ubicar a las personas indocumentadas que viven en el país, o no se usa para este fin? Seleccione solo una respuesta.

- 1) Sí, se usa para esto
- 2) No, no se usa para esto
- 3) No lo sé

Logic:

- Only one response permitted
- Do NOT rotate answer choices

Section Q11 (use3)

Is the census used to see what changes have taken place in the size, location, and characteristics of the people in the United States, or is it not used for this? *Select only one answer*.

- 1) Yes, used for this
- 2) No, not used
- 3) Don't know

Section Q11 Spanish (use3)

¿El censo se usa para ver qué cambios han ocurrido en el tamaño, la ubicación y las características de la población en los Estados Unidos, o no se usa para este fin? *Seleccione solo una respuesta*.

- 1) Sí, se usa para esto
- 2) No, no se usa para esto
- 3) No lo sé

Logic:

- Only one response permitted
- Do NOT rotate answer choices

/* END SERIES */

/* END PAGE */

Page Title: Legal Requirements

Section Q17 (legal1)

Does the law require you to answer the census questions, or is this not required by law? Select only one answer.

- 1) Yes, required by law
- 2) No, not required by law
- 3) Don't know

Section Q17 Spanish (legal1)

¿La ley exige que conteste las preguntas del censo, o no lo exige? Seleccione solo una respuesta.

- 1) Sí, la ley lo exige
- 2) No, la ley no lo exige
- 3) No lo sé

Logic:

- Only one response permitted
- Do NOT rotate answer choices

Section Q18 (legal2)

Is the Census Bureau required by law to keep information confidential, or is this not required by law? *Select only one answer.*

- 1) Yes, required by law
- 2) No, not required by law
- 3) Don't know

Section Q18 Spanish (legal2)

¿La ley exige que la Oficina del Censo mantenga la información confidencial, o no lo exige? Seleccione solo una respuesta.

- 1) Sí, la ley lo exige
- 2) No, la ley no lo exige

3) No lo sé

Logic:

- Only one response permitted
- Do NOT rotate answer choices

Section Q19 (legal3)

Does the U.S. Constitution require that the census be conducted, or is this not something the Constitution requires? *Select only one answer*.

- 1) Yes, Constitution requires
- 2) No, Constitution does not require
- 3) Don't know

Section Q19 Spanish (legal3)

¿La Constitución de los Estados Unidos exige que el censo se lleve a cabo, o no es algo que exija la Constitución? Seleccione solo una respuesta.

- 1) Sí, la Constitución lo exige
- 2) No, la Constitución no lo exige
- 3) No lo sé

Logic:

- Only one response permitted
- Do NOT rotate answer choices

Page Title: All_Motivators
Section Q34 (all motivators)

Which ONE of the following is the most important reason, to you personally, that you should fill out the census form? *Select only one answer*.

- 1) It helps determine funding for public services in my community, like schools and fire departments
- 2) It determines how many elected representatives my state has in Congress
- 3) It is used to enforce civil rights laws
- 4) It provides information for my local government to plan for changes in my community
- 5) It shows that I am proud of my cultural heritage
- 6) It is my civic duty (along with voting, jury duty, paying taxes)
- 7) It contributes to a better future for my community

Section Q34 Spanish (all motivators)

¿CUÁL de las siguientes razones es la más importante para usted personalmente por la que debería llenar el formulario del censo? Seleccione solo una respuesta.

- Ayuda a determinar el financiamiento para servicios públicos en mi comunidad, como escuelas y estaciones de bomberos
- 2) Determina cuántos representantes electos tiene mi estado en el Congreso
- 3) Se usa para hacer cumplir las leyes de derechos civiles
- 4) Proporciona información a mi gobierno local para planificar cambios en mi comunidad
- 5) Demuestra que estoy orgulloso(a) de mi herencia cultural
- 6) Es mi deber cívico (como votar, cumplir con el deber de servir en un jurado, pagar impuestos)
- 7) Contribuye a un mejor futuro para mi comunidad

Logic:

- Only one response permitted
- Random rotate answer choices

/* END PAGE */

/* START PAGE */

Page Title: Trust_in_Government

Section Q35 (trust federal)

How much of the time do you think you can trust the FEDERAL government to do what is right? *Select only one answer*.

- 1) Just about always
- 2) Most of the time
- 3) Only some of the time
- 4) None of the time

Section Q35 Spanish (trust federal)

¿Con qué frecuencia puede confiar en que el gobierno FEDERAL hará lo correcto? Seleccione solo una respuesta.

- 1) Casi siempre
- 2) La mayor parte del tiempo
- 3) Solo parte del tiempo
- 4) En ningún momento

Logic:

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

Section Q36 (trust_state)

How much of the time do you think you can trust your STATE government to do what is right? *Select only one answer*.

- 1) Just about always
- 2) Most of the time
- 3) Only some of the time
- 4) None of the time

Section Q36 Spanish (trust state)

¿Con qué frecuencia puede confiar en que su gobierno ESTATAL hará lo correcto? Seleccione solo una respuesta.

- 1) Casi siempre
- 2) La mayor parte del tiempo
- 3) Solo parte del tiempo
- 4) En ningún momento

Logic:

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

Section Q37 (trust local)

How much of the time do you think you can trust your LOCAL government to do what is right? *Select only one answer.*

- 1) Just about always
- 2) Most of the time
- 3) Only some of the time

4) None of the time

Section Q37 Spanish (trust local)

¿Con qué frecuencia puede confiar en que su gobierno LOCAL hará lo correcto? Seleccione solo una respuesta.

- 1) Casi siempre
- 2) La mayor parte del tiempo
- 3) Solo parte del tiempo
- 4) En ningún momento

Logic:

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

/* END PAGE */

/* START PAGE */

Page Title: Confidentiality

Section Q38 (concern1)

How concerned are you, if at all, that the Census Bureau will not keep answers to the 2020 Census confidential? *Select only one answer.*

- 1) Extremely concerned
- 2) Very concerned
- 3) Somewhat concerned
- 4) Not too concerned
- 5) Not at all concerned

Section Q38 Spanish (concern1)

¿Qué tan preocupado(a) está, si está preocupado(a), de que la Oficina del Censo no mantenga las respuestas al Censo del 2020 confidenciales? *Seleccione solo una respuesta*.

