SUBCHAPTER I—FINDINGS, DECLARATIONS, AND DEFINITIONS

§ 5121. Congressional findings and declarations

(a) The Congress hereby finds and declares that—

(1) because disasters often cause loss of life, human suffering, loss of income, and property loss and damage; and

(2) because disasters often disrupt the normal functioning of governments and communities, and adversely affect individuals and families with great severity;

special measures, designed to assist the efforts of the affected States in expediting the rendering of aid, assistance, and emergency services, and the reconstruction and rehabilitation of devastated areas, are necessary.

(b) It is the intent of the Congress, by this chapter, to provide an orderly and continuing means of assistance by the Federal Government to State and local governments in carrying out their responsibilities to alleviate the suffering and damage which result from such disasters by—

(1) revising and broadening the scope of existing disaster relief programs;

(2) encouraging the development of comprehensive disaster preparedness and assistance plans, programs, capabilities, and organizations by the States and by local governments;

(3) achieving greater coordination and responsiveness of disaster preparedness and relief programs;

(4) encouraging individuals, States, and local governments to protect themselves by obtaining insurance coverage to supplement or replace governmental assistance;

(5) encouraging hazard mitigation measures to reduce losses from disasters, including development of land use and construction regulations; and

(6) providing Federal assistance programs for both public and private losses sustained in disasters¹

(g) Criteria for assistance awards

In determining whether to provide technical and financial assistance to a State or local government under this section, the President shall provide financial assistance only in States that have received a major disaster declaration in the previous 7 years, or to any Indian tribal government located partially or entirely within the boundaries of such States, and take into account—

(1) the extent and nature of the hazards to be mitigated;

(2) the degree of commitment of the State or local government to reduce damages from future natural disasters;

(3) the degree of commitment by the State or local government to support ongoing non-Federal support for the hazard mitigation measures to be carried out using the technical and financial assistance;

nical and financial assistance contribute to the mitigation goals and priorities established by the State;

(5) the extent to which the technical and financial assistance is consistent with other assistance provided under this chapter;

(6) the extent to which prioritized, cost-effective mitigation activities that produce meaningful and definable outcomes are clearly identified;

EFFECTIVE DATE OF 2018 AMENDMENT

Amendment by Pub. L. 115-254 applicable to each major disaster and emergency declared by the President on or after Aug. 1, 2017, and authorities provided under div. D of Pub. L. 115-254 applicable to each major disaster and emergency declared by the President on or after Jan. 1, 2016, except as otherwise provided, see section 1202 of Pub. L. 115-254, set out as a note under section 5121 of this title.

Pub. L. 115-254, div. D, §1234(b), Oct. 5, 2018, 132 Stat. 3462, provided that: “The amendments made to section 203 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133) by paragraphs (3) and (5) of subsection (a) shall apply to funds appropriated on or after the date of enactment of this Act [Oct. 5, 2018].”

Pub. L. 115-254, div. D, §1234(d), Oct. 5, 2018, 132 Stat. 3463, provided that the amendment made by section 1234(d) is effective on the date that is 5 years after Oct. 5, 2018.

FINDINGS

Pub. L. 111-351, §2, Jan. 4, 2011, 124 Stat. 3863, provided that: “Congress finds the following:

“(1) The predisaster hazard mitigation program has been successful and cost-effective. Funding from the predisaster hazard mitigation program has successfully reduced loss of life, personal injuries, damage to and destruction of property, and disruption of communities from disasters.

“(2) The predisaster hazard mitigation program has saved Federal taxpayers from spending significant sums on disaster recovery and relief that would have been otherwise incurred had communities not successfully applied mitigation techniques.

“(3) A 2007 Congressional Budget Office report found that the predisaster hazard mitigation program reduced losses by roughly \$3 (measured in 2007 dollars) for each dollar invested in mitigation efforts funded under the predisaster hazard mitigation program. Moreover, the Congressional Budget Office found that projects funded under the predisaster hazard mitigation program could lower the need for post-disaster assistance from the Federal Government so that the predisaster hazard mitigation investment by the Federal Government would actually save taxpayer funds.

“(4) A 2005 report by the Multihazard Mitigation Council showed substantial benefits and cost savings from the hazard mitigation programs of the Federal Emergency Management Agency generally. Looking at a range of hazard mitigation programs of the Federal Emergency Management Agency, the study found that, on average, \$1 invested by the Federal Emergency Management Agency in hazard mitigation provided the Nation with roughly \$4 in benefits. Moreover, the report projected that the mitigation grants awarded between 1993 and 2003 would save more than 220 lives and prevent nearly 4,700 injuries over approximately 50 years.

“(5) Given the substantial savings generated from the predisaster hazard mitigation program in the years following the provision of assistance under the program, increasing funds appropriated for the program would be a wise investment.”

FINDINGS AND PURPOSE

Pub. L. 106-390, title I, §101, Oct. 30, 2000, 114 Stat. 1552, provided that:

“(a) FINDINGS.—Congress finds that—

“(1) natural disasters, including earthquakes, tsunamis, tornadoes, hurricanes, flooding, and wildfires, pose great danger to human life and to property throughout the United States;

“(2) greater emphasis needs to be placed on—

“(A) identifying and assessing the risks to States and local governments (including Indian tribes) from natural disasters;

“(B) implementing adequate measures to reduce losses from natural disasters; and

“(C) ensuring that the critical services and facilities of communities will continue to function after a natural disaster;

“(3) expenditures for postdisaster assistance are increasing without commensurate reductions in the likelihood of future losses from natural disasters;

“(4) in the expenditure of Federal funds under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), high priority should be given to mitigation of hazards at the local level; and

“(5) with a unified effort of economic incentives, awareness and education, technical assistance, and demonstrated Federal support, States and local governments (including Indian tribes) will be able to—

“(A) form effective community-based partnerships for hazard mitigation purposes;

“(B) implement effective hazard mitigation measures that reduce the potential damage from natural disasters;

“(C) ensure continued functionality of critical services;

“(D) leverage additional non-Federal resources in meeting natural disaster resistance goals; and

“(E) make commitments to long-term hazard mitigation efforts to be applied to new and existing structures.

“(b) PURPOSE.—The purpose of this title [enacting this section and sections 5134, 5165 and 5165a of this title, amending section 5170c of this title, and repealing section 5176 of this title] is to establish a national disaster hazard mitigation program—

“(1) to reduce the loss of life and property, human suffering, economic disruption, and disaster assistance costs resulting from natural disasters; and

“(2) to provide a source of predisaster hazard mitigation funding that will assist States and local governments (including Indian tribes) in implementing effective hazard mitigation measures that are designed to ensure the continued functionality of critical services and facilities after a natural disaster.”

§ 5134. Interagency task force

(a) In general

The President shall establish a Federal interagency task force for the purpose of coordi-

nating the implementation of predisaster hazard mitigation programs administered by the Federal Government.

(b) Chairperson

The Administrator of the Federal Emergency Management Agency shall serve as the chairperson of the task force.

(c) Membership

The membership of the task force shall include representatives of—

(1) relevant Federal agencies;

(2) State and local government organizations (including Indian tribes); and

(3) the American Red Cross.

(Pub. L. 93-288, title II, §204, as added Pub. L. 106-390, title I, §103, Oct. 30, 2000, 114 Stat. 1557; amended Pub. L. 111-351, §3(c)(2), Jan. 4, 2011, 124 Stat. 3864.)

AMENDMENTS

2011—Subsec. (b). Pub. L. 111-351 substituted “Administrator” for “Director”.

(b) Application

(1) In general

To be eligible to receive a capitalization grant under this section, an eligible entity

shall submit to the Administrator an application that includes the following:

§ 5154a. Prohibited flood disaster assistance**(a) General prohibition**

Notwithstanding any other provision of law, no Federal disaster relief assistance made available in a flood disaster area may be used to make a payment (including any loan assistance payment) to a person for repair, replacement, or restoration for damage to any personal, residential, or commercial property if that person at any time has received flood disaster assistance that was conditional on the person first having obtained flood insurance under applicable Federal law and subsequently having failed to obtain and maintain flood insurance as required under applicable Federal law on such property.

(b) Transfer of property**(1) Duty to notify**

In the event of the transfer of any property described in paragraph (3), the transferor shall, not later than the date on which such transfer occurs, notify the transferee in writing of the requirements to—

(A) obtain flood insurance in accordance with applicable Federal law with respect to such property, if the property is not so insured as of the date on which the property is transferred; and

(B) maintain flood insurance in accordance with applicable Federal law with respect to such property.

Such written notification shall be contained in documents evidencing the transfer of ownership of the property.

(2) Failure to notify

If a transferor described in paragraph (1) fails to make a notification in accordance with such paragraph and, subsequent to the transfer of the property—

(A) the transferee fails to obtain or maintain flood insurance in accordance with applicable Federal law with respect to the property,

(B) the property is damaged by a flood disaster, and

(C) Federal disaster relief assistance is provided for the repair, replacement, or restoration of the property as a result of such damage,

the transferor shall be required to reimburse the Federal Government in an amount equal to the amount of the Federal disaster relief assistance provided with respect to the property.

(3) Property described

For purposes of paragraph (1), a property is described in this paragraph if it is personal,

commercial, or residential property for which Federal disaster relief assistance made available in a flood disaster area has been provided, prior to the date on which the property is transferred, for repair, replacement, or restoration of the property, if such assistance was conditioned upon obtaining flood insurance in accordance with applicable Federal law with respect to such property.

CODIFICATION

Section is comprised of section 582 of Pub. L. 103-325. Subsec. (c) of section 582 of Pub. L. 103-325 amended section 4012a of this title.

§ 5155. Duplication of benefits**(a) General prohibition**

The President, in consultation with the head of each Federal agency administering any program providing financial assistance to persons, business concerns, or other entities suffering losses as a result of a major disaster or emergency, shall assure that no such person, business concern, or other entity will receive such assistance with respect to any part of such loss as to which he has received financial assistance under any other program or from insurance or any other source.

