Part 20 Respirator Protection Exemption Request for Non-Power Reactors/RTR
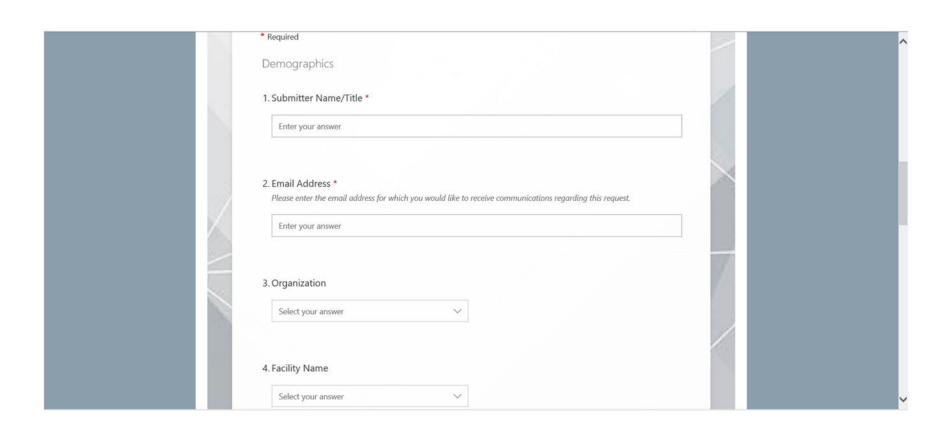

By letter dated April 27, 2020 (ADAMS Accession No. ML20099G757), the U.S. Nuclear Regulatory Commission (NRC) provided guidance to the nuclear industry regarding the expedited review of licensee-requested exemptions from the medical examination frequency requirements in 10 CFR 20.1703(c)(5)(iii) and the fit-testing frequency requirements in 10 CFR 20.1703(c)(6) during the COVID-19 Public health Emergency (PHE). As detailed in the April 27, 2020 letter, the NRC will expeditiously review requests from individual licensees for exemptions from these requirements if those requests meet certain elements. This form is intended for use by research and test reactor/non-power reactor licensees to request these exemptions. If applicable under NRC regulations, please provide required copies to the state and other government agencies.

If the licensee determines that it cannot meet the expedited review criteria described in the April 27, 2020 letter, or requests one or more exemptions from different Part 20 provisions, then the licensee may seek separate NRC approval through the normal exemption process.
