

Leading Indicator Survey Questions - Master List

The survey created for these questions is intended to assess the use of safety and health metrics, with special emphasis on the acceptance and use of “leading indicators.” Answers to surveys generated from this master list are not intended for OSHA policy or rulemaking efforts. For the purpose of these surveys, the following definitions apply:

Leading Indicator or Metric: For purposes of this document, leading indicators are proactive, preventive, and predictive measures that provide information about the effective performance of your safety and health activities. They measure events leading up to injuries, illnesses, and other incidents and reveal potential problems in your safety and health program. In contrast, lagging indicators measure the occurrence and frequency of events that occurred in the past, such as the number or rate of injuries, illnesses, and fatalities.

Examples of leading indicators can include:

- Risk assessments
- Job safety observations
- Inspections
- EHS training
- Leadership safety engagement
- Corrective actions completed
- Employee safety perception surveys

Lagging or Trailing Indicator or Metric: Lagging indicators on the other hand alert you to a failure in an area of your safety and health program or to the existence of a hazard, leading indicators allow you to take preventive action to address that failure or hazard before it turns into an incident. A good program uses leading indicators to drive change and lagging indicators to measure effectiveness.

Examples of lagging indicators can include:

- OSHA Total Recordable Incident Rate (TRIR)

Appendix A

Survey Questions Master List

- OSHA Days Away, Restricted and Transferred (DART) rates
- Property damage
- Workers' compensation costs
- Liability/litigation costs

Business Impact Measures: Trailing or outcome measures that focus on the business impacts of safety and health programs and initiatives (e.g., safety and health contributions to key business strategies). For more information one can refer to OSHA's , [Using Leading Indicators to Improve Safety and Health Outcomes](#).

Examples of business impact measures can include:

- Productivity
- Reputational risk
- Business continuity
- Workforce morale
- Financial health

Public reporting burden for this collection of information is estimated to average 15 minutes per response (for surveys) and 8 hours (for discussion groups) , including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Ave NW., Suite N3621, Washington, DC 20210-4537 and reference the OMB Control Number 1290-0043.

The following questions are designed to collect information on the indicators that are in place at your worksite. Lagging indicators include the traditional safety metrics (OSHA rates) that indicate, for example, compliance with OSHA standards and regulations. These are the bottom-line numbers that can evaluate the overall effectiveness of safety at your facility. The drawback with lagging indicators to measure site safety success is that they only tell one events that have already occurred. The lagging indicator does address successes in preventing injuries, incidents, and accidents. This is where leading indicators come into play and should be used in conjunction with lagging indicators as a part of a site's metrics. A leading indicator in contrast is a measure one utilizes that ideally would precede a future event and would be used to drive and measure activities your site may carry out to prevent and control injury and illness.

Survey Questions

As appropriate for each of the questions in this survey please address if your response is site based or if it reflects on the entire corporation.

Appendix A
Survey Questions Master List

1. What business or industry are you in (i.e., healthcare, manufacturing, construction, and so forth)?
2. Who is filling out this survey – safety and health professional or another company manager?
3. What is your annual average for the number of employees?
4. What percent of your employees are full time company employees?
5. What percent of your employees are contractors?
6. What percent of your employees are temporary employees?
7. Do you use safety and health related leading indicators in your workplace?
 - a. Yes
 - b. No
8. If the answer to question #1 is “yes” are they used extensively?
 - a. Yes, we have several
 - b. We have one or two
 - c. No, we don’t use leading indicators.
9. At what level in the enterprise are leading indicators used? *(Select all that apply)*
 - a. Company wide
 - b. Business unit
 - c. Site level
10. Do you primarily use leading indicators as a preventative tool for fixing workplace hazards, or as a tool for improving the performance of your safety and health program (S&H program)? *(Select all that apply)*
 - a. Fixing workplace hazards
 - b. Improving S&H program performance
 - c. Both
 - d. Neither
11. What leading indicators do you collect? (See the following table)

✓ *Check All That Apply*

	Musculoskeletal Disorders
	Employee Involvement
	Leadership Engagements
	Corrective Actions (Quality/Closures)
	Risk Assessment/ Inspections of hazards with potentially serious consequences

Appendix A
Survey Questions Master List

	Incidents (Near-miss or Close Calls)
	Violations/Penalties (or 3 rd Party Audits)
	Safety and Health Program Participation
	Safety and Health-Related Training Rate
	Incident Reporting Process
	Company Safety Plan Audits, Exercises and drills
	Other Leading Indicators not listed (please specify)

12. Of these, indicate which leading indicators are most important in your workplace?

✓ *Check All That Apply Number in order of importance.*

	Musculoskeletal Disorders
	Employee Involvement
	Leadership Engagements
	Corrective Actions (Quality/Closures)
	Risk Assessment/ Inspections of hazards with potentially serious consequences
	Incidents (Near-miss or Close Calls)
	Violations/Penalties (or 3 rd Party Audits)
	Safety and Health Program Participation
	Safety and Health-Related Training Rate
	Incident Reporting Process
	Company Safety Plan Audits, Exercises and drills
	Other Leading Indicators not listed (please specify)

13. Why were the indicators in question 11 chosen?

Briefly comment on all that apply.