(b) Special rules**(1) Limitation**

This section shall not prohibit the provision of Federal assistance to a person who is or

may be entitled to receive benefits for the same purposes from another source if such person has not received such other benefits by the time of application for Federal assistance and if such person agrees to repay all duplicative assistance to the agency providing the Federal assistance.

(2) Procedures

The President shall establish such procedures as the President considers necessary to ensure uniformity in preventing duplication of benefits.

(3) Effect of partial benefits

Receipt of partial benefits for a major disaster or emergency shall not preclude provision of additional Federal assistance for any part of a loss or need for which benefits have not been provided.

(4) Waiver of general prohibition

(A) In general

The President may waive the general prohibition provided in subsection (a) upon request of a Governor on behalf of the State or on behalf of a person, business concern, or any other entity suffering losses as a result of a major disaster or emergency, if the President finds such waiver is in the public interest and will not result in waste, fraud, or abuse. In making this decision, the President may consider the following:

- (i) The recommendations of the Administrator of the Federal Emergency Management Agency made in consultation with the Federal agency or agencies administering the duplicative program.
- (ii) If a waiver is granted, the assistance to be funded is cost effective.
- (iii) Equity and good conscience.
- (iv) Other matters of public policy considered appropriate by the President.

(B) Grant or denial of waiver

A request under subparagraph (A) shall be granted or denied not later than 45 days after submission of such request.

(C) Prohibition on determination that loan is a duplication

Notwithstanding subsection (c), in carrying out subparagraph (A), the President may not determine that a loan is a duplication of assistance, provided that all Federal assistance is used toward a loss suffered as a result of the major disaster or emergency.

(c) Recovery of duplicative benefits

A person receiving Federal assistance for a major disaster or emergency shall be liable to the United States to the extent that such assistance duplicates benefits available to the person for the same purpose from another source. The agency which provided the duplicative assistance shall collect such duplicative assistance from the recipient in accordance with chapter 37 of title 31, relating to debt collection, when the head of such agency considers it to be in the best interest of the Federal Government.

(d) Assistance not income

Federal major disaster and emergency assistance provided to individuals and families under

this chapter, and comparable disaster assistance provided by States, local governments, and disaster assistance organizations, shall not be considered as income or a resource when determining eligibility for or benefit levels under federally funded income assistance or resource-tested benefit programs.

§ 5170c. Hazard mitigation

(a) In general

The President may contribute up to 75 percent of the cost of hazard mitigation measures which the President has determined are cost effective and which substantially reduce the risk of, or increase resilience to, future damage, hardship, loss, or suffering in any area affected by a major disaster, or any area affected by a fire for which assistance was provided under section 5187 of this title. Such measures shall be identified following the evaluation of natural hazards under section 5165 of this title and shall be subject to approval by the President. Subject to section 5165 of this title, the total of contributions under this section for a major disaster or event under section 5187 of this title shall not exceed 15 percent for amounts not more than \$2,000,000,000, 10 percent for amounts of more than \$2,000,000,000 and not more than \$10,000,000,000, and 7.5 percent on amounts of more than \$10,000,000,000 and not more than \$35,333,000,000 of the estimated aggregate amount of grants to be made (less any associated administrative costs) under this chapter with respect to the major disaster or event under section 5187 of this title.

(b) Property acquisition and relocation assistance

(1) General authority

In providing hazard mitigation assistance under this section in connection with flooding, the Administrator of the Federal Emergency Management Agency may provide property acquisition and relocation assistance for projects that meet the requirements of paragraph (2).

(2) Terms and conditions

An acquisition or relocation project shall be eligible to receive assistance pursuant to paragraph (1) only if—

(A) the applicant for the assistance is otherwise eligible to receive assistance under the hazard mitigation grant program established under subsection (a); and

(B) on or after December 3, 1993, the applicant for the assistance enters into an agreement with the Administrator that provides assurances that—

(i) any property acquired, accepted, or from which a structure will be removed pursuant to the project will be dedicated and maintained in perpetuity for a use that is compatible with open space, recreational, or wetlands management practices;

(ii) no new structure will be erected on property acquired, accepted or from which a structure was removed under the acquisition or relocation program other than—

(I) a public facility that is open on all sides and functionally related to a designated open space;

(II) a rest room; or

(III) a structure that the Administrator approves in writing before the commencement of the construction of the structure; and

(iii) after receipt of the assistance, with respect to any property acquired, accepted or from which a structure was removed under the acquisition or relocation program—

(I) no subsequent application for additional disaster assistance for any purpose will be made by the recipient to any Federal entity; and

(II) no assistance referred to in subclause (I) will be provided to the applicant by any Federal source.

(3) Statutory construction

Nothing in this subsection is intended to alter or otherwise affect an agreement for an acquisition or relocation project carried out pursuant to this section that was in effect on the day before December 3, 1993.

(c) Program administration by States

(1) In general

A State desiring to administer the hazard mitigation grant program established by this section with respect to hazard mitigation assistance in the State may submit to the President an application for the delegation of the authority to administer the program.

(2) Criteria

The President, in consultation and coordination with States and local governments, shall establish criteria for the approval of applications submitted under paragraph (1). Until such time as the Administrator promulgates regulations to implement this paragraph, the Administrator may waive notice and comment rulemaking, if the Administrator determines doing so is necessary to expeditiously implement this section, and may carry out this sec-

tion as a pilot program. The criteria shall include, at a minimum—

- (A) the demonstrated ability of the State to manage the grant program under this section;
- (B) there being in effect an approved mitigation plan under section 5165 of this title; and
- (C) a demonstrated commitment to mitigation activities.

(3) Approval

The President shall approve an application submitted under paragraph (1) that meets the criteria established under paragraph (2).

(4) Withdrawal of approval

If, after approving an application of a State submitted under paragraph (1), the President determines that the State is not administering the hazard mitigation grant program established by this section in a manner satisfactory to the President, the President shall withdraw the approval.

(5) Audits

The President shall provide for periodic audits of the hazard mitigation grant programs administered by States under this subsection.

(d) Streamlined procedures

(1) In general

For the purpose of providing assistance under this section, the President shall ensure that—

- (B) the shortest existing applicable process under the National Environmental Policy Act of 1969 [42 U.S.C. 4321 et seq.] and the National Historic Preservation Act¹ is utilized.

(2) Authority for other expedited procedures

The President may utilize expedited procedures in addition to those required under paragraph (1) for the purpose of providing assistance under this section, such as procedures under the Prototype Programmatic Agreement of the Federal Emergency Management Agency, for the consideration of multiple structures as a group and for an analysis of the cost-effectiveness and fulfillment of cost-share requirements for proposed hazard mitigation measures.

(e) Advance assistance

The President may provide not more than 25 percent of the amount of the estimated cost of hazard mitigation measures to a State grantee eligible for a grant under this section before eligible costs are incurred.

(f) Use of assistance

Recipients of hazard mitigation assistance provided under this section and section 5133 of this title may use the assistance to conduct ac-

tivities to help reduce the risk of future damage, hardship, loss, or suffering in any area affected by a wildfire or windstorm, such as—

- (1) reseeded ground cover with quick-growing or native species;
- (2) mulching with straw or chipped wood;
- (3) constructing straw, rock, or log dams in small tributaries to prevent flooding;
- (4) placing logs and other erosion barriers to catch sediment on hill slopes;
- (5) installing debris traps to modify road and trail drainage mechanisms;
- (6) modifying or removing culverts to allow drainage to flow freely;
- (7) adding drainage dips and constructing emergency spillways to keep roads and bridges from washing out during floods;
- (8) planting grass to prevent the spread of noxious weeds;
- (9) installing warning signs;
- (10) establishing defensible space measures;
- (11) reducing hazardous fuels;
- (12) mitigating windstorm damage, including replacing or installing electrical transmission or distribution utility pole structures with poles that are resilient to extreme wind and combined ice and wind loadings for the basic wind speeds and ice conditions associated with the relevant location;
- (13) removing standing burned trees; and
- (14) replacing water systems that have been burned and have caused contamination.

(g) Use of assistance for earthquake hazards

Recipients of hazard mitigation assistance provided under this section and section 5133 of this title may use the assistance to conduct activities to help reduce the risk of future damage, hardship, loss, or suffering in any area affected by earthquake hazards, including—

- (1) improvements to regional seismic networks in support of building a capability for earthquake early warning;
- (2) improvements to geodetic networks in support of building a capability for earthquake early warning; and

(a) Repair, reconstruction, restoration, or replacement of United States facilities

The President may authorize any Federal agency to repair, reconstruct, restore, or replace any facility owned by the United States and under the jurisdiction of such agency which is damaged or destroyed by any major disaster if he determines that such repair, reconstruction, restoration, or replacement is of such importance and urgency that it cannot reasonably be deferred pending the enactment of specific authorizing legislation or the making of an appropriation for such purposes, or the obtaining of congressional committee approval.

(b) Availability of funds appropriated to agency for repair, reconstruction, restoration, or replacement of agency facilities

In order to carry out the provisions of this section, such repair, reconstruction, restoration, or replacement may be begun notwithstanding a lack or an insufficiency of funds appropriated for such purpose, where such lack or insufficiency can be remedied by the transfer, in accordance with law, of funds appropriated to that agency for another purpose.

PRIOR PROVISIONS

A prior section 405 of Pub. L. 93-288 was classified to section 5175 of this title prior to repeal by Pub. L. 100-707.

§ 5172. Repair, restoration, and replacement of damaged facilities

(a) Contributions

(1) In general

The President may make contributions—

(A) to a State or local government for the repair, restoration, reconstruction, or replacement of a public facility damaged or destroyed by a major disaster and for associated expenses incurred by the government; and

(B) subject to paragraph (3), to a person that owns or operates a private nonprofit facility damaged or destroyed by a major disaster for the repair, restoration, reconstruction, or replacement of the facility and for associated expenses incurred by the person.