- 1) Extremadamente preocupado(a)
- 2) Muy preocupado(a)
- 3) Algo preocupado(a)
- 4) No muy preocupado(a)
- 5) Nada preocupado(a)

Logic:

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

Section Q39 (concern2)

How concerned are you, if at all, that the Census Bureau will share answers to the 2020 Census with other government agencies? *Select only one answer*.

- 1) Extremely concerned
- 2) Very concerned
- 3) Somewhat concerned

- 4) Not too concerned
- 5) Not at all concerned

Section Q39 Spanish (concern2)

¿Qué tan preocupado(a) está, si está preocupado(a), de que la Oficina del Censo comparta las respuestas al Censo del 2020 con otras agencias gubernamentales? Seleccione solo una respuesta.

- 1) Extremadamente preocupado(a)
- 2) Muy preocupado(a)
- 3) Algo preocupado(a)
- 4) No muy preocupado(a)
- 5) Nada preocupado(a)

Logic:

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

Section Q40 (concern3)

How concerned are you, if at all, that the answers you provide to the 2020 Census will be used against you? *Select only one answer*.

- 1) Extremely concerned
- 2) Very concerned
- 3) Somewhat concerned
- 4) Not too concerned
- 5) Not at all concerned

Section Q40 Spanish (concern3)

¿Qué tan preocupado(a) está, si está preocupado(a), de que las respuestas que usted le proporcione al Censo del 2020 se usen en su contra? *Seleccione solo una respuesta*.

- 1) Extremadamente preocupado(a)
- 2) Muy preocupado(a)
- 3) Algo preocupado(a)
- 4) No muy preocupado(a)
- 5) Nada preocupado(a)

Logic:

- Only one response permitted
- If QORDER = C1 then show written order of answer choices
- If QORDER = C2 then show reversed order of answer choices

Page Title: Civic_Participation

Section Q44 (civic participation)

Which of the following have you ever done, if any? Please select all that apply.

- 1) Voted in an election
- 2) Signed a petition (including online petitions)
- 3) Posted your own thoughts or comments on political or social issues online
- 4) Volunteered at any organization
- 5) Worn a button/bracelet/pin for an issue or cause
- 6) Contacted, or attempted to contact, a politician or civil servant to express your views
- 7) Attended a neighborhood or community meeting
- 8) Participated in an organized protest or rally of any kind
- 9) Donated money or raised funds for social or political activity
- 10) None of the above /* EXCLUSIVE */ /* DO NOT ROTATE */

Section Q44 Spanish (civic participation)

¿Cuál de las siguientes acciones ha realizado usted, si ha realizado alguna? Seleccione todas las que correspondan.

- 1) Voté en una elección
- 2) Firmé una petición (incluyendo peticiones por internet)
- 3) Publiqué mis propias ideas o comentarios sobre asuntos políticos o sociales por internet
- 4) Trabajé como voluntario(a) en una organización
- 5) Usé una insignia/brazalete/prendedor a favor de una causa
- Me comuniqué o intenté comunicarme con un político o funcionario público para expresar mis puntos de vista
- 7) Asistí a una reunión de mi vecindario o de la comunidad
- 8) Participé en algún tipo de protesta o manifestación organizada
- 9) Doné dinero o recaudé fondos para una actividad social o política
- 10) Ninguna de las anteriores /* EXCLUSIVE */ /* DO NOT ROTATE */

Logic:

- Multiple responses permitted
- Random rotate answer choices
- If respondents select response 10 ("None of the above"/ "Ninguna de las anteriores"), other responses would be grayed out.

Section Q45 (election2016)

Thinking about the 2016 general election for President and other offices, did you happen to vote in the election, or did things come up that kept you from voting? *Select only one answer.*

- 1) Yes, voted in 2016 election
- 2) No, did not vote in 2016 election

Section Q45 Spanish (election2016)

Piense en las elecciones generales del 2016 para presidente y otros cargos. ¿Votó usted en las elecciones o surgió algo que le impidió votar? *Seleccione solo una respuesta*.

- 1) Sí, voté en las elecciones del 2016
- 2) No, no voté en las elecciones del 2016

Logic:

- Only one response permitted
- Do NOT rotate answer choices

/* END PAGE */

/* START PAGE */

Page Title: Age Gender

Section Display before Q46 (display Q46)

These final questions are for statistical purposes only.

Section Display before Q46 Spanish (display Q46)

Estas últimas preguntas se hacen solo con propósitos estadísticos.

Section Q46 (birth year)

What year were you born? Please enter a number.

Section Q46 Spanish (birth year)

¿En qué año nació usted? Por favor ingrese un número.

Logic:

- Open end numeric
- Range: 1900 to 2017
- If a respondent enters a number that falls outside of the above range, display the following message (soft edit):
 - o For English: "Please enter a number between 1900 and 2017."
 - o For Spanish: "Por favor ingrese un número entre 1900 y 2017."

Section Q47 (gender)

Are you... Select only one answer.

- 1) Male
- 2) Female

Section Q47 Spanish (gender)

Usted es... Seleccione solo una respuesta.

1) Hombre

2) Mujer

Logic:

- Only one response permitted
- Do NOT rotate answer choices

/* END PAGE */

/* START PAGE */

Page Title: Education

Section Q48 (education)

What is the highest degree or level of school you have completed? Select only one answer.

- 1) No high school
- 2) Some high school
- 3) High school graduate or equivalent (for example GED)
- 4) Some college, but degree not received or is in progress
- 5) Associate degree (for example AA, AS)
- 6) Bachelor's degree (for example BA, BS, AB)
- 7) Graduate degree (for example master's, professional, doctorate)

Section Q48 Spanish (education)

¿Cuál es el grado o nivel de educación más alto que ha completado? Seleccione solo una respuesta.

- 1) No fui a la escuela secundaria o preparatoria (high school)
- 2) Algo de escuela secundaria o preparatoria (high school)
- Graduado(a) de escuela secundaria o preparatoria (high school) o equivalente (por ejemplo, GED)
- 4) Algo de universidad, pero no recibí un título o todavía estoy estudiando
- 5) Título de asociado universitario (por ejemplo, AA, AS)
- 6) Título de licenciatura universitaria (por ejemplo, BA, BS, AB)
- 7) Título de posgrado (por ejemplo, título de maestría, título profesional, doctorado)

Logic:

- Only one response permitted
- Do NOT rotate answer choices

/* END PAGE */

/* START PAGE */

Page Title: Race_Ethnicity Section Q49 (hispanics)

Are you of Hispanic, Latino, or Spanish origin?

