character funce telestrifer for laboratory  monite and character funce to provide the set monits. has you indooratory changed testing each pathogen? Yes, 1so repeats for all pathogens*  monite character (best your laboratory test tool specimens (broad/CFF for Literals) on site for each pathogen? Yes, 1so repeats for all pathogens*  minerican character (best your laboratory test tool specimens for testing). The provided intericant character (best pathogens part of your laboratory down your sed pathogens or all pathogens* except Listeria character (best pathogens part of your laboratory your character (best pathogens). The pathogen part of your laboratory was calture to intailing laporate x9500) enteric screen?  CRC character (best pathogens part of your laboratory your character (best pathogens). The pathogens part of your laboratory your character (best pathogens). The pathogens part of your laboratory your charge most pathogens?  CRC character (best pathogens) and pathogens pathogens are pathogens of the pathogens of the pathogens pathogens are pathogens of the pathogens pathogens are pathogens. The pathogens pathogens are pathogens are pathogens of the pathogens are pathogens are pathogens. The pathogens are pathogens are pathogens are pathogens.  CRC character (best pathogens) and pathogens pathogens are pathogens are pathogens. The pathogens is detected using CIDT, is culture of the organism attempted on site?  CRC pathogens are pathogens in selected using CIDT, is culture of the organism attempted on site?  CRC pathogens are pathogens are pathogens are pathogens are pathogens. The pathogens are pathogens are pathogens are pathogens. The pathogens are pathogens are path			, ,		
Integretable therethe character pump the past 6 months, has you laboratory changed sesting methods used for detecting each pathogen? Yes, 10 months of the control of the c	•		,		
define CC  character of the pathogen part of your staboratory sets stool aptendence (filed (CF)) for texternal on set for each pathogen?  fine text  character (a week pathogen part of your staboratory sets stool aptendence seems (filed (CF)) for texternal on the for each pathogen?  fine text  character (a week pathogen part of your staboratory set voltine (approx x800) enteric screen?  CC  character (bow often does your staboratory use fixtred in minishly detect each pathogen?  could be completed to the country of the country				Yes. No	repeats for all pathogens*
character   which laboratory do voiced specimens for testing?   Text test   tepests for all pathogens* except Listeria   testing   testi				,	
character (see ach pathogen pan of your laboratory is each pathogen? routinely, sometimes, rarely, never respects of all pathogens* recept Listeria (unitarity legislation).  **Celloractive**  **Celloractive**					
character How often does your laboratory use culture to initially detect each pathogen?  October character How often does your laboratory use PCR text to initially detect each pathogen?  Obther character How often does your laboratory use PCR text to initially detect each pathogen?  Obther character How often does your laboratory use PCR text to initially detect each pathogen?  Obther character How often does your laboratory use PCR text to initially detect each pathogen?  Obther character How often does your laboratory use PCR text to initially detect each pathogen?  Increase How often does your laboratory use PCR text to initially detect each pathogen?  Increase How often does your laboratory use PCR text to initially detect each pathogen? BrothSubmit character How often are broth submitted to the public health laboratory? routinely, sometimes, rarely, never repeats for all pathogens* except Listeria	IsolateSubmit		, ,		
	StoolSubmit		, ,	routinely, sometimes, rarely, never	repeats for all pathogens* except Listeria
BloodSubmit character How often are blood samples submitted to the public health laboratory? routinely, sometimes, rarely, never Listeria only	BrothSubmit	character	How often are broth submitted to the public health laboratory?	routinely, sometimes, rarely, never	repeats for all pathogens* except Listeria
	BloodSubmit	character	How often are blood samples submitted to the public health laboratory?	routinely, sometimes, rarely, never	Listeria only

		FoodNet Clincal Laboratory Survey	Data Elements	
Variable Name	Format	Description	Legal Values	Comments
CSFSubmit	character	How often are CSF samples submitted to the public health laboratory?	routinely, sometimes, rarely, never	Listeria only
E.coliCXspecsent	character	If only culture for E. coli, are specimens sent to a different laboratory for Shiga toxin testing?	Yes, No	STEC only
E.coliCXlab	character	To which laboratory?	free text	STEC only
STECCIDTspecsent	t character	If ONLY non-culture based test(s), are specimens sent to a different laboratory for culture testing?	Yes, No	STEC only
STECCIDTIab	character	To which laboratory?	free text	STEC only
ListProtocolBLD	character	Which of the following protocols are followed to detect Listeria from blood culture?	PCR concurrently used with culture PCR performed first, if positive reflex culture performed Only PCR panels, no sub-culture is performed Only culture, no PCR test is performed	Listeria only
ListProtocolCSF	character	Which of the following protocols are followed to detect Listeria in CSF?	PCR concurrently used with culture PCR performed first, if positive reflex culture performed (routi PCR performed first, if positive reflex culture performed (provi PCR or culture or some combination thereof based on provider order Only PCR panels, no culture is performed Only culture, no PCR test is performed	
Norotest		When is norovirus test performed?	Stool submitted to your laboratory for any enteric pathogen Only when <i>norovirus</i> testing is specifically requested by a clinician Other reason (specify below)	Norovirus only
Norotestspec		Please specify other reason?	free text	Norovirus only
NoroGene		Please specify gene targets for PCR assay devloped in house or by published PCR method	free text	Norovirus only
NoroOthMeth		If other antigen test, PCR, or method used, please specify	free text	Norovirus only
Comments	character		free text	
Survey_method	character	For this survey cycle, how were the data for this laboratory collected?	Laboratory verified via phone/in-person visit Laboratory verified via email/electronic survey Laboratory did not respond, data from previous survey were verified via ELR Laboratory did not respond, data not verified	

<sup>\*</sup>Pathogens include Campylobacter, STEC (E.coli O157 and/or Shiga toxin), Salmonella, Shigella, Vibrio, Yersinia, Listeria, Cyclospora, and Norovirus
