# MDPS Screening Survey Instrument

## MDPS Screening Specifications

### Acronyms used:

- HH = household population
- GQU = group quarters
- NHH = non-household population
- JA = jail population
- PR = prison population
- SH = state psychiatric hospital population
- HL = homeless population

### Symbols used

- [] skips
- <> fills
- != = not equal
- | = OR
- \*\* = indicates that we need two versions of response options, i.e., one for self-administration in “Sentence case” and one for interviewer administration in “ALL CAPS”.

GENERIC ERROR MESSAGE FOR BLANK: “If you are not sure or prefer not to answer, simply select 'Not sure' or 'Prefer not to answer' and then click 'Next' to continue.” \*\*

PROGRAMMER: FOR DK PLEASE DISPLAY “Not sure”\*\* and for REF “Prefer not to answer”\*\*; FOR PHONE AND IN-PERSON (NOT IN-PERSON SELF-ADMINISTERED), WHERE APPLICABLE, PLEASE DISPLAY ON SCREEN IMMEDIATELY.

### Populations:

- The routing through the instruments for the different populations will be based on a preloaded case ID which differentiates the populations.
- HH/GQU:
  - Up to two randomly selected individuals in separate sessions.
  - Self-completion via web, (inbound) phone with TI, or self-completion in-person with FI (note April 2021: due to COVID, in-person will always be CASI).
  - Pilot sample of 200-250 cases will only be administered the CIDI screener
  - Replicate 2: Randomly assign individuals who complete on the web or in-person self-administered (CASI) to either non-adaptive CIDI screener or to CAT-MH screener. Switch CAT-MH to CIDI only if in-person interviewer is offline.
- JA
  - JA are exempted from the screener randomization to non-adaptive CIDI screener or CAT-MH. They will only receive the non-adaptive CIDI screener.
  - Everyone in the JA population completing the screener will be invited to complete the NetSCID – no subsampling.
  - JA will not be asked for consent to the clinical interview at the end of the screener.
  - Note April 2021: currently FI administration is not planned, possibly later. Older comment: The JA where FI administered will not be via self-completion section.

## SECTION 2: DEPRESSION

PROGRAMMER TIME STAMP SET: DEPRESSION

**SMDD1** The next questions are about emotional difficulties you might have experienced at some time in the past year.

Almost everyone has times when they feel sad, depressed, or discouraged about how things are going in their life. Think about a time in **the past 12 months** lasting 2 weeks or longer when you had the strongest feelings of this sort. During **those 2 weeks**, how often did you have each of the following feelings?

If you are one of the few people that never had such times, <IF SFID3 = 2 | (WEB = YES & HH = YES): mark> <IF SFID3 = 1|3: tell me> “none of the time” to all the following questions.

	All or almost all the time	Most of the time	Some of the time	A little of the time	None of the time

## SECTION 4: MANIA/HYPOMANIA

PROGRAMMER TIME STAMP SET: MANIA

**SCI1** The next question is about whether you **ever in your life had an episode lasting 4 days or longer** when your mood was either much higher than usual most of the day, much more irritable than usual most of the day, or a mix of these things.

During these episodes, people are often much more excitable than usual or are extremely self-confident or optimistic. They often do things they would normally not do. And this sometimes gets them into trouble or puts them at risk of trouble.

With this definition in mind, did you ever in your life have an episode of this sort lasting **4 days or longer**?

PROGRAMMER TIME STAMP SET: PTSD

**SPC1** Many people have extremely stressful experiences that affect them psychologically for many years. Think of a time lasting **1 month or longer** in the **past 12 months** when you had the most severe reactions to such an extremely stressful experience. During that month, how much were you bothered by each of the following problems:

	Extremely	Quite a bit	Moderately	A little bit	Not at all
a. Suddenly feeling or acting as if the stressful experience were actually happening again – as if you were actually back there reliving it?	4○	3○	2○	1○	0○
b. Avoiding external reminders of the stressful experience, for example, people, places, conversations, activities, objects, or situations?	○	○	○	○	○

## SECTION 7: PSYCHOSIS

PROGRAMMER TIME STAMP SET: PSYCHOSIS

**SCI3** The next questions are about unusual experiences, like seeing visions or hearing voices. Recent research suggests that they are common and may be normal, but we do not know exactly how common because this is the first large-scale survey to ask about them comprehensively. So please take your time and think carefully before answering the following questions.

Please **do not** count times you had these experiences when you were having a fever, dreaming, half-asleep, or under the influence of alcohol or drugs.

Not counting those things, did you ever in your life have any of the following experiences?

	Yes**	No**
a. The first one is seeing a vision that other people said was not there like a face, an animal, a figure, or colors. Remember not to count times when you were having a fever, dreaming, half-asleep or under the influence of alcohol or drugs. Did you ever see a vision at any other time?	<input type="radio"/>	<input type="radio"/>
b. Did you ever hear voices that other people did not hear like voices coming from inside your head talking to you or about you, or voices coming out of the air when there was no one around?	<input type="radio"/>	<input type="radio"/>
c. Did you ever believe that some mysterious force was inserting thoughts that were definitely not your own thoughts, directly into your head by means of x-rays, laser beams, or other methods?	<input type="radio"/>	<input type="radio"/>
d. Did you ever believe your thoughts were being stolen out of your mind by some force?	<input type="radio"/>	<input type="radio"/>
e. Did you ever think your mind was being taken over by forces with laser beams or other methods that were making you do things you did not choose to do?	<input type="radio"/>	<input type="radio"/>
f. Did you ever think some force was trying to communicate directly with you by sending special signs or signals, like through the radio or television, that you could understand but that no one else could understand?	<input type="radio"/>	<input type="radio"/>
g. Did you ever believe there was a plot to harm you or to have people follow you, but your friends or family did not think this was true?	<input type="radio"/>	<input type="radio"/>

6536 The patient's speech is rapid and difficult to interrupt; the amount of speech produced is greater than that considered normal.  
6537 The patient is distracted by nearby stimuli, which interrupts the flow of speech.  
6538 A pattern of speech in which sounds rather than meaningful relationships govern word choice.  
6539 I have experienced hearing voices, noises, music, etc.  
6540 I hear a voice commenting upon what I am doing or thinking.  
6541 I have had visions, or seen things that are invisible to other people.  
6542 I see and/or hear things that other people do not, but I know that they are real.  
6543 I have had the feeling that I was being controlled by some force or power outside of myself, as though I was a robot and without a will of my own.  
6544 I have felt that my thoughts were broadcast to other people, or that other people knew what I was thinking.  
6545 I feel that thoughts were put into my head that were not my own.  
6546 I feel that thoughts were taken away from me by some external force.  
6547 I feel that things in the world do not make sense and that I am living in a false world or parallel universe.  
6548 I feel that my body and organ systems are diseased.  
6549 I feel that I am living in a fantasy world, for example when people from another world are talking to me.  
6550 I feel that I have committed a crime, or have done some terrible thing and deserve punishment.  
6551 I feel that I am a particularly important person or that I have special powers or abilities.  
6552 I feel that I have infinite power.  
6553 I am concerned/preoccupied about something, but other people do not believe me.  
6554 There were times that I spoke very rapidly or talked on and on and couldn't be stopped.  
6555 There were times when I was unable to sit still or always had to be moving or pacing up and down.  
6556 There was a time when I was more active or involved in things compared to the way I usually am.  
6557 I have done things to call attention to myself the way I dressed or acted.  
6558 I hear voices, noises, or other sounds that no one else hears.  
6559 I hear a voice which makes a running commentary on my behavior or thoughts.  
6560 I hear two or more voices conversing.  
6561 I have experienced peculiar physical sensations in my body.  
6562 I see shapes or people that are not actually present.  
6563 I see and/or hear things that others do not frequently and they affect my life.  
6564 I have special powers or abilities.  
6565 I am preoccupied with thoughts of a religious nature.  
6566 My body is diseased, abnormal, or has changed.  
6567 I believe that significant events or events affect me or have special meaning.  
6568 People can read my mind or know my thoughts.  
6569 My thoughts have been taken away from my mind.  
6570 Thoughts that are not my own have been inserted into my mind.  
6571 My thoughts have been broadcast to other people or moved into other people's heads.  
6572 I have a set of repetitive actions or rituals that I must perform over and over.  
6573 My behavior deviates from social norms that most other people conform to.  
6574 When I speak, my ideas slip off track into unrelated topics.  
6575 I feel emotionally withdrawn, lack spontaneity, and am isolated from others.  
6576 My movements are unusual and unusual.  
6577 My emotions are inconsistent with what I am talking about (e.g., I smile when talking about someone's death).  
6578 My emotions are inappropriate for the situation.  
6579 When I respond to questions, my answers are vague, very concrete, and convey little information.  
6580 My train of thought is interrupted.  
6581 I take a long time to reply to questions.  
6582 I have difficulty having normal conversations.  
6583 My clothes are shabby or soiled, and I have greasy hair and body odor.  
6584 I have difficulty seeking or maintaining employment, continuing schoolwork, keeping up my house, etc.  
6585 I feel drained of energy and tired in normal life.  
6586 I have few or no friends and prefer to spend all of my time isolated.  
6587 I am uninvolved or uninterested. I feel "hollow."  
6588 I have trouble subtracting numbers or spelling words backwards.  
6589 I am having trouble concentrating on the interview.  
6590 I am confused, disoriented, disorganized, and/or derailed.  
6591 I feel disoriented and am often confused about where I am talking to, where I am and what time it is.  
6592 I am aware that I have a psychosomatic illness and am dealing with its effects.  
6593 I see things that are unrelated to each other, for example, "The bird. All people have eyes."  
6594 When I talk, I have trouble conveying information, because of being vague and using obscure phrases.  
6595 When I talk, I have trouble creating a logical connection between words and phrases and have abrupt changes in subject matter.  
6596 My speech is essentially incomprehensible at times.  
6597 When I talk, the conclusions I reach do not follow logically from what I am saying.  
6598 When I speak, I have trouble expressing the idea that I am trying to convey.  
6599 I have trouble communicating with others.  
6600 I feel heightened emotions, isolation, and/or increased reactivity.  
6601 There have been times when I felt very good or too cheerful or high, not just my normal self.  
6602 I have felt more self-confident than usual. I have felt that I am a particularly important person or that I had special talents or abilities.  
6603 I feel that I have big plans in store for me in the future, such as I will be president or walk on the moon.  
6604 I am very irritable, annoyed, and/or angry.  
6605 My speech is accelerated and I change topics frequently.  
6606 I do things considered inappropriate according to usual social norms (e.g., masturbating in public).  
6607 I believe in an aggressive, violent manner, often unnecessarily.  
6608 I reply to questions in with answers that do not make sense to the person I am talking to.  
6609 My speech is rapid and difficult to interrupt; the amount of my speech is greater than what is considered normal.  
6610 When I am talking, I am distracted by nearby things, which interrupt my flow of speech.  
6611 When I talk, I choose words based on how they sound rather than their true meaning.  
6612 How much were you bothered by repeated, disturbing, and unwanted memories or images of a very stressful experience?  
6613 How much were you bothered by negative feelings or actions as if a very stressful experience were actually happening again (as if you were actually back there reliving it)?

## Screening Survey

Your address was randomly chosen for the National Study of Mental Health. This is a research study about mental health and tobacco, alcohol and drug use. If you choose to take part in the study, you will be one of about 44,500 people to do so.

We would like to conduct a short screening survey with you to determine if you are eligible to be interviewed for the overall study.

If you decide to participate you can complete the screening survey online or by telephone, by mail, or a professional interviewer will come to your home to complete the survey in person. For more information please see the invitation letter you received.

The screening survey should take about 15 minutes to complete and to show our appreciation you will receive \$20. A check for \$20 will be mailed to you if you complete this paper screening survey. Or, you may receive a \$20 electronic pre-paid Visa if you choose to complete the online or telephone screening survey, or \$20 in cash if you complete the screening survey with an interviewer in your home. This study is for research purposes only. There is no direct benefit to you from your participation in the study. Information learned from the study may help other people in the future. You might find some of the questions we ask to be upsetting or stressful. Your participation is voluntary, and you can refuse to answer any questions.

It is up to you whether or not to be in this study. The following information is meant to help you decide.

## **General Information**

This study, sponsored by the Substance Abuse and Mental Health Services Administration (SAMHSA), collects information for research and program planning by asking about:

- Mental health;
- Health behaviors;
- Access to, and use of, medical care or treatment; and
- Tobacco, alcohol, and drug use or non-use.

We will be asking questions about substance abuse and mental health. You cannot be identified through any information you give us. Your name and address will never be connected to your answers. In addition, federal law requires us to keep all your answers confidential. Any answers you give will only be used by authorized researchers for statistical purposes. Your participation is voluntary and you can stop at any time. Your alternative is not to participate, and there is no expected benefit to you from your participation in the study.

