1. Non-Substantive Change Request Justification Document
2. Description of Changes (Attachment #1)
3. Cross-Walk 2021 to 2022 (Attachment #2)
4. **ABCs:** 2022 ABCs Case Report Form (Attachment #3)
5. **FoodNet:** FoodNet Active Surveillance Data Elements List (Attachment #4)
6. **FoodNet:** FoodNet Hemolytic Uremic Syndrome (Attachment #5)
7. **FoodNet:** Diagnostic Laboratory Practices and Volume Data Elements List (Attachment #6)
8. **FluSurv-NET:** Influenza Hospitalization Surveillance Network Case Report Form (Attachment #7)
9. **FluSurv-NET:** FluSurv-NET/RSV-NET Hospital Laboratory Survey (Attachment #8)
10. **HAIC:** Invasive Methicillin-resistant *Staphylococcus aureus* (MRSA) Infection Case Report Form (Attachment #9)
11. **HAIC:** Invasive Methicillin-sensitive *Staphylococcus aureus* (MSSA) Infection Case Report Form (Attachment #10)
12. **HAIC:** CDI Case Report and Treatment Form (Attachment #11)
13. **HAIC:** CDI Annual Surveillance Officers Survey (Attachment #12)
14. **HAIC:** Annual Survey of Laboratory Testing Practices for *C. difficile* Infections (Attachment #13)
15. **HAIC:** Candidemia Case Report (Attachment #14)
16. **HAIC:** Laboratory Testing Practices for Candidemia Questionnaire (Attachment #15)
17. **HAIC:** Invasive *Staphylococcus aureus* Laboratory Survey: Use of Nucleic Acid Amplification Testing (NAAT) (Attachment #16)

Justification for Change Request for OMB 0920-0978

This is a nonmaterial/non-substantive change request for OMB No. 0920-0978, expiration date 04/30/2022, for the Emerging Infections Programs (EIP). All requested changes represent minor modifications to already-approved instruments including revised formatting, rewording, new answer options, and the addition/subtraction of a limited number of questions. Larger changes are being packaged together into a revision ICR that will be submitted later.

The Emerging Infections Programs (EIPs) are population-based centers of excellence established through a network of state health departments collaborating with academic institutions, local health departments, public health and clinical laboratories, infection control professionals, and healthcare providers. EIPs assist in local, state, and national efforts to prevent, control, and monitor the public health impact of infectious diseases.

Activities of the EIPs fall into the following general categories: (1) active surveillance; (2) applied public health epidemiologic and laboratory activities; (3) implementation and evaluation of pilot prevention/intervention projects; and (4) flexible response to public health emergencies. Activities of the EIPs are designed to: (1) address issues that the EIP network is particularly suited to investigate; (2) maintain sufficient flexibility for emergency response and new problems as they arise; (3) develop and evaluate public health interventions to inform public health policy and treatment guidelines; (4) incorporate training as a key function; and (5) prioritize projects that lead directly to the prevention of disease.

Activities in the EIP Network in which all applicants must participate are:

- Active Bacterial Core surveillance (ABCs): active population-based laboratory surveillance for invasive bacterial diseases.
- Foodborne Diseases Active Surveillance Network (FoodNet): active population-based laboratory surveillance to monitor the incidence of select enteric diseases.
- Influenza Hospitalization Surveillance Network (FluSurv-NET): active population-based surveillance for laboratory confirmed influenza-related hospitalizations.
- Healthcare-Associated Infections-Community Interface (HAIC) surveillance: active population-based surveillance for healthcare-associated pathogens and infections.

This non-substantive change request is for changes to the disease-specific data elements for ABCs, FoodNet, FluSurv-NET, and HAIC. The changes made to all forms under this non-substantive request will aid in improving surveillance efficiency and data quality to clarify the burden of disease and possible risk factors for disease. This information can be used to inform strategies for preventing disease and negative outcomes. Specifically, changes were made for clarification purposes, to assist data collectors in capturing data in a standardized fashion to improve accuracy. As a result of proposed changes, the estimated annualized burden is expected to increase by 406 hours, from 38,894 to 39,300. The data elements and justifications are described below.

The forms for which approval for changes are being sought include:

ABCs:

1. 2022 ABCs Case Report Form (Attachment 3)

Food Net:

2. FoodNet Active Surveillance Data Elements List (Attachment 4)
3. FoodNet Hemolytic Uremic Syndrome (Attachment 5)
4. Diagnostic Laboratory Practices and Volume Data Elements List (Attachment 6)

FluSurv-NET:

5. FluSurv-Net Influenza Hospitalization Surveillance Network Case Report Form (Attachment 7)
6. FluSurv-NET/RSV-NET Laboratory Survey (Attachment 8)

HAIC:

7. 2020 Invasive Methicillin-resistant *Staphylococcus aureus* (MRSA) Infection Case Report Form (Attachment 9)
8. 2020 Invasive Methicillin-sensitive *Staphylococcus aureus* (MSSA) Infection Case Report Form (Attachment 10)
9. CDI Case Report and Treatment Form (Attachment 11)
10. CDI Annual Surveillance Officers Survey (Attachment 12)
11. Annual Survey of Laboratory Testing Practices for *C. difficile* Infections (Attachment 13)
12. Candidemia Case Report (Attachment 14)
13. Laboratory Testing Practices for Candidemia Questionnaire (Attachment 15)
14. Invasive *Staphylococcus aureus* Laboratory Survey: Use of Nucleic Acid Amplification Testing (NAAT) (Attachment 16)

Estimated Annualized Burden Hours

As a result of proposed changes to forms highlighted in yellow, the estimated annualized burden is expected to increase by 406 hours, from 38,894 to 39,300. The figures highlighted in red are the forms where there was a change in burden hours.

The following table is updated for the entire 0920-0978 burden table. The forms included in this change request are highlighted:

Type of Respondent	Form Name	No. of respondents	No. of responses per respondent	Avg. burden per response (in hours)	Current	After Proposed Changes
State Health Department	ABCs Case Report Form	10	808	20/60	2697	2697
	ABCs Invasive Pneumococcal Disease in Children Case Report Form	10	22	10/60	37	37
	ABCs <i>H. influenzae</i> Neonatal Sepsis Expanded Surveillance Form	10	6	10/60	10	10
	ABCs Severe GAS Infection Supplemental Form	10	136	20/60	453	453
	ABCs Neonatal Infection Expanded Tracking Form	10	37	20/60	123	123
	FoodNet Campylobacter	10	970	21/60	3395	3395
	FoodNet Cyclospora	10	42	10/60	70	70
	FoodNet Listeria monocytogenes	10	16	20/60	53	53
	FoodNet Salmonella	10	855	21/60	2993	2993
	FoodNet Shiga toxin producing <i>E. coli</i>	10	290	20/60	967	967
	FoodNet Shigella	10	234	10/60	390	390
	FoodNet Vibrio	10	46	10/60	77	77
