The Specialized Centers of Research Excellence on Sex Differences (SCORE) program is the only NIH cooperative agreement program supporting disease-agnostic research on sex differences. Each center serves as a national resource for translational research to identify the role of biological sex differences in the health of women.

At this year's #SCORE2021 Annual Meeting, Dr. Jocalyn Clark, Executive Editor of *The Lancet*, will present the keynote address, titled "Sex Differences Research and the Health of Women: An Editor's Perspective." This portion of the meeting is open to the public, whereas the remainder of the event is a business meeting for SCORE investigators. To register, visit "[link will be made available/ provided](#)".