This screening survey will take about 15 minutes and we will send you a \$20 check through the mail when you finish. We will request your email address at the end of this survey which will only be used to contact you if you are selected for the main interview. It will not be stored with your answers. We included a stamped business return envelope so there will be no additional cost to you for participating in this short survey.

If you are chosen for the main interview, it will be done on a different day that we will schedule at your convenience. The interview takes about 80 minutes, on average.

Each person who is chosen and completes the main interview will receive a \$30 electronic gift card, a \$30 check, or \$30 cash if in person.

---

## **Protecting Your Confidentiality**

To help keep information about you confidential, we have obtained a Certificate of Confidentiality from the Department of Health and Human Services (DHHS). This adds special protection for the research information about you because it protects the research team from being forced, even under a court order or subpoena, to release information that could identify you. However, there are some exceptions to this privacy rule. If you tell us about the abuse of a child or that you plan to hurt yourself or others, we may need to notify a mental health professional or other authorities.

## EMOTIONS AND MOOD

The next questions are about emotional difficulties you might have experienced at some time in the past year.

4. Almost everyone has times when they feel sad, depressed, or discouraged about how things are going in their life. Think about a time in the past 12 months lasting 2 weeks or longer when you had the strongest feelings of this sort. During those 2 weeks, how often did you have each of the following feelings?

*If you are one of the few people that never had such times, mark "None of the time" to all the following questions.*

	All or almost all the time	Most of the time	Some of the time	A little of the time	None of the time

d. Felt down on yourself, no good, or worthless	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

5. Think about a time lasting 6 months or longer in the past 12 months when you had the strongest feelings of worry and anxiety. During those 6 months, how often did you have each of the following feelings?

	Just about every day	More days than not	1-3 days a week	Less than 1 day a week	Never
a. You felt worried or anxious	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. You worried about a number of different things in your life, such as your work, family, health, or finances	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. You felt more worried than other people in your same situation	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. You had trouble controlling your worry	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

--	--	--	--	--	--	--	--

6. The next question is about whether you ever in your life had an episode lasting 4 days or longer when your mood was either much higher than usual most of the day, much more irritable than usual most of the day, or a mix of these things.

During these episodes, people are often much more excitable than usual or are extremely self-confident or optimistic. They often do things they would normally not do. And this sometimes gets them into trouble or puts them at risk of trouble.

With this definition in mind, did you ever in your life have an episode of this sort lasting 4 days or longer?

- Yes
- No → *Skip to question 8*

7. What is the longest episode of this sort you ever had in your life?

- 4 to 7 days
- 8 to 14 days
- More than 14 days

8. Many people have extremely stressful experiences that affect them psychologically for many years. Think of a time lasting 1 month or longer in the past 12 months when you had the most severe reactions to such an extremely stressful experience. During that month, how much were you bothered by each of the following problems:

	Extremely	Quite a bit	Moderately	A little bit	Not at all
a. Suddenly feeling or acting as if the stressful experience were actually happening again – as if you were actually back there reliving it?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Avoiding external reminders of the stressful experience, for example, people, places, conversations, activities, objects, or situations?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Feeling emotionally distant or depressed?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Irritable behavior, angry outbursts, or acting aggressively?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

## UNUSUAL EXPERIENCES

**13. This question asks about unusual experiences, like seeing visions or hearing voices. Recent research suggests that they are common and may be normal, but we do not know exactly how common because this is the first large-scale survey to ask about them comprehensively. So please take your time and think carefully before answering the following questions.**

**Please do not count times you had these experiences when you were having a fever, dreaming, half-asleep, or under the influence of alcohol or drugs.**

**Not counting those things, did you ever in your life have any of the following experiences?**

	Yes	No
a. The first one is seeing a vision that other people said was not there like a face, an animal, a figure, or colors. Remember not to count times when you were having a fever, dreaming, half-asleep or under the influence of alcohol or drugs. Did you ever see a vision at any other time?	<input type="radio"/>	<input type="radio"/>
b. Did you ever hear voices that other people did not hear like voices coming from inside your head talking to you or about you, or voices coming out of the air when there was no one around?	<input type="radio"/>	<input type="radio"/>
c. Did you ever believe that some mysterious force was inserting thoughts that were definitely not your own thoughts, directly into your head by means of x-rays, laser beams, or other methods?	<input type="radio"/>	<input type="radio"/>
d. Did you ever believe your thoughts were being stolen out of your mind by some force?	<input type="radio"/>	<input type="radio"/>
e. Did you ever think your mind was being taken over by forces with laser beams or other methods that were making you do things you did not choose to do?	<input type="radio"/>	<input type="radio"/>
f. Did you ever think some force was trying to communicate directly with you by sending special signs or signals, like through the radio or television, that you could understand but that no one else could understand?	<input type="radio"/>	<input type="radio"/>
g. Did you ever believe there was a plot to harm you or to have people follow you, but your friends or family did not think this was true?	<input type="radio"/>	<input type="radio"/>

Acronyms used:

1. HH = household population
2. GQU = group quarters
3. NHH = non-household population (JA, PR, SH, HL unless specified otherwise)
4. JA = jail population
5. PR = prison population
6. SH = state psychiatric hospital population
7. HL = homeless population
8. SI = secondary interviewer (NA as of April 21; before: only in HH, JA, OR SH)
9. PO = proxy (only in HH, JA; NA for SH as of April 21)
10. GQU = group quarters
11. LAR = legally authorized representative
12. SBT = short blessed test

Symbols used:

- [] skips
- <> fills
- != not equal to
- = equal to
- | = or

PROGRAMMER: PLEASE ALWAYS DISPLAY DK/REF (WHERE APPLICABLE) IN INTERVIEWER ADMINISTRATION

The routing through the instruments for the different populations will be based on a preloaded case ID which differentiates the populations.

For the proxy interviews:

- Only for HH, JA (note April 2021: NA for SH) but not in PR OR HL
- The respondent interview should be reset before the proxy interview is conducted
- Those interviews will mostly be conducted by phone
- Protocol is triggered either via:
  - o SBT fail
  - o Informed Consent Knowledge quiz fail
  - o Respondent initiated
- The interviewer will complete a debriefing for proxy interviews

For the secondary informant interviews – note NA entirely as of April 21:

- Only for HH, JA, and SH but not in PR OR HL
- The secondary informant will answer a handful of questions regarding the relationship to the respondent and contact information in Blaise, and add to the information in the NetSCID portion

of the interview that was provided by the respondent, not the Blaise portion of what the respondent provided.

- As discussed, questions that should be part of the SI interview will be marked in the Note(s) column of the overview with an SI
- Triggered by Clinical interviewer as necessary at the end of the respondent interview (failed to establish diagnosis)
- In most instances this interview will be conducted AFTER completion of the respondent interview; Sometimes a secondary informant may be present during the interview.
- Those interviews will mostly be conducted by phone
- There will be no separate debriefing for these interviews

PROGRAMMER: GO TO CIDBBR1 IF CIDB0 = INCOMPLETE INTERVIEW/BREAKOFF ELSE CONTINUE

- GAF1** [IF SECONDARY = NO] Consider psychological, social, and occupational functioning on a hypothetical continuum of mental health-illness. Do not include impairment in functioning due to physical (or environmental) limitations.

\_\_\_\_\_ [RANGE]

NOTE: USE INTERMEDIATE CODES WHEN APPROPRIATE, E.G., 45, 68, 72.

100-91	Superior functioning in a wide range of activities, life's problems never seem to get out of hand, is sought out by others because of his or her many positive qualities. No symptoms.
90-81	Absent of minimal symptoms (e.g., mild anxiety before an exam), good functioning in all areas, interested and involved in a wide range of activities, socially effective, generally satisfied with life, no more than everyday problems or concerns (e.g., an occasional argument with family members).
80-71	If symptoms are present, they are transient and expectable reactions to psychosocial stressors (e.g., difficulty concentrating after family argument); no more than slight impairment in social, occupational, or school functioning (e.g., temporarily falling behind in schoolwork).
70-61	Some mild symptoms (e.g., depressed mood and mild insomnia) or some difficulty in social, occupational, or school functioning (e.g., occasional truancy, or theft within the household), but generally functioning pretty well, has some meaningful interpersonal relationships.
60-51	Moderate symptoms (e.g., flat and circumstantial speech, occasional panic attacks) or moderate difficulty in social occupational, or social functioning (e.g., few friends, conflicts with co-workers).
50-41	Serious symptoms (e.g., suicidal ideation, severe obsessional rituals, frequent shoplifting) or any serious impairment in social, occupational, or school functioning (e.g., no friends, unable to keep a job).
40-31	Some impairment in reality testing or communication (e.g., speech is at times illogical, obscure, or irrelevant) or major impairment in several areas, such as work or school, family relations, judgment, thinking, or mood (e.g., depressed man avoids friends, neglects family, and is unable to work, child frequently beats up younger children, is defiant at home, and is failing at school).

30-21	Behavior is considerably influenced by delusions or hallucinations or serious impairment in communication or judgment (e.g., sometimes incoherent, acts grossly inappropriately, suicidal preoccupation) or inability to function in almost all areas (e.g., stays in bed all day, no job, home, or friends).
20-11	Some danger of hurting self or others (e.g., suicide attempts without clear expectation of death, frequently violent, manic excitement) or occasionally fails to maintain minimal personal hygiene (e.g., smears feces) or gross impairment in communication (e.g., largely incoherent or mute).
10-1	Persistent danger of severely hurting self or others (e.g., recurrent violence) or persistent inability to maintain minimal personal hygiene or serious suicidal act with clear expectation of death.

**OVERVIEW**

I'm going to be asking you about problems or difficulties you may have had, and I'll be making some notes as we go along.  
 Do you have any questions before we begin?

<p><b>How old are you?</b></p>	
<p><b>Are you currently in a relationship with a partner?</b></p> <p><i>IF YES: What is the nature of that relationship, for example, are you married or living together? How long have you been (RELATIONSHIP STATUS)?</i></p> <p><b>Have you ever been separated/divorced or widowed?</b></p> <p><i>IF YES: How many times?</i></p> <p><b>Do you have any children?</b></p> <p><i>IF YES: How many? (What are their ages?)</i></p>	
<p><b>In what city, town, or community do you live?</b></p> <p><b>In what kind of place do you currently live? (A house, an apartment, a shelter, a halfway house, or some other living arrangement? Are you homeless?)</b></p>	
<p><b>What is your highest completed level of education?</b></p> <p><b>Did you ever <u>not</u> complete a degree or program? Why?</b></p>	
<p><b>I would like to now ask you about your cultural background or identity. By background or identity, I mean, for example, the communities you belong to, the languages you speak, where you or your family are from, your race or ethnic background, your gender or sexual orientation, or your faith or religion.</b></p> <p><b>For you, what are the most important aspects of your background or identity?</b></p>	
<p><b>In the past year, have you done work for which you were paid?</b></p> <p><i>IF YES: Tell me about that. What kind of jobs have you had?</i></p> <p><i>IF HAS NOT WORKED IN PAST YEAR OR HAS WORKED TOO FEW HOURS TO BE SELF-SUPPORTING: How have you supported yourself during the past year?</i></p>	

<p><b>In the past year, have you (also) been in school or enrolled in on-line classes? What kind of program was it?</b></p> <p><b>Have there been any times during the past year when you were on leave for illness or disability?</b></p> <p><i>IF YES: What was the illness/disability?</i></p> <p><i>IF UNCLEAR: Are you currently retired?</i></p>	
<p><i>IF UNKNOWN: During the past year, have there been any periods of time when you were unable to work or go to school?</i></p> <p><i>IF YES: Why was that?</i></p>	
<p>→ <b>Have you ever been involved with the legal system (Have you ever been arrested??)</b></p>	

<p><b>Psychological Difficulties Past Year</b></p> <p><b>In the past year, have you seen a doctor, a therapist, or a counselor for any kind of psychological problem?</b></p> <p><i>IF YES: Tell me about it. (What was the reason for your seeking help?) (What kinds of symptoms [have you been/were you experiencing?] (When did these symptoms begin?) (Was anything going on in your life when they began?) (Since they began, when have you felt the worst?)</i></p> <p><b>What kind of help did you receive? (Counselling or psychotherapy?) (Medication—what kind?) (For how long have you been getting that help?)</b></p> <p><b>What about (also) getting help during the past year from outside the health system, like from a self-help group like Alcoholics Anonymous, or from a faith healer or pastoral counselor?</b></p>	
<p>→ <i>IF HAS SOUGHT HELP IN THE PAST YEAR: Besides [PROBLEMS ALREADY DISCUSSED], have you had any other problems that you considered getting help for but didn't?</i></p> <p>→ <i>IF HAS NOT SOUGHT HELP IN PAST YEAR: What about having a problem during the past year that you considered getting help for? Have other people mentioned that you ought to seek help for a psychological problem? Tell me about that.</i></p> <p><b>In the past year, have you gotten any help for problems with drugs or alcohol? Tell me about that.</b></p>	

<p><b>Most Stressful Situation/Event In Past Year</b></p> <p>Most people have experienced situations, other people, or events that they have found to be upsetting, challenging, or stressful.</p> <p>What has been the <u>most</u> challenging or stressful experience that you experienced in the past year? Tell me about that. How did it affect you?</p>	
<p><b>Hospitalization History</b></p> <p>Have you <u>ever</u> been hospitalized for psychological problems or a drug or alcohol problem?</p> <p><i>IF YES: What was that for?</i></p> <p>IF AN INADEQUATE ANSWER IS GIVEN, CHALLENGE GENTLY: e.g., <b>Wasn't there something else? People don't usually go to psychiatric hospitals just because they are tired or nervous.</b></p> <p>Have you <u>ever</u> been hospitalized for treatment of a medical problem?</p> <p><i>IF YES: What was that for?</i></p>	

**Suicidal Ideation and Behavior**

*CHECK FOR THOUGHTS:* In the past year, since [ONE YEAR AOG], have you had any thoughts about taking your own life or just going to sleep and not waking up, or thinking that you would be better off dead? (Tell me about that.)