(2) Associated expenses

For the purposes of this section, associated expenses shall include—

(A) the costs of mobilizing and employing the National Guard for performance of eligible work;

(B) the costs of using prison labor to perform eligible work, including wages actually paid, transportation to a worksite, and extraordinary costs of guards, food, and lodging;

(C) base and overtime wages for the employees and extra hires of a State, local government, or person described in paragraph (1) that perform eligible work, plus fringe benefits on such wages to the extent that such benefits were being paid before the major disaster; and

(D) base and overtime wages for extra hires to facilitate the implementation and enforcement of adopted building codes for a period of not more than 180 days after the major disaster is declared.

(3) Conditions for assistance to private nonprofit facilities

(A) In general

The President may make contributions to a private nonprofit facility under paragraph (1)(B) only if—

(i) the facility provides critical services (as defined by the President) in the event of a major disaster; or

(ii) the owner or operator of the facility—

(I) has applied for a disaster loan under section 636(b) of title 15; and

(II)(aa) has been determined to be ineligible for such a loan; or

(bb) has obtained such a loan in the maximum amount for which the Small Business Administration determines the facility is eligible.

(B) Definition of critical services

In this paragraph, the term “critical services” includes power, water (including water provided by an irrigation organization or facility), sewer, wastewater treatment, communications (including broadcast and telecommunications), education, and emergency medical care.

(C) Religious facilities

A church, synagogue, mosque, temple, or other house of worship, educational facility, or any other private nonprofit facility, shall be eligible for contributions under paragraph (1)(B), without regard to the religious character of the facility or the primary religious use of the facility. No house of worship, educational facility, or any other private nonprofit facility may be excluded from receiving contributions under paragraph (1)(B) because leadership or membership in the organization operating the house of worship is limited to persons who share a religious faith or practice.

(4) Notification to Congress

Before making any contribution under this section in an amount greater than \$20,000,000, the President shall notify—

(A) the Committee on Environment and Public Works of the Senate;

(B) the Committee on Transportation and Infrastructure of the House of Representatives;

(C) the Committee on Appropriations of the Senate; and

(D) the Committee on Appropriations of the House of Representatives.

(b) Federal share

(1) Minimum Federal share

Except as provided in paragraph (2), the Federal share of assistance under this section shall be not less than 75 percent of the eligible cost of repair, restoration, reconstruction, or replacement carried out under this section.

(2) Reduced Federal share

The President shall promulgate regulations to reduce the Federal share of assistance under this section to not less than 25 percent in the case of the repair, restoration, reconstruction, or replacement of any eligible public facility or private nonprofit facility following an event associated with a major disaster—

(A) that has been damaged, on more than one occasion within the preceding 10-year period, by the same type of event; and

(B) the owner of which has failed to implement appropriate mitigation measures to address the hazard that caused the damage to the facility.

(3) Increased Federal share

(A) Incentive measures

The President may provide incentives to a State or Tribal government to invest in measures that increase readiness for, and resilience from, a major disaster by recognizing such investments through a sliding scale that increases the minimum Federal share to 85 percent. Such measures may include—

(i) the adoption of a mitigation plan approved under section 5165 of this title;

(ii) investments in disaster relief, insurance, and emergency management programs;

(iii) encouraging the adoption and enforcement of the latest published editions of relevant consensus-based codes, specifications, and standards that incorporate the latest hazard-resistant designs and establish minimum acceptable criteria for the design, construction, and maintenance of residential structures and facilities that may be eligible for assistance under this chapter for the purpose of protecting the health, safety, and general welfare of the buildings’ users against disasters;

(iv) facilitating participation in the community rating system; and

(v) funding mitigation projects or granting tax incentives for projects that reduce risk.

(B) Comprehensive guidance

Not later than 1 year after February 9, 2018, the President, acting through the Administrator, shall issue comprehensive guidance to State and Tribal governments regarding the measures and investments, weighted appropriately based on actuarial assessments of eligible actions, that will be recognized for the purpose of increasing the

Federal share under this section. Guidance shall ensure that the agency's review of eligible measures and investments does not unduly delay determining the appropriate Federal cost share.

(C) Report

One year after the issuance of the guidance required by subparagraph (B), the Administrator shall submit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Homeland Security and Governmental Affairs of the Senate a report regarding the analysis of the Federal cost shares paid under this section.

(D) Savings clause

Nothing in this paragraph prevents the President from increasing the Federal cost share above 85 percent.

(c) Large in-lieu contributions

(1) For public facilities

(A) In general

In any case in which a State or local government determines that the public welfare would not best be served by repairing, restoring, reconstructing, or replacing any public facility owned or controlled by the State or local government, the State or local government may elect to receive, in lieu of a contribution under subsection (a)(1)(A), a contribution in an amount equal to the Federal share of the Federal estimate of the cost of repairing, restoring, reconstructing, or replacing the facility and of management expenses.

(B) Use of funds

Funds contributed to a State or local government under this paragraph may be used—

- (i) to repair, restore, or expand other selected public facilities;
- (ii) to construct new facilities; or
- (iii) to fund hazard mitigation measures that the State or local government determines to be necessary to meet a need for governmental services and functions in the area affected by the major disaster.

(C) Limitations

Funds made available to a State or local government under this paragraph may not be used for—

- (i) any public facility located in a regulatory floodway (as defined in section 59.1 of title 44, Code of Federal Regulations (or a successor regulation)); or
- (ii) any uninsured public facility located in a special flood hazard area identified by the Administrator of the Federal Emergency Management Agency under the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.).

(2) For private nonprofit facilities

(A) In general

In any case in which a person that owns or operates a private nonprofit facility determines that the public welfare would not best be served by repairing, restoring, recon-

structing, or replacing the facility, the person may elect to receive, in lieu of a contribution under subsection (a)(1)(B), a contribution in an amount equal to the Federal share of the Federal estimate of the cost of repairing, restoring, reconstructing, or replacing the facility and of management expenses.

(B) Use of funds

Funds contributed to a person under this paragraph may be used—

- (i) to repair, restore, or expand other selected private nonprofit facilities owned or operated by the person;
- (ii) to construct new private nonprofit facilities to be owned or operated by the person; or
- (iii) to fund hazard mitigation measures that the person determines to be necessary to meet a need for the person's services and functions in the area affected by the major disaster.

(C) Limitations

Funds made available to a person under this paragraph may not be used for—

- (i) any private nonprofit facility located in a regulatory floodway (as defined in section 59.1 of title 44, Code of Federal Regulations (or a successor regulation)); or
- (ii) any uninsured private nonprofit facility located in a special flood hazard area identified by the Administrator of the Federal Emergency Management Agency under the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.).

(d) Flood insurance

(1) Reduction of Federal assistance

If a public facility or private nonprofit facility located in a special flood hazard area identified for more than 1 year by the Administrator pursuant to the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.) is damaged or destroyed, after the 180th day following November 23, 1988, by flooding in a major disaster and such facility is not covered on the date of such flooding by flood insurance, the Federal assistance which would otherwise be available under this section with respect to repair, restoration, reconstruction, and replacement of such facility and associated expenses shall be reduced in accordance with paragraph (2). This section shall not apply to more than one building of a multi-structure educational, law enforcement, correctional, fire, or medical campus, for any major disaster or emergency declared by the President under section 5170 or 5191, respectively, of this title on or after January 1, 2016, through December 31, 2018.

(2) Amount of reduction

The amount of a reduction in Federal assistance under this section with respect to a facility shall be the lesser of—

- (A) the value of such facility on the date of the flood damage or destruction, or
- (B) the maximum amount of insurance proceeds which would have been payable with respect to such facility if such facility

had been covered by flood insurance under the National Flood Insurance Act of 1968 on such date.

(3) Exception

Paragraphs (1) and (2) shall not apply to a private nonprofit facility which is not covered by flood insurance solely because of the local government's failure to participate in the flood insurance program established by the National Flood Insurance Act.

(4) Dissemination of information

The President shall disseminate information regarding the reduction in Federal assistance provided for by this subsection to State and local governments and the owners and operators of private nonprofit facilities who may be affected by such a reduction.

(e) Eligible cost

(1) Determination

(A) In general

For the purposes of this section, for disasters declared on or after August 1, 2017, or a disaster in which a cost estimate has not yet been finalized for a project, or for any project for which the finalized cost estimate is on appeal, the President shall estimate the eligible cost of repairing, restoring, reconstructing, or replacing a public facility or private nonprofit facility—

(i) on the basis of the design of the facility as the facility existed immediately before the major disaster;

(ii) in conformity with the latest published editions of relevant consensus-based codes, specifications, and standards that incorporate the latest hazard-resistant designs and establish minimum acceptable criteria for the design, construction, and maintenance of residential structures and facilities that may be eligible for assistance under this chapter for the purposes of protecting the health, safety, and general welfare of a facility's users against disasters (including floodplain management and hazard mitigation criteria required by the President or under the Coastal Barrier Resources Act (16 U.S.C. 3501 et seq.)); and

(iii) in a manner that allows the facility to meet the definition of resilient developed pursuant to this subsection.

(B) Cost estimation procedures

(i) In general

Subject to paragraph (2), the President shall use the cost estimation procedures established under paragraph (3) to determine the eligible cost under this subsection.

(ii) Applicability

The procedures specified in this paragraph and paragraph (2) shall apply only to projects the eligible cost of which is equal to or greater than the amount specified in section 5189 of this title.

(C) Contributions

Contributions for the eligible cost made under this section may be provided on an ac-

tual cost basis or on cost-estimation procedures.

