

Translational Research in Clinical Oncology (TRACO)

Recent advances in understanding cancer biology are beginning to be translated into improvements in diagnosis and treatment of cancer. In the post-genome era, we increasingly rely on strong collaboration between basic and clinical scientists to develop novel approaches for treatment of human disease. The Center for Cancer Research (CCR) of the NCI is one of the largest centers for cancer research in the world, with over 200 Principal Investigators, and has a major role in development and implementation of many of new technologies, such as nanotechnology, next generation sequencing, genomics and proteomics.

The **Translational Research in Clinical Oncology (TRACO)** course is usually held on Monday afternoons from September to November 2021 by WebEx. TRACO is designed to provide an overview of general principles of cancer biology and treatment, epidemiology, genomics, precision medicine, mechanisms of resistance, use of preclinical models, and identification of novel molecular targets. Participants will have an unprecedented opportunity to learn new information, glimpse into future developments of translational research in clinical oncology and meet leaders in cancer research. The participation of NIH Postdoctoral and Clinical Fellows is encouraged. For schedule details, please visit the [TRACO program website](#).

Registration closes September 8th, 2021.

OMB No.: 0925-0740
Expiration Date: 7/31/2022

Public reporting burden for this collection of information is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-0740). Do not return the completed form to this address.
