

Crosswalk: (CMS-10524; OMB-0938-1293)
 Prior Authorization Process for Certain Durable Medical
 Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) Items

This is a revised collection. The updated average burden estimate is 445,920 cases per year in years one through three, with a projected annual average burden cost of \$7,860,000. In our previous collection, the average burden estimate was 330,210 cases per year in years one through three, with a projected annual average burden cost of \$5,300,000

The previous burden estimate was based on the potential number of prior authorization requests from the Master List (ML) finalized in CMS 6050-F. Since then we have broadened the criteria for the Master List through CMS 1713-F, which significantly increases the number of items on the Master List from which we can choose for required prior authorization.

Adding more items to the Required Prior Authorization List will increase the number of prior authorization request submissions, which in turn, increases the total burden associated with this package

Previous Total Burden

Year	Year One	Year Two	Year Three	Annual Average
Costs	\$ 5,160,899	\$ 5,369,349	\$ 5,369,349	\$5,299,866
Cases	321,551	334,540	334,540	330,210

Revised Annual Total Burden

Year	Year One	Year Two	Year Three	Annual Average
Costs	\$ 4, 816,039	\$ 8,446,079	\$ 10,311,253	\$7,857,790,
Cases	263,443	479,305	585,152	445,920
