Section 547.5(f) requires a TGRA to maintain records of its following determinations: (i) Regarding a testing laboratory's (that is owned or operated or affiliated with a tribe) independence from the manufacturer and gaming operator for whom it is providing the testing, evaluating, and reporting functions; (ii) regarding a testing laboratory's suitability determination based upon standards no less stringent than those set out in 25 CFR 533.6(b)(1)(ii) through (v) and based upon no less information than that required by 25 CFR 537.1; and/or (iii) the TGRA's acceptance of a testing laboratory's suitability determination made by any other gaming regulatory authority in the United States. The TGRA must maintain said records for a minimum of three years and must make the records available to the Commission upon request. Section 547.17 requires a TGRA to submit a detailed report for each enumerated standard for which the TGRA approves an alternate standard, and the report must include: (i) An explanation of how the alternate standard achieves a level of security and integrity sufficient to accomplish the purpose of the standard it is to replace; and (ii) the alternate standard as approved and the record on which the approval is based. This collection is mandatory and allows the NIGC to confirm tribal compliance with NIGC regulations on "electronic, computer, or other technologic aids" to conduct class II gaming activities.

Abstract: The regulations at 30 CFR 250, subpart L, Oil and Gas Production Measurement, Surface Commingling, and Security, are the subject of this collection. This request also covers the related Notices to Lessees and Operators (NLTs) that BSEE issues to clarify, supplement, or provide additional guidance on some aspects of our

regulations. BSEE uses the information collected under subpart L to ensure that the volumes of hydrocarbons produced are measured accurately, and royalties are paid on the proper volumes. Specifically, BSEE needs the information to:

Liquid Hydrocarbon Measurement

- Determine if measurement equipment is properly installed, provides accurate measurement of production on which royalty is due, and is operating properly;
- Ascertain if all removals of oil and condensate from the lease are reported;
- Obtain rates of production measured at royalty meters, which can be examined during field inspections;

Gas Measurement

- Ensure that the sales location is secure and production cannot be removed without the volumes being recorded;

Surface Commingling

- Review gas volume statements and compare them with the Oil and Gas Operations Reports to verify accuracy.

Miscellaneous & Recordkeeping

- Review proving reports to verify that data on run tickets are calculated and reported accurately.

Title of Collection: 30 CFR 250, subpart L, Oil and Gas Production Measurement Surface Commingling, and Security.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public:

Potential respondents include Federal OCS oil, gas, and sulfur lessees and/or operators and holders of pipeline rights-of-way.

Total Estimated Number of Annual Respondents: Currently there are approximately 60 Oil and Gas Drilling and Production Operators in the OCS. Not all the potential respondents will submit information in any given year, and some may submit multiple times.

Total Estimated Number of Annual Responses: 104,291.

Estimated Completion Time per Response: Varies from 15 minutes to 35 hours, depending on activity.

Total Estimated Number of Annual Burden Hours: 38,986.
