

storage capacity of greater than or equal to 42,000 gallons; or (2) the facility's total oil storage capacity is greater than or equal to one million gallons and one or more of the following harm factors are met: Insufficient secondary containment for aboveground storage tanks at the facility; a discharge of oil could cause injury to fish and wildlife and sensitive environments; a discharge of oil could shut down a drinking water intake; the facility has experienced a reportable oil discharge of 10,000 gallons or more in the last 5 years; or other factors considered by the Regional Administrator (see 40 CFR 112.20(a)(2), (b)(1), (f)(1) and (f)(2) for further information).

The purpose of an FRP is to help an owner or operator identify the necessary resources to respond to an oil discharge in a timely manner. If implemented effectively, the FRP will reduce the impact and severity of oil discharges and may prevent discharges because of the identification of risks at the facility. Although the owner or operator is the primary data user, EPA also uses the data in certain situations to ensure that facilities comply with the regulation and to help allocate response resources. State and local governments may use the data, which are not generally available elsewhere, and can greatly assist local emergency preparedness planning efforts. The EPA reviews all submitted FRPs and must approve FRPs for those facilities whose discharges may cause significant and substantial harm to the environment to ensure that facilities believed to pose the highest risk have planned for adequate resources and procedures to respond to oil discharges (See 40 CFR 112.20(f)(3) for further information about the criteria for significant and substantial harm.). No information collected under the FRP rule is expected to be confidential. One of the criteria necessary for information to be classified as "proprietary business information" (40 CFR 2.208) is that a business must show that it has previously taken reasonable measures to protect the confidentiality of the information and that it intends to continue to take such measures. EPA provides no assurances of confidentiality to facility owners or operators when they file their FRPs.

The burden estimates, numbers and types of respondents, wage rates and unit and total costs for this ICR renewal will be revised and updated, if needed, during the 60-day comment period while the ICR Supporting Statement is undergoing review at OMB.

*Form Numbers:* None.

*Respondents/affected entities:* Owners or operators of facilities

required to have Spill Prevention, Control, and Countermeasure (SPCC) plans under the Oil Pollution Prevention regulation (40 CFR part 112) and that, because of their location, could reasonably be expected to cause substantial harm to the environment.

*Respondent's obligation to respond:* Mandatory under section 311(j)(5) of the Clean Water Act, as amended by the Oil Pollution Act of 1990.

*Estimated number of respondents:* 16,027 (total).

*Frequency of response:* Annual.

*Total estimated burden:* 385,784 hours (per year). Burden is defined at 5 CFR 1320.03(b).

*Total estimated cost:* \$17,728,836 (per year), includes \$3,355 annualized capital or operation and maintenance costs.

*Changes in Estimates:* Total estimated costs reflect U.S. Bureau of Labor Statistics labor rates as of May 2020. This estimate is based on EPA's current inventory of facilities that have submitted and are maintaining an FRP. Any change in burden or cost resulting from the 60-day OMB review period will be described and explained in this section when the updated ICR Supporting Statement is completed.

*General Description of Collection:* This information collection involves the submission of various forms by (1) contractors who wish to do business with the FDIC or are currently under contract with the FDIC; (2) those vendors and parties participating in innovation pilot programs and prize competitions with the possibility of being awarded a contract; and (3) government agencies or commercial businesses that provide FDIC with past performance information. There is no change in the method or substance of the collection. However, the FDIC has amended this submission to account for the burdens associated with vendors and parties participating in innovation pilot programs and prize competitions.

The Federal Deposit Insurance Act (12 U.S.C. Section 1819) empowers the FDIC to enter into contracts using

private sector contractors to provide goods or services. The Act also provides that the FDIC may promulgate policies and procedures to administer the powers granted to it, including the power to enter into contracts. Pursuant to such policies, the Acquisition and Corporate Services Branch of the FDIC’s Division of Administration has developed forms and clauses to facilitate the procurement of goods and services from private sector contractors. The information collected through these forms and clauses fall under the definition of collection of information under the Paperwork Reduction Act of 1995 (PRA).

During the review of the renewal of this Acquisition Services Information Requirements information collection, FDIC determined that portions of the PRA burdens that are currently under

the information collection entitled *Innovation Pilot Programs*. (OMB No. 3064–0212) should be transferred to this information collection (OMB No. 3064–0072). OMB No. 3064–0212 involves the collection of information from third parties (banks and firms in partnership with banks) who are invited to voluntarily propose time-limited pilot programs, which will be collected and considered by the FDIC on a case-by-case basis. FDIC has determined that the burdens associated with OMB No. 3064–0212 that contain the possibility of entering into a contract with the FDIC should be transferred to OMB No. 3064–0072. To avoid duplication of burden hours, OMB No. 3064–0212 will be separately amended to only contain the burden on IDIs and third parties that are involved in the various projects that third parties may engage in. FDIC

determined that OMB No. 3064–0072 should include the burden involved with the preparation and submission of applications to participate in FDIC-sponsored or co-sponsored prize competitions if the outcome of those prize competitions includes the possibility of entering into a contract with the FDIC. These burdens are similar to the burdens currently under the IC entitled *Generic Clearance for Prize Competition Participation* (OMB No. 3064–0211). However, OMB No. 3064–0211 contains and will continue to contain those burdens associated with prize competitions whose outcomes do not include the possibility of an entering into a contract with the FDIC.

