

As part of the COVID-19 Public Education Campaign market research efforts, the Current Events Tracker (CET) is a flexible survey vehicle designed for easy addition or removal of questions as applicable to the current environment. In this round, we removed last week's new questions. We are asking new or updated questions relating to parents vaccinating their children including risk awareness of the EUA for 5-11-year-olds, mandates and whether they're responsible for a respondents vaccination decision, reasons for not vaccinating, booster eligibility knowledge and willingness to receive a booster at various time intervals, and awareness and perceptions of forthcoming antiretroviral medications to treat COVID-19 once infected.
