

Justification for No Material/Nonsubstantive Change Request for 3145-0260,  
Office of Polar Programs (OPP) United States Antarctic Program (USAP) Sexual Assault and Harassment  
Prevention and Response (SAHPR) Data Collection Plan

The National Science Foundation is adding approximately 30 United States Air Force employees to the respondent population of this information collection, given their role in transporting researchers, visitors, contractors, and all other participants in the United States Antarctic Program to the Polar regions. This increase in the respondent population will not materially change the cost or burden numbers associated with this collection.
