I. Checklist Materials

Checklist Code: 30

Checklist Title: PHARMACEUTICAL PRODUCTS

A. Checklist Area Description

Except where the context otherwise requires, the headings of this chapter apply only to products of a organotherapeutic, therapeutic, prophylactic or diagnostic use; or articles used for medical, surgical, dental or veterinary purposes.

B. Exclusions

Certain products are excluded from chapter 30, even if they can be used in a medical setting:

1. Foods or beverages, other than nutritional preparations for intravenous administration.
2. Preparations, such as tablets, chewing gum or patches (transdermal systems), intended to assist smokers to stop smoking (heading 2106 or 3824).
3. Plasters specially calcined or finely ground for the use in dentistry. These fall under heading 2520.
4. Aqueous distillates or solutions of essential oils, suitable for medicinal uses. These fall under heading 3301.
5. Preparations of headings 3303 to 3307, even if they have therapeutic/prophylactic properties.
6. Soap, or other products of heading 3401, containing added medicaments
7. Preparations with a basis of plaster for use in dentistry. These fall under 3407.
8. Blood albumin not prepared for therapeutic or prophylactic uses. These fall under heading 3502.

C. Common Initiation Problems

None

D. Additional Checklist Area Information

E. Customs Ruling Online Search System (CROSS)

The purpose of this section is to help identify examples of NESOI classified items and obtain clarification for any 10 digit classification code. The primary manner in which to comprehensively define the scope of a Harmonized code described as "Other" is by process of elimination. That is, the code should be compared to what is covered by its related Harmonized codes or sub-headings. Another tool to help identify and classify items is the Customs Rulings Online Search System (CROSS) system. CROSS is a database that holds all classification rulings that have been handed down by Customs. Though primarily intended for imports, HTS and Schedule B code overlap allows the CROSS database to be used for exports as well.

In order to access CROSS, please click on the following link or type it into your browser:

Checklist Code: 30

Checklist Title: PHARMACEUTICAL PRODUCTS

<http://rulings.cbp.gov/>. Make sure that the Collection selection is set to "All" (not "HQ" or "NY") to capture all applicable rulings, and make sure that the NAFTA filter is off. Using the Search bar at the top of the screen you may search by Customs ruling number, or by HTSUSA number. When searching by HTSUSA number, the format must be 1234.56.7890, with periods between the fourth and fifth and sixth and seventh digits. Searches may also be done above the 10 digit level.

It should be kept in mind that CROSS is not an exhaustive source of NESOI items nor does it cover rulings for every 10 digit code. Rulings may also apply to more than one HTSUSA number, and since new rulings are constantly being handed down by Customs, previous rulings may be amended or overturned at any time.

If you have any questions regarding a Customs ruling please contact the IPP Classification team (Classification_Team_IPP@bls.gov) via the IPPQues process.

F. Terminology

Arachidonic Acid – A precursor of prostaglandins, a liquid unsaturated fatty acid C₂₀H₃₂O₂ that occurs in most animal fats; consider essential in animal nutrition

Blood Albumin – The main protein of human plasma; binds with water, cations, fatty acids, hormones, bilirubin, thyroxine, and drugs

Catgut – an absorbable suture material, prepared from the intestines of mammals, used to close surgical wounds. It can be treated with chromic salts to delay absorption and enhance strength

Colloidal Solutions – a mixture with properties between those of a solution and fine suspension

Hemostatics – A medical product which is used to cause bleeding to stop

Immunological – relating to the structure and function of the immune system, innate and acquired immunity, and laboratory techniques involving the interaction of antigens with specific antibodies

Insulin – A natural hormone made by the pancreas that controls the level of glucose in the blood; cells cannot use glucose without insulin

Laminaria - A genus of 31 species of brown algae, all of which share the common name "kelp"

Leukotrienes - One of a group of chemicals produced by the body that accompanies inflammation; believed to play a major role in causing the symptoms of hay fever and asthma

Mucilage - A gelatinous substance of various plants that contains protein and polysaccharides and is similar to plant gums; sometimes used as an adhesive

Opacifying - To cause to become opaque

Ostomy - A surgical procedure which creates an opening in the body for the discharge of body wastes

Organotherapy - The treatment of disease with preparations derived from animal endocrine organs or glandular extracts such as insulin and thyroxin

Pectic Substance - Any of various water-soluble substances that bind adjacent cell walls in plant tissues to yield a gel

Prophylactic - Guarding from or preventing the spread or occurrence of disease or infection

Prostaglandins - One of a number of hormone-like substances that participate in a wide range of body functions; derived from arachidonic acid

Sterile - Free of all forms of microbial life, including transmissible agents. Sterilization can be achieved through application of the proper combinations of heat, chemicals, irradiation, high pressure and filtration.