- 1) No, not of Hispanic, Latino, or Spanish origin
- 2) Yes, Mexican, Mexican American, Chicano
- 3) Yes, Puerto Rican
- 4) Yes, Cuban

5) Yes, another Hispanic, Latino, or Spanish origin (specify origin, for example, Argentinian, Colombian, Dominican, Nicaraguan, Salvadoran, Spaniard, and so on) /* SPECIFY */ ## OPEN-ENDED RESPONSE UP TO 60 CHARACTERS ##

Section Q49 Spanish (hispanics)

¿Es usted de origen hispano, latino, o español?

- 1) No, no soy de origen hispano, latino, o español
- 2) Sí, mexicano, mexicanoamericano, chicano
- 3) Sí, puertorriqueño
- 4) Sí, cubano
- 5) Sí, de otro origen hispano, latino, o español (especifique el origen, por ejemplo, argentino, colombiano, dominicano, nicaragüense, salvadoreño, español, etc.) /* SPECIFY */ ## OPEN-ENDED RESPONSE UP TO 60 CHARACTERS ##

Logic:

- Only one response permitted
- Do NOT rotate answer choices
- If respondents choose any answer choices other than 5 ("Yes, another Hispanic, Latino, or Spanish origin"/ "Sí, de otro origen hispano, latino, o español"), remove and/or disable text field for answer choice 5.

Section Q50 (race)

What is your race? Please select all that apply.

- 1) White
- 2) Black or African American
- American Indian or Alaska Native (specify name of enrolled or principal tribe) /* SPECIFY */ ## OPEN-ENDED RESPONSE UP TO 60 CHARACTERS ##
- 4) Asian Indian
- 5) Chinese

Do you speak a language other than English at home? Select only one answer.

1) Yes

2) No

Section Q52 Spanish (language1)

¿Habla algún otro idioma que no sea inglés en su casa? Seleccione solo una respuesta.

- Sí
- 2) No

Logic:

- Only one response permitted
- Do NOT rotate answer choices
- Go to question 53 (language2) if respondents choose answer choice 1 (Yes)
- Skip to question 55 (marital_status) if respondents choose answer choice 2 (No) or skip this question

/* END PAGE */

/* START PAGE */

Page Title: Language2

Section Q53 (language2)

What is this language? If more than one, other than English what language do you speak most often at home? *Specify language*.

Section Q53 Spanish (language2)

¿Qué idioma? Si es más de uno, ¿además del inglés, qué idioma habla con mayor frecuencia en su casa? Especifique el idioma.

Logic:

- Display this question only to respondents who choose answer choice 1 (Yes) in Q52 (language1)
- Open end
- Limit to 30 characters

Section Q54 (language3)

How well do you speak English? Select only one answer.

- 1) Very well
- 2) Well
- 3) Not well
- 4) Not at all

Section Q54 Spanish (language3)

¿Qué tan bien habla usted inglés? Seleccione solo una respuesta.

- 1) Hablo muy bien
- 2) Hablo bien
- 3) No hablo bien
- 4) Nada

Logic:

- Display this question only to respondents who choose answer choice 1 (Yes) in Q52 (language1)
- Only one response permitted
- Do NOT rotate answer choices

/* END PAGE */

/* START PAGE */

Page Title: Household

Section Q55 (marital status)

What is your marital status? Select only one answer.

- 1) Now married
- 2) Divorced
- 3) Separated
- 4) Widowed
- 5) Never married

Section Q55 Spanish (marital status)

¿Cuál es su estado civil? Seleccione solo una respuesta.

- 1) Casado(a) actualmente
- 2) Divorciado(a)
- 3) Separado(a)
- 4) Viudo(a)
- 5) Nunca me he casado

Logic:

- Only one response permitted
- Do NOT rotate answer choices

Section Q56 (household1)

Are there any children 5 years old or younger (including babies) currently living in your household? *Select only one answer.*

- 1) Yes
- 2) No

Section Q56 Spanish (household1)

¿Actualmente viven en su hogar niños de 5 años de edad o menores (incluyendo bebés)? Seleccione solo una respuesta.

- 1) Sí
- 2) No

Logic:

- Only one response permitted
- Do NOT rotate answer choices

Section Q57 (household2)

Are there any children ages 6 to 17 years old currently living in your household? Select only one answer.

- 1) Yes
- 2) No

Section Q57 Spanish (household2)

¿Actualmente viven en su hogar niños de 6 a 17 años de edad? Seleccione solo una respuesta.

- 1) Sí
- 2) No

Logic:

- Only one response permitted
- Do NOT rotate answer choices

Section Q58 (household3)

How many total people – adults and children – currently live in your household, including yourself? *Please enter a number*.

Section Q58 Spanish (household3)

¿Cuántas personas en total – adultos y niños – viven actualmente en su hogar, incluyéndose a sí mismo(a)? Por favor ingrese un número.

Logic:

- Open end numeric
- Range: 1 to 40
- If a respondent enters a number that falls outside of the above range, display the following message (soft edit):
 - o For English: "Please enter a number between 1 and 40."
 - o For Spanish: "Por favor ingrese un número entre 1 y 40."

/* END PAGE */

/* START PAGE */

Page Title: Rent

Section Q59 (rent)

Do you rent or own your house or apartment? Select only one answer.

- 1) Own
- 2) Rent
- 3) Occupied without payment of rent

Section Q59 Spanish (rent)

¿Usted alquila su casa o apartamento o es dueño(a)? Seleccione solo una respuesta.

- 1) Dueño(a)
- 2) Alquilo

3) Ocupo la vivienda sin pagar alquiler

Logic:

- Only one response permitted
- Do NOT rotate answer choices

/* END PAGE */

/* START PAGE */

Page Title: Sexual Orientation

Section Q60 (sexual orientation)

Which of the following best represents how you think of yourself? Select only one answer.