*CHECK FOR ATTEMPT:* In the past year, have you done anything to try to end your life?

*IF YES:* Tell me about that. What did you do?

**NOTE: IF PAST YEAR IDEATION OR ATTEMPT, ASSESS FOR CURRENT SUICIDE RISK AND ACT ACCORDINGLY.**

**Ask:** In the past week have you had any thoughts about taking your own life?

*IF YES,* Tell me more about that. Do you intend to hurt yourself or take your own life?

*IF YES,* Have you thought about a specific method for attempting suicide? What has prevented you from acting on this plan?

**IF CURRENT, ACTIVE SUICIDAL IDEATION AND INTENT IS CONFIRMED, STOP THE INTERVIEW AND GO TO DRP SCENARIO 1B**

SUICIDAL IDEATION PAST YEAR:

- 1. Yes
- 2. No

SUICIDAL ATTEMPT PAST YEAR:

- 1. Yes
- 2. No

**Other Problems in Past Year**

Have you had any problems in the past year other than what we've talked about so far?

*IF UNKNOWN:* How were you affected by the coronavirus pandemic? (Did you or someone close to you need to be hospitalized for treatment? Did you lose someone whom you were close to? How about the financial implications of the crisis?)

How has your physical health been during the past year, since [ONE YEAR AGO]? Have you been getting help for any medical problems? (What kind of problems are you getting help for? Are you taking any medicines or getting any other kind of treatment for the problem?)

In the past year, have you taken any medication (including over the counter medications, vitamins, nutritional supplements, or natural or traditional health remedies) for your emotions or nerves or to help you sleep (other than those you've already told me about?)

*IF YES:* What medication are you taking (did you take)?

### Screening for Alcohol Use Disorder in Past Year

**Have you drunk any alcohol in the past year, that is, since (ONE YEAR AGO)?**

*IF UNKNOWN:* Have you drunk alcohol at least six times in the past 12 months?

**IF UNKNOWN:** What are the most drinks you have had at one time in the past 12 months?

**MALES:** ALCOHOL DRUNK AT LEAST SIX TIMES IN PAST TWELVE MONTHS AND HAVE HAD AT LEAST FOUR DRINKS AT ONE TIME AT LEAST ONCE IN PAST YEAR: Yes No

**FEMALES:** ALCOHOL DRUNK AT LEAST SIX TIMES IN PAST TWELVE MONTHS AND HAVE HAD AT LEAST THREE DRINKS AT ONE TIME IN THE PAST YEAR: Yes No

### Screening for Nonsubstance Use Disorder in Past Year

Now I'd like to ask you about your use of drugs or medicines over the past 12 months, since (ONE YEAR AGO).

		At or Above Screening Threshold	Below Screening Threshold	
E15	<b>Sedatives, Hypnotics, or Anxiolytics:</b> In the past 12 months, have you taken any pills to calm you down, help you relax, or help you sleep? (Drugs like Valium, Xanax, Ativan, Klonopin, Ambien, Sonata, or Lunesta?) <b>IF YES, specific drug(s) used</b> _____	YES	NO	E15
E16	<b>Cannabis:</b> In the past 12 months, have you used marijuana ("pot," "grass," "weed," "flower"), hashish ("hash"), THC, "wax," "sauce," or "shatter," K2, or "spice"? <b>IF YES, specific drug(s) used:</b> _____	YES	NO	E16
E17	<b>Stimulants:</b> In the past 12 months, have you used any stimulants or "uppers" to give you more energy, keep you alert, lose weight, or help you focus? (Drugs like speed, methamphetamine, crystal meth, "crank," Ritalin or methylphenidate, Dexedrine, Adderall or amphetamine, or prescription diet pills?) How about cocaine or "crack"? <b>IF YES, specific drug(s) used:</b> _____	YES	NO	E17

Did you ever take more of it than was prescribed or run out of your prescription early? Did you ever have to go to more than one doctor to make sure you didn't run out?</b></p> <p>→IF OVER-THE-COUNTER (OTC) <b>Over the past 12 months, did you get hooked or become dependent on (OTC MEDICATION)? Did you</b></p>				

THE TREATMENT TIMELINE (BELOW) MAY BE USED AT ANY POINT IN THE OVERVIEW TO RECORD THE DETAILS OF A COMPLICATED HISTORY.

### A. MOOD EPISODES

MAJOR DEPRESSIVE EPISODE PAST YEAR	MAJOR DEPRESSIVE EPISODE CRITERIA		
<p><b>[IF UNBLINDMDE = YES]</b> In your earlier interview you mentioned that you have had times in the past year when you felt depressed or down or lost interest in things that you used to enjoy. I'd like to ask you some more questions about those times.</p> <p><b>[ELSE]</b> Now I am going to ask you some more questions about your mood.</p>	<p>A. Five (or more) of the following symptoms have been present during the same 2-week period and represent a change from previous functioning; at least one of the symptoms is either (1) depressed mood or (2) loss of interest or pleasure.</p>		
<p><b>A1</b></p>	<p><b>During the past 12 months, since (ONE YEAR AGO), has there been a period of time when you were feeling depressed or down most of the day, <u>nearly every day</u>? (Has anyone said that you look sad, down, or depressed?)</b></p> <p><i>IF NO: <b>How about feeling sad, empty, or hopeless, most of the day, nearly every day?</b></i></p> <p>IF YES TO EITHER OF ABOVE: <b>What has it been like? For how long have you felt like that for most of the day, nearly every day? (As long as 2 weeks?)</b></p>	<p>1. Depressed mood most of the day, nearly every day, as indicated by either subjective report (e.g., feels sad, empty, hopeless) or observation made by others (e.g., appears tearful).</p> <p style="text-align: center;">—      +</p>	<p><b>A1</b></p>
<p><b>A2</b></p>	<p>▶ IF PREVIOUS ITEM RATED "+": <b>During that time, did you have less interest or pleasure in things you usually enjoyed? (What has that been like?)</b></p> <p>▶ IF PREVIOUS ITEM RATED "—": <b>What about a time since (ONE YEAR AGO) when you lost interest or pleasure in things you usually enjoyed? (What has that been like?)</b></p> <p>IF YES: <b>Has it been nearly every day? How long has it lasted? (As long as 2 weeks?)</b></p>	<p>2. Markedly diminished interest or pleasure in all, or almost all, activities most of the day, nearly every day (as indicated by either subjective account or observation).</p> <p style="text-align: center;">—      +</p>	<p><b>A2</b></p>
<p>IF BOTH <b>A1</b> AND <b>A2</b> ARE RATED AS "—" FOR THE PAST YEAR, Continue with <b>A29</b> (Manic Episode Past Year), <b>page 15</b>.</p>			
<p><b>Have you had more than one time like that during the past 12 months? (Which time was the worst?)</b></p>		<p><i>NOTE: If more than one episode in the past 12 months is likely, select the "worst" one for your inquiry about a Major Depressive Episode in the past 12 months.</i></p>	

A3	<p>FOR THE FOLLOWING QUESTIONS, FOCUS ON THE WORST 2-WEEK PERIOD OF THE WORST EPISODE IN THE PAST YEAR: <b>Thinking about</b> (WORST EPISODE IN PAST YEAR), <b>during which 2-week period would you say you have been feeling the worst or functioning the worst?</b></p>			
	<p><b>During</b> (2-WEEK PERIOD)...</p> <p>...<b>how was your appetite?</b> (What about compared to your usual appetite? Did you have to force yourself to eat? Eat [less/more] than usual? <u>Was that nearly every day?</u> Did you lose or gain any weight?)</p> <p><i>IF YES: How much? (Had you been trying to [lose/gain] weight?)</i></p>	<p>3. Significant weight loss when not dieting or weight gain (e.g., a change of more than 5% of body weight in a month), or decrease or increase in appetite nearly every day.</p>	<p>— +</p>	A3
A4	<p>...<b>how had you been sleeping?</b> (Trouble falling asleep, waking frequently, trouble staying asleep, waking too early, OR sleeping too much?)</p> <p>How many hours of sleep (including naps) have you been getting? How many hours of sleep did you typically get before you got (depressed/OWN WORDS)? <u>Had it been nearly every night?</u></p>	<p>4. Insomnia or hypersomnia nearly every day.</p>	<p>— +</p>	A4
A5	<p>(During [2-WEEK PERIOD]...)</p> <p>...<b>were you so fidgety or restless that you were unable to sit still?</b></p> <p>What about the opposite—talking more slowly, or moving more slowly than was normal for you, as if you’re moving through molasses or mud?</p> <p>(IN EITHER INSTANCE, has it been so bad that other people noticed it? What did they notice? <u>Was that nearly every day?</u>)</p>	<p>5. Psychomotor agitation or retardation nearly every day (observable by others, not merely subjective feelings of restlessness or being slowed down).</p> <p><i>NOTE: CONSIDER BEHAVIOR DURING THE INTERVIEW.</i></p>	<p>— +</p>	A5
A6	<p>...<b>what was your energy like?</b> (Tired all the time? <u>Nearly every day?</u>)</p>	<p>6. Fatigue or loss of energy nearly every day.</p>	<p>— +</p>	A6
A7	<p>(During [2-WEEK PERIOD]...)</p> <p>...<b>were you feeling worthless?</b></p> <p>What about feeling guilty about things you had done or not done?</p> <p><i>IF YES: What kinds of things? (Was this only because you couldn’t take care of things because you had been sick?)</i></p> <p><b>IF YES TO EITHER OF ABOVE: Was that <u>Nearly every day?</u></b></p>	<p>7. Feelings of worthlessness or excessive or inappropriate guilt (which may be delusional) nearly every day (not merely self-reproach or guilt about being sick).</p>	<p>— +</p>	A7

A8	<p>...Did you have trouble thinking or concentrating? Had it been hard to make decisions about everyday things? (What kinds of things had it been interfering with? <u>Nearly every day?</u>)</p>	<p>8. Diminished ability to think or concentrate, or indecisiveness, nearly every day (either by subjective account or as observed by others).</p>	<p>— +</p>	A8
A9	<p>(During [2-WEEK PERIOD]...)</p> <p>...Had things been so bad that you thought a lot about death or that you would be better off dead? Did you think about taking your own life?</p> <p><i>IF YES: Had you done something about it? (What did you do? Had you made a specific plan? Did you take any action to prepare for it? Did you actually make a suicide attempt?)</i></p>	<p>9. Recurrent thoughts of death (not just fear of dying), recurrent suicidal ideation without a specific plan, or a suicide attempt or a specific plan for committing suicide.</p> <p>Note: ANY CURRENT SUICIDAL THOUGHTS, PLANS, OR ACTIONS SHOULD BE THOROUGHLY ASSESSED BY THE CLINICIAN AND ACTION TAKEN IF NECESSARY.</p>	<p>— +</p>	A9
A10		<p>AT LEAST FIVE OF THE ABOVE CRITERION A SXS (A1-A9) ARE RATED "+".</p>	<p>NO YES</p>	A10

**IF FEWER THAN FIVE ITEMS: Has there been any other time when you were (depressed/OWN WORDS) during the past year and had even more of the symptoms than I just asked about?**

→ IF YES: Go back to **A1**, page 10, and assess symptoms for that episode.