Appendix A
 Survey Questions Master List

Musculoskeletal Disorders	
Employee/Leadership Engagements	
Corrective Actions (Quality/Closures)	
Risk Assessment/ Inspections of Hazards with potentially Serious Consequences	
Incidents (Near-miss or Close Calls)	
Violations/Penalties (or 3 rd Party Audits)	
Safety Program Participation	
Safety and Health-Related Training Rate	

Appendix A
 Survey Questions Master List

Incident Reporting Process	
Company Safety Plan Audits, Exercises and drills	
Other Leading Indicators not listed	

14. How do you track the leading indicators you identified in Question 11 above?

Briefly comment on all that apply.

Musculoskeletal Disorders	
Employee/Leadership Engagements	
Corrective Actions (Quality/Closures)	
Risk Assessment/ Inspections of Hazards with Potentially serious Consequences	

Appendix A
Survey Questions Master List

Incidents (Near-miss or Close Calls)	
Violations/Penalties (or 3 rd Party Audits)	
Safety Program Participation	
Safety and Health-Related Training Rate	
Incident Reporting Process	
Company Safety Plan Audits, Exercises, and drills	
Other Leading Indicators not listed	

15. What lagging indicators do you collect? Please list.
16. Do you link your leading indicators to outcome data such as OSHA Days Away, Restricted or Transferred (DART) or Total Case Incident Rate (TCIR) metrics to evaluate results?
 - a. Yes
 - b. No

Appendix A
Survey Questions Master List

17. How do you determine the effectiveness of your leading indicators?
18. Which metrics, if any, (leading, lagging, business impact) do you report to senior management?

✓ Check All That Apply

<input type="checkbox"/> leading <input type="checkbox"/> lagging <input type="checkbox"/> business	Musculoskeletal Disorders
<input type="checkbox"/> leading <input type="checkbox"/> lagging <input type="checkbox"/> business	Employee/Leadership Engagements
<input type="checkbox"/> leading <input type="checkbox"/> lagging <input type="checkbox"/> business	Corrective Actions (Quality/Closures)
<input type="checkbox"/> leading <input type="checkbox"/> lagging <input type="checkbox"/> business	Risk Assessment/ Inspections of hazards with potentially serious consequences
<input type="checkbox"/> leading <input type="checkbox"/> lagging <input type="checkbox"/> business	Incidents (Near-miss or Close Calls)
<input type="checkbox"/> leading <input type="checkbox"/> lagging <input type="checkbox"/> business	Violations/Penalties (or 3 rd Party Audits)
<input type="checkbox"/> leading <input type="checkbox"/> lagging <input type="checkbox"/> business	Safety and Health Program Participation
<input type="checkbox"/> leading <input type="checkbox"/> lagging <input type="checkbox"/> business	Safety and Health-Related Training Rate
<input type="checkbox"/> leading <input type="checkbox"/> lagging <input type="checkbox"/> business	Incident Reporting Process
<input type="checkbox"/> leading <input type="checkbox"/> lagging <input type="checkbox"/> business	Company Safety Plan Audits, Exercises and drills
<input type="checkbox"/> leading <input type="checkbox"/> lagging <input type="checkbox"/> business	Other Leading Indicators not listed

19. Do you validate the leading indicator/metrics data?
a. Yes
b. No
20. If “yes” generally how is that done?
21. Do you validate the lagging/outcome metrics?
a. Yes

Appendix A
Survey Questions Master List

b. No

22. If yes, how is that done?

23. What leading indicators are, or could be, commonly used in your industry?

Current Use:

Future Use:

24. What are the enabling factors for using leading indicators in your company?

25. What barriers and challenges, if any, have you encountered to using leading indicators?

26. How many employees in your company are involved in tracking leading indicators? (Types of responsibility or job titles?)

27. Has the use of leading indicators changed the way that you manage your safety and health program or other business operations? If so, how?

28. How could employers be encouraged to use leading indicators in addition to lagging indicators to improve safety management? Example?

29. Any additional comments regarding the use of leading indicators?

30. Any additional comments on the use of metrics generally?

31. Are your leading indicators of safety and health reported to, or reviewed by the Board of Directors (BoD), or a BoD governance committee?

32. Have the leading indicators you've selected overtaken OSHA Recordable injury statistics as having more meaning for your organization than OSHA lagging indicators?

33. If you have any leading indicators tracking, data, or forms you would be willing to share, please email to NSC at [TBD]

34. What leading indicators have you **stopped** collecting? Why?

35. What leading indicators do you use that provide the best value?
