

**NHSN 0920-0666 PRA PACKAGE REVIEW****Review how NHSN is accounting for CMS reducing reporting requirements**

As part of the CMS Meaningful Measures initiative, CMS finalized proposals during the summer and fall of 2018 to discontinue the required reporting of measures in the End-Stage Renal Disease Quality Incentive Program (QIP) and the Long-Term Care Hospital (LTCH), Inpatient Rehabilitation Facility (IRF), Inpatient Psychiatric Facility (IPF), Ambulatory Surgery Center (ASC), and Outpatient quality reporting programs.. While some facilities will continue to report these measures voluntarily or in fulfillment of state mandates, the overall burden for completing the forms associated with the measures has decreased. NHSN intends to make resulting revisions to its data collection tools in this ICR. The attached chart details the recent CMS final regulations that implement the discontinuation of required reporting of select measures in some of the quality reporting programs. For each of those measures, the associated forms are listed with the burden reduction in this ICR. Forms (57.112) (57.127) (57.128) and (57.203) likely, will all have an associated burden decrease based on adjustments made to the number of facilities that are no longer required for reporting as part of CMS quality reporting programs. However, multiple states still require mandated HAI reporting. Therefore, there is significant variability in the voluntary reporting by many NHSN facilities.

**Five Step enrollment for NHSN facilities and its relationship to ICR.**

The Five-step enrollment webpage is a tool used by NHSN users to provide an understanding of the process for gaining access to NHSN. The time estimates included on this page were developed based on some forms in this ICR as well as additional materials and processes that are exempt from the ICR. NHSN is working with developers to update the estimates posted on the website.

**A brief overview of NHSN Changes included in ICR.**

NHSN has updated the burden table to reflect direct burden adjustments in highlighted text. Also, the burden table was updated to reflect the direct burden impact for each form and the annual change for this ICR. Finally, Supporting Statement A has been updated to reflect the items that are accompanied by attachments as requested by OMB.
