TITLE OF INFORMATION COLLECTION: CDSE Instructor Led Training End-of-Class Feedback

PURPOSE: The Defense Counterintelligence Security Agency (DCSA) Center for Development of Security Excellence (CDSE) is required to evaluate education and training activities, including classes, seminars, workshops, symposia, and conferences. The CDSE ILT End-of-Class Feedback survey is used to collect class participant experience data following completion of a class. The survey employs a set of model questions and additional custom questions. The information collected is used for the purpose of assessing and improving the availability, effectiveness, and usability of training and education services and products. Responses to these surveys are requested online within a week of learning event completion. Responding is optional. No personally identifiable information is requested. Anonymity of responses is maintained. Responses are aggregated and summarized for reports that are reviewed by CDSE instructors, training program and course designers and developers, and management.

DESCRIPTION OF RESPONDENTS: The respondents to the information collection are individuals who have completed Instructor-Led (face—to-face) courses provided by the DCSA CDSE. Respondents comprise employees of the Department of Defense, employees of participants in the National Industrial Security Program (NISP), employees of other Federal Departments and State, and Local Governments, employees of foreign governments, and other users. These surveys are made available to the population of learning event completers, including military personnel, DoD civilian employees, Federal Government civilian employees, employees of contractors that participate in the NISP, and employees of foreign governments. The estimated response rate is approximately 50%. A small percentage of potential respondents (<1%) includes employees of state and local governments, educational institutions, or employees of foreign governments. Respondents participate because the CDSE solicits their input on training event satisfaction, experience, problems encountered in learning, and suggestions for improvement in order to identify problems and assure quality. The responses are also used as a factor in assessing effectiveness in meeting training program goals.