→ IF NO: Continue with **A29** (Manic Episode Past Year), **page 15**

Continue with **A11** (Criterion B), **next page.**

**A11**

IF UNKNOWN: **Are you taking any medications or other health remedies because of (DEPRESSIVE SXS)? Tell me about that.**

IF UNKNOWN: **Are you seeing a doctor, a therapist, or a counselor for (DEPRESSIVE SXS)? Tell me about that.**

IF UNKNOWN: **Have other people suggested that you ought to seek help for (DEPRESSIVE SXS)? Tell me about that.**

IF UNCLEAR: **What effect did (DEPRESSIVE SXS) have on your life?**

ASK THE FOLLOWING QUESTIONS ONLY AS NEEDED:

**How did (DEPRESSIVE SXS) affect your relationships or your interactions with other people? (Did [DEPRESSIVE SXS] cause you any problems in your relationships with your family, romantic partner, or friends?)**

**How did (DEPRESSIVE SXS) affect your work/school? (How about your attendance at work/school? Did [DEPRESSIVE SXS] make it more difficult to do your work/schoolwork? Did [DEPRESSIVE SXS] affect the quality of your work/schoolwork?)**

**How did (DEPRESSIVE SXS) affect your ability to take care of things at home? How about doing simple everyday things, like getting dressed, bathing, or brushing your teeth? What about doing other things that were important to you, like religious activities, physical exercise, or hobbies?**

**Did you avoid doing anything because you felt like you weren't up to it?**

**Did (DEPRESSIVE SXS) affect any other important part of your life?**

IF DEPRESSIVE SXS DO NOT INTERFERE WITH LIFE: **How much were you bothered or upset by having (DEPRESSIVE SXS)?**

B. The symptoms cause clinically significant distress or impairment in social, occupational, or other important areas of functioning.

**Treatment for sx:** Code "+" if "YES" to any of the first three questions.

**Impairment due to sx:** Code "+" if judged to be moderate or greater

**Distress:** Code "+" if judged to be moderate or greater

**A11**

**IF DUE TO MEDICAL CONIDITON OR SUBSTANCE: Has there been any other time during the past year when you were (high/irritable/OWN WORDS) and had (ACKNOWLEDGED MANIC SXS) and you were not (ill with GMC/using SUBSTANCE)?**

▶ IF NO: Continue with **B1 (Psychotic sxs), page 26**.

## B. PSYCHOTIC AND ASSOCIATED SYMPTOMS

FOR ANY PSYCHOTIC AND ASSOCIATED SYMPTOMS THAT ARE PRESENT, DETERMINE WHETHER THE SYMPTOM IS DEFINITELY "PRIMARY" (I.E., DUE TO A PSYCHOTIC DISORDER) OR WHETHER THERE IS A POSSIBLE OR DEFINITE ETIOLOGICAL GMC OR SUBSTANCE/MEDICATION. (REFER TO PAGE 71 FOR A LIST OF ETIOLOGICAL GMCs OR SUBSTANCES/MEDICATIONS.) THIS INFORMATION WILL BE USEFUL IN DIFFERENTIATING A PRIMARY PSYCHOTIC DISORDER FROM A PSYCHOTIC DISORDER DUE TO AMC OR SUBSTANCE/MEDICATION-INDUCED PSYCHOTIC DISORDER IN MODULE C.

THE FOLLOWING QUESTIONS MAY BE USEFUL FOR THIS DETERMINATION IF THE OVERVIEW HAS NOT ALREADY PROVIDED THE INFORMATION:

**Just before (PSYCHOTIC SXS) began, were you using drugs?** IF YES: **What were you using?**  
**...On any medications?** IF YES: **What were you taking?**  
**...Did you drink much more than usual or stop drinking after you had been drinking a lot for a while?**  
**...Were you physically ill?**

IF YES TO ANY: **Has there been a time when you had (PSYCHOTIC SXS) and were not (using [DRUG]/taking [MEDICATION]/changing your drinking habits/physically ill)?**

**[IF UNBLINDPSYCHOS1 = YES]** In your earlier interview you mentioned that a health professional said you had schizophrenia or schizoaffective disorder, I'd like to ask you some more questions about this.

**[IF UNBLINDPSYCHOS2 = YES]** In your earlier interview you mentioned that you received disability payments because of a schizophrenia or schizoaffective disorder diagnosis, I'd like to ask you some more questions about this.

**[IF UNBLINDPSYCHOS3 = YES]** In your earlier interview you mentioned having one or more unusual experiences in your life. I'd like to ask you some more questions about those experiences.

**[ELSE]** Now I am going to ask you about unusual experiences that people sometimes have.

### DELUSIONS

A false belief based on incorrect inference about external reality that is firmly held despite what almost everyone else believes and despite what constitutes incontrovertible and obvious proof or evidence to the contrary. The belief is not one ordinarily accepted by other members of the person's culture or subculture (i.e., it is not an article of religious faith). When a false belief involves a value judgment, it is regarded as a delusion only when the judgment is so extreme as to defy credibility.

*NOTE: Code overvalued ideas (unreasonable and sustained beliefs that are maintained with less than delusional intensity) as "—".*

## C. DIFFERENTIAL DIAGNOSIS OF PSYCHOTIC DISORDERS

If no primary psychotic items from Module B have ever been present, **skip to D1** (Differential Diagnosis of Mood Disorders), **page 36**.

**C1** Note: for the following items, only include psychotic symptoms in Module B that have been rated to be primary.

Psychotic symptoms occur **at times other than** during Major Depressive or Manic Episodes

IF A MAJOR DEPRESSIVE OR MANIC EPISODE HAS EVER BEEN PRESENT:  
**Has there ever been a time when you had (PSYCHOTIC SXS) and you were not (depressed/high/irritable/OWN WORDS)?**  
  
**That is, have you only had (PSYCHOTIC SXS) during times when you have been (depressed/high/irritable/OWN WORDS)?**

Two (or more) of the following, each present for a significant portion of time during a 1-month period (or less if successfully treated):  
 At least one of these must be (1), (2), or (3):

1. Delusions [**B1–B13**].
2. Hallucinations [**B14–B15**].
3. Disorganized speech (e.g., frequent derailment or incoherence) [**B20**].
4. Grossly disorganized or catatonic behavior [**B21–B22**].
5. Negative symptoms (i.e., diminished emotional expression or avolition) [**B23–B24**].

*NO: Consider rating "NO" if the only symptoms are delusions accompanied by tactile and/or olfactory hallucinations that are thematically related to the content of the delusions (which is consistent with a diagnosis of Delusional Disorder).*

Continuous signs of the disturbance persist for at least **6 months**. This 6-month period must include at least **1 month** of symptoms (or less if successfully treated) that **meet Criterion A** (i.e., active-phase symptoms) and may include periods of **prodromal** or **residual** symptoms.

Prodromal/residual symptoms include:

- Unusual or odd beliefs that are not of delusional proportions (e.g., ideas of reference or magical thinking);
- Unusual perceptual experiences (e.g., sensing the presence of an unseen person);
- Speech that is generally understandable but digressive, vague, or overelaborate
- Behavior that is unusual but not grossly disorganized (e.g., collecting garbage, talking to self in public, hoarding food)
- Negative symptoms (e.g., marked impairment in personal hygiene and grooming; marked lack of initiative, interests, or energy)
- Blunted or inappropriate affect
- Marked social isolation or withdrawal

Continue with **F42** (Generalized Anxiety Disorder), **page 50**.

**List of Withdrawal Symptoms (from DSM-5 criteria for specific substance withdrawal diagnoses)**

Listed below are the characteristic withdrawal syndromes for those classes of psychoactive substances for which a withdrawal syndrome has been identified. (*NOTE: A specific withdrawal syndrome has not been identified for PCP, HALLUCINOGENS, and INHALANTS.*) Withdrawal symptoms may occur following the cessation of prolonged moderate or heavy use of a psychoactive substance or a reduction in the amount used.

**SEDATIVES, HYPNOTICS, OR ANXIOLYTICS**

Two (or more) of the following, developing within several hours to a few days after the cessation of (or reduction in) sedative, hypnotic, or anxiolytic use that has been heavy and prolonged:

1. Autonomic hyperactivity (e.g., sweating or pulse rate greater than 100 bpm).
2. Hand tremor.
3. Insomnia.
4. Nausea or vomiting.
5. Transient visual, tactile, or auditory hallucinations or illusions.
6. Psychomotor agitation.
7. Anxiety.
8. Grand mal seizures.

**CANNABIS**

Three (or more) of the following signs and symptoms developing within approximately 1 week after cessation of cannabis use that has been heavy and prolonged (i.e., usually daily or almost daily use over a period of at least a few months):

1. Irritability, anger, or aggression.
2. Nervousness or anxiety.
3. Sleep difficulty (e.g., insomnia, disturbing dreams).
4. Decreased appetite or weight loss.
5. Restlessness.
6. Depressed mood.
7. At least one of the following physical symptoms causing significant discomfort: abdominal pain, shakiness/tremors, sweating, fever, chills, or headache.

**STIMULANTS/COCAINE**

Dysphoric mood AND two (or more) of the following physiological changes, developing within a few hours to several days after cessation of (or reduction in) prolonged amphetamine-type substance, cocaine, or other stimulant use:

1. Fatigue.
2. Vivid, unpleasant dreams.
3. Insomnia or hypersomnia.
4. Increased appetite.
5. Psychomotor retardation or agitation.

**OPIOIDS**

Three (or more) of the following, developing within minutes to several days after cessation of (or reduction in) opioid use that has been heavy and prolonged (i.e., several weeks or longer) or after administration of an opioid antagonist after a period of opioid use:

1. Dysphoric mood.
2. Nausea or vomiting.
3. Muscle aches.
4. Lacrimation or rhinorrhea (runny nose).
5. Pupillary dilation, piloerection [{"goose bumps"}], or sweating.
6. Diarrhea.
7. Yawning.
8. Fever.
9. Insomnia.

	OBSESSIVE-COMPULSIVE DISORDER (PAST YEAR)	OBSESSIVE-COMPULSIVE DISORDER CRITERIA
	<p>In the past year, since (12 MONTHS AGO)...</p>	<p>A. Presence of obsessions, compulsions, or both:</p> <p>Obsessions are defined by (1) and (2):</p>
<b>G1</b>	<p>...have you been bothered by thoughts that kept coming back to you even when you didn't want them to, like being exposed to germs or dirt or needing everything to be lined up in a certain way? (What were they?)</p> <p>How about having urges to do something that kept coming back to you even though you didn't want them to, like an urge to harm a loved one? (What were they?)</p> <p>How about having images popping into your head that you didn't want, like violent or horrible scenes or something of a sexual nature? (What were they?)</p> <p>IF YES TO ANY OF ABOVE: Have these (THOUGHTS/URGES/IMAGES) made you very anxious or upset?</p>	<p>1. Recurrent and persistent thoughts, urges, or images that are experienced, at some time during the disturbance, as intrusive and unwanted, and that in most individuals cause marked anxiety or distress.</p>
<b>G2</b>	<p>When you had these (THOUGHTS/URGES/IMAGES) did you try hard to get them out of your head? (What would you try to do?)</p>	<p>2. The individual attempts to ignore or suppress such thoughts, urges, or images, or to neutralize them with some other thought or action (i.e., by performing a compulsion).</p>
	<p>Compulsions are defined by (1) and (2):</p>	
<b>G3</b>	<p>In the past year since (12 MONTHS AGO), was there anything that you had to do over and over again and was hard to resist doing, like washing your hands again and again, repeating something over and over again until it "felt right," counting up to a certain number, or checking something many times to make sure that you'd done it right?</p> <p>Tell me about that. (What did you have to do?)</p>	<p>1. Repetitive behaviors (e. g., hand washing, ordering, checking) or mental acts (e.g., praying, counting, repeating words silently) that the individual feels driven to perform in response to an obsession or according to rules that must be applied rigidly.</p>
<b>G4</b>	<p>IF UNCLEAR: Why did you have to do (COMPULSIVE ACT)? What would happen if you didn't do it?</p> <p>IF UNCLEAR: How many times would you do (COMPULSIVE ACT)? Are you doing (COMPULSIVE ACT) more than really makes sense?</p>	<p>2. The behaviors or mental acts are aimed at preventing or reducing anxiety or distress, or preventing some dreaded event or situation; however, these behaviors or mental acts either are not connected in a realistic way with what they are designed to neutralize or prevent, or are clearly excessive.</p>

**[IF UNBLINDPTSD = YES]** In your earlier interview you mentioned having one or more highly stressful experiences in your life. I'd like to ask you some more questions about those experiences.

**[ALL]**

I'd now like to ask about some things that may have happened to you that may have been extremely upsetting. People often find that talking about these experiences can be helpful. I'll start by asking if these experiences apply to you, and if so, I'll ask you to briefly describe what happened and how you felt at the time.

A. Exposure to actual or threatened death, serious injury, or sexual violence in one (or more) of the following ways:

1. Directly experiencing the traumatic event(s).
2. Witnessing, in person, the event(s) as it occurred to others.
3. Learning that the traumatic event(s) occurred to a close family member or close friend. In cases of actual or threatened death of a family member or friend, the event(s) must have been violent or accidental.
4. Experiencing repeated or extreme exposure to aversive details of the traumatic event(s) (e.g., first responders collecting human remains; police officers repeatedly exposed to details of child abuse).

