

**Non-substantive Change Request
OMB Control Number 0920-0765
Fellowship Management System**

**Application Module
Host Site Module**

Date Submitted: June 2, 2021

Revised: June 8, 2021

This is a change request for the Centers for Disease Control and Prevention (CDC) Fellowship Management System (FMS). The web-based, flexible, and robust data management system allows CDC to electronically collect and process fellowship applications, host site assignment proposals, and fellowship alumni information from nonfederal persons. FMS also supports and monitors ongoing fellowship activities and compliance with fellowship requirements. Through Revisions and Change Requests, CDC has adapted the FMS to reflect changes in the demand for fellowship opportunities, to improve alignment and tailoring of questions for each fellowship program's eligibility criteria, and to clarify questions and instructions in response to user feedback. FMS consists of four modules. Each module has specialized functionality, and in the currently approved ICR for FMS (**OMB No. 0920-0765**), information collection occurs for multiple fellowships (see [Table A](#)).

In this Change Request, CDC seeks OMB approval to accommodate specific changes to the following fellowship programs: Preventive Medicine Residency and Fellowship (PMR/F), Population Health Training in Place Program (PH-TIPP), Public Health Informatics Fellowship Program (PHIFP), CDC Steven M. Teutsch Prevention Effectiveness Fellowship (PEF), and the Future Leaders in Infections and Global Health Threats (FLIGHT).

The proposed changes will contribute enhancements and provide the CDC with a more efficient and effective mechanism for collecting and monitoring fellowship information and ongoing fellowship activities, and compliance with fellowship requirements. These changes will also help us better assess applicants and host sites during the selection process.

The specific changes include the following:

- (1) Modifications to sections of our data collections on which we have received feedback from program participants, staff, reviewers, and other partners that support fellowship and training programs' efficiency and effectiveness. The specific modifications are described in **Tables C - D: Application Module and Host Site Module**, and **Attachment C - D: the accompanying screenshots**. These changes will apply to the following fellowship programs: PMR/F, PH-TIPP, PHIFP, PEF, and FLIGHT. Many changes below relate to specific fellowships opting in to use questions already approved as part of eFMS.

All the requested changes will add no more than 10 minutes to the FMS modules' entire burden. The approved FMS ICR burden time per response for each module is illustrated in [Table B](#). The proposed changes were tested by six (6) CDC staff and external partners, timed, and found that completion of the changes overall modules result in no more than 5 minutes additional time per respondent for each of the two modules included here. The proposed changes do not substantively impact the burden

because the modifications to questions and instructional language will help to guide participants through the application process and enhance efficiency.

The details of these changes are described below and depicted in Attachments C-F with screenshots:

1. [Tables C](#) (Application Module) and **Attachment C** Application Module Screenshots
2. [Table D](#) (Host Site Module) **Attachment D** Host-Site Module Screenshots