Therapeutic - Of or pertaining to the treating or curing of disease

Thromboxane - A substance made by platelets that causes blood clotting and constriction of blood vessels. This is related to prostaglandins and is derived from arachidonic acids

Thyroxin - an iodine-containing hormone, produced by the thyroid, which increases the rate of cell metabolism and regulates growth

Product Checklist Title: HUMAN BLOOD; ANIMAL BLOOD PREPARED FOR THERAPEUTIC, PROPHYLACTIC OR DIAGNOSTIC USES; ANTISERA, OTHER BLOOD FRACTIONS AND IMMUNOLOGICAL PRODUCTS, WHETHER OR NOT MODIFIED OR OBTAINED BY MEANS OF BIOTECHNOLOGICAL PROCESSES; VACCINES, TOXINS, CULTURES OF MICRO-ORGANISMS AND SIMILAR PRODUCTS

Description: All human blood, animal blood prepared for therapeutic, prophylactic or diagnostic uses, antisera, other blood fractions and immunological products. Covered within the heading are products derived from blood, as well as modified thrombomodulins, modified haemoglobins, as well as cross-linked haemoglobins and blood albumin. Immunological products, used for diagnostic or therapeutic purposes and for immunological tests, covered within this heading included monoclonal antibodies (MABs), antibody fragments, conjugates, and fragment conjugates. Vaccines, toxins, cultures of micro-organisms (excluding yeasts), viruses, human, animal and vegetable and anti-viruses, as well as bacteriophage. Diagnostic kits are classified here when the essential character of the kit is given by any of the products of this heading.

The expression "modified immunological products" applies to peptides and proteins (other than goods of heading 2937) with are directly involved in the regulation of immunological processes, such as monoclonal antibodies (MABs), antibody fragments, antibody conjugates and antibody fragment conjugates, interleukins, interferons (IFN), chemokines and certain tumor necrosis factors (TNF), growth factors (GF), hematopoietins and colony stimulating factors (CSF).

Product Checklist Title: MEDICAMENTS (EXCLUDING GOODS OF HEADING 3002, 3005 OR 3006) CONSISTING OF TWO OR MORE CONSTITUENTS WHICH HAVE BEEN MIXED TOGETHER FOR THERAPEUTIC OR PROPHYLACTIC USES, NOT PUT UP IN MEASURED DOSES OR IN FORMS OR PACKAGING FOR RETAIL SALE

Description: This heading covers medicinal preparations for use in the internal or external treatment or prevention of human or animal ailments. These preparations are obtained by mixing together two or more substances. However, if put up in measured doses or in forms or packaging for retail sale, they should be classified under 3004.

Products in this heading are treated as unmixed if they are (1) dissolved in water, (2) any good of chapter 28 or 29, and (3) simple vegetable extracts of heading 1302, merely standardized or dissolved in any solvent. Products in this heading is considered mixed if they are (1) colloidal solutions and suspensions (other than colloidal sulfur), (2) vegetable extracts obtained by the treatment of mixtures of vegetable materials, and (3) salts and concentrates obtained by evaporating natural mineral waters.

- 01 Medicinal Preparations:**
- 001 Containing penicillins or derivatives thereof, with a penicillanic acid structure, or streptomycins or their derivatives
 - 002 Containing other antibiotics or hormones
 - 003 Containing insulin
 - 004 Containing artificial mixtures of natural hormones
 - 005 Containing alkaloids or derivatives thereof but not containing hormones or other products of heading 2937, or antibiotics
 - 006 Containing ephedrine or its salts
 - 007 Containing pseudoephedrine or its salts
 - 008 Containing norephedrine or its salts
 - 009 Containing antimalarial active principles
 - 010 Other:

- 02 Other Features:**
(Select all that apply)
- 001 Product Identifier (product name/number, if available):

 - 002 Brand name and generic name (for brand name drugs only. Example: Prozac/Fluoxetine):

(Please specify)
 - 003 Patent expiration date (if known, patented drugs only):

Product Checklist Title: MEDICAMENTS (EXCLUDING GOODS OF HEADING 3002, 3005 OR 3006) CONSISTING OF MIXED OR UNMIXED PRODUCTS FOR THERAPEUTIC OR PROPHYLACTIC USES, PUT UP IN MEASURED DOSES (INCLUDING THOSE IN THE FORM OF TRANSDERMAL ADMINISTRATION SYSTEMS) OR IN FORMS OR PACKAGING FOR RETAIL SALE

Description: These medicaments are either mixed or unmixed, in measured doses and in packaging for retail sale. Products in this heading are treated as unmixed if they are (1) dissolved in water, (2) any good of chapter 28 or 29, and (3) simple vegetable extracts of heading 1302, merely standardized or dissolved in any solvent. Products in this heading is considered mixed if they are (1) colloidal solutions and suspensions (other than colloidal sulfur), (2) vegetable extracts obtained by the treatment of mixtures of vegetable materials, and (3) salts and concentrates obtained by evaporating natural mineral waters.

Chapters 28 and 29 cover most inorganic and organic chemicals. Heading 1302 covers vegetable saps and extracts; pectic substances, pectinates and pectates; mucilages and thickeners, which are derived from vegetable products.
