Page 2: IRB Conditions of Approval

1. The Committee determined that it is not appropriate to include minor subjects (ages 14-17) in this research since there is no increased benefit for including these subjects and there is concern regarding these subjects experiencing increased risk in the form of anxiety due to discordant test results. Therefore, the Committee does not approve the inclusion of minors in this study. Please confirm your understanding of this item.
2. Please revise the Waiting Room Approach Script Outline to include a confirmation that the potential study participant is 18 years old or older.
3. Please provide revised versions of the information sheets and consent forms which contain the updated language for the RISKS, STRESS, OR DISCOMFORT section, as provided in item #7 of your deferral response.
4. Thank you for confirming that the activities described in this application do not meet the FDA's definition of research and therefore the study is not subject to the FDA regulations (deferral letter item #11). Since this study is not FDA regulated, please remove the following statement from the PROTECTION OF RESEARCH INFORMATION section in all information sheets and consent forms:

The U.S. Food and Drug Administration (FDA) reserves the right to review study data that may contain identifying information.

5. Please note that the card that will be provided for Part 2 - Group 2 participants to receive study results must be submitted to our office for review prior to use with subjects.
6. The IRB noted that the study team is in the process of obtaining a Certificate of Confidentiality for this study. As a reminder, subjects cannot be recruited or consented until the UW IRB has received and acknowledged the Certificate of Confidentiality granted by the federal agency. Please confirm your understanding of this item.
