Form Approved. OMB No. 0920-0600

Expiration Date 02/20/2022

Public reporting burden of this collection of information is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road NE, MSD-74, Atlanta, Georgia 30333; Attn: OMB-PRA(0920-0600)

## Instructions

- For each survey submitted, two growth-based drug susceptibility test methods and two molecular test method can be entered.
  - Sensititre, if performed, must be entered as the first method.
- All results for the MPEP survey must be entered at one time.
- For questions or comments, contact TBMPPEP@cdc.gov.

**In the last calendar year (January 1 - December 31, 2021), how many isolates of *M. tuberculosis* complex (MTBC) did your laboratory test for drug susceptibilities? (Please exclude quality control isolates)**

\* must provide value

---

**What method was performed in your laboratory for MTBC growth-based drug susceptibility testing (DST) in this shipment? (Only one method can be selected. If multiple methods were performed, there will be an opportunity to enter those results after the first method.)**

\* must provide value

- Agar Proportion (Middlebrook 7H10 or 7H11)
- MGIT System
- TREK Sensititre
- VersaTrek Myco