(2) Modification of eligible cost

(A) Actual cost greater than ceiling percentage of estimated cost

In any case in which the actual cost of repairing, restoring, reconstructing, or replacing a facility under this section is greater than the ceiling percentage established under paragraph (3) of the cost estimated under paragraph (1), the President may determine that the eligible cost includes a portion of the actual cost of the repair, restoration, reconstruction, or replacement that exceeds the cost estimated under paragraph (1).

(B) Actual cost less than estimated cost

(i) Greater than or equal to floor percentage of estimated cost

In any case in which the actual cost of repairing, restoring, reconstructing, or replacing a facility under this section is less than 100 percent of the cost estimated under paragraph (1), but is greater than or equal to the floor percentage established under paragraph (3) of the cost estimated under paragraph (1), the State or local government or person receiving funds under this section shall use the excess funds to carry out cost-effective activities that reduce the risk of future damage, hardship, or suffering from a major disaster.

(ii) Less than floor percentage of estimated cost

In any case in which the actual cost of repairing, restoring, reconstructing, or replacing a facility under this section is less than the floor percentage established under paragraph (3) of the cost estimated under paragraph (1), the State or local government or person receiving assistance under this section shall reimburse the President in the amount of the difference.

(C) No effect on appeals process

Nothing in this paragraph affects any right of appeal under section 5189a of this title.

(3) Expert panel

(A) Establishment

Not later than 18 months after October 30, 2000, the President, acting through the Administrator of the Federal Emergency Management Agency, shall establish an expert panel, which shall include representatives from the construction industry and State and local government.

(B) Duties

The expert panel shall develop recommendations concerning—

(i) procedures for estimating the cost of repairing, restoring, reconstructing, or replacing a facility consistent with industry practices; and

(ii) the ceiling and floor percentages referred to in paragraph (2).

(C) Regulations

Taking into account the recommendations of the expert panel under subparagraph (B),

the President shall promulgate regulations that establish—

- (i) cost estimation procedures described in subparagraph (B)(i); and
- (ii) the ceiling and floor percentages referred to in paragraph (2).

(D) Review by President

Not later than 2 years after the date of promulgation of regulations under subparagraph (C) and periodically thereafter, the President shall review the cost estimation procedures and the ceiling and floor percentages established under this paragraph.

(E) Report to Congress

Not later than 1 year after the date of promulgation of regulations under subparagraph (C), 3 years after that date, and at the end of each 2-year period thereafter, the expert panel shall submit to Congress a report on the appropriateness of the cost estimation procedures.

(4) Special rule

In any case in which the facility being repaired, restored, reconstructed, or replaced under this section was under construction on the date of the major disaster, the cost of repairing, restoring, reconstructing, or replacing the facility shall include, for the purposes of this section, only those costs that, under the contract for the construction, are the owner's responsibility and not the contractor's responsibility.

(5) New rules

(A) In general

Not later than 18 months after October 5, 2018, the President, acting through the Administrator of the Federal Emergency Management Agency, and in consultation with the heads of relevant Federal departments and agencies, shall issue a final rulemaking that defines the terms “resilient” and “resiliency” for purposes of this subsection.

ASSISTANCE PROGRAMS

§ 5191. Procedure for declaration

(a) Request and declaration

All requests for a declaration by the President that an emergency exists shall be made by the Governor of the affected State. Such a request shall be based on a finding that the situation is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments and that Federal assistance is necessary. As a part of such request, and as a prerequisite to emergency assistance under this chapter, the Governor shall take appropriate action under State law and direct execution of the State's emergency plan. The Governor shall furnish information describing the State and local efforts and resources which have been or will be used to alleviate the emergency, and will define the type and extent of Federal aid required. Based upon such Governor's request, the President may declare that an emergency exists.

(b) Certain emergencies involving Federal primary responsibility

The President may exercise any authority vested in him by section 5192 of this title or section 5193 of this title with respect to an emergency when he determines that an emergency exists for which the primary responsibility for response rests with the United States because the emergency involves a subject area for which, under the Constitution or laws of the United States, the United States exercises exclusive or preeminent responsibility and authority. In determining whether or not such an emergency exists, the President shall consult the Governor of any affected State, if practicable. The President's determination may be made without regard to subsection (a).

The Chief Executive of an affected Indian tribal government may submit a request for a declaration by the President that an emergency exists consistent with the requirements of subsection (a).

(3) Savings provision

Nothing in this subsection shall prohibit an Indian tribal government from receiving as-

sistance under this subchapter through a declaration made by the President at the request of a State under subsection (a) if the President does not make a declaration under this subsection for the same incident.

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I transmit herewith Reorganization Plan No. 1 of 1958, prepared in accordance with the Reorganization Act of 1949, as amended. The reorganization plan provides new arrangements for the conduct of Federal defense mobilization and civil defense functions.

In formulating Reorganization Plan No. 1, I have had the benefit of several studies made by the executive branch as well as those conducted by the Congress. The reorganization plan will overcome the major difficulties revealed by those studies and mentioned in my 1959 budget message where I made the following statement:

The structure of Federal organization for the planning, coordination, and conduct of our nonmilitary defense programs has been reviewed, and I have concluded that the existing statutes assigning responsibilities for the central coordination and direction of these programs are out of date. The rapid technical advances of military science have led to a serious overlap among agencies carrying on these leadership and planning functions. Because the situation will continue to change and because these functions transcend the responsibility of any single department or agency, I have concluded that they should be vested in no one short of the President. I will make recommendations to the Congress on this subject.

The principal effects of the organization plan are—

First, it transfers to the President the functions vested by law in the Federal Civil Defense Administration and those so vested in the Office of Defense Mobilization. The result is to establish a single pattern with respect to the vesting of defense mobilization and civil defense functions. At the present time disparity exists in that civil defense functions are vested in the President only to a limited degree while a major part of the functions administered by the Office of Defense Mobilization are vested by law in the President and delegated by him to that Office. Under the plan, the broad program responsibilities for coordinating and conducting the interrelated defense mobilization and civil defense functions will be vested in the President for appropriate delegation as the rapidly changing character of the nonmilitary preparedness program warrants.

Second, the reorganization plan consolidates the Office of Defense Mobilization and the Federal Civil Defense Administration to form a new Office of Defense and Civilian Mobilization in the Executive Office of the President. I have concluded that, in many instances, the interests and activities of the Office of Defense Mobilization and the Federal Civil Defense Administration overlap to such a degree that it is not possible to work out a satisfactory division of those activities and interests between the two agencies. I have also concluded that a single civilian mobilization agency of appropriate stature and authority is needed and that such an agency will ensue from the consolidation and from the

granting of suitable authority to that agency for directing and coordinating the preparedness activities of the Federal departments and agencies and for providing unified guidance and assistance to the State and local governments.

Third, the reorganization plan transfers the membership of the Director of the Office of Defense Mobilization on the National Security Council to the Director of the Office of Defense and Civilian Mobilization and also transfers the Civil Defense Advisory Council to the Office of Defense and Civilian Mobilization.

Initially, the Office of Defense and Civilian Mobilization will perform the civil defense and defense mobilization functions now performed by the Office of Defense Mobilization and the Federal Civil Defense Administration. One of its first tasks will be to advise me with respect to the actions to be taken to clarify and expand the roles of the Federal departments and agencies in carrying out nonmilitary defense preparedness functions. After such actions are taken, the direction and coordination of the civil defense and defense mobilization activities assigned to the departments and agencies will comprise a principal remaining responsibility of the Office of Defense and Civilian Mobilization.

After investigation, I have found and hereby declare that each reorganization included in Reorganization Plan No. 1 of 1958 is necessary to accomplish one or more of the purposes set forth in section 2(a) of the Reorganization Act of 1949, as amended.

I have also found and hereby declare that it is necessary to include in the accompanying reorganization plan, by reason of reorganizations made thereby, provisions for the appointment and compensation of new officers specified in sections 2 and 3 of the plan. The rates of compensation fixed for these officers are, respectively those which I have found to prevail in respect of comparable officers in the executive branch of the Government.

The taking effect of the reorganizations included in Reorganization Plan No. 1 of 1958 will immediately reduce the number of Federal agencies by one and, by providing sounder organizational arrangements for the administration of the affected functions, should promote the increased economy and effectiveness of the Federal expenditures concerned. It is, however, impracticable to itemize at this time the reduction of expenditures which it is probable will be brought about by such taking effect.

I urge that the Congress allow the reorganization plan to become effective.

DWIGHT D. EISENHOWER.

THE WHITE HOUSE, April 24, 1958.

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

On January 5 I announced a three-part program to streamline the executive branch of the Federal Government. By concentrating less responsibility in the President's immediate staff and more in the hands of the departments and agencies, this program should significantly improve the services of the Government. I believe these reforms have become so urgently necessary that I intend, with the cooperation of the Congress, to pursue them with all of the resources of my office during the coming year.

The first part of this program is a renewed drive to achieve passage of my legislative proposals to overhaul the Cabinet departments. Secondly, I have appointed three Cabinet Secretaries as Counsellors to the President with coordinating responsibilities in the broad areas of human resources, natural resources, and community development, and five Assistants to the President with special responsibilities in the areas of domestic affairs, economic affairs, foreign affairs, executive management, and operations of the White House.

The third part of this program is a sharp reduction in the overall size of the Executive Office of the President and a reorientation of that office back to its original mission as a staff for top-level policy formation and monitoring of policy execution in broad functional areas. The Executive Office of the President should no

longer be encumbered with the task of managing or administering programs which can be run more effectively by the departments and agencies. I have therefore concluded that a number of specialized operational and program functions should be shifted out of the Executive Office into the line departments and agencies of the Government. Reorganization Plan No. 1 of 1973, transmitted herewith, would effect such changes with respect to emergency preparedness functions and scientific and technological affairs.

