**Assumptions**

<sup>a</sup> This ICR uses the following labor rates: \$153.55 for managerial labor, \$122.20 for technical labor, and \$61.51 for clerical labor. Statistics, March 2021 “Table 2. Civilian Workers, by occupational and industry group.” The rates have been increased by 110 per industry.

<sup>b</sup> There are an estimated 2,900 existing plating and polishing plants and no new facilities are expected. We assume that each source

<sup>c</sup> Each of the 2,900 existing plants noted above would have already submitted an initial notification. Since there are no new facilities

<sup>d</sup> Each of the 2,900 existing plants noted above would have already submitted a notification of compliance status by the appropriate respondents required to submit a notification of compliance status is 0.

<sup>e</sup> The 2,900 existing plants would be required to prepare an annual compliance certification every year. They would only submit them if they experience a deviation, the number of compliance certifications submitted will be  $(2,900 * 0.05) = 145$ .

<sup>f</sup> Assumes that 5% of existing facilities would have to submit a report of deviations starting in Year 3 of the ICR clearance period,

<sup>g</sup> It is assumed that 0.33 hr (20 minutes) per week will be required per facility for recordkeeping.

<sup>h</sup> Annual transmittals would include submission of annual compliance certifications (145) and reports of deviations (145) for 5% of
