

The National Cancer Institute's Center for Cancer Research, Neuro-Oncology Branch, NCI-CONNECT (Comprehensive Oncology Network for Rare CNS Tumors) program invites you to attend the **virtual Survivorship Workshop**, which will take place **June 21 to 22, 2021**.

The two half-day sessions will bring together researchers, health care providers and patient advocates to discuss the challenges experienced by persons diagnosed and living with brain and central nervous system tumors. The goals of the workshop are to draft survivorship guidelines for the medical community and to develop a research agenda focusing on the gaps in CNS tumors survivorship research and care.

The *NCI-CONNECT Survivorship Workshop* is free to attend and the educational sessions are open to all. To learn more about the workshop and to register, please visit our website:
