Subject: Inaugural Early Career Investigator Day - Registration open

Dear Colleagues,

Early Career Investigator Day (ECID) will be held on Tuesday, March 22, 2022 (9AM-12PM EDT) as a pre-conference session of the Annual Symposium on Global Cancer Research, which is held in conjunction with the Consortium of Universities in Global Health annual meeting. The ECID is an opportunity for early career scientists interested in a career in global cancer research to learn about initiating and sustaining research collaborations in global settings and getting started in cancer research. This interactive session will begin with an introduction to global research training opportunities at the US National Cancer Institute and National Institutes of Health (NIH). This will be followed by presentations from and discussions with cancer researchers supported by the NIH where they will share experiences in initiating and maintaining research collaborations; they will also discuss technical and non-technical skills and competencies needed for global cancer research careers. Finally, perspectives from current NIH early career development awardees and mentors will be presented and discussed.

Learn more about registration criteria and the registration process on the ECID page of the event website.
