## DEPARTMENT OF LABOR

### Bureau of Labor Statistics

#### Information Collection Activities; Comment Request

**AGENCY:** Bureau of Labor Statistics, Department of Labor.

**ACTION:** Notice of information collection; request for comment.

**SUMMARY:** The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of

information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed revision of the “National Longitudinal Survey of Youth 1997.” A copy of the proposed information collection request can be obtained by contacting the individual listed in the **ADDRESSES** section of this notice.

**DATES:** Written comments must be submitted to the office listed in the Addresses section below on or before March 29, 2021.

**ADDRESSES:** Send comments to Carol Rowan, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 4080, 2 Massachusetts Avenue NE, Washington, DC 20212. Written comments also may be transmitted by email to [BLS\\_PRA\\_Public@bls.gov](mailto:BLS_PRA_Public@bls.gov).

**FOR FURTHER INFORMATION CONTACT:** Carol Rowan, BLS Clearance Officer, 202–691–7628 (this is not a toll free number). (See **ADDRESSES** section.)

**SUPPLEMENTARY INFORMATION:**

#### I. Background

The National Longitudinal Survey of Youth 1997 (NLSY97) is a nationally representative sample of persons who were born in the years 1980 to 1984. These respondents were ages 12–17 when the first round of annual interviews began in 1997; starting with round sixteen, the NLSY97 is conducted on a biennial basis. Round twenty interviews will occur from September 2021 to June 2022. The Bureau of Labor Statistics (BLS) contracts with a vendor to conduct the NLSY97. The primary objective of the survey is to study the transition from schooling to the establishment of careers and families. The longitudinal focus of this survey requires information to be collected from the same individuals over many years in order to trace their education, training, work experience, fertility, income, and program participation.

One of the goals of the Department of Labor (DOL) is to produce and disseminate timely, accurate, and relevant information about the U.S. labor force. The BLS contributes to this goal by gathering information about the labor force and labor market and disseminating it to policymakers and the public so that participants in those

markets can make more informed, and thus more efficient, choices.

Research based on the NLSY97 contributes to the formation of national policy in the areas of education, training, work experience, fertility, income, and program participation. In addition to the reports that the BLS produces based on data from the NLSY97, members of the academic community publish articles and reports based on NLSY97 data for the DOL and other funding agencies. To date, approximately 795 articles examining NLSY97 data have been published in scholarly journals.

The survey design provides data gathered from the same respondents over time to form the only dataset that contains this type of information for this important population group. Without the collection of these data, an accurate longitudinal dataset could not be provided to researchers and policymakers, thus adversely affecting the DOL’s ability to perform its policy- and report-making activities.

#### II. Current Action

The BLS seeks approval to conduct round 20 of biennial interviews of the NLSY97. Respondents of the NLSY97 will undergo an interview of approximately 75 minutes during which they will answer questions about schooling and labor market experiences, family relationships, and community background. During the fielding period for the main round 20 interviews, no more than 2 percent of respondents will be asked to participate in a brief validation interview a few weeks after the initial interview. The purpose of the validation interview is to verify that the initial interview took place as the interviewer reported and to assess the data quality of selected questionnaire items.

The BLS plans to record randomly selected segments of the main interviews during round 20. Recording interviews helps the BLS and its contractors to ensure that the interviews actually took place and interviewers are reading the questions exactly as worded and entering the responses properly. Recording also helps to identify parts of the interview that might be causing problems or misunderstanding for interviewers or respondents. Each respondent will be informed that the interview may be recorded for quality control, testing, and training purposes. If the respondent objects to the recording of the interview, the interviewer will confirm to the respondent that the interview will not be recorded and then proceed with the interview.

Round 20 will be a predominantly telephone survey. We anticipate that approximately 90 percent of interviews will be completed by telephone, with the remaining interviews being conducted in person.

The round 20 questionnaire will resemble the round 19 questionnaire with few modifications. New questions for the round 20 questionnaire include questions on hours worked from home, on the value of a job, on labor market volatility due to Coronavirus pandemic, on contracting of Coronavirus, on vaccines, on applications for Unemployment Compensation, on criminal background checks, on internet access and on the respondents' previous on experience with NLSY97's Coronavirus supplemental survey. In addition, we have made attempts to

streamline the questionnaire so that it will be shorter and less burdensome for respondents. To this end, fewer questions will be asked about college enrollment, non-compete agreements, device ownership, chronic pain, and the use of pain killers.

**III. Desired Focus of Comments**

The Bureau of Labor Statistics is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used.

- Enhance the quality, utility, and clarity of the information to be collected.
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

*Title:* National Longitudinal Survey of Youth 1997.

*OMB Number:* 1220-0157.

*Type of Review:* Revision of a currently approved collection.

*Affected Public:* Individuals or households.

Form	Total respondents	Frequency	Total responses	Average time per response (minutes)	Estimated total burden (hours)
Main NLSY97: September 2021–June 2022 .....	6,650	One-time .....	6,650	75	8,312.5
Validation interview: October 2021–June 2022 .....	133	One-time .....	133	4	8.9
Totals * .....	6,650	.....	6,783	.....	8,321

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they also will become a matter of public record.

Signed at Washington, DC, January 19, 2021.

**Eric Molina,**

*Acting Chief, Division of Management Systems.*

**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Occupational Requirements Survey (ORS) is a nationwide survey that the Bureau of Labor Statistics (BLS) is conducting at the request of the Social Security Administration (SSA). Three years of data collection and capture for the ORS will start in 2021 and end in mid-2024.

Estimates produced from the data collected by the ORS will be used by the SSA to update occupational requirements data for administering the Social Security Disability Insurance (SSDI) and Supplemental Security Income (SSI) programs.

The ORS occupational information will allow SSA adjudicators to clearly associate the assessment of a claimant's physical and mental functional capacity and vocational profile with work requirements. BLS will compute percentages of workers with various characteristics, such as skill and strength level. SSA will use this information to provide statistical support for the medical-vocational rules used at step 5 of sequential evaluation regarding the number of unskilled jobs that exist at each level of exertion in the national economy.

The Social Security Administration, Members of Congress, and representatives of the disability community have all identified collection of updated information on the