**OVERVIEW**

I'm going to be asking you about problems or difficulties you may have had, and I'll be making some notes as we go along.

Do you have any questions before we begin?

<p><b>How old are you?</b></p>	
<p><b>Are you currently in a relationship with a partner?</b> <i>IF YES: What is the nature of that relationship, for example, are you married? How long have you been (RELATIONSHIP STATUS)?</i></p> <p><b>Have you ever been separated/divorced or widowed?</b> <i>IF YES: How many times?</i></p> <p><b>Do you have any children?</b> <i>IF YES: How many? (What are their ages?)</i></p>	
<p><b>What is your highest completed level of education?</b></p> <p><b>Did you ever <u>not</u> complete a degree or program? Why?</b></p>	
<p>I would like to now ask you about your cultural background or identity. By background or identity, I mean, for example, the communities you belong to, the languages you speak, where you or your family are from, your race or ethnic background, your gender or sexual orientation, or your faith or religion.</p> <p>For you, what are the most important aspects of your background or identity?</p>	
<p><b>Before you were in prison what kinds of work did you do?</b></p>	
<p><b>In the past year, have you been in school or enrolled in on-line classes? What kind of program was it?</b></p>	

## Psychological Difficulties Past Year

**In the past year, have you seen a doctor, a therapist, or a counselor for any kind of psychological problem?**

*IF YES:* Tell me about it. (What was the reason for your seeking help?) (What kinds of symptoms [have you been/were you experiencing?]) (When did these symptoms begin?) (Was anything going on in your life when they began?) (Since they began, when have you felt the worst?)

**What kind of help did you receive? (Counselling or psychotherapy?) (Medication—what kind?) (For how long have you been getting that help?)**

**What about (also) getting help during the past year from outside the health system, like from a self-help group like Alcoholics Anonymous, or from a faith healer or pastoral counselor?**

→ *IF HAS SOUGHT HELP IN THE PAST YEAR:* **Besides [PROBLEMS ALREADY DISCUSSED], have you had any other problems that you considered getting help for but didn't?**

→ *IF HAS NOT SOUGHT HELP IN PAST YEAR:* **What about having a problem during the past year that you considered getting help for? Have other people mentioned that you ought to seek help for a psychological problem? Tell me about that.**

### **Most Stressful Situation/Event In Past Year**

**Most people have experienced situations, other people, or events that they have found to be upsetting, challenging, or stressful.**

**What has been the most challenging or stressful experience that you experienced in the past year? Tell me about that. How did it affect you?**

### **Hospitalization History**

**Have you ever been hospitalized for psychological problems?**

*IF YES: What was that for?*

IF AN INADEQUATE ANSWER IS GIVEN, CHALLENGE

GENTLY: e.g., **Wasn't there something else? People don't usually go to psychiatric hospitals just because they are tired or nervous.**

**Have you ever been hospitalized for treatment of a medical problem?**

*IF YES: What was that for?*

## Suicidal Ideation and Behavior

**CHECK FOR THOUGHTS:** In the past year, since [ONE YEAR AOG], have you had any thoughts about taking your own life or just going to sleep and not waking up, or thinking that you would be better off dead? (Tell me about that.)

**CHECK FOR ATTEMPT:** In the past year, have you done anything to try to end your life?

*IF YES:* Tell me about that. What did you do?

**NOTE: IF PAST YEAR IDEATION OR ATTEMPT, ASSESS FOR CURRENT SUICIDE RISK AND ACT ACCORDINGLY.**

**Ask:** In the past week have you had any thoughts about taking your own life?

*IF YES,* Tell me more about that. Do you intend to hurt yourself or take your own life?

*IF YES,* Have you thought about a specific method for attempting suicide? What has prevented you from acting on this plan?

**IF CURRENT, ACTIVE SUICIDAL IDEATION AND INTENT IS CONFIRMED, STOP THE INTERVIEW AND GO TO DRP SCENARIO 1B**

SUICIDAL IDEATION PAST YEAR:

1. Yes
2. No

SUICIDAL ATTEMPT PAST YEAR:

1. Yes
2. No

## Other Problems in Past Year

Have you had any problems in the past year other than what we've talked about so far?

*IF UNKNOWN:* How were you affected by the coronavirus pandemic? (Did you or someone close to you need to be hospitalized for treatment? Did you lose someone whom you were close to? How about the financial implications for people close to you related to the crisis?)

How has your physical health been during the past year, since [ONE YEAR AGO]? Have you been getting help for any medical problems? (What kind of problems are you getting help for? Are you taking any medicines or getting any other kind of treatment for the problem?)

In the past year, have you taken any medication (including over the counter medications, vitamins, nutritional supplements, or natural or traditional health remedies) for your emotions or nerves or to help you sleep (other than those you've already told me about?)

*IF YES:* What medication are you taking (did you take)?

## A. MOOD EPISODES

MAJOR DEPRESSIVE EPISODE PAST YEAR		MAJOR DEPRESSIVE EPISODE CRITERIA		
<p><b>[IF UNBLINDMDE = YES]</b> In your earlier interview you mentioned that you have had times in the past year when you felt depressed or down or lost interest in things that you used to enjoy. I'd like to ask you some more questions about those times.</p> <p><b>[ELSE]</b> Now I am going to ask you some more questions about your mood.</p>		<p>A. Five (or more) of the following symptoms have been present during the same 2-week period and represent a change from previous functioning; at least one of the symptoms is either (1) depressed mood or (2) loss of interest or pleasure.</p>		
<b>A1</b>	<p>During the past 12 months, since (ONE YEAR AGO), has there been a period of time when you were feeling depressed or down most of the day, <u>nearly every day</u>? (Has anyone said that you look sad, down, or depressed?)</p> <p><i>IF NO: <u>How about feeling sad, empty, or hopeless, most of the day, nearly every day?</u></i></p> <p>IF YES TO EITHER OF ABOVE: <b>What has it been like? For how long have you felt like that for most of the day, nearly every day? (As long as 2 weeks?)</b></p>	1. Depressed mood most of the day, nearly every day, as indicated by either subjective report (e.g., feels sad, empty, hopeless) or observation made by others (e.g., appears tearful).	— +	<b>A1</b>
<b>A2</b>	<p>▶ IF PREVIOUS ITEM RATED "+": <b>During that time, did you have less interest or pleasure in things you usually enjoyed? (What has that been like?)</b></p> <p>▶ IF PREVIOUS ITEM RATED "—": <b>What about a time since (ONE YEAR AGO) when you lost interest or pleasure in things you usually enjoyed? (What has that been like?)</b></p> <p><i>IF YES: <u>Has it been nearly every day?</u> How long has it lasted? (As long as 2 weeks?)</i></p>	2. Markedly diminished interest or pleasure in all, or almost all, activities most of the day, nearly every day (as indicated by either subjective account or observation).	— +	<b>A2</b>
<p>IF BOTH A1 AND A2 ARE RATED AS "—" FOR THE PAST YEAR, Continue with <b>A29</b> (Manic Episode Past Year), <b>page 13</b>.</p>				
<p>Have you had more than one time like that during the past 12 months? (Which time was the worst?)</p>		<p><i>NOTE: If more than one episode in the past 12 months is likely, select the "worst" one for your inquiry about a Major Depressive Episode in the past 12 months.</i></p>		

A3	<p>FOR THE FOLLOWING QUESTIONS, FOCUS ON THE WORST 2-WEEK PERIOD OF THE WORST EPISODE IN THE PAST YEAR: <b>Thinking about</b> (WORST EPISODE IN PAST YEAR), <b>during</b> which 2-week period would you say you have been feeling the worst or functioning the worst?</p>			
A4	<p>During (2-WEEK PERIOD)...</p> <p>...how was your appetite? (What about compared to your usual appetite? Did you have to force yourself to eat? Eat [less/more] than usual? <u>Was that nearly every day?</u> Did you lose or gain any weight?)</p> <p><i>IF YES: How much? (Had you been trying to [lose/gain] weight?)</i></p>	<p>3. Significant weight loss when not dieting or weight gain (e.g., a change of more than 5% of body weight in a month), or decrease or increase in appetite nearly every day.</p>	<p>— +</p>	A3
A4	<p>...how had you been sleeping? (Trouble falling asleep, waking frequently, trouble staying asleep, waking too early, OR sleeping too much?)</p> <p>How many hours of sleep (including naps) have you been getting? How many hours of sleep did you typically get before you got (depressed/OWN WORDS)? <u>Had it been nearly every night?</u></p>	<p>4. Insomnia or hypersomnia nearly every day.</p>	<p>— +</p>	A4
A5	<p>(During [2-WEEK PERIOD]...)</p> <p>...were you so fidgety or restless that you were unable to sit still?</p> <p>What about the opposite—talking more slowly, or moving more slowly than was normal for you, as if you’re moving through molasses or mud?</p> <p>(IN EITHER INSTANCE, has it been so bad that other people noticed it? What did they notice? <u>Was that nearly every day?</u>)</p>	<p>5. Psychomotor agitation or retardation nearly every day (observable by others, not merely subjective feelings of restlessness or being slowed down).</p> <p><i>NOTE: CONSIDER BEHAVIOR DURING THE INTERVIEW.</i></p>	<p>— +</p>	A5
A6	<p>...what was your energy like? (Tired all the time? <u>Nearly every day?</u>)</p>	<p>6. Fatigue or loss of energy nearly every day.</p>	<p>— +</p>	A6
A7	<p>(During [2-WEEK PERIOD]...)</p> <p>...were you feeling worthless?</p> <p>What about feeling guilty about things you had done or not done?</p> <p><i>IF YES: What kinds of things? (Was this only because you couldn’t take care of things because you had been sick?)</i></p> <p><b>IF YES TO EITHER OF ABOVE: Was that <u>Nearly every day?</u></b></p>	<p>7. Feelings of worthlessness or excessive or inappropriate guilt (which may be delusional) nearly every day (not merely self-reproach or guilt about being sick).</p>	<p>— +</p>	A7

A8	<p>...Did you have trouble thinking or concentrating? Had it been hard to make decisions about everyday things? (What kinds of things had it been interfering with? <u>Nearly every day?</u>)</p>	<p>8. Diminished ability to think or concentrate, or indecisiveness, nearly every day (either by subjective account or as observed by others).</p>	<p>— +</p>	A8
A9	<p>(During [2-WEEK PERIOD]...)</p> <p>...Had things been so bad that you thought a lot about death or that you would be better off dead? Did you think about taking your own life?</p> <p><i>IF YES: Had you done something about it? (What did you do? Had you made a specific plan? Did you take any action to prepare for it? Did you actually make a suicide attempt?)</i></p>	<p>9. Recurrent thoughts of death (not just fear of dying), recurrent suicidal ideation without a specific plan, or a suicide attempt or a specific plan for committing suicide.</p> <p>Note: ANY CURRENT SUICIDAL THOUGHTS, PLANS, OR ACTIONS SHOULD BE THOROUGHLY ASSESSED BY THE CLINICIAN AND ACTION TAKEN IF NECESSARY.</p>	<p>— +</p>	A9
A10		<p>AT LEAST FIVE OF THE ABOVE CRITERION A SXS (A1-A9) ARE RATED "+".</p>	<p>NO YES</p>	A10

**IF FEWER THAN FIVE ITEMS: Has there been any other time when you were (depressed/OWN WORDS) during the past year and had even more of the symptoms than I just asked about?**

→ IF YES: Go back to **A1**, page 9, and assess symptoms for that episode.  
 → IF NO: Continue with **A29** (Manic Episode Past Year), **page 13**.

Continue with **A11** (Criterion B), **next page**.

**A11**

IF UNKNOWN: **Are you taking any medications or other health remedies because of (DEPRESSIVE SXS)? Tell me about that.**

IF UNKNOWN: **Are you seeing a doctor, a therapist, or a counselor for (DEPRESSIVE SXS)? Tell me about that.**

IF UNKNOWN: **Have other people suggested that you ought to seek help for (DEPRESSIVE SXS)? Tell me about that.**

IF UNCLEAR: **What effect did (DEPRESSIVE SXS) have on your life?**

ASK THE FOLLOWING QUESTIONS ONLY AS NEEDED:

**How did (DEPRESSIVE SXS) affect your relationships or your interactions with other people? (Did [DEPRESSIVE SXS] cause you any problems in your relationships with your family, friends, other inmates, or with correctional staff?)**

**How did (DEPRESSIVE SXS) affect your work/school? (How about your attendance at work/school? Did [DEPRESSIVE SXS] make it more difficult to do your work/schoolwork? Did [DEPRESSIVE SXS] affect the quality of your work/schoolwork?)**

**How did (DEPRESSIVE SXS) affect your ability to follow the prison schedule? How about doing simple everyday things, like getting dressed, bathing, or brushing your teeth? What about doing other things that were important to you, like religious activities, physical exercise, hobbies, or keeping in touch with family?**

**Did you avoid doing anything because you felt like you weren't up to it?**

**Did (DEPRESSIVE SXS) affect any other important part of your life?**

IF DEPRESSIVE SXS DO NOT INTERFERE WITH LIFE: **How much were you bothered or upset by having (DEPRESSIVE SXS)?**

B. The symptoms cause clinically significant distress or impairment in social, occupational, or other important areas of functioning.

