

## TEACHER LOG

The purpose of the Teacher Log is to collect information on the implementation of curricula and use of various teaching practices in both intervention and control classrooms. This information will be used to describe how the interventions are implemented and the treatment contrast when comparing each intervention group to the control group, as well as comparing the intervention groups to each other. This attachment includes the following: (a) the Teacher Log; and (b) communication to teachers regarding the log and related honoraria.

## Introduction

---

Thank you for participating in the Variations in Implementation of Quality Interventions (VIQI). As part of this study, we would like you to answer some questions about the activities in your classroom. This information is crucial to helping us understand what activities occur in different early care and education centers, how teachers deliver these activities, and what professional development is received.

Your participation is completely voluntary, and you may skip any questions you do not wish to answer. Your decision to participate will not have any effect on your job. Your responses will be completely private and will only be used for research and program improvement purposes. Your responses will be stored in password protected computer files and in locked research facilities and we will not share your individual responses with anyone outside of the research team.

Please complete this Teacher Log, thinking about the classroom activities you delivered during [reporting period]. For each item, read all options and their descriptions and then select the option that best applies. It will take approximately 15 minutes to complete.

[Add description delineating when the log must be submitted based on the reporting period. Example: Please complete one log every week (from September through May). All logs must be submitted by the last day of the [reporting period].]

Thank you!

*An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB number for this information collection is 0970-0508 and the expiration date is XX/XX/XXXX. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to [Contractor Contact Name]; [Contractor Contact Address].*

*[NOTE TO REVIEWERS: This log has been drafted as though we are asking teachers to complete the log on an ongoing basis every week and to report on a specific day of that week. There are two sets of items for the log – Week A and Week B – and we will alternate which set of items we ask each week. There is also a set of items that will be asked quarterly only. This is to maximize the number of questions we ask teachers while minimizing the length of time it will take to complete the log on any given week. We plan on piloting different versions of some of the items in the log during the pilot study; we note this throughout the log by the phrase “alternative wording.” We may also pilot different data collection time points. This includes testing out alternative time sampling approaches (e.g., asking teachers to fill out the log thinking about a specific day of the week or the entire week). We have not shown all of the potential iterations, since it would be helpful to continue to refine the measurement approach during the pilot study, so that we can apply the learnings to finalizing the full-scale version of the instruments. These approaches will help us refine our measurement approach for the full-scale study and help us have a better understanding of which items are most appropriate and informative about the constructs of interest.]*
