NASS:

I read through the documents provided by the Food and Nutrition Service and everything looks in order. I have only one item to verify, please double check the years in Appendix D5 and D5a. I think they need to be updated from 2021 to 2022.

FNS Response:

That is correct; data collection is intended for 2022. All dates in recruitment materials are considered place holders and will be updated upon receipt of clearance and just before data collection begins to ensure accuracy.