**Treatment for sxS:** Code "+" if "YES" to any of the first three questions.

**Impairment due to sxS:** Code "+" if judged to be moderate or greater

	MANIC EPISODE PAST YEAR	MANIC EPISODE CRITERIA		
A29a	<p><b>[IF UNBLINDMANIA = YES]</b> In your earlier interview you mentioned that you have had times in the past year when you felt so full of energy or in such a good mood for at least four days that other people thought you were not yourself. Or, you may have mentioned that you were much more irritable for at least four days. ## B. PSYCHOTIC AND ASSOCIATED SYMPTOMS

FOR ANY PSYCHOTIC AND ASSOCIATED SYMPTOMS THAT ARE PRESENT, DETERMINE WHETHER THE SYMPTOM IS DEFINITELY "PRIMARY" (I.E., DUE TO A PSYCHOTIC DISORDER) OR WHETHER THERE IS A POSSIBLE OR DEFINITE ETIOLOGICAL GMC OR MEDICATION. (REFER TO **PAGE 51** FOR A LIST OF ETIOLOGICAL GMCs OR MEDICATIONS.) THIS INFORMATION WILL BE USEFUL IN DIFFERENTIATING A PRIMARY PSYCHOTIC DISORDER FROM A PSYCHOTIC DISORDER DUE TO AMC OR MEDICATION-INDUCED PSYCHOTIC DISORDER IN MODULE C.

THE FOLLOWING QUESTIONS MAY BE USEFUL FOR THIS DETERMINATION IF THE OVERVIEW HAS NOT ALREADY PROVIDED THE INFORMATION:

**Just before (PSYCHOTIC SXS) began, were you**  
**...On any medications? IF YES: What were you taking?**  
**...Were you physically ill?**

IF YES TO ANY: **Has there been a time when you had (PSYCHOTIC SXS) and were not (taking [MEDICATION]/ill)?**

**[IF UNBLINDPSYCHOS1 = YES]** In your earlier interview you mentioned that a health professional said you had schizophrenia or schizoaffective disorder, I'd like to ask you some more questions about this.

**[IF UNBLINDPSYCHOS2 = YES]** In your earlier interview you mentioned that you received disability payments because of a schizophrenia or schizoaffective disorder diagnosis, I'd like to ask you some more questions about this.

**[IF UNBLINDPSYCHOS3 = YES]** In your earlier interview you mentioned having one or more unusual experiences in your life. I'd like to ask you some more questions about those experiences.

**[ELSE]** Now I am going to ask you about unusual experiences that people sometimes have.

### DELUSIONS

A false belief based on incorrect inference about external reality that is firmly held despite what almost everyone else believes and despite what constitutes incontrovertible and obvious proof or evidence to the contrary. The belief is not one ordinarily accepted by other members of the person's culture or subculture (i.e., it is not an article of religious faith). When a false belief involves a value judgment, it is regarded as a delusion only when the judgment is so extreme as to defy credibility.

*NOTE: Code overvalued ideas (unreasonable and sustained beliefs that are maintained with less than delusional intensity) as "—".*

## C. DIFFERENTIAL DIAGNOSIS OF PSYCHOTIC DISORDERS

If no primary psychotic items from Module B have ever been present, **skip to D1** (Differential Diagnosis of Mood Disorders), **page 36**.

**C1** Note: for the following items, only include psychotic symptoms in Module B that have been rated to be primary.

Psychotic symptoms occur **at times other than** during Major Depressive or Manic Episodes

IF A MAJOR DEPRESSIVE OR MANIC EPISODE HAS EVER BEEN PRESENT:  
**Has there ever been a time when you had (PSYCHOTIC SXS) and you were not (depressed/high/irritable/OWN WORDS)?**

**That is, have you only had (PSYCHOTIC SXS) during times when you have been (depressed/high/irritable/OWN WORDS)?**

### SCHIZOPHRENIA CRITERION A

**C2**

Two (or more) of the following, each present for a significant portion of time during a 1-month period (or less if successfully treated):  
 At least one of these must be (1), (2), or (3):

1. Delusions **[B1–B13]**.
2. Hallucinations **[B14–B15]**.
3. Disorganized speech (e.g., frequent derailment or incoherence) **[B20]**.
4. Grossly disorganized or catatonic behavior **[B21–B22]**.
5. Negative symptoms (i.e., diminished emotional expression or avolition) **[B23–B24]**.

*NO: Consider rating “NO” if the only symptoms are delusions accompanied by tactile and/or olfactory hallucinations that are thematically related to the content of the delusions (which is consistent with a diagnosis of Delusional Disorder).*

### SCHIZOPHRENIA CRITERION C

**C4**

Continuous signs of the disturbance persist for at least **6 months**. This 6-month period must include at least **1 month** of symptoms (or less if successfully treated) that meet Criterion A (i.e., active-phase symptoms) and may include periods of prodromal or residual symptoms.

Prodromal/residual symptoms include:

- Unusual or odd beliefs that are not of delusional proportions (e.g., ideas of reference or magical thinking);
- Unusual perceptual experiences (e.g., sensing the presence of an unseen person);
- Speech that is generally understandable but digressive, vague, or overelaborate
- Behavior that is unusual but not grossly disorganized (e.g., collecting garbage, talking to self in public, hoarding food)
- Negative symptoms (e.g., marked impairment in personal hygiene and grooming; marked lack of initiative, interests, or energy)
- Blunted or inappropriate affect
- Marked social isolation or withdrawal

	<p>In the past year, since (12 MONTHS AGO)...</p>	<p>A. Presence of obsessions, compulsions, or both:</p> <p>Obsessions are defined by (1) and (2):</p>
G1	<p>...have you been bothered by thoughts that kept coming back to you even when you didn't want them to, like being exposed to germs or dirt or needing everything to be lined up in a certain way? (What were they?)</p> <p>How about having urges to do something that kept coming back to you even though you didn't want them to, like an urge to harm a loved one? (What were they?)</p> <p>How about having images popping into your head that you didn't want, like violent or horrible scenes or something of a sexual nature? (What were they?)</p> <p>IF YES TO ANY OF ABOVE: Have these (THOUGHTS/URGES/IMAGES) made you very anxious or upset?</p>	<p>1. Recurrent and persistent thoughts, urges, or images that are experienced, at some time during the disturbance, as intrusive and unwanted, and that in most individuals cause marked anxiety or distress.</p>
G2	<p>When you had these (THOUGHTS/URGES/IMAGES) did you try hard to get them out of your head? (What would you try to do?)</p>	<p>2. The individual attempts to ignore or suppress such thoughts, urges, or images, or to neutralize them with some other thought or action (i.e., by performing a compulsion).</p>
		<p>Compulsions are defined by (1) and (2):</p>
G3	<p>In the past year since (12 MONTHS AGO), was there anything that you had to do over and over again and was hard to resist doing, like washing your hands again and again, repeating something over and over again until it "felt right," counting up to a certain number, or checking something many times to make sure that you'd done it right?</p> <p>Tell me about that. (What did you have to do?)</p>	<p>1. Repetitive behaviors (e. g., hand washing, ordering, checking) or mental acts (e.g., praying, counting, repeating words silently) that the individual feels driven to perform in response to an obsession or according to rules that must be applied rigidly.</p>
G4	<p>IF UNCLEAR: Why did you have to do (COMPULSIVE ACT)? What would happen if you didn't do it?</p> <p>IF UNCLEAR: How many times would you do (COMPULSIVE ACT)? ### ***Key Information***

Your address was randomly chosen for the National Study of Mental Health. This is a research study about mental health and tobacco, alcohol and drug use. If you choose to take part in the study, you will be one of about 44,500 people to do so.

We would like to conduct a short screening survey with you to determine if you are eligible to be interviewed for the overall study.

If you decide to participate you can complete the screening survey online or by telephone, by mail, or a professional interviewer will come to your home to complete the survey in person.

The screening survey should take about 15 minutes to complete and you will receive a \$20 electronic gift card or \$20 cash if in person. This study is for research purposes only. There is no direct benefit to you from your participation in the study. Information learned from the study may help other people in the future. You might find some of the questions we ask to be upsetting or stressful. Your participation is voluntary, and you can refuse to answer any questions.. Although, you may not be able to skip, refuse, or answer ‘don’t know’ to some questions depending on whether you are answering the questions over video, phone, or in-person.

It is up to you whether or not to be in this study. The following information is meant to help you decide.

### ***General Information***

This study, sponsored by the Substance Abuse and Mental Health Services Administration (SAMHSA), collects information for research and program planning by asking about:

- Mental health;
- Health behaviors;
- Access to, and use of, medical care or treatment; and
- Tobacco, alcohol, and drug use or non-use.

We will be asking questions about substance abuse and mental health. You cannot be identified through any information you give us. Your name and address will never be connected to your answers. In addition, federal law requires us to keep all your answers confidential. Any answers you give will only be used by authorized researchers for statistical purposes. Your participation is voluntary and you can stop at any time. Your alternative is not to participate, and there is no expected benefit to you from your participation in the study

This screening survey will take about 15 minutes and we will e-mail you a \$20 electronic gift card or give you \$20 cash when you finish. We will request your email address at the end of this survey. It will only be used to send you the gift card, and to contact you if you are selected for the main interview. It will not be stored with your answers There will be no additional costs to you for participating in this short survey, other than your normal phone, internet or data plan charges if applicable.

If you are chosen for the main interview, it will be done on a different day that we will schedule at your convenience. The interview takes about 80 minutes, on average.

**Each person who is chosen and completes the interview will receive a \$30 electronic gift card or \$30 cash if in person.**

### ***Protecting Your Confidentiality***

To help keep information about you confidential, we have obtained a Certificate of Confidentiality from the Department of Health and Human Services (DHHS). This adds special protection for the research information about you because it protects the research team from being forced, even under a court order or subpoena, to release information that could identify you. However, there are some exceptions to this privacy rule. If you tell me about the abuse of a child or that you plan to hurt yourself or others, we may need to notify a mental health professional or other authorities.

### ***Whom To Contact About This Study***

During the study, if you have questions, concerns or complaints about the study, please contact the Investigator at the contact information on the first page of this consent.

I will ask for permission to record the interview to ensure I did it properly.]

You can still be interviewed even if you do not allow the interview to be recorded.

The interview should take about 80 minutes to complete and you will receive \$30. Your participation is voluntary, and you can refuse to answer any questions.

You cannot be identified through any information you give us. Your name and address will never be connected to your answers. However, there are some exceptions to this privacy rule. If you tell me about the abuse of a child or that you plan to hurt yourself or others, we may need to notify a mental health professional or other authorities.

It is up to you whether or not to be in this study. The following information is meant to help you decide.

### ***WHO IS LEADING THE STUDY?***

The person in charge of this study is the study investigator from RTI International, a nonprofit research company in North Carolina. The study is sponsored by the Substance Abuse and Mental Health Services Administration (SAMHSA), an agency in the U.S. Department of Health and Human Services (DHHS).

[IF MODE = TELEPHONE OR IN PERSON FILL: Next I will share additional information about the study.]

### ***WHAT IS THIS STUDY ABOUT?***

The study will look at how many people in the United States have experienced mental health conditions like depression, anxiety, psychosis, and post-traumatic stress disorder. We are asking people who take part in the study to answer questions about these conditions. We will also ask about using tobacco, alcohol, and drugs.

For the study to be successful, we need to hear from people who have had these experiences and from people who have never had these experiences.

The questions will also ask about your health in general and about healthcare and any mental health or substance abuse treatment you may be getting. The last set of questions asks about household income and involvement with the criminal justice system.

**Your name will not be linked to your answers.** Your answers will be combined with answers from the other study participants and will be used to understand how many people experience mental health and substance use conditions, and how these conditions impact their quality of life. Also, this information may be used by local, state, and federal agencies to support education, treatment and prevention programs.

[IF MODE = TELEPHONE OR IN PERSON FILL: Now I will share information about your participation in this interview, possible risks or discomforts, as well as possible benefits.]

### ***DO I HAVE TO TAKE PART IN THIS INTERVIEW?***

It is your choice whether or not you take part in this study. Even if you decide to start the interview, you may change your mind and stop at any time. If you decide to stop the interview before finishing it, let the interviewer know.

The only alternative is to not participate in the study. If you decide not to take part or to stop the interview, there will not be any penalty and you will not lose any benefits or rights you would normally receive.