STREAMLINING THE FEDERAL SCIENCE ESTABLISHMENT

When the National Science Foundation was established by an act of the Congress in 1950, its statutory responsibilities included evaluation of the Government's scientific research programs and development of basic science policy. In the late 1950's, however, with the effectiveness of the U.S. science effort under serious scrutiny as a result of sputnik, the post of Science Advisor to the President was established. The White House became increasingly involved in the evaluation and coordination of research and development programs and in science policy matters, and that involvement was institutionalized in 1962 when a reorganization plan established the Office of Science and Technology within the Executive Office of the President, through transfer of authorities formerly vested in the National Science Foundation.

With advice and assistance from OST during the past decade; the scientific and technological capability of the Government has been markedly strengthened. This administration is firmly committed to a sustained, broadbased national effort in science and technology, as I made plain last year in the first special message on the subject ever sent by a President to the Congress. The research and development capability of the various executive departments and agencies, civilian as well as defense, has been upgraded. The National Science Foundation has broadened from its earlier concentration on basic research support to take on a significant role in applied research as well. It has matured in its ability to play a coordinating and evaluative role within the Government and between the public and private sectors.

I have therefore concluded that it is timely and appropriate to transfer to the Director of the National Science Foundation all functions presently vested in the Office of Science and Technology, and to abolish that office. Reorganization Plan No. 1 would effect these changes.

The multi-disciplinary staff resources of the Foundation will provide analytic capabilities for performance of the transferred functions. In addition, the Director of the Foundation will be able to draw on expertise from all of the Federal agencies, as well as from outside the Government, for assistance in carrying out his new responsibilities.

It is also my intention, after the transfer of responsibilities is effected, to ask Dr. H. Guyford Stever, the current Director of the Foundation, to take on the additional post of Science Adviser. In this capacity, he would advise and assist the White House, Office of Management and Budget, Domestic Council, and other entities within the Executive Office of the President on matters where scientific and technological expertise is called for, and would act as the President's representative in selected cooperative programs in international scientific affairs, including chairing such joint bodies as the U.S.—U.S.S.R. Joint Commission on Scientific and Technical Cooperation.

In the case of national security, the Department of Defense has strong capabilities for assessing weapons needs and for undertaking new weapons development, and the President will continue to draw primarily on this source for advice regarding military technology. The President in special situations also may seek independent studies or assessments concerning military technology from within or outside the Federal establishment, using the machinery of the National Security

Council for this purpose, as well as the Science Adviser when appropriate.

In one special area of technology—space and aeronautics—a coordinating council has existed within the Executive Office of the President since 1958. This body, the National Aeronautics and Space Council, met a major need during the evolution of our nation's space program. Vice President Agnew has served with distinction as its chairman for the past four years. At my request, beginning in 1969, the Vice President also chaired a special Space Task Group charged with developing strategy alternatives for a balanced U.S. space program in the coming years.

As a result of this work, basic policy issues in the United States space effort have been resolved, and the necessary interagency relationships have been established. I have therefore concluded, with the Vice President's concurrence, that the Council can be discontinued. Needed policy coordination can now be achieved through the resources of the executive departments and agencies, such as the National Aeronautics and Space Administration, augmented by some of the former Council staff. Accordingly, my reorganization plan proposes the abolition of the National Aeronautics and Space Council.

A NEW APPROACH TO EMERGENCY PREPAREDNESS

The organization within the Executive Office of the President which has been known in recent years as the Office of Emergency Preparedness dates back, through its numerous predecessor agencies, more than 20 years. It has performed valuable functions in developing plans for emergency preparedness, in administering Federal disaster relief, and in overseeing and assisting the agencies in this area.

OEP's work as a coordinating and supervisory authority in this field has in fact been so effective—particularly under the leadership of General George A. Lincoln, its director for the past four years, who retired earlier this month after an exceptional military and public service career—that the line departments and agencies which in the past have shared in the performance of the various preparedness functions now possess the capability to assume full responsibility for those functions. In the interest of efficiency and economy, we can now further streamline the Executive Office of the President by formally relocating those responsibilities and closing the Office of Emergency Preparedness.

I propose to accomplish this reform in two steps. First, Reorganization Plan No. 1 would transfer to the President all functions previously vested by law in the Office or its Director, except the Director's role as a member of the National Security Council, which would be abolished; and it would abolish the Office of Emergency Preparedness.

The functions to be transferred to the President from OEP are largely incidental to emergency authorities already vested in him. They include functions under the Disaster Relief Act of 1970 [42 U.S.C. 4401 et seq.]; the function of determining whether a major disaster has occurred within the meaning of (1) Section 7 of the Act of September 30, 1950, as amended, 20 U.S.C. 241-1, or (2) Section 762(a) of the Higher Education Act of 1965, as added by Section 161(a) of the Education Amendments of 1972, Public Law 92-318, 86 Stat. 288 at 299 (relating to the furnishing by the Commissioner of Education of disaster relief assistance for educational purposes) [20 U.S.C. 1132d-1]; and functions under Section 232 of the Trade Expansion Act of 1962, as amended (19 U.S.C. 1862), with respect to the conduct of investigations to determine the effects on national security of the importation of certain articles.

The Civil Defense Advisory Council within OEP would also be abolished by this plan, as changes in domestic and international conditions since its establishment in 1950 have now obviated the need for a standing council of this type. Should advice of the kind the Council has provided be required again in the future,

State and local officials and experts in the field can be consulted on an ad hoc basis.

Second, as soon as the plan became effective, I would delegate OEP's former functions as follows:

All OEP responsibilities having to do with preparedness for and relief of civil emergencies and disasters would be transferred to the Department of Housing and Urban Development. This would provide greater field capabilities for coordination of Federal disaster assistance with that provided by States and local communities, and would be in keeping with the objective of creating a broad, new Department of Community Development.

OEP's responsibilities for measures to ensure the continuity of civil government operations in the event of major military attack would be reassigned to the General Services Administration, as would responsibility for resource mobilization including the management of national security stockpiles, with policy guidance in both cases to be provided by the National Security Council, and with economic considerations relating to changes in stockpile levels to be coordinated by the Council on Economic Policy.

Investigations of imports which might threaten the national security—assigned to OEP by Section 232 of the Trade Expansion Act of 1962 [19 U.S.C. 1862]—would be reassigned to the Treasury Department, whose other trade studies give it a readymade capability in this field; the National Security Council would maintain its supervisory role over strategic imports.

Those disaster relief authorities which have been reserved to the President in the past, such as the authority to declare major disasters, will continue to be exercised by him under these new arrangements. In emergency situations calling for rapid interagency coordination, the Federal response will be coordinated by the Executive Office of the President under the general supervision of the Assistant to the President in charge of executive management.

The Oil Policy Committee will continue to function as in the past, unaffected by this reorganization, except that I will designate the Deputy Secretary of the Treasury as chairman in place of the Director of OEP. The committee will operate under the general supervision of the Assistant to the President in charge of economic affairs.

DECLARATIONS

After investigation, I have found that each action included in the accompanying plan is necessary to accomplish one or more of the purposes set forth in Section 901(a) of title 5 of the United States Code. In particular, the plan is responsive to the intention of the Congress as expressed in Section 901(a)(1), "to promote better execution of the laws, more effective management of the executive branch and of its agencies and functions, and expeditious administration of the public business;" and in Section 901(a)(3), "to increase the efficiency of the operations of the Government to the fullest extent practicable;" and in Section 901(a)(5), "to reduce the number of agencies by consolidating those having similar functions under a single head, and to abolish such agencies or functions as may not be necessary for the efficient conduct of the Government."

While it is not practicable to specify all of the expenditure reductions and other economies which will result from the actions proposed, personnel and budget savings from abolition of the National Aeronautics and Space Council and the Office of Science and Technology alone will exceed \$2 million annually, and additional savings should result from a reduction of Executive Pay Schedule positions now associated with other transferred and delegated functions.

The plan has as its one logically consistent subject matter the streamlining of the Executive Office of the President and the disposition of major responsibilities currently conducted in the Executive Office of the President, which can better be performed elsewhere or abolished.

The functions which would be abolished by this plan, and the statutory authorities for each, are:

(1) the functions of the Director of the Office of Emergency Preparedness with respect to being a member of the National Security Council (Sec. 101, National Security Act of 1947, as amended, 50 U.S.C. 402 [now 50 U.S.C. 3021]; and Sec. 4, Reorganization Plan No. 1 of 1958);

(2) the functions of the Civil Defense Advisory Council (Sec. 102(a) Federal Civil Defense Act of 1950; [former] 50 U.S.C. App. 2272(a)); and

(3) the functions of the National Aeronautics and Space Council (Sec. 201, National Aeronautics and Space Act of 1958; 42 U.S.C. 2471).

The proposed reorganization is a necessary part of the restructuring of the Executive Office of the President. It would provide through the Director of the National Science Foundation a strong focus for Federal efforts to encourage the development and application of science and technology to meet national needs. It would mean better preparedness for and swifter response to civil emergencies, and more reliable precautions against threats to the national security. The leaner and less diffuse Presidential staff structure which would result would enhance the President's ability to do his job and would advance the interests of the Congress as well.

I am confident that this reorganization plan would significantly increase the overall efficiency and effectiveness of the Federal Government. I urge the Congress to allow it to become effective.

RICHARD NIXON.