- 1) Lesbian or gay
- 2) Straight, that is not lesbian or gay
- 3) Bisexual
- 4) Something else (please specify) /* SPECIFY */ ## OPEN-ENDED RESPONSE UP TO 60 CHARACTERS ##
- 5) I don't know the answer

Section Q60 Spanish (sexual orientation)

¿Cuál de las siguientes describe cómo usted se identifica a sí mismo(a)? Seleccione solo una respuesta.

- 1) Lesbiana o gay
- 2) Heterosexual, es decir ni lesbiana ni gay
- 3) Bisexual

2020 Census Planning Survey

U.S. DEPARTMENT OF COMMERCE conomics and Statistics Administration U.S. CENSUS BUREAU

Thank you for participating. Completing this short 15-minute survey will help the U.S. Census Bureau conduct the next census in 2020. This survey is not the census.

Start here

Respond online today at: respond.census.gov/plan

OR

Complete this form and mail it back as soon as possible.

Dé vuelta a esta encuesta para completarla en español o responda hoy en respond.census.gov/plan.

This survey should be completed by the person who typically opens the mail for your household. We will keep your answers confidential.

To learn more about this survey go to: www.census.gov/plan or call 1-866-599-5128 toll-free.

Please continue to the next page.

FORM CM-Q11(ES) (01-25-2018)

The U.S. census is the count of all the people who live in the United States. It happens every 10 years. It asks questions such as how many people live in your household, their age, race, and ethnicity. This survey is not the census. The next census is in 2020.	How likely are you to encourage someone you know to fill out the 2020 Census form? Mark (X) ONE box. Extremely likely Very likely
	Somewhat likely
How familiar are you with the U.S. census? Mark (X) ONE box.	Not too likely
Extremely familiar	Not at all likely
Very familiar	<u> </u>
Somewhat familiar	6 About how often do you use the internet? Mark (X) ONE box.
Not too familiar	Almost constantly
Not at all familiar	Several times a day
	About once a day
If the census were held today, how likely would you be to fill out the census form?	Several times a week
Mark (X) ONE box.	Once a week
Extremely likely	Less than once a week
Very likely	Never
Somewhat likely	
Not too likely	Which devices do you often use to access the internet? Mark (X) all that apply.
Not at all likely	Desktop or laptop computer
Thinking about most people you know, if the census were held today how likely would they	Smartphone (for example an iPhone, Android, Blackberry)
be to fill out the census form? Mark (X) ONE box.	Tablet computer (for example an iPad, Samsung Galaxy Tab, Kindle Fire)
Extremely likely	I don't use the internet
Very likely	
Somewhat likely	Which of the following comes closest to your
Not too likely	view? Mark (X) ONE box. I prefer to fill out paper forms instead of
Not at all likely	online forms
	I prefer to fill out online forms instead of paper forms
Based on your past experience or just your best guess, how long do you think it would take you personally to fill out the 2020 Census? Please print a number.	I have no preference between completing online or paper forms
minutes	

		0	leake commenced as heleake collected
	The following questions are about the 2020 Census in general. There is no need to look up this information. As you understand it, will the 2020 Census be used in any of the following	•	Is the census used to help the police and FBI keep track of people who break the law, or is it not used for this? Mark (X) ONE box.
1	ways or not?		Yes, used for this
			No, not used
	Is the census used to decide how much money communities will get from the government, or is it not used for this? Mark (X) ONE box.		Don't know
	Yes, used for this	Œ	Is the census used to locate people living in the country without documentation, or is it
	No, not used		not used for this? Mark (X) ONE box.
	Don't know		Yes, used for this
			No, not used
	Is the census used to determine the rate of unemployment, or is it not used for this? Mark (X) ONE box.		Don't know
	Yes, used for this	1	Is the census used to see what changes have
	No, not used		taken place in the size, location, and characteristics of the people in the United States, or is it not used for this?
	Don't know		States, or is it not used for this? Mark (X) ONE box.
			Yes, used for this
	Does the census count both citizens and		No, not used
	non-citizens, or only citizens? Mark (X) ONE box.		Don't know
	Yes, used for counting both citizens and non-citizens		Don't move
	No, used only for counting citizens	1	Does the law require you to answer the census
	Don't know	Ĭ	questions, or is this not required by law? Mark (X) ONE box.
	Is the census used to determine property taxes,		Yes, required by law
	or is it not used for this? Mark (X) ONE box.		No, not required by law
	Yes, used for this		Don't know
	No, not used		
	Don't know	Œ	Is the Census Bureau required by law to keep information confidential, or is this not required by law? Mark (X) ONE box.
	Is the census used to decide how many		Yes, required by law
	representatives each state will have in Congress, or is it not used for this? Mark (X) ONE box.	0	No, not required by law
	Yes, used for this		Don't know
	No, not used		
	☐ Don't know	1	Does the U.S. Constitution require that the census be conducted, or is this not something the Constitution requires? Mark (X) ONE box.
			Yes, Constitution requires
			No. Constitution does not require
			Don't know
			BOIL MICH

FORM CM-Q11 (01-25-2018)

V		
	The U.S. census is the count of all the people who live in the United States. It happens every 10 years. It asks questions such as how many people live in your household, their age, race, and ethnicity. This survey is not the census. The next census is in 2020.	How likely are you to encourage someone you know to fill out the 2020 Census form? Mark (X) ONE box. Extremely likely Very likely
0	How familiar are you with the U.S. census? Mark (X) ONE box. Extremely familiar Very familiar Somewhat familiar Not too familiar Not at all familiar	Somewhat likely Not too likely Not at all likely About how often do you use the internet? Mark (X) ONE box. Almost constantly Several times a day About once a day
2	If the census were held today, how likely would you be to fill out the census form? Mark (X) ONE box. Extremely likely Very likely Somewhat likely	Several times a week Once a week Less than once a week Never
0	Not too likely Not at all likely Thinking about most people you know, if the census were held today how likely would they be to fill out the census form? Mark (X) ONE box.	Which devices do you often use to access the internet? Mark (X) all that apply. Desktop or laptop computer Smartphone (for example an iPhone, Android, Blackberry) Tablet computer (for example an iPad, Samsung Galaxy Tab, Kindle Fire)
0	Extremely likely Very likely Somewhat likely Not too likely Not at all likely Based on your past experience or just your best guess, how long do you think it would take you	Which of the following comes closest to your view? Mark (X) ONE box. I prefer to fill out paper forms instead of online forms I prefer to fill out online forms instead of paper forms I have no preference between completing online or paper forms
	personally to fill out the 2020 Census? Please print a number. minutes	
	k.	The second secon

	The following questions are about the 2020 Census in general. There is no need to look up this information. As you understand it, will the 2020 Census be used in any of the following ways or not?	0	Is the census used to help the police and FBI keep track of people who break the law, or is it not used for this? Mark (X) ONE box. Yes, used for this
			No. not used
	Is the census used to decide how much money communities will get from the government, or is it not used for this? Mark (X) ONE box.		Don't know
	Yes, used for this No, not used	Œ	Is the census used to locate people living in the country without documentation, or is it not used for this? Mark (X) ONE box.
	Don't know		Yes, used for this
			No. not used
	Is the census used to determine the rate of		
	unemployment, or is it not used for this? Mark (X) ONE box.		Don't know
	Yes, used for this	Œ	Is the census used to see what changes have
	No, not used		taken place in the size, location, and characteristics of the people in the United
	Don't know		States, or is it not used for this? Mark (X) ONE box.
	L		Yes, used for this
	Does the census count both citizens and		
	non-citizens, or only citizens? Mark (X) ONE box.		No, not used
	Yes, used for counting both citizens and non-citizens		Don't know
	No, used only for counting citizens	1	Does the law require you to answer the census
	Don't know		questions, or is this not required by law? Mark (X) ONE box.
			Yes, required by law
	Is the census used to determine property taxes, or is it not used for this? Mark (X) ONE box.		No, not required by law
	Yes, used for this		Don't know
	No, not used		
	Don't know	B	Is the Census Bureau required by law to keep information confidential, or is this not required by law? Mark (X) ONE box.
١	Is the census used to decide how many		Yes, required by law

FORM CM-Q13 (01-25-2018)

The U.S. census is the count of all the people who live in the United States. It happens every 10 years. It asks questions such as how many people live in your household, their age, race, and ethnicity. This survey is not the census. The next census is in 2020.	How likely are you to encourage someone you know to fill out the 2020 Census form? Mark (X) ONE box.
	Not at all likely
	Not too likely
	Somewhat likely
How familiar are you with the U.S. census? Mark (X) ONE box.	Very likely
Not at all familiar	Extremely likely
Not too familiar	
Somewhat familiar	About how often do you use the internet? Mark (X) ONE box.
Very familiar	Never
Extremely familiar	Less than once a week
	Once a week
If the census were held today, how likely would	Several times a week
you be to fill out the census form? Mark (X) ONE box.	About once a day
Not at all likely	Several times a day
Not too likely	Almost constantly
Somewhat likely	
☐ Very likely	Which devices do you often use to access the internet? Mark (X) all that apply.
Extremely likely	Desktop or laptop computer
Thinking about most people you know, if the	Smartphone (for example an iPhone, Android, Blackberry)
census were held today how likely would they be to fill out the census form? Mark (X) ONE box.	Tablet computer (for example an iPad, Samsung Galaxy Tab, Kindle Fire)
Not at all likely	I don't use the internet
Not too likely	
Somewhat likely	Which of the following comes closest to your
Very likely	view? Mark (X) ONE box.
Extremely likely	I prefer to fill out online forms instead of paper forms
	I prefer to fill out paper forms instead of online forms
Based on your past experience or just your best guess, how long do you think it would take you personally to fill out the 2020 Census? Please print a number.	I have no preference between completing online or paper forms
Please print a number.

OFFICE OF THE DIRECTOR

February 20, 2018

A Message from the Director, U.S. Census Bureau...

Your address has been randomly selected by the U.S. Census Bureau to participate in the 2020 Census Planning Survey. The Census Bureau is conducting this important, 15-minute survey to help us plan for how to best count everyone living in the United States during the upcoming 2020 Census. The Census Bureau will use these survey results to develop effective ways of communicating the purpose of the census to households throughout the United States.

Please respond by March 1 using ONE of the following options:

Option 1

Go to respond.census.gov/plan to complete the survey online. You will need your 8-digit User ID, which is printed below the barcode on the front of the enclosed questionnaire.

Option 2

If you are unable to respond online, complete and mail back the enclosed questionnaire in the postage-paid envelope provided.

Answering online saves taxpayer money, conserves natural resources, and makes processing the results more efficient.

The Census Bureau is required by law to keep your information confidential. The Census Bureau is not permitted to publicly release your responses in a way that could identify you or your household.

For more information about this survey, please visit www.census.gov/plan. You may also call 1-866-599-5128 toll-free.

We have enclosed a small token of appreciation for households asked to participate in this survey.

Thank you in advance for your prompt response.

Mensaje importante: Para completar la Encuesta de Planificación del Censo del 2020, visite respond.census.gov/plan.

FREQUENTLY ASKED QUESTIONS

Are my answers confidential?

Yes. The U.S. Census Bureau is required by law to protect your information (13 U.S.C. § 9 and § 214). The Census Bureau is not permitted to publicly release your responses in a way that could identify you or your household. The Census Bureau chose your address, not you personally, as part of a randomly selected sample.

We are conducting this survey under the authority of 13 U.S.C. § 182. Per the Federal Cybersecurity Enhancement Act of 2015, your data are protected from cybersecurity risks through screening of the systems that transmit your data.

For more information about how we protect your information, please visit our website at www.census.gov and click on "Data Protection and Privacy Policy" at the bottom of the home page.

What is the 2020 Census Planning Survey?

The 2020 Census Planning Survey is a survey that the Census Bureau is conducting in preparation for the 2020 Census. This voluntary survey is critical for helping the Census Bureau make final plans for how they go about contacting and counting all people in the 2020 Census. The Census Bureau will use these survey results to design useful ways of communicating the purpose of the census to people across the United States. The Census Bureau is making it quick, easy, and safe for everyone to respond, helping ensure a complete and accurate census.

How will the Census Bureau use the information I provide?

Your information will be combined with the information provided by other sampled households to help plan for the 2020 Census. Under the Privacy Act of 1974 (5 U.S.C. § 552a) your information may be shared with other Census Bureau staff for work-related purposes and as published in the Privacy Act System of Records Notice COMMERCE/Census-5, Decennial Census Programs. Additional information can be found at www.federalregister.gov/documents/2014/04/21/2014-08993/privacy-act-system-of-records.