***WHAT ARE THE POSSIBLE RISKS OR DISCOMFORTS?***

The length of the interview might cause you to feel tired or stressed. Also, you might find some of the questions we ask to be upsetting or stressful. If this happens, you can take a short break or stop the interview and finish it another day. Your participation is voluntary, and you can refuse to answer any of the questions.

***WHAT ARE THE POSSIBLE BENEFITS?***

This study is for research purposes only. There is no direct benefit to you from your participation in the study. Information learned from the study may help other people in the future.

[IF MODE = TELEPHONE OR IN PERSON FILL: Next I will share if there are any costs associated with your participation, and the payment you will receive for participating, as well as information about confidentiality.]

***WILL THERE BE ANY COSTS ASSOCIATED WITH MY PARTICIPATION?***

There will be no charge to you for your participation in this study, other than your normal phone, internet or data plan charges if applicable.

***WILL I RECEIVE ANY PAYMENT FOR TAKING PART IN THIS STUDY?***

Yes, you will receive \$30 if you participate.

***WILL MY RESPONSES BE KEPT CONFIDENTIAL?***

You cannot be identified through any information you give us. Your name and address will never be connected to your answers. Your answers will be combined with those from the other study participants. The results of the study will come from the combined answers and it won't be possible to identify you. In addition, federal law requires us to keep all your answers confidential. Any information you give us will only be used by authorized personnel for statistical purposes.

To help keep information about you confidential, we have obtained a Certificate of Confidentiality from the Department of Health and Human Services (DHHS). The questions will also ask about your health in general and about healthcare and any mental health or substance abuse treatment you may be getting. The last set of questions asks about household income and involvement with the criminal justice system.

**Your name will not be linked to your answers.** Your answers will be combined with answers from the other study participants and will be used to understand how many people experience mental health and substance use conditions, and how these conditions impact their quality of life. Also, this information may be used by local, state, and federal agencies to support education, treatment, and prevention programs.

If you participate in the interview, we would also like to receive a copy of your medical records from this hospital. This is separate from this interview, and you will be asked to sign and date a separate form for this. You can consent to the interview and to allow the study staff to receive your medical records, or you can consent to just the interview, or you can choose not to take part in either activity.

### ***DO I HAVE TO TAKE PART IN THIS INTERVIEW?***

It is your choice whether or not you take part in this study. Even if you decide to start the interview, you may change your mind and stop at any time. If you decide to stop the interview before finishing it, let me know. The only alternative is to not participate in the study. If you decide not to take part or to stop the interview, there will not be any penalty and you will not lose any benefits or rights you would normally receive.

***WHERE IS THE INTERVIEW GOING TO TAKE PLACE, AND HOW LONG WILL IT LAST?***

We will do the interview here. It should take about 90 minutes to complete.

***WHAT ARE THE POSSIBLE RISKS OR DISCOMFORTS?***

The length of the interview might cause you to feel tired or stressed. Also, you might find some of the questions I ask to be upsetting or stressful. If this happens, you can take a short break or stop the interview and finish it another day, if that is an option. Your participation is voluntary, and you can refuse to answer any of the questions.

***WHAT ARE THE POSSIBLE BENEFITS?***

This study is for research purposes only. There is no direct benefit to you from your participation in the study. Information learned from the study may help other people in the future.

***WILL THERE BE ANY COSTS ASSOCIATED WITH MY PARTICIPATION?***

There will be no charge to you for your participation in this study.

***WILL I RECEIVE ANY PAYMENT OR REWARD FOR TAKING PART IN THIS STUDY?***

«Compensation»

Yes, you can get a \$30 deposit to your hospital account or a voucher to be used in the hospital store or cafeteria.

***WILL MY RESPONSES BE KEPT CONFIDENTIAL?***

You cannot be identified through any information you give us. Your name will never be connected to your answers. Your answers will be combined with those from the other study participants. The results of the study will come from the combined answers and it won't be possible to identify you. In addition, federal law requires us to keep all your answers confidential. Any information you give us will only be used by authorized personnel for statistical purposes.

To help keep information about you confidential, we have obtained a Certificate of Confidentiality from the Department of Health and Human Services. This adds special protection for the information about you because it protects the research team from being forced, even under a court order or subpoena, to release information that could identify you. However, there are some exceptions to this privacy rule. If you tell me about the abuse of a child or that you plan to hurt yourself or others, we may need to notify a mental health professional or other authorities.

**Address:** RTI, International  
3040 E Cornwallis Rd, PO Box 12194  
Research Triangle Park, NC 27709

## **KEY INFORMATION**

You are being invited to take part in the National Study of Mental Health. This is a research study about mental health, and tobacco, alcohol, and drug use. If you choose to take part in the study, you will be one of about 44,500 people to do so.

Today, I would like to conduct a short screening survey with you to determine if you are eligible to be interviewed for the overall study. If you are eligible, that interview would be done after you are released from jail.

The screening survey should take about 15 minutes to complete [IF INCENTIVE IS ALLOWED IN FACILITY: and you will receive (a snack/OTHER INCENTIVE) if you agree to participate]. This study is for research purposes only. There is no direct benefit to you from your participation in the study. Information learned from the study may help other people in the future. If you decide not to take part, there will not be any penalty and you will not lose any benefits or rights you would normally receive. You might find some of the questions we ask to be upsetting or stressful. Your participation is voluntary, and you can refuse to answer any questions.

You cannot be identified through any information you give us. Your name will not be connected to your answers.

However, there are some exceptions to this privacy rule. If you tell me about the abuse of a child or that you plan to hurt yourself or others, we may need to notify a mental health professional or other authorities. If you tell me that you have had sexual contact with another inmate or correctional staff, I may need to inform officials at this jail or authorities outside of the jail who are responsible for protecting jail inmates.

It is up to you whether or not to be in this study. The following information is meant to help you decide.

### ***General Information***

This study, sponsored by the Substance Abuse and Mental Health Services Administration (SAMHSA), collects information for research and program planning by asking about:

- Mental health;
- Health behaviors;
- Access to, and use of, medical care or treatment; and
- Tobacco, alcohol, and drug use or non-use.

Today, I will be asking questions about mental health. You cannot be identified through any information you give us. Your name and address will never be connected to your answers. In addition, federal law requires us to keep all your answers confidential. Any answers you give will only be used by authorized researchers for statistical purposes. Your participation is voluntary, and you can stop at any time. Your alternative is not to participate, and there is no expected benefit to you from your participation in the study.

### «Compensation»

This screening survey will take about 15 minutes [IF INCENTIVE IS ALLOWED IN FACILITY: and you will receive (a snack/OTHER INCENTIVE) if you agree to participate]. There will be no costs to you for participating in this short survey.

If you are chosen for the main interview, it will be done after you are released from jail. The interview takes about 80 minutes, on average. I will give you information on how to reach the study team so that you can contact us to schedule that interview at your convenience.

**Each person who is chosen and completes the interview will receive a \$30 electronic gift card or \$30 cash if in person.**

### ***Protecting Your Confidentiality***

To help keep information about you confidential, we have obtained a Certificate of Confidentiality from the Department of Health and Human Services (DHHS). This adds special protection for the research information about you because it protects the research team from being forced, even under a court order or subpoena, to release information that could identify you. It is up to you whether or not you are part of this study. The following information is meant to help you decide.

### ***WHO IS LEADING THE STUDY?***

The person in charge of this study is the study investigator from RTI International, a nonprofit research company in North Carolina. The study is sponsored by the Substance Abuse and Mental Health Services Administration (SAMHSA), an agency in the U.S. Department of Health and Human Services (DHHS).

### ***WHAT IS THIS STUDY ABOUT?***

The study will look at how many people in the United States have experienced mental health conditions like depression, anxiety, psychosis, and post-traumatic stress disorder. We are asking people who take part in the study to answer questions about these conditions. While the study goals also address alcohol, drug, and tobacco use, we will not ask inmates about using alcohol or drugs.

For the study to be successful, we need to hear from people who have had these experiences and from people who have never had these experiences.

The questions will also ask about your health in general and about healthcare and any mental health or substance abuse treatment you may be getting. The last set of questions asks about involvement with the criminal justice system.

**Your name will not be linked to your answers.** Your answers will be combined with answers from the other study participants and will be used to understand how many people experience mental health and substance use conditions, and how these conditions impact their quality of life. ## ***KEY INFORMATION***

You are being invited to take part in the National Study of Mental Health on behalf of the participant. The participant was selected to participate in this study and provided permission for you to participate on his/her behalf. This is a research study about mental health, tobacco, alcohol and drug use, and consists of one interview. If you choose to take part in the study, you will be one of about 7,200 people to do so.

If you decide to participate, a trained interviewer will ask the questions by phone, video teleconference, or in person, using a laptop computer. You can be in your home, office or another private location when you complete the interview. You will be asked for permission to record the interview to ensure: the interviewer did it properly. You can still be interviewed even if you do not allow the interview to be recorded.

The interview will include a few questions about your relationship with the participant, but will mostly consist of questions about the participant's health. The interview should take about 60 to 80 minutes to complete and you will receive a \$30 electronic gift card or \$30 cash if you agree to participate. Your participation is voluntary, and you can refuse to answer any questions.

The following information is meant to help you decide whether or not to be in this study.

## ***WHO IS LEADING THE STUDY?***

## Clinical Interview Follow-Up Letter

Dear <<Name>>:

Thank you for completing the National Study of Mental Health\* Screening Survey on [FILL DATE] and agreeing to participate in the main interview. You received \$20 for completing the Screening Survey and **\$30 to participate in the main interview. However, you have not yet completed the main interview.** Your participation is very important! Completing the main interview will make the information you already provided much more valuable.

The interview takes 80 minutes on average. A trained interviewer will ask questions by video teleconference or by telephone, using a laptop computer. You can be in your home, office, or another private location when you complete the interview. We appreciate that your time is precious and will schedule an interview at a date and time that works best for you.

We understand that your privacy is important. Your answers are combined with the answers of thousands of other people and reported only overall. In addition, you can refuse to answer any question.

The National Study of Mental Health is the first of its kind in the country. Data from this study will be used to understand mental health and findings may be helpful for improving health services in the United States.

**Please email us at [nsmh@rti.org](mailto:nsmh@rti.org) or contact our study assistance line toll-free at 833-947-2575 to schedule your interview.** You can also contact us with any questions. If we do not hear from you, one of our professional interviewers in the area will contact you at your home to complete it in person or by video.

Thank you for your time and for making an appointment to complete your interview.

## Clinical Interview Recontact Letter (Screener CI Reluctance)

Dear <<Name>>:

Thank you for completing the National Study of Mental Health\* Screening Survey! By participating in this study you have contributed to furthering our understanding of important health issues. **However, we still need your help!**

You were selected to complete the main interview and we hope you will reconsider continuing your participation in this groundbreaking study. A limited number of people were randomly selected to represent the population of the United States, and you are one of them. If you choose not to participate, your experiences and views—as well as the thousands of people you represent—will not be heard.

Completing the main interview will make the information you already provided much more valuable. We cannot replace you with anyone else.

The interview takes 80 minutes on average, and to thank you for your participation you will receive a \$30 check or \$30 electronic prepaid Visa© (whichever you prefer). A trained interviewer will ask questions by video teleconference or by telephone, using a laptop computer. You can be in your home, office, or another private location when you complete the interview. We appreciate that your time is precious and will schedule an interview at a date and time that works best for you.

The National Study of Mental Health is the first of its kind in the country. Data from this study will be used to understand mental health and findings may be helpful for improving health services in the United States.

**Please email us at [nsmh@rti.org](mailto:nsmh@rti.org) or contact our study assistance line toll-free at 833-947-2575 to schedule your interview appointment.** You can also contact us with any questions.

Thank you for your time. I hope you'll reconsider and choose to participate in this extremely important and beneficial study.

[CITY], [STATE] [ZIP]

Dear Resident:

Recently, a professional interviewer from RTI International attempted to contact your household about participating in the National Study of Mental Health\*. Your participation in this study is important—this is why we continue to try and reach you.

Some people are cautious about speaking to a stranger at the door, and that is understandable. Please know that we are not soliciting or selling anything—we have just a few general questions to ask that will take about five minutes, and the adult that answers the questions will receive \$5 in cash if completed with a field interviewer in person or a \$10 electronic prepaid Visa© or \$10 check if completed via web or telephone.

It is not necessary for you to let the interviewer into your home—you can answer the questions right at your door. Or, you can answer the questions online or via telephone. To complete the 5-minute household membership listing via telephone please call us toll-free at 877-267-2910 between [FILL], Eastern Time. To complete the household membership listing via a website on a personal computer, laptop, or tablet:

1. **In your web browser type the study website address: <https://nsmh.rti.org>**
2. **On the login screen, type your password exactly as shown below:**

**Password: <Password>**

After these initial questions, someone in your household may or may not be randomly selected to answer a few more questions to find out if they are eligible to participate in the main interview. These questions will take about 15 minutes to complete. We will give the person answering these additional questions \$20. Then, if anyone is selected for and completes the main interview, that person will receive \$30 as a token of appreciation.

