From Sapling to Redwood: IS Career Development Grants

Join us for our next [Implementation Science Webinar](#) hosted by the National Cancer Institute (NCI) Division of Cancer Control & Population Sciences (DCCPS) Implementation Science Team.

Since late 2016, we have been joined by all manner of leading experts, collaborators, mid-career investigators, and colleagues to discuss funding, training, growth in the field, global collaborations, priority areas, and the role of Implementation Science at NCI. Based on audience demand, we are excited to focus our fall programming on funding and grants development from several vantage points. Dr. David Chambers will be joined by Drs. Burnside, Davis, and Sheth to discuss their experience as investigators who have used career development awards, including K and T mechanisms, to grow capacity in implementation science individually and at home institutions. The session will include initial comments from our speakers, sharing their perspectives in a facilitated discussion, and we will then open it up for questions from participants.

This webinar will kick off a series of three sessions and will be followed by a late-October session featuring investigators who have shared their funded applications in our [DCCPS Sample Grant](#) repository, responding to broader questions about their paths to successful funding as well as speaking about the components of their applications they found the most challenging; in mid-November we will welcome past Dissemination and Implementation Research in Health (DIRH) Study Section Chairs sharing insights gleaned from their collective leadership of the review committee.

[Registration is required.](#)

Once you register at the link above, you will receive a confirmation email with the log-in information for the WebEx session - please be sure to save that information so you can access the session.

Can't be there? The session will be recorded and archived approximately one week following the session. Additionally, the [full archive](#) of previous IS webinars is available.

Speakers:

Elizabeth S. Burnside, MD, MPH, MS

Professor, Radiology

Associate Dean of Team Science and Interdisciplinary Research

Deputy Executive Director for the Institute for Clinical and Translational Research

University of Wisconsin, School of Medicine and Public Health

Melinda Davis, PhD

Associate Director, Oregon Rural Practice-based Research Network (ORPRN)

Associate Professor, Department of Family Medicine & OHSU-PSU

School of Public Health

Oregon Health & Science University (OHSU)

Sangini Sheth, MD, MPH

Assistant Professor of Obstetrics, Gynecology, and Reproductive Sciences

Associate Medical Director & Director of Colposcopy and Cervical Dysplasia,

Women's Center

Yale New Haven Hospital

Reasonable Accommodations

Captioning can be provided during the presentation. Individuals with disabilities who need reasonable accommodation to participate in this event should contact NCIdccpsISteam@mail.nih.gov no later than the Monday before the session.
