MEMORANDUM

To: Bob Sivinski, OMB
From: Rachel Hansen, NCES
Through: Carrie Clarady, NCES
Re: School Pulse Panel March 2022 Questionnaire Change Request (OMB# 1850-0963 v. 9)

The School Pulse Panel (SPP) monthly data collection was originally cleared under emergency review under 5 CFR 1320.13(a) (OMB #1850-0963 v1) in June 2021. After a difficult start, a revised package (also cleared under emergency review) was cleared in September 2021 (OMB #1850-0963 v5). NCES requested emergency clearance for those packages to allow us to comply with the January 21, 2021 EO 14000 Executive Order on Supporting the Reopening and Continuing Operation of Schools and Early Childhood Education Providers. Normal clearance procedures would not allow IES to comply with the intent of this EO. In October 2021, the SPP was suspended for the months of October, November, and December due to continued low response rates in September 2021, the first month of the collection (OMB #1850-0963 v6). During that pause, the Institute of Education Sciences redesigned the study to improve response rates.

An additional Emergency Clearance for the collection (OMB# 1850-0963 v.7) was approved by OMB in December 2021. This emergency review under 5 CFR 1320.13(a) was for the SPP to collect voluntary responses throughout the 2022 calendar year from a nationally representative sample of public schools to better understand how schools, students, and educators are responding to the ongoing stressors of the coronavirus pandemic, along with other priority items for the White House, Centers for Disease Control and Prevention, and Department of Education program offices. The SPP study itself is extremely important particularly now that COVID-19 has not waned, and the pulse model is one that the agency will need after the pandemic subsides for other quick-turnaround data needs. In order to extend this research beyond the 6 months allowed for research activities cleared under 5 CFR 1320.13(a), NCES has simultaneously publish a Federal Register Notice soliciting both 60-day and 30-day public comment on this collection concurrent with data collection. Furthermore, we anticipate that new content will be rotated in (and some rotated out) on a monthly basis. Moving forward, we plan to submit requests for new content quarterly to OMB for 30-day public comment.

The purpose of this Change Request is to make modifications to previously approved items and to add new items (within the scope of research domains established and approved in previous packages) to be collected on the March instrument. These modifications and additions reflect school experiences with providing meals and continued responses to the current COVID-19 surge with the omicron variant. Specifically, we incorporated minor edits to the school nutrition items that were provided by the USDA Food and Nutrition Service. Furthermore, items focused on parental concerns have been replicated to capture student and school staff concerns, and additional items have been developed to ask whether parents/students/staff have staged any protests due to their school's response to COVID-19.

The costs to the government have not changed as a result of this amendment, nor has the projected respondent burden. Planned communication materials and items to be collected in January, February, and March are provided in Appendices A and B, with the changes to Appendix B detailed below.
