8. This question concerns the acceptability of a toxic bait to control wild pig populations in your state. Assume that the bait has the following characteristics:

- It was approved by federal and state authorities
- It could only be used by trained government personnel to assist landowners (with landowners' permission)
- The bait would be placed in a feeder designed to prevent other animals from reaching and consuming the bait
- Wild pigs would die within a few hours of consuming the bait, with little pain and suffering
- The likelihood other animals would consume the bait and die is very low (but not zero)
- Toxic levels of the active ingredient would not accumulate in a wild pig's muscle or meat tissues, and it is very unlikely there would be any negative affect on humans or animals that consume a wild pig carcass

On a scale of 1 to 5, with 1 being completely unacceptable and 5 being completely acceptable, how acceptable would the use of the toxic bait in your state be to you?

- ^{xxx} (1) Completely unacceptable
