

## **NYTS Interviewer Guide – Item Set 3 (Demographics, Antitobacco Messaging, Exposure, and Environment)**

### **Instructions:**

1. Introduce yourself and ensure that tech is working; respondent should be able to access the web survey and share their screen.
2. Briefly discuss the goal of the larger survey and the goal of this interview (i.e., to understand how easy or hard these questions are to answer)
  - a. This is YOUR interview. YOUR chance to give important feedback so kids like you can have a better survey experience.
3. Remind the student of consent highlights:
  - a. If possible, take the survey in a private location, away from other family members or your parents.
  - b. Information will not be shared and is only used internally without your name and personal information
  - c. You can skip any question. But, if you feel the question is so uncomfortable that you want to skip it, I'll ask you why you feel that way.
  - d. The interview will be recorded, and we will take notes.
4. Read the OMB statement:
  - 1) CDC estimates the average public reporting burden for this collection of information as 2 hours per response, including the time for reviewing instructions, searching existing data/information sources, gathering and maintaining the data/information needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-0621).
5. Explain process.
  - a. Read each question to yourself and answer it through the web survey.
  - b. Pause when you see a stop sign in the survey and I'll ask you some questions about how you answered.
  - c. There are no wrong answers to any of the questions you will see. In fact, we aren't going to use the answers you provide in any way. We are more interested in what you think of the questions and response choices you will see. We want your honest feedback about what you think about these questions and response choices. We didn't write any of these questions so nothing you say about them will bother us.
  - d. Jump in with comments as you're trying to answer.
6. Start with a practice question to make sure they understand how probes work.
7. Avoid use or reference to the National Youth Tobacco Survey or NYTS to minimize the introduction of bias.
8. After you explain the instructions ask if the respondent has any questions.

### **Generic probes (use these when the respondent hesitates or appears confused about an item):**

1. In your own words, what is this question asking?
2. Are there any unfamiliar or confusing words in this question?

3. How sure are you about your answer? Why?
4. How do you think we could make this question less confusing or easier to understand?
5. Was anything about this question uncertain or uncomfortable?
  - a. If so, what is it?
  - b. If so, do you think others would not want to respond honestly to this question?
