Welcome to the International Price Program (IPP) Internet data reporting site. The price data you provide to the Bureau's International Price Program is used in the construction of U.S. export and import price indexes. These indices are used primarily to deflate various foreign trade and growth statistics produced by the U.S. Government. Other uses include measuring inflation, as an input to fiscal and monetary policy and forecasting future prices. Together with the Consumer Price Indexes and Producer Price Indexes, the International Price Program is considered one of the BLS' three major price programs. These three price programs have been designated as leading Federal economic indicators and are designed to cover the entire U.S. economy.
