

**Non-substantive Change Request  
OMB Control Number 0920-0765  
Fellowship Management System**

**Application Module  
Host Site Module**

**Date Submitted: November 5, 2021**

This is a change request for the Centers for Disease Control and Prevention (CDC) Fellowship Management System (FMS). The web-based, flexible, and robust data management system allows CDC to electronically collect and process fellowship applications, host site assignment proposals, and fellowship alumni information from nonfederal persons. FMS also supports and monitors ongoing fellowship activities and compliance with fellowship requirements. Through Revisions and Change Requests, CDC has adapted the FMS to reflect changes in the demand for fellowship opportunities, to improve alignment and tailoring of questions for each fellowship program's eligibility criteria, and to clarify questions and instructions in response to user feedback. FMS consists of four modules. Each module has specialized functionality, and in the currently approved ICR for FMS (**OMB No. 0920-0765**), information collection occurs for multiple fellowships (see [Table A](#)).

In this Change Request, CDC seeks OMB approval to accommodate specific changes to only the Public Health Associate Program (PHAP) fellowship.

The proposed changes will contribute enhancements and provide the CDC with a more efficient and effective mechanism for collecting and monitoring fellowship information and ongoing fellowship activities, and compliance with fellowship requirements. In particular, these changes will help us streamline the assessment of applicants and better assess host sites during the selection process.

The specific changes include the following:

(1) Deletion of two questions from the Application Module that were deemed unnecessary to meet program objectives and (2) Addition of two questions to the Host Site Module to obtain more information about the position and workplace expectations.

The requested changes will not add any time to the FMS modules' entire burden. The approved FMS ICR burden time per response for each module is illustrated in [Table B](#). The proposed changes do not substantively impact the burden because questions were both deleted and added. Moreover, the added questions require little to no additional time from respondents to answer.

The details of these changes are described below and depicted in Attachments C-F with screenshots:
