CISC 2021 Meeting Harnessing Imaging Tools to Guide Immunotherapy Trials is taking place as a virtual meeting on April 6, 2021. The meeting will take place beginning at 9:30 am on April 6, a draft agenda is attached for your reference. You are invited to attend and contribute to this meeting as a participant.

Participation in this meeting is by invitation only. Please go to <https://www.cvent.com/d/ciqs5d> to register for this meeting so that we can plan for your attendance. We request your response no later than April 2, 2021. If you are unable to attend this meeting, kindly respond to this email.

Information on the WebEx log in will be provided closer to the meeting date and only to registered participants.

The objectives of this meeting are:

- To review the available diagnostic imaging tools to assess the impact of immunotherapy. This includes the role of predicting as well as assessing response in Phase II and III immunotherapy clinical trials.
- Assessing the role of investigational tools such as:
 - o Image analysis of standard of care scans such as CT, MR and PET – texture, volume and radiomics
 - o Functional MR agents such as USPIOs
 - o Molecular Imaging PET agents

I look forward to seeing you in April!

Natalie