How long will this survey take?

The Census Bureau estimates that, for the average household, this survey will take about 15 minutes to complete, including the time for reviewing the instructions and answers.

How do I know that this is an approved Census Bureau survey?

This collection has been approved by the Office of Management and Budget (OMB). The eight-digit OMB approval number that appears on the form or login screen confirms this approval. If this number were not displayed we could not conduct this survey.

How do I contact the Census Bureau if I have questions or comments about this survey?

You may send comments regarding time estimates or any other aspect of this data collection, including suggestions for reducing this burden, to: Paperwork Reduction Project 0607-0978, U.S. Census Bureau, ADRM PRA Liaison, 5K022D, 4600 Silver Hill Road, Washipton, DC 20233. You may e-mail comments to adrm.pra@census.gov; use "Paperwork Project 0607-0978" as the subject. Please do NOT mail your actual questionnaire to this address. Use the preaddressed envelope that you receive with the questionnaire to return your completed questionnaire.

FREQUENTLY ASKED QUESTIONS

Are my answers confidential?

Yes. The U.S. Census Bureau is required by law to protect your information (13 U.S.C. § 9 and § 214). The Census Bureau is not permitted to publicly release your responses in a way that could identify you or your household. The Census Bureau chose your address, not you personally, as part of a randomly selected sample.

We are conducting this survey under the authority of 13 U.S.C. § 182. Per the Federal Cybersecurity Enhancement Act of 2015, your data are protected from cybersecurity risks through screening of the systems that transmit your data.

For more information about how we protect your information, please visit our website at www.census.gov and click on "Data Protection and Privacy Policy" at the bottom of the home page.

What is the 2020 Census Planning Survey?

The 2020 Census Planning Survey is a survey that the Census Bureau is conducting in preparation for the 2020 Census. This voluntary survey is critical for helping the Census Bureau make final plans for how they go about contacting and counting all people in the 2020 Census. The Census Bureau will use these survey results to design useful ways of communicating the purpose of the census to people across the United States. The Census Bureau is making it quick, easy, and safe for everyone to respond, helping ensure a complete and accurate census.

How will the Census Bureau use the information I provide?

Your information will be combined with the information provided by other sampled households to help plan for the 2020 Census. Under the Privacy Act of 1974 (5 U.S.C. § 552a) your information may be shared with other Census Bureau staff for work-related purposes and as published in the Privacy Act System of Records Notice COMMERCE/Census-5, Decennial Census Programs. Additional information can be found at www.federalregister.gov/documents/2014/04/21/2014-08993/privacy-act-system-of-records.

How long will this survey take?

The Census Bureau estimates that, for the average household, this survey will take about 15 minutes to complete, including the time for reviewing the instructions and answers.

How do I know that this is an approved Census Bureau survey?

This collection has been approved by the Office of Management and Budget (OMB). The eight-digit OMB approval number that appears on the form or login screen confirms this approval. If this number were not displayed we could not conduct this survey.

How do I contact the Census Bureau if I have questions or comments about this survey?

You may send comments regarding time estimates or any other aspect of this data collection, including suggestions for reducing this burden, to: Paperwork Reduction Project 0607-0978, U.S. Census Bureau, ADRM PRA Liaison, 5K022D, 4600 Silver Hill Road, Washington, DC 20233. You may e-mail comments to adrm.pra@census.gov

March 19, 2018

A Message from the Director, U.S. Census Bureau...

A few weeks ago, the U.S. Census Bureau sent instructions for completing the 2020 Census Planning Survey, along with a small token of appreciation. Your address was randomly selected as part of a national sample of households, and it is important to hear from everyone who is asked to respond for the results to be accurate. This survey will help the Census Bureau prepare for how to best count people in your community during the upcoming 2020 Census. The Census Bureau will use these survey results to communicate the purpose of the census to people living across the United States.

If you have already completed the survey, you do not need to take any further action. If you have not already responded, please do so now.

Complete the survey using only ONE of the following options:

Option 1

Go to respond.census.gov/plan to complete the survey online.
You will need your 8-digit User ID, which is printed below the barcode on the front of the enclosed questionnaire.

Option 2

If you are unable to respond online, complete and mail back the enclosed questionnaire in the postage-paid envelope provided.

The Census Bureau is required by law to keep your information confidential.

The Census Bureau is not permitted to publicly release your responses in a way that could identify you or your household.

Additional information about the survey can be found at www.census.gov/plan, or by calling us toll-free at 1-866-599-5128.

Mensaje importante: Para completar la Encuesta de Planificación del Censo del 2020, visite respond.census.gov/plan.

February 20, 2018

A Message from the Director, U.S. Census Bureau...

Your address has been randomly selected by the U.S. Census Bureau to participate in the 2020 Census Planning Survey. The Census Bureau is conducting this important, 15-minute survey to help us plan for how to best count everyone living in the United States during the upcoming 2020 Census. The Census Bureau will use these survey results to develop effective ways of communicating the purpose of the census to households throughout the United States.

Please respond by March 1 using ONE of the following options:

Option 1

Go to **respond.census.gov/plan** to complete the survey online. You will need your 8-digit User ID, which is printed below the barcode on the front of the enclosed questionnaire.

Option 2

If you are unable to respond online, complete and mail back the enclosed questionnaire in the postage-paid envelope provided.

Answering online saves taxpayer money, conserves natural resources, and makes processing the results more efficient.

The Census Bureau is required by law to keep your information confidential. The Census Bureau is not permitted to publicly release your responses in a way that could identify you or your household.

For more information about this survey, please visit www.census.gov/plan. You may also call 1-866-599-5128 toll-free.

We have enclosed a small token of appreciation for households asked to participate in this survey.

Thank you in advance for your prompt response.

20 de febrero de 2018

Mensaje del Director de la Oficina del Censo de los Estados Unidos

La Oficina del Censo de los EE. UU. seleccionó su dirección al azar para participar en la **Encuesta de Planificación del Censo del 2020**. La Oficina del Censo está llevando a cabo esta importante encuesta de 15 minutos para ayudar a planificar el mejor conteo posible de todas las personas que vivan en los Estados Unidos durante el próximo Censo del 2020. La Oficina del Censo usará los resultados de esta encuesta para crear métodos efectivos de comunicación para explicar el propósito del censo a los hogares en todo Estados Unidos.

