Introduction

Mathematica is conducting the American Indian and Alaska Native Head Start Family and Child Experiences Survey 2019 (AIAN FACES 2019) under contract with the Administration for Children and Families (ACF) of the U.S. Department of Health and Human Services (HHS).

To help us understand your center better, we need you to complete this brief survey. It asks about:

- staffing and recruitment
- Native culture and language
- staff education and training; curriculum and assessment
- supports for physical activity and nutrition
- program management
- · a few questions about yourself and your background

Some questions will be about the COVID-19 pandemic, mental health, and national events that have potentially caused distress. The National Suicide Prevention Lifeline offers free and confidential support for people in distress and is available 24 hours a day at 1-800-273-8255.

Thank you for taking the time to complete this survey. Questions are not always numbered sequentially, so please answer questions in the order they appear, regardless of the question number. Additionally, you may be told to skip some questions because they do not apply to you.

Your participation in the study is voluntary and you may refuse to answer any questions you are not comfortable answering. Your individual answers will not be shared with other staff at your center, or anybody else not working on this study. Please be assured that all information you provide will be kept private to the extent permitted by law. In the future, survey responses from the study (with nothing identifying individuals, programs, or communities) may be securely shared with qualified individuals for additional learning purposes to better understand the strengths and needs of children and families in Head Start and the programs that serve them.

Additionally, there are a few questions that you will answer using your own words. The information you provide as part of those open-ended questions may be directly quoted in order to illustrate a point, but any specific names or places (or any other information that could identify an individual, program, or community) that you mention will be omitted from study reports.

The survey will take about 30 minutes to complete.