EX. ORD. NO. 12657. DEPARTMENT OF HOMELAND SECURITY ASSISTANCE IN EMERGENCY PREPAREDNESS PLANNING AT COMMERCIAL NUCLEAR POWER PLANTS

Ex. Ord. No. 12657, Nov. 18, 1988, 53 F.R. 47513, as amended by Ex. Ord. No. 13286, §41, Feb. 28, 2003, 68 F.R. 10626, provided:

By the authority vested in me as President by the Constitution and laws of the United States of America, including the Federal Civil Defense Act of 1950, as amended ([former] 50 U.S.C. App. 2251 *et seq.*), the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 *et seq.*), the Atomic Energy Act of 1954, as amended (42 U.S.C. 2011 *et seq.*), Reorganization Plan No. 1 of 1958 [set out above], Reorganization Plan No. 1 of 1973 [set out above], and Section 301 of Title 3 of the United States Code, and in order to ensure that plans and procedures are in place to respond to radiological emergencies at commercial nuclear power plants in operation or under construction, it is hereby ordered as follows:

SECTION 1. *Scope.* (a) This Order applies whenever State or local governments, either individually or together, decline or fail to prepare commercial nuclear power plant radiological emergency preparedness plans that are sufficient to satisfy Nuclear Regulatory Commission ("NRC") licensing requirements or to participate adequately in the preparation, demonstration, testing, exercise, or use of such plans.

(b) In order to request the assistance of the Department of Homeland Security ("DHS") provided for in this Order, an affected nuclear power plant applicant or licensee ("licensee") shall certify in writing to DHS that the situation described in Subsection (a) exists.

SEC. 2. *Generally Applicable Principles and Directives.*

(a) Subject to the principles articulated in this Section, the Secretary of Homeland Security is hereby authorized and directed to take the actions specified in Sections 3 through 6 of this Order.

(b) In carrying out any of its responsibilities under this Order, DHS:

(1) shall work actively with the licensee, and, before relying upon its resources or those of any other Department or agency within the Executive branch, shall make maximum feasible use of the licensee's resources;

(2) shall take care not to supplant State and local resources. DHS shall substitute its own resources for those of the State and local governments only to the extent necessary to compensate for the nonparticipation or inadequate participation of those governments, and only as a last resort after appropriate consultation with the Governors and responsible local officials in the affected area regarding State and local participation;

(3) is authorized, to the extent permitted by law, to enter into interagency Memoranda of Understanding providing for utilization of the resources of other Executive branch Departments and agencies and for delegation to other Executive branch Departments and agencies of any of the functions and duties assigned to DHS under this Order; however, any such Memorandum of Understanding shall be subject to approval by the Director of the Office of Management and Budget ("OMB") and published in final form in the Federal Register; and

(4) shall assume for purposes of Sections 3 and 4 of this Order that, in the event of an actual radiological emergency or disaster, State and local authorities would contribute their full resources and exercise their authorities in accordance with their duties to protect the public from harm and would act generally in conformity with the licensee's radiological emergency preparedness plan.

(c) The Director of OMB shall resolve any issue concerning the obligation of Federal funds arising from the implementation of this Order. In resolving issues under this Subsection, the Director of OMB shall ensure:

(1) that DHS has utilized to the maximum extent possible the resources of the licensee and State and local

governments before it relies upon its appropriated and lawfully available resources or those of any Department or agency in the Executive branch;

(2) that DHS shall use its existing resources to coordinate and manage, rather than duplicate, other available resources;

(3) that implementation of this Order is accomplished with an economy of resources; and

(4) that full reimbursement to the Federal Government is provided, to the extent permitted by law.

SEC. 3. *DHS Participation in Emergency Preparedness Planning.* (a) DHS assistance in emergency preparedness planning shall include advice, technical assistance, and arrangements for facilities and resources as needed to satisfy the emergency planning requirements under the Atomic Energy Act of 1954, as amended [42 U.S.C. 2011 *et seq.*], and any other Federal legislation or regulations pertaining to issuance or retention of a construction permit or an operating license for a nuclear power plant.

(b) DHS shall make all necessary plans and arrangements to ensure that the Federal Government is prepared to assume any and all functions and undertakings necessary to provide adequate protection to the public in cases within the scope of this Order. In making such plans and arrangements,

(1) DHS shall focus planning of Federal response activities to ensure that:

(A) adequate resources and arrangements will exist, as of the time when an initial response is needed, given the absence or inadequacy of advance State and local commitments; and

(B) attention has been given to coordinating (including turning over) response functions when State and local governments do exercise their authority, with specific attention to the areas where prior State and local participation has been insufficient or absent;

(2) FEMA's [DHS's] planning for Federal participation in responding to a radiological emergency within the scope of this Order shall include, but not be limited to, arrangements for using existing Federal resources to provide prompt notification of the emergency to the general public; to assist in any necessary evacuation; to provide reception centers or shelters and related facilities and services for evacuees; to provide emergency medical services at Federal hospitals, including those operated by the military services and by the Veterans' Administration [now Department of Veterans Affairs]; and to ensure the creation and maintenance of channels of communication from commercial nuclear power plant licensees or applicants to State and local governments and to surrounding members of the public.

SEC. 4. *Evaluation of Plans.* (a) DHS shall consider and evaluate all plans developed under the authority of this Order as though drafted and submitted by a State or local government.

(b) DHS shall take all actions necessary to carry out the evaluation referred to in the preceding Subsection and to permit the NRC to conduct its evaluation of radiological emergency preparedness plans including, but not limited to, planning, participating in, and evaluating exercises, drills, and tests, on a timely basis, as necessary to satisfy NRC requirements for demonstrations of off-site radiological emergency preparedness.

SEC. 5. *Response to a Radiological Emergency.* (a) In the event of an actual radiological emergency or disaster, DHS shall take all steps necessary to ensure the implementation of the plans developed under this Order and shall coordinate the actions of other Federal agencies to achieve the maximum effectiveness of Federal efforts in responding to the emergency.

(b) DHS shall coordinate Federal response activities to ensure that adequate resources are directed, when an initial response is needed, to activities hindered by the absence or inadequacy of advance State and local commitments. DHS shall also coordinate with State and local governmental authorities and turn over response functions as appropriate when State and local governments do exercise their authority.

(c) DHS shall assume any necessary command-and-control function, or delegate such function to another

Federal agency, in the event that no competent State and local authority is available to perform such function.

(d) In any instance in which Federal personnel may be called upon to fill a command-and-control function during a radiological emergency, in addition to any other powers it may have, DHS or its designee is authorized to accept volunteer assistance from utility employees and other nongovernmental personnel for any purpose necessary to implement the emergency response plan and facilitate off-site emergency response.

SEC. 6. *Implementation of Order.* (a) DHS shall issue interim and final directives and procedures implementing this Order as expeditiously as is feasible and in any event shall issue interim directives and procedures not more than 90 days following the effective date of this Order and shall issue final directives and procedures not more than 180 days following the effective date of this Order.

(b) Immediately upon the effective date of this Order, DHS shall review, and initiate necessary revisions of, all DHS regulations, directives, and guidance to conform them to the terms and policies of this Order.

(c) Immediately upon the effective date of this Order, DHS shall review, and initiate necessary renegotiations of, all interagency agreements to which DHS is a party, so as to conform them to the terms and policies of this Order. This directive shall include, but not be limited to, the Federal Radiological Emergency Response Plan (50 *Fed. Reg.* 46542 (November 8, 1985)).

(d) To the extent permitted by law, DHS is directed to obtain full reimbursement, either jointly or severally, for services performed by DHS or other Federal agencies pursuant to this Order from any affected licensee and from any affected nonparticipating or inadequately participating State or local government.

SEC. 7. *Amendments.* This Executive Order amends Executive Order Nos. 11490 (34 *Fed. Reg.* 17567 (October 28, 1969)) [see note above], 12148 (44 *Fed. Reg.* 43239 (July 20, 1979)) [set out above], and 12241 (45 *Fed. Reg.* 64879 (September 29, 1980)), and the same are hereby superseded to the extent that they are inconsistent with this Order.

SEC. 8. *Judicial Review.* This Order is intended only to improve the internal management of the Executive branch, and is not intended to create any right or benefit, substantive or procedural, enforceable at law by a party against the United States, its agencies, its officers, or any person.

SEC. 9. *Effective Date.* This Order shall be effective November 18, 1988.

Ex. Ord. No. 13010, July 15, 1996, 61 F.R. 37347, as amended by Ex. Ord. No. 13025, Nov. 13, 1996, 61 F.R. 58623; Ex. Ord. No. 13041, Apr. 3, 1997, 62 F.R. 17039; Ex. Ord. No. 13064, Oct. 11, 1997, 62 F.R. 53711; Ex. Ord. No. 13077, Mar. 10, 1998, 63 F.R. 12381; Ex. Ord. No. 13138, §3(c), Sept. 30, 1999, 64 F.R. 53880, provided:

Certain national infrastructures are so vital that their incapacity or destruction would have a debilitating impact on the defense or economic security of the United States. These critical infrastructures include telecommunications, electrical power systems, gas and oil storage and transportation, banking and finance, transportation, water supply systems, emergency services (including medical, police, fire, and rescue), and continuity of government. Threats to these critical infrastructures fall into two categories: physical threats to tangible property ("physical threats"), and threats of electronic, radio-frequency, or computer-based attacks on the information or communications components that control critical infrastructures ("cyber threats"). Because many of these critical infrastructures are owned and operated by the private sector, it is essential that the government and private sector work together to develop a strategy for protecting them and assuring their continued operation.

NOW, THEREFORE, by the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows:

SECTION 1. *Establishment.* There is hereby established the President's Commission on Critical Infrastructure Protection ("Commission").

(a) *Chair.* A qualified individual from outside the Federal Government shall be designated by the President from among the members to serve as Chair of the Commission. The Commission Chair shall be employed on a full-time basis.

(b) *Members.* The head of each of the following executive branch departments and agencies shall nominate not more than two full-time members of the Commission:

- (i) Department of the Treasury;
- (ii) Department of Justice;

- (vi) Department of Energy;
- (vii) Central Intelligence Agency;

- (viii) Federal Emergency Management Agency;
- (ix) Federal Bureau of Investigation;
- (x) National Security Agency.

One of the nominees of each agency may be an individual from outside the Federal Government who shall be employed by the agency on a full-time basis. Each nominee must be approved by the Steering Committee.

