

National Use-of-Force Data Collection "National" Questionnaire

This questionnaire is being provided to allow for an easy review of questions and possible response values. The data collection itself, however, will use a web form.

NATIONAL USE-OF-FORCE DATA COLLECTION

The National Use-of-Force Data Collection is a component of the Uniform Crime Reporting Program that is used by law enforcement agencies to report a law enforcement use of force that results in a fatality, serious bodily injury to a person, or the discharge of a firearm at or in the direction of a person.

The definition of *serious bodily injury* is based in part on 18 United States Code 2246 (4) and means “***bodily injury that involves a substantial risk of death, unconsciousness, protracted and obvious disfigurement, or protracted loss or impairment of the function of a bodily member, organ, or mental faculty.***”

Multiple conditions can be indicated only if multiple subjects were involved.

Did this incident result in...? (Select all that apply.)

- The death of a person due to law enforcement use of force?
- The serious bodily injury of person due to law enforcement use of force?
- The discharge of a firearm by law enforcement at or in the direction of a person that did not otherwise result in death or serious bodily injury?

If you were able to select any of the above categories, please proceed to the Incident Information on the next page.
