Subject: RE: OMB package materials for the Chronic Pain Guideline Project

Dear Mr. Grant,

We have an updated SSA for you, attached.

To recap, our project, the Chronic Pain Guideline Project, has changed from non-research, to research, specifically human subjects research.

As we discussed, neither CDC nor the contractor (Abt Associates) will have access to PII. However, after speaking with the Patient Confidentiality Unit, it seems ISI may be applicable (as discussed in the documents). A Certificate of Confidentiality is also now in place for this project.

Our 60 day posting period is now complete. We would like to send everything in for the final 30 day posting next week before people leave for the holiday week. **Would it be possible to return to us by close of next Wednesday 12/15 at the very latest?**

Thank you for your assistance with this matter.

Jas and team

Subject: RE: OMB package materials for the Chronic Pain Guideline Project

Dear Mr. Grant,

Just wanted to follow up on this. We are approaching the 30 day posting and would like to finalize all required documentation soon.

I have been advised by the OMB liaison that it should not affect the PIA, but to keep you in the loop, we have recently changed our determination from non-research to research and human subjects research. Some minor edits will be made to the SSA as a result, but my impression is that this should not affect the PIA.

Thank you for your assistance with this.

Subject: RE: OMB package materials for the Chronic Pain Guideline Project

Hi Jas and others,

Below I am sharing an updated assessment of the documents previously provided. PII is applicable only if collecting or storing patient's name, email, and or phone number. Please confirm if this is or is not the case.

Documents	Summary of Review
1-Final SSA-9-2-21	<ul style="list-style-type: none"> • The goal of this study is to evaluate the effects of policies and evidence-based guidelines related to chronic pain management and opioid prescribing, including access to medications for opioid use disorder (MOUD), for patients and clinicians in primary care settings among a diverse sample of health systems. • All personally identifiable information (PII) will be removed from the files prior to uploading using MOVEit, an online platform for data sharing which meets FedRAMP requirements. • Survey Analysis: Univariate statistics across systems will be performed on survey data, including means, medians, and standard deviations. Distributions of continuous variables will be plotted and frequency tables created. We will code responses to open-ended survey questions thematically; describe common themes, along with demonstrative examples of responses of each theme; and stratify analyses by geographic region, clinician type, and system. • Qualitative Synthesis and Analysis: Qualitative data from the process evaluation will be reviewed and coded to identify themes and contextualize the quantitative data. All qualitative data will be coded and analyzed using Nvivo qualitative analytic software. Codebook development will be iterative and include deductive codes. • Secondary EHR Data Analysis: The study will use quantitative methods such as odds ratio to measure health system variation in QI measure change and their significance over time.
2-Final SSB-9-2-21	<ul style="list-style-type: none"> • Using REDCap- Survey data from clinicians at participating health systems • Telephone Interviews of health system leaders involved with chronic pain management and opioid prescribing guideline.(may need phone numbers and or email addresses for contact. Case study Interviews are recorded. • Interview at least two staff members per health system, up to two clinicians and two care team members for an upper limit of four staff members per system. Interviews will be conducted by telephone or video software (e.g., WebEx or Zoom) and are expected to take up to 30 minutes. All interviews will be recorded with respondents' permission. If permission to record the interview is not given, we will rely on notes taken by a note taker.
3. A Clinician Survey	<ul style="list-style-type: none"> • Clinicians have to sign a consent form. Participation is voluntary. PII is applicable only if they are collecting or storing patient's name, email, and or phone number. • Survey takes 10 minutes

	<ul style="list-style-type: none"> • Small risk of confidentiality
4. Patient Survey	<ul style="list-style-type: none"> • Patients have to sign a consent form. Participation is voluntary. PII is applicable only if they are collecting or storing patient's name, email, and or phone number. • Survey takes 10 minutes • Small risk of confidentiality

Subject: RE: OMB package materials for the Chronic Pain Guideline Project

Dear Mr. Wade,

Just wanted to touch base about our project documents, and see if there are any questions or issues for us to address.

Thank you!

Jas and the Clinical Practice Team

Subject: OMB package materials for the Chronic Pain Guideline Project

Dear Mr. Wade,

As promised, attached are the OMB package materials for the chronic pain guideline project, including SSA, SSB, and 5 data collection instruments.

The documents are attached here, and also saved at this link, depending on your preferred method of reviewing.
[\\cdc.gov\project\CCEHIP_NCIPC_DUIP\DUIP-Share\PDO Health Systems and Research Branch\Abt Guideline Evaluation \(3 Phases\)\3 Phase Three\8 OMB package sent to Karen Angel and Danny W. 9-2-21](\\cdc.gov\project\CCEHIP_NCIPC_DUIP\DUIP-Share\PDO Health Systems and Research Branch\Abt Guideline Evaluation (3 Phases)\3 Phase Three\8 OMB package sent to Karen Angel and Danny W. 9-2-21)

I am also sending these to the OMB liaison (Karen Angel) today for simultaneous review. These versions are near final, but subject to further edits by the OMB liaison.

I will be on leave effective this evening until 9/15. Should you have any time-sensitive questions, please contact my team members who are cc'd here.

We appreciate your assistance.

Jas, Christina, John, and Wes