Responda antes del 1 de marzo usando UNA de las siguientes opciones:

Opción 1:

Visite respond.census.gov/plan para completar la encuesta por internet. Usted tendrá que dar su número de identificación de usuario de 8 cifras, que se encuentra debajo del código de barras al frente del cuestionario adjunto.

Opción 2:

Complete y envíe por correo postal el cuestionario impreso adjunto en el sobre con sello pagado que se incluye.

Contestar por internet ahorra dinero de los contribuyentes, conserva recursos naturales, y permite que el procesamiento de los resultados sea más eficiente.

La Oficina del Censo está obligada por ley a mantener su información confidencial. A la Oficina del Censo no se le permite divulgar sus respuestas de manera que usted o su hogar pudieran ser identificados.

Para obtener más información sobre esta encuesta, visite www.census.gov/plan. También puede llamar gratis en inglés o español al 1-866-599-5128.

Hemos incluido una pequeña muestra de agradecimiento para los hogares a los que se les pidió participar en esta encuesta.

Gracias de antemano por su rápida respuesta.

FREQUENTLY ASKED QUESTIONS

Are my answers confidential?

Yes. The U.S. Census Bureau is required by law to protect your information (13 U.S.C. § 9 and § 214). The Census Bureau is not permitted to publicly release your responses in a way that could identify you or your household. The Census Bureau chose your address, not you personally, as part of a randomly selected sample.

We are conducting this survey under the authority of 13 U.S.C. §182. Per the Federal Cybersecurity Enhancement Act of 2015, your data are protected from cybersecurity risks through screening of the systems that transmit your data.

For more information about how we protect your information, please visit our website at www.census.gov and click on "Data Protection and Privacy Policy" at the bottom of the home page.

What is the 2020 Census Planning Survey?

The 2020 Census Planning Survey is a survey that the Census Bureau is conducting in preparation for the 2020 Census. This voluntary survey is critical for helping the Census Bureau make final plans for how they go about contacting and counting all people in the 2020 Census. The Census Bureau will use these survey results to design useful ways of communicating the purpose of the census to people across the United States. The Census Bureau is making it quick, easy, and safe for everyone to respond, helping ensure a complete and accurate census.

How will the Census Bureau use the information I provide?

Your information will be combined with the information provided by other sampled households to help plan for the 2020 Census. Under the Privacy Act of 1974 (5 U.S.C. § 552a) your information may be shared with other Census Bureau staff for work-related purposes and as published in the Privacy Act System of Records Notice COMMERCE/Census-5, Decennial Census Programs. Additional information can be found at

www.federalregister.gov/documents/2014/04/21/2014-08993/privacy-act-system-of-records.

How long will this survey take?

The Census Bureau estimates that, for the average household, this survey will take about 15 minutes to complete, including the time for reviewing the instructions and answers.

How do I know that this is an approved Census Bureau survey?

This collection has been approved by the Office of Management and Budget (OMB). The eight-digit OMB approval number that appears on the form or login screen confirms this approval. If this number were not displayed we could not conduct this survey.

How do I contact the Census Bureau if I have questions or comments about this survey?

You may send comments regarding time estimates or any other aspect of this data collection, including suggestions for reducing this burden, to: Paperwork Reduction Project 0607-0978, U.S. Census Bureau, ADRM PRA Liaison, 5K022D, 4600 Silver Hill Road, Washington, DC 20233. You may e-mail comments to adrm.pra@census.gov; use "Paperwork Project 0607-0978" as the subject. Please do NOT mail your actual questionnaire to this address. Use the preaddressed envelope that you receive with the questionnaire to return your completed questionnaire.

PREGUNTAS FRECUENTES

¿Mis respuestas son confidenciales?

Si. La Oficina del Censo de los EE. UU. está obligada por ley a proteger su información (Secciones 9 y 214 del Título 13 del Código de los Estados Unidos). A la Oficina del Censo no se le permite divulgar sus respuestas de manera que usted o su hogar pudieran ser identificados. La Oficina del Censo escogió su dirección, y no a usted personalmente, como parte de una muestra de hogares seleccionados al azar.

Estamos realizando esta encuesta en conformidad con la Sección 182 del Título 13 del Código de los Estados Unidos. En conformidad con la Ley para el Fortalecimiento de la Seguridad Cibernética Federal del 2015, sus datos están protegidos contra los riesgos de seguridad cibernética mediante los controles aplicados a los sistemas que los transmiten.

Para obtener más información sobre cómo protegemos su información, visite nuestro sitio web www.census.gov y haga clic en "Data Protection and Privacy Policy" (en inglés) en la parte inferior de la página principal.

¿Qué es la Encuesta de Planificación del Censo del 2020?

La Encuesta de Planificación del Censo del 2020 es una encuesta que la Oficina del Censo está llevando a cabo como preparación para el Censo del 2020. Esta encuesta voluntaria es fundamental para ayudar a la Oficina del Censo a hacer los últimos planes para contactar y contar a todas las personas en el Censo del 2020. La Oficina del Censo usará los resultados de esta encuesta para crear métodos efectivos de comunicación para explicar el propósito del censo a las personas en los Estados Unidos. La Oficina del Censo está haciendo la encuesta rápida, fácil, y segura para que todos puedan responder y así ayudar a garantizar un censo preciso y completo.

¿Cómo usará la Oficina del Censo la información que yo proporcione?

Su información será combinada con la información proporcionada por otros hogares incluidos en la muestra para ayudar a planificar el Censo del 2020. En conformidad con la Ley sobre la Privacidad de 1974 (Sección 552a del Título 5 del Código de los EE. UU.) su información puede ser compartida con personal de la Oficina del Censo para fines relacionados con sus tareas y tal como se publica en el Aviso sobre el Sistema de Registros de la Ley sobre la Privacidad COMMERCE/Census-5, Programa del Censo Decenal. Se puede encontrar información adicional (en inglés) en www.federalregister.gov/documents/2014/04/21/2014-08993/privacy-act-system-of-records.

¿Cuánto tiempo va a tomar esta encuesta?