**New Burden: Prize Competitions—Estimated Number of Respondents, Responses and Hourly Burdens**

As described above, this ICR adds to OMB No. 3064–0072 the burdens involved with the preparation and submission of applications to participate in FDIC-sponsored or co-sponsored prize competitions if the outcomes of those prize competitions include the possibility of entering into a contract with the FDIC. The information associated with this burden are collected from potential and actual participants (including technologists, coders, engineers and developers; consumers of financial services; consumer advocates; academics; members of trade groups and other associations; individuals connected to financial institutions, community banks, and financial and bank service and technology providers; software, data, and technology firms; and other members of the public) of those prize competitions. The FDIC collects information from respondents during both an application phase and during a proposal phase.

1. *Application Phase:* The FDIC has never conducted a prize competition where outcomes included the possibility of entering into a contract with the FDIC. FDIC anticipates that approximately 100 applications would be received if the FDIC were to initiate such a prize competition. For the purposes of this ICR, FDIC assumes that each application is submitted by a distinct respondent. Thus, in the above burden table, for the line item Prize Competition—Application, FDIC assumes that the number of responses per respondent is one and use a respondent count of 100 per year.

In order for the FDIC to determine which applicants will be eligible and selected to participate in FDIC prize competitions, the FDIC will request that

potential participants provide their name, contact information, address, and such other information that may be necessary to evaluate applicants' qualifications and ability to participate in the event as well as to match the applicants' anticipated role to the needs of the competition. Applicants will also be asked to acknowledge the terms and conditions of participating in the prize competition. Based on their experience with previous prize competitions, FDIC estimates that respondents will spend, on average, one hour to prepare and submit an application.

2. *Proposal Phase:* Certain participants in these prize competitions may be invited to present a contract proposal to be considered by the FDIC. Should such a prize competition occur, FDIC assumes that it would receive five contract proposals per year. For the purposes of this ICR, FDIC assumes that each proposal is submitted by a distinct respondent. Thus, for the line item Prize Competition—Proposal, FDIC assumes that the number of responses per respondent is one and use a respondent count of five per year.

Based on experience with previous prize competitions, FDIC expects that respondents will spend, on average, 60 hours to prepare and submit a proposal. Thus, for the line item Prize Competition—Proposal, FDIC estimates a time burden of 60 hours per response.

**Transferred Burden From OMB No. 3064–0212: Innovation Pilot Program—Estimated Number of Respondents, Responses and Hourly Burdens**

As described above, this ICR transfers the burdens that contain the possibility of entering into a contract with the FDIC from OMB No. 3064–0212 to OMB No. 3064–0072. The information associated with this burden are collected from innovators who are invited to voluntarily propose time-limited pilot programs. The program is typically conducted in four phases, with a declining number of companies advancing at each phase. The FDIC provides fixed monetary awards for the successful completion of some of these phases. In order to evaluate potential contractors, the FDIC collects information from respondents twice: During an application phase and during a proposal phase.

1. *Application Phase:* The FDIC issues a call for concept papers as a general solicitation. Interested parties respond by submitting concept papers, thus becoming offerors. The FDIC then subjectively assesses those papers to determine its confidence in the prospective merits of those concept papers as well as the FDIC's confidence

in the offeror's apparent ability to transform concepts into real-world solutions. FDIC used its experience with the first Innovation Pilot Program<sup>1</sup> to estimate that 50 concept papers are submitted to the FDIC in response to a call. Although one company could submit multiple concept papers to one call, or different concept papers to different calls, the FDIC considers a concept paper submission for each call to be from a distinct respondent. The FDIC anticipates issuing three calls per year. Thus, for purposes of this information collection item, FDIC estimates 150 respondents per year and one response per respondent per year.

FDIC believes that the hourly burden for preparing concept papers to be similar to that of RFPs. However, the applications for pilot programs are usually more extensive than the average RFP. Based on the hourly burden estimated for RFPs, FDIC estimates that each application will take 20 hours to prepare and submit. Thus, for the line item Innovation Pilot Program—Application, FDIC estimates a time burden of 20 hours per response.

2. *Proposal Phase:* During a pilot program, all contractors who are participating will provide an initial summary of the terms and conditions (including price, deliverables, intellectual property rights, and so forth) it contemplates proposing for a follow-on pilot. The FDIC may provide feedback to the contractor and contractors may resubmit their proposal one or more times based on feedback received. Based on their experience with rapid Phase Prototyping (RPP), FDIC estimates that approximately 60 percent of applications received in response to calls for concept papers, or 90 applications per year,<sup>2</sup> will be invited to submit contract proposal. As above, the FDIC assumes each response to be from a distinct respondent. Thus, for the line item Innovation Pilot Program—Proposal, FDIC estimates 90 respondents per year and one response per respondent per year.

FDIC believes that, given the iterative nature of the RPP process, it is likely

<sup>1</sup> The first Innovation Pilot Program, Rapid Phased Prototyping (RPP), began in August 2020. Details for RPP can be found at <https://www.fdic.gov/fditech/rpp.html> (last accessed September 30, 2021). The proposal submission phase for RPP is expected to finish in 2021. The FDIC received 35 applications for RPP; FDIC conservatively estimates 50 responses per pilot program to account for the fact that future collections could receive increased interest. The FDIC also anticipates holding up to three pilots a year, for a total of 150 estimated applications per year.

<sup>2</sup> 90 contract proposals = 50 application per call \* 3 calls per year \* 60%.

that contractors will go through multiple iterations of contract proposals. FDIC assumes that each respondent will have to revise their submission twice, on average. In addition, these contract proposals include pricing, terms, and conditions, which will require more time than the concept papers. Given these differences, FDIC estimates that each response to an Innovation Pilot Program—Proposal will take 60 hours to prepare and submit.

#### *Request for Comment*

*Comments are invited on:* (a) Whether the collection of information is necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.