SEC. 2. *The Principals Committee.* The Commission shall report to the President through a Principals Committee ("Principals Committee"), which shall review any reports or recommendations before submission to the President. The Principals Committee shall comprise the:

- (i) Secretary of the Treasury;
- (ii) Secretary of Defense;
- (iii) Attorney General;
- (iv) Secretary of Commerce;
- (v) Secretary of Transportation;
- (vi) Secretary of Energy;
- (vii) Director of Central Intelligence;
- (viii) Director of the Office of Management and Budget;

et;

- (ix) Director of the Federal Emergency Management Agency;

- (x) Assistant to the President for National Security Affairs;

- (xi) Assistant to the Vice President for National Security Affairs.[:]

- (xii) Assistant to the President for Economic Policy and Director of the National Economic Council; and

- (xiii) Assistant to the President and Director of the Office of Science and Technology Policy.

SEC. 3. *The Steering Committee of the President's Commission on Critical Infrastructure Protection.* A Steering Committee ("Steering Committee") shall oversee the work of the Commission on behalf of the Principals Committee. The Steering Committee shall comprise [sic] five members. Four of the members shall be appointed by the President, and the fifth member shall be the Chair of the Commission. Two of the members of the Committee shall be employees of the Executive Office of the President. The Steering Committee will receive regular reports on the progress of the Commission's work and approve the submission of reports to the Principals Committee.

SEC. 4. *Mission.* The Commission shall: (a) within 30 days of this order, produce a statement of its mission objectives, which will elaborate the general objectives set forth in this order, and a detailed schedule for addressing each mission objective, for approval by the Steering Committee;

- (b) identify and consult with: (i) elements of the public and private sectors that conduct, support, or contribute to infrastructure assurance; (ii) owners and operators of the critical infrastructures; and (iii) other elements of the public and private sectors, including the Congress, that have an interest in critical infrastructure assurance issues and that may have differing perspectives on these issues;

- (c) assess the scope and nature of the vulnerabilities of, and threats to, critical infrastructures;

- (d) determine what legal and policy issues are raised by efforts to protect critical infrastructures and assess how these issues should be addressed;

- (e) recommend a comprehensive national policy and implementation strategy for protecting critical infrastructures from physical and cyber threats and assuring their continued operation;

- (f) propose any statutory or regulatory changes necessary to effect its recommendations; and

- (g) produce reports and recommendations to the Steering Committee as they become available; it shall not limit itself to producing one final report.

SEC. 5. [Revoked by Ex. Ord. No. 13138, §3(c), Sept. 30, 1999, 64 F.R. 53880.]

SEC. 6. *Administration.* (a) All executive departments and agencies shall cooperate with the Commission and provide such assistance, information, and advice to the Commission as it may request, to the extent permitted by law.

- (b) The Commission and the Advisory Committee may hold open and closed hearings, conduct inquiries, and establish subcommittees, as necessary.

- (c) Members of the Advisory Committee shall serve without compensation for their work on the Advisory Committee. While engaged in the work of the Advisory Committee, members may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by law for persons serving intermittently in the government service.

- (d) To the extent permitted by law, and subject to the availability of appropriations, the Department of Defense shall provide the Commission and the Advisory Committee with administrative services, staff, other support services, and such funds as may be necessary for the performance of its functions and shall reimburse the executive branch components that provide representatives to the Commission for the compensation of those representatives.

- (e) In order to augment the expertise of the Commission, the Department of Defense may, at the Commission's request, contract for the services of nongovernmental consultants who may prepare analyses, reports, background papers, and other materials for consideration by the Commission. In addition, at the Commission's request, executive departments and agencies shall request that existing Federal advisory committees consider and provide advice on issues of critical infrastructure protection, to the extent permitted by law.

- (f) The Commission shall terminate 1 year and 90 days from the date of this order, unless extended by the President prior to that date. The Principals Committee, the Steering Committee, and the Advisory Committee shall terminate no later than September 30, 1998, and, upon submission of the Commission's report, shall review the report and prepare appropriate recommendations to the President.

- (g) The person who served as Chair of the Commission may continue to be a member of the Steering Committee after termination of the Commission.

SEC. 7. *Review of Commission's Report.* (a) Upon the termination of the Commission as set out in section 6(f) of this order, certain of the Commission's staff may be retained no later than September 30, 1998, solely to assist the Principals, Steering, and Advisory Committees in reviewing the Commission's report and preparing recommendations to the President. They shall act under the direction of the Steering Committee or its designated agent. The Department of Defense shall continue to provide funding and administrative support for the retained Commission staff.

- (b) Pursuant to [former] Executive Order 12958, I hereby designate the Executive Secretary of the National Security Council to exercise the authority to classify information originally as "Top Secret" with respect to the work of the Commission staff, the Principals Committee, the Steering Committee, the Advisory Committee, and the Infrastructure Protection Task Force.

SEC. 8. *Interim Coordinating Mission.* (a) While the Commission is conducting its analysis and until the President has an opportunity to consider and act on its recommendations, there is a need to increase coordination of existing infrastructure protection efforts in order to better address, and prevent, crises that would have a debilitating regional or national impact. There is hereby established an Infrastructure Protection Task Force ("IPTF") within the Department of Justice, chaired by the Federal Bureau of Investigation, to undertake this interim coordinating mission.

- (b) The IPTF will not supplant any existing programs or organizations.

- (c) The Steering Committee shall oversee the work of the IPTF.

- (d) The IPTF shall include at least one full-time member each from the Federal Bureau of Investigation, the Department of Defense, and the National Security Agency. It shall also receive part-time assistance from other executive branch departments and agencies.

Members shall be designated by their departments or agencies on the basis of their expertise in the protection of critical infrastructures. IPTF members' compensation shall be paid by their parent agency or department.

(e) The IPTF's function is to identify and coordinate existing expertise, inside and outside of the Federal Government, to:

(i) provide, or facilitate and coordinate the provision of, expert guidance to critical infrastructures to detect, prevent, halt, or confine an attack and to recover and restore service;

(ii) issue threat and warning notices in the event advance information is obtained about a threat;

(iii) provide training and education on methods of reducing vulnerabilities and responding to attacks on critical infrastructures;

(iv) conduct after-action analysis to determine possible future threats, targets, or methods of attack; and

(v) coordinate with the pertinent law enforcement authorities during or after an attack to facilitate any resulting criminal investigation.

(f) All executive departments and agencies shall cooperate with the IPTF and provide such assistance, information, and advice as the IPTF may request, to the extent permitted by law.

(g) All executive departments and agencies shall share with the IPTF information about threats and warning of attacks, and about actual attacks on critical infrastructures, to the extent permitted by law.

(h) The IPTF shall terminate no later than 180 days after the termination of the Commission, unless extended by the President prior to that date.

SEC. 9. *General.* (a) This order is not intended to change any existing statutes or Executive orders.

(b) This order is not intended to create any right, benefit, trust, or responsibility, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies, its officers, or any person.

WILLIAM J. CLINTON.

[Ex. Ord. No. 13138, §3(c), Sept. 30, 1999, 64 F.R. 53880, formerly set out as a note under section 14 of the Federal Advisory Committee Act in the Appendix to Title 5, Government Organization and Employees, revoked "Section 5 and that part of section 6(f) of Executive Order 13010, as amended by section 3 of Executive Order 13025, Executive Order 13041, sections 1, 2, and that part of section 3 of Executive Order 13064, and Executive Order 13077, establishing the Advisory Committee to the President's Commission on Critical Infrastructure Protection".]

EXECUTIVE ORDER NO. 13130

Ex. Ord. No. 13130, July 14, 1999, 64 F.R. 38535, which established the National Infrastructure Assurance Council, was revoked by Ex. Ord. No. 13231, §10(e)(iii), Oct. 16, 2001, 66 F.R. 53070, set out as a note under section 121 of Title 6, Domestic Security.

EX. ORD. NO. 13151. GLOBAL DISASTER INFORMATION NETWORK

Ex. Ord. No. 13151, Apr. 27, 2000, 65 F.R. 25619, as amended by Ex. Ord. No. 13284, §5, Jan. 23, 2003, 68 F.R. 4075, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in order to establish a Global Disaster Information Network to use information technology more effectively to reduce loss of life and property from natural and man-made disasters, it is hereby ordered as follows:

SECTION 1. *Policy.* (a) It is the policy of this Administration to use information technology more effectively to coordinate the Federal Government's collection and dissemination of information to appropriate response agencies and State governments to prepare for and respond to natural and man-made disasters (disasters). As a result of changing population demographics in our

coastal, rural, and urban areas over the past decades, the loss of life and property (losses) from disasters has nearly doubled. One of the ways the Federal Government can reduce these losses is to use technology more effectively to coordinate its collection and dissemination (hereafter referred to collectively as "provision") of information which can be used in both planning for and recovering from disasters. While many agencies provide disaster-related information, they may not always provide it in a coordinated manner. To improve the provision of disaster-related information, the agencies shall, as set out in this order, use information technology to coordinate the Federal Government's provision of information to prepare for, respond to, and recover from domestic disasters.

(b) It is also the policy of this Administration to use information technology and existing channels of disaster assistance to improve the Federal Government's provision of information that could be helpful to foreign governments preparing for or responding to foreign disasters. Currently, the United States Government provides disaster-related information to foreign governments and relief organizations on humanitarian grounds at the request of foreign governments and where appropriate. This information is supplied by Federal agencies on an ad hoc basis. To increase the effectiveness of our response to foreign disasters, agencies shall, where appropriate, use information technology to coordinate the Federal Government's provision of disaster-related information to foreign governments.

(c) To carry out the policies in this order, there is established the Global Disaster Information Network (Network). The Network is defined as the coordinated effort by Federal agencies to develop a strategy and to use existing technical infrastructure, to the extent permitted by law and subject to the availability of appropriations and under the guidance of the Interagency Coordinating Committee and the Committee Support Office, to make more effective use of information technology to assist our Government, and foreign governments where appropriate, by providing disaster-related information to prepare for and respond to disasters.