La Oficina del Censo calcula que al hogar típico le tomará como promedio aproximadamente 15 minutos completar esta encuesta, incluyendo el tiempo que toma repasar las instrucciones y revisar las respuestas.

¿Cómo puedo saber que esta es una encuesta aprobada por la Oficina del Censo?

Esta recopilación de información ha sido aprobada por la Oficina de Administración y Presupuesto (OMB). El número de ocho digitos aprobado por la OMB que aparece en el formulario o pantalla de ingreso confirma esta aprobación. Si este número no se mostrara, no podríamos llevar a cabo esta encuesta

¿Cómo puedo contactar a la Oficina del Censo si tengo preguntas o comentarios sobre esta encuesta?

Puede enviar comentarios en inglés o en español, sobre el tiempo que tomará o cualquier otro aspecto de esta recopilación de información, incluyendo sugerencias para reducir el tiempo, a: Paperwork Reduction Project 0607-0978 U.S. Census Bureau, ADRM PRA Liaison, 5K022D, 4600 Silver Hill Road, Washington, DC 20233. Usted puede enviar sus comentarios por correo electrónico a: adrm.pra@census.gov; use "Paperwork Project 0607-0978" como tema. NO envie por correo su cuestionario a esta dirección. Use el sobre de devolución con la dirección que reciba con el cuestionario para devolverlo una vez completado.

A Message from the Director, U.S. Census Bureau...

Now is the time to respond.

The U.S. Census Bureau sent you two requests to complete the **2020 Census Planning Survey**. If you have not already responded, it is critical that you complete this survey right away. The survey should take only 15 minutes of your time. Information from this survey will help us plan effective ways of communicating the purpose of the census to households throughout the United States.

If you have already responded, thank you. If you have not responded, please use the information below. Answer online to help us save taxpayer money and process data more efficiently.

> Respond now at: respond.census.gov/plan

Your User ID is:

If you are unable to respond online, we will send you a paper questionnaire in two weeks.

By law, your answers are kept completely confidential. The Census Bureau is not permitted to publicly release your responses in a way that could identify you or your household.

To learn more about this survey, please visit www.census.gov/plan or call 1-866-599-5128 toll-free.

Thank you for helping us make the 2020 Census successful.

Núm. de OMB 0607-0978: Aprobado hasta 08/31/2020

Mensaje del Director de la Oficina del Censo de los Estados Unidos

Ahora es el momento de responder.

La Oficina del Censo de los EE. UU. le envió dos cartas para pedirle que completara la **Encuesta de Planificación del Censo del 2020**. Si todavía no ha respondido, es fundamental que complete esta encuesta de inmediato. Esta encuesta tomará solo unos 15 minutos de su tiempo. La información de esta encuesta nos ayudará a planificar métodos efectivos para comunicar el propósito del censo a los hogares en todo Estados Unidos.

Si usted ya ha respondido, se lo agradecemos. Si no ha respondido, use la información que aparece a continuación. Responda por internet para ayudarnos a ahorrar dinero de los contribuyentes y procesar datos con más eficiencia.

Responda ya en: respond.census.gov/plan Su identificación de usuario es:

Si usted no puede responder por internet, dentro de dos semanas le enviaremos un cuestionario impreso.

Por ley, sus respuestas se mantienen completamente confidenciales. A la Oficina del Censo no se le permite divulgar sus respuestas de manera que usted o su hogar pudieran ser identificados.

Para obtener más información sobre esta encuesta, visite www.census.gov/plan o llame gratis en inglés o español al 1-866-599-5128.

Gracias por ayudarnos a lograr que el Censo del 2020 sea exitoso.

March 19, 2018

A Message from the Director, U.S. Census Bureau...

A few weeks ago, the U.S. Census Bureau sent instructions for completing the 2020 Census Planning Survey, along with a small token of appreciation. Your address was randomly selected as part of a national sample of households, and it is important to hear from everyone who is asked to respond for the results to be accurate. This survey will help the Census Bureau prepare for how to best count people in your community during the upcoming 2020 Census. The Census Bureau will use these survey results to communicate the purpose of the census to people living across the United States.

If you have already completed the survey, you do not need to take any further action. If you have not already responded, please do so now.

Complete the survey using only ONE of the following options:

Option 1

Go to respond.census.gov/plan to complete the survey online. You will need your 8-digit User ID, which is printed below the barcode on the front of the enclosed questionnaire.

Option 2

If you are unable to respond online, complete and mail back the enclosed questionnaire in the postage-paid envelope provided.

The Census Bureau is required by law to keep your information confidential.

The Census Bureau is not permitted to publicly release your responses in a way that could identify you or your household.

Additional information about the survey can be found at www.census.gov/plan, or by calling us toll-free at 1-866-599-5128.

Mensaje del Director de la Oficina del Censo de los Estados Unidos

Hace algunas semanas, la Oficina del Censo de los EE. UU. le envió instrucciones para completar la Encuesta de Planificación del Censo del 2020 junto con una pequeña muestra de agradecimiento. Su dirección fue seleccionada al azar como parte de una muestra nacional de hogares y, para que los resultados sean precisos, es muy importante recibir respuestas de todos a quienes se les pide contestar. Esta encuesta ayudará a la Oficina del Censo a prepararse para realizar el mejor conteo posible de las personas que vivan en su comunidad durante el próximo Censo del 2020. La Oficina del Censo usará los resultados de esta encuesta para comunicar el propósito del censo a las personas que viven en todo Estados Unidos.

Si usted ya ha completado la encuesta, no tiene que hacer nada más. Si todavía no ha respondido, por favor hágalo ahora.

Complete la encuesta usando solo UNA de las siguientes opciones:

Opción 1:

Visite respond.census.gov/plan para completar la encuesta por internet. Usted tendrá que dar su número de identificación de usuario de 8 cifras, que se encuentra debajo del código de barras al frente del cuestionario adjunto.

Opción 2:

Si usted no puede responder por internet, complete el cuestionario adjunto y envielo por correo postal en el sobre con sello pagado que se incluye.

La Oficina del Censo está obligada por ley a mantener su información confidencial.

A la Oficina del Censo no se le permite divulgar sus respuestas de manera que usted o su hogar pudieran ser identificados.

Se puede encontrar información adicional acerca de la encuesta en www.census.gov/plan, o llamándonos gratis en inglés o español al 1-866-599-5128.
