

Crop Progress and Condition Report - or - Crop Weather – 20XX

The weekly Crop Progress or Crop Weather survey, asks questions concerning the different stages of growth, condition, and development for various crops across the United States. Questionnaires are customized for each State to measure the crops progress throughout the growing season. The questions asked are based on several factors (HQ required questions, historic trends, and current weather and growth trends) within each State. HQ required questions focus on program commodities for each State. The following listing contains all of the questions that will be used throughout the growing season across the United States. In the ROCIS submission system we have attached a typical questionnaire that shows that the weekly questionnaire takes approximately 10 minutes to complete.

COMMODITY	QUESTION TEXT
ALFALFA HAY HARVESTED	NONE
ALFALFA HAY HARVESTED	LIGHT
ALFALFA HAY HARVESTED	MODERATE
ALFALFA HAY HARVESTED	ACTIVE
ALFALFA HAY HARVESTED	FINISHED
ALFALFA SEED	ALFALFA SEED HARVESTED
ALFALFA SHEEPING OFF	NONE