SEC. 2. *Establishment.* (a) There is established an Interagency Coordinating Committee (Committee) to provide leadership and oversight for the development of the Network. The Office of the Vice President, the Department of Commerce through the National Oceanic and Atmospheric Administration, and the Department of State, respectively, shall designate a representative to serve as Co-chairpersons of the Committee. The Committee membership shall comprise representatives from the following departments and agencies:

- (1) Department of State;
- (2) Department of Defense;
- (3) Department of the Interior;
- (4) Department of Agriculture;
- (5) Department of Commerce;
- (6) Department of Transportation;
- (7) Department of Energy;
- (8) Department of Homeland Security;
- (9) Office of Management and Budget;
- (10) Environmental Protection Agency;
- (11) National Aeronautics and Space Administration;
- (12) United States Agency for International Development;
- (13) Federal Emergency Management Agency; and
- (14) Central Intelligence Agency.

At the discretion of the Co-chairpersons of the Committee, other agencies may be added to the Committee membership. The Committee shall include an Executive Secretary to effect coordination between the Co-chairpersons of the Committee and the Committee Support Office.

(b) There is established a Committee Support Office (Support Office) to assist the Committee by developing plans and projects that would further the creation of the Network. The Support Office shall, at the request of the Co-chairpersons of the Committee, carry out tasks taken on by the Committee.

(c) The National Oceanic and Atmospheric Administration shall provide funding and administrative support for the Committee and the Support Office. To the extent permitted by law, agencies may provide support to the Committee and the Support Office to assist them in their work.

SEC. 3. *Responsibilities.* (a) The Committee shall:

(1) serve as the United States Government's single entity for all matters, both national and international, pertaining to the development and establishment of the Network;

(2) provide leadership and high-level coordination of Network activities;

(3) provide guidance for the development of Network strategies, goals, objectives, policies, and legislation;

(4) represent and advocate Network goals, objectives, and processes to their respective agencies and departments;

(5) provide manpower and material support for Network development activities;

(6) develop, delegate, and monitor interagency opportunities and ideas supporting the development of the Network; and

(7) provide reports, through the Co-chairpersons of the Committee, to the President as requested or at least annually.

(b) The Support Office shall:

(1) provide management and administrative support for the Committee;

(2) develop Network strategies, goals, objectives, policies, plans, and legislation in accordance with guidance provided by the Committee;

(3) consult with agencies, States, nongovernment organizations, and international counterparts in developing Network development tasks;

(4) develop and make recommendations concerning Network activities to the agencies as approved by the Committee; and

(5) participate in projects that promote the goals and objectives of the Network.

SEC. 4. *Implementation.* (a) The Committee, with the assistance of the Support Office, shall address national and international issues associated with the development of the Network within the context of:

(1) promoting the United States as an example and leader in the development and dissemination of disaster information, both domestically and abroad, and, to this end, seeking cooperation with foreign governments and international organizations;

(2) striving to include all appropriate stakeholders in the development of the Network; and

(3) facilitating the creation of a framework that involves public and private stakeholders in a partnership for sustained operations of the Network.

(b) Intelligence activities, as determined by the Director of the Central Intelligence Agency, as well as national security-related activities of the Department of Defense and of the Department of Energy, are exempt from compliance with this order.

SEC. 5. *Tribal Governments.* This order does not impose any requirements on tribal governments.

SEC. 6. *Judicial Review.* This order does not create any right or benefit, substantive or procedural, enforceable by law, by a party against the United States, its officers, its employees, or any other person.

EX. ORD. NO. 13407. PUBLIC ALERT AND WARNING SYSTEM

Ex. Ord. No. 13407, June 26, 2006, 71 F.R. 36975, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended (42 U.S.C. 5121 *et seq.*), and the Homeland Security Act of 2002, as amended (6 U.S.C. 101 *et seq.*), it is hereby ordered as follows:

SECTION 1. *Policy.* It is the policy of the United States to have an effective, reliable, integrated, flexible, and comprehensive system to alert and warn the American

people in situations of war, terrorist attack, natural disaster, or other hazards to public safety and well-being (public alert and warning system), taking appropriate account of the functions, capabilities, and needs of the private sector and of all levels of government in our Federal system, and to ensure that under all conditions the President can communicate with the American people.

SEC. 2. *Functions of the Secretary of Homeland Security.*

(a) To implement the policy set forth in section 1 of this order, the Secretary of Homeland Security shall:

§ 5195c. Critical infrastructures protection

(a) Short title

This section may be cited as the “Critical Infrastructures Protection Act of 2001”.

(b) Findings

Congress makes the following findings:

(1) The information revolution has transformed the conduct of business and the operations of government as well as the infrastructure relied upon for the defense and national security of the United States.

(2) Private business, government, and the national security apparatus increasingly depend on an interdependent network of critical physical and information infrastructures, including telecommunications, energy, financial services, water, and transportation sectors.

(3) A continuous national effort is required to ensure the reliable provision of cyber and physical infrastructure services critical to maintaining the national defense, continuity of government, economic prosperity, and quality of life in the United States.

(4) This national effort requires extensive modeling and analytic capabilities for purposes of evaluating appropriate mechanisms to ensure the stability of these complex and

interdependent systems, and to underpin policy recommendations, so as to achieve the continuous viability and adequate protection of the critical infrastructure of the Nation.

(c) Policy of the United States

It is the policy of the United States—

(1) that any physical or virtual disruption of the operation of the critical infrastructures of the United States be rare, brief, geographically limited in effect, manageable, and minimally detrimental to the economy, human and government services, and national security of the United States;

(2) that actions necessary to achieve the policy stated in paragraph (1) be carried out in a public-private partnership involving corporate and non-governmental organizations; and

(3) to have in place a comprehensive and effective program to ensure the continuity of essential Federal Government functions under all circumstances.

(d) Establishment of national competence for critical infrastructure protection

(1) Support of critical infrastructure protection and continuity by National Infrastructure Simulation and Analysis Center

There shall be established the National Infrastructure Simulation and Analysis Center (NISAC) to serve as a source of national competence to address critical infrastructure protection and continuity through support for activities related to counterterrorism, threat assessment, and risk mitigation.

(2) Particular support

The support provided under paragraph (1) shall include the following:

(A) Modeling, simulation, and analysis of the systems comprising critical infrastructures, including cyber infrastructure, telecommunications infrastructure, and physical infrastructure, in order to enhance understanding of the large-scale complexity of such systems and to facilitate modification of such systems to mitigate the threats to such systems and to critical infrastructures generally.

(B) Acquisition from State and local governments and the private sector of data necessary to create and maintain models of such systems and of critical infrastructures generally.

(C) Utilization of modeling, simulation, and analysis under subparagraph (A) to provide education and training to policymakers on matters relating to—

(i) the analysis conducted under that subparagraph;

(ii) the implications of unintended or unintentional disturbances to critical infrastructures; and

(iii) responses to incidents or crises involving critical infrastructures, including the continuity of government and private sector activities through and after such incidents or crises.

(D) Utilization of modeling, simulation, and analysis under subparagraph (A) to provide recommendations to policymakers, and

to departments and agencies of the Federal Government and private sector persons and entities upon request, regarding means of enhancing the stability of, and preserving, critical infrastructures.

(3) Recipient of certain support

§ 5301. Congressional findings and declaration of purpose

(a) Critical social, economic, and environmental problems facing Nation's urban communities

The Congress finds and declares that the Nation's cities, towns, and smaller urban communities face critical social, economic, and environmental problems arising in significant measure from—

(1) the growth of population in metropolitan and other urban areas, and the concentration of persons of lower income in central cities;

(2) inadequate public and private investment and reinvestment in housing and other physical facilities, and related public and social services, resulting in the growth and persist-

ence of urban slums and blight and the marked deterioration of the quality of the urban environment; and

(3) increasing energy costs which have seriously undermined the quality and overall effectiveness of local community and housing development activities.

(b) Establishment and maintenance of viable urban communities; systematic and sustained action by Federal, State, and local governments; expansion of and continuity in Federal assistance; increased private investment; streamlining programs and improvement of functioning of agencies; action to address consequences of scarce fuel supplies

The Congress further finds and declares that the future welfare of the Nation and the well-being of its citizens depend on the establishment and maintenance of viable urban communities as social, economic, and political entities, and require—

(1) systematic and sustained action by Federal, State, and local governments to eliminate blight, to conserve and renew older urban areas, to improve the living environment of low- and moderate-income families, and to develop new centers of population growth and economic activity;

(2) substantial expansion of and greater continuity in the scope and level of Federal assistance, together with increased private investment in support of community development activities;

(3) continuing effort at all levels of government to streamline programs and improve the functioning of agencies responsible for planning, implementing, and evaluating community development efforts; and

(4) concerted action by Federal, State, and local governments to address the economic and social hardships borne by communities as a consequence of scarce fuel supplies.

(c) Decent housing, suitable living environment, and economic opportunities for persons of low and moderate income; community development activities which may be supported by Federal assistance

The primary objective of this chapter and of the community development program of each grantee under this chapter is the development of viable urban communities, by providing decent housing and a suitable living environment and expanding economic opportunities, principally for persons of low and moderate income. Consistent with this primary objective, not less than 70 percent of the aggregate of the Federal assistance provided to States and units of general local government under section 5306 of this title and, if applicable, the funds received as a result of a guarantee or a grant under section 5308 of this title, shall be used for the support of activities that benefit persons of low and moderate income, and the Federal assistance provided in this chapter is for the support of community development activities which are directed toward the following specific objectives—

(1) the elimination of slums and blight and the prevention of blighting influences and the deterioration of property and neighborhood and community facilities of importance to the