A limited number of households were randomly selected to represent the population of the U.S. Your household cannot be replaced. If you choose not to participate, your experiences and views—as well as the thousands of people you represent—will not have a chance to be heard.

Thank you for your time. I hope you'll choose to participate in this extremely important and beneficial study.

Sincerely,

[FS NAME], Field Supervisor

The National Study of Mental Health is a major source of national data concerning mental health, substance use, and emotional issues. Information from this study will be used by government agencies, policy makers, and researchers to understand trends in mental health and substance use treatment. Results may be used to help design and support prevention, treatment, and education programs. By participating in this study, you will be contributing to furthering our understanding of important health issues.

Thank you for your time. I hope you'll reconsider and choose to participate in this extremely important and beneficial study.

Sincerely,

[FS NAME], Field Supervisor

### A. Public Information

#### 1. Landing Page

**The National Study of Mental Health (NSMH) is a research effort that will provide critical information on mental health and health behaviors in the United States.**

The NSMH will help begin to answer questions on these important topics by interviewing people who live at home as well as those who are currently hospitalized, incarcerated, or residing in homeless shelters. Participants across the United States will be invited to participate in this important national study. This initiative represents one of the largest studies on mental health in the United States. We're very pleased to invite you to participate in this exciting research opportunity!

[There will be links at the top of the landing page to separate pages for items 2 – 6](#)

#### 2. About

You may have received a letter inviting you to complete a short household membership listing. Once that is complete, up to two people in your household may be invited to complete a short screening survey and an interview.

You can complete the household membership listing and screening survey online, by phone, by mail, or if needed, a trained interviewer can come to your home. You can complete the main interview by video, by phone, or if needed, a trained interviewer can come to your home to conduct the interview.

You will be asked questions about mental health, health behaviors including tobacco, alcohol, and drug use, and access to medical care and treatment. More details on the household membership listing, short screening survey, and main interview will be provided to you.

Please be assured that all your data will be kept confidential.

If you ever feel that you need to talk to someone about mental health issues, you can call the National Lifeline Network. Counselors are available to talk at any time of the day or night and they can give you information about services in your area.

### **3. Confidentiality**

Confidentiality is critical to this research effort and RTI places great importance on maintaining the highest standards of confidentiality and integrity of participants' data.

Participants cannot be identified through any information they provide. Participants' names and addresses will never be connected to their answers. All answers will be combined with responses from other participants; the results of the study will come from the combined answers and it won't be possible to identify any individual. Information provided by a participant will only be used by authorized personnel for statistical purposes.

Federal law requires us to keep all answers confidential. The right of privacy is guaranteed by the federal **Privacy Act of 1974**. This Act prohibits the release of personal information gathered by or for a federal agency without the written consent of the respondent. Fines and penalties apply to individuals or organizations that violate this law.

The National Study of Mental Health project has also obtained a Certificate of Confidentiality from the Department of Health and Human Services (DHHS). This adds special protection for the research information about participants because it protects the research team from being forced, even under a court order or subpoena, to release information that could identify anyone.

### **4. RTI & Collaborators**

The National Study of Mental Health is led by RTI International in collaboration with Columbia University/New York State Psychiatric Institute (CU/NYSPI), the University of Washington, Duke Health, Harvard University, the Treatment Advocacy Center, and the University of Chicago. The study is funded by a grant to RTI from the Substance Abuse and Mental Health Services Administration (SAMHSA) within the Department of Health and Human Services (DHHS).

Founded in 1958, RTI is an independent, nonprofit research organization dedicated to improving the human condition. Our vision is to address the world's most critical problems with science-based solutions in pursuit of a better future.

Our experts hold degrees in more than 250 scientific, technical, and professional disciplines across the social and laboratory sciences, engineering, and international development fields. Our staff of nearly 6,000 works in more than 75 countries—tackling [hundreds of projects](#) each year to address complex social and scientific challenges on behalf of governments, businesses, foundations, universities, and other clients and partners.

### **5. Selected Participants**

Thank you for visiting the National Study of Mental Health (NSMH) Website. Your participation in this national study is very important and we appreciate your interest.

For the study, household addresses are randomly selected through scientific methods. Once your household has been selected, no other household can take your place. For this reason, please know your participation matters and is critical for furthering our understanding of mental health and substance use in the United States.

If your address has been selected, you should have received a letter inviting you to complete a short household membership listing. This will only take a few minutes, and the household

member who completes this online, by telephone, or by mail will receive a \$10 check or \$10 electronic prepaid Visa®. Or a trained interviewer can come to your home and you will receive \$10 in cash for your participation.

Once the household membership listing is complete, up to two people in your household may be invited to complete a short screening survey. This 15-minute survey can be completed online, by phone, by mail, or if needed, a trained interviewer can come to your home. To thank you for your participation you will receive \$20 (a \$20 check or \$20 electronic prepaid Visa® if completed online, by telephone, or by mail; \$20 in cash if completed in person).

Those that complete the screening survey may be selected for the main interview, which can be completed by video, by phone, or if needed, a trained interviewer can come to your home to conduct the interview. You will be asked questions about mental health, health behaviors including tobacco, alcohol and drug use, and access to medical care and treatment. This interview will take about 80 minutes, and to thank you for your participation you will receive \$30 (a \$30 check or \$30 electronic prepaid Visa® if completed by video or telephone; \$30 in cash if completed in person).

Please review the NSMH brochure and/or use your study password to access additional information here.

## COVID Risk Form Vaccinated Protocol A

### Important Information about COVID-19 and Your Participation in NSMH

This document contains important information about COVID-19 and how participating in research may impact you. COVID-19 is the disease caused by a newly identified type of coronavirus. Study participation will include visiting with a NSMH interviewer. If the interviewer who conducts the household membership listing and/or screening survey(s) tests positive for COVID-19 in the future, the state or local health department or their agents may reach out to this household for the purpose of contact tracing. Please be assured that if this occurs, the interviewer will only share with the health department or their agents the address of this household and the time and dates of the interviewer's visits. None of the answers you provide during the household membership listing or screening survey will be shared. It is also possible that the contact tracers may use the address shared by the interviewer to find other means to contact this household such as by phone or email.

**How is COVID-19 spread?** People can catch COVID-19 from other people who have the virus. The disease spreads mainly from person to person through small droplets from the nose or mouth, which are spread when a person with COVID-19 coughs, sneezes, or speaks.

**What are the symptoms of COVID-19?** Symptoms of COVID-19 may include:

- Fever or chills
- Cough
- Shortness of breath
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Symptoms typically appear 2-14 days after exposure to the virus. It is possible that individuals with the COVID-19 virus will not display any of these symptoms. You can find more information at <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>.

**What are some ways to reduce the risk of getting or spreading COVID-19?**

- Regularly wash your hands for at least 20 seconds with soap and water or alcohol-based hand sanitizer.
- Maintain at least 6 feet between yourself and others.
- Avoid going to crowded places where you are more likely to come into close contact with someone who has COVID-19 and it is more difficult to maintain physical distance.
- Wear a mask that covers your mouth and nose when you go out in public or have in-person contact with someone from outside of your household.
- Avoid touching your eyes, nose and mouth. Your hands can transfer the virus to your eyes, nose or mouth. From there, the virus can enter your body.
- If you are not wearing a mask and need to cough or sneeze, cover your mouth and nose with a bent elbow or tissue.

**What happens if someone gets COVID-19?** People with COVID-19 may have a wide range of symptoms—ranging from mild symptoms to severe illness. Older adults and people who already have serious medical conditions like heart or lung disease or diabetes seem to be at higher risk for developing complications or dying from COVID-19. Vaccines and new treatment options will help decrease the severity of a COVID-19 infection, although they may not be readily available in your community or to all individuals. We want to provide you this information because your choice about whether to participate in this study or to invite an interviewer into your home might be informed by whether there is someone in your household who is older or has a medical condition that increases the risk of becoming severely ill as a result of COVID-19.

**How do I know a NSMH interviewer does not have COVID-19?** Unfortunately, there is no guarantee that an interviewer does not have COVID-19. This is because individuals can have the virus but only have mild symptoms or even no symptoms of COVID-19 at all. However, interviewers have promised to take their temperature every day and are not allowed to work if they have a fever. Interviewers have also promised that they will not conduct in-person data collection if they or any members of their household show symptoms of or have been diagnosed with COVID-19.

**What steps are interviewers required to take to keep me and others safe?** While out in the field, an interviewer is required to use hand sanitizer frequently. The interviewer must wear a disposable mask to help reduce the likelihood that he or she could give you COVID-19. The interviewer will practice social distancing, which means he or she will sit or stand at least 6 feet from you and other persons during the household membership listing and screening survey and will remain outside if possible. The interviewer will not have physical contact with you or other members of your household.

**Does the interview need to be conducted inside my home?** No, it does not need to be conducted inside your home. You and the interviewer can talk outside—on a porch or steps, in your yard, or in some nearby public outdoor space that allows sufficient privacy. If you want to participate at another location, you and the interviewer will have to maintain social distance from each other as well as other people. We must keep our data confidential so we need a location where no one will be able to hear or see your answers.

You can complete the household membership listing and the screening survey online or by phone if you prefer. You may have already received your login and password. If you no longer have it, please contact our study assistance line toll-free at 833-947-2575 to obtain your password and then visit the NSMH website (<https://nsmh.rti.org>). To complete by phone, call 877-267-2910; this is a toll-free number. If you are selected for the main interview it will be done by video or phone.

**How will I complete the interview?** I will ask you questions to complete the household membership listing. If you are selected for the screening survey you will use a tablet. The tablet will be sanitized prior to your use and we can provide you with gloves if that would make you more comfortable. Paper forms are single-use and have not been touched by other participants. If you are selected for the main interview an interviewer will ask you questions by video or phone.

**If you have additional questions about your participation in NSMH, please call 1-833-947-2575.**

To complete by phone, call 877-267-2910; this is a toll-free number. If you are selected for the main interview it will be done by video or phone.

**How will I complete the interview?** I will ask you questions to complete the household membership listing. If you are selected for the screening survey you will use a tablet. The tablet will be sanitized prior to your use and we can provide you with gloves if that would make you more comfortable. Paper forms are single-use and have not been touched by other participants. If you are selected for the main interview an interviewer will ask you questions by video or phone.

**If you have additional questions about your participation in NSMH, please call 1-833-947-2575.**

#### Inside Panel

If you have questions about the National Study of Mental Health, please call 833-947-2575, e-mail: [nsmh@rti.org](mailto:nsmh@rti.org), or visit our website at <https://nsmh.rti.org>

The NSMH asks questions about mental health and other health-related topics. This year 6,000 adults from across the United States will be interviewed for this study. Information from the NSMH will be used to determine national estimates of mental health and substance use disorders among U.S. adults ages 18 to 65. The study will also provide information on the number of adults who receive treatment.

This study is led by RTI International in collaboration with Columbia University/New York State Psychiatric Institute (CU/NYSPI), University of Washington, Duke Health, Harvard University, the Treatment Advocacy Center, and the University of Chicago. The study is funded by a grant to RTI from the Substance Abuse and Mental Health Services Administration (SAMHSA) within the Department of Health and Human Services (DHHS).

##### Questions

Why Should I Participate? You are important! Your address was chosen to represent thousands of households across the nation, and no other household can take your place. By participating in the NSMH, you are contributing to a national effort to better understand mental health and health behaviors. This research has the potential to inform federal, state, and local efforts to address the unmet needs of individuals and families in terms of mental health and substance use. The adult who completes the initial questions will receive \$10. If an adult is selected for and completes the screening survey they will receive \$20. If an adult is selected for and completes the main interview they will receive \$30. What If I Do Not Have Any Mental Health Conditions? The responses of people who do not

experience mental health conditions are just as important as the responses of people who do. Although some questions ask about mental health conditions, other questions ask about important health-related topics relevant for all people. How Was I Chosen? Household addresses, not specific people, were randomly selected through scientific methods. Once a household has been selected, it cannot be replaced for any reason. This ensures that the NSMH accurately represents the many different types of adults in the United States.

#### Middle panel

**How Does My Household Participate?** To begin we need an adult 18 years old or older, who is knowledgeable about your household, to complete a 5-minute household membership listing via our study website, telephone, or mail. If the 5-minute household membership listing is not completed online, by telephone, or by mail one of our professional interviewers will contact you to schedule a time to complete the listing in person. After the 5-minute household membership listing has been completed up to two adults could be chosen to complete a 15-minute screening survey to find out if they are eligible for the main interview. This survey can be completed via our study website, telephone, mail, or in person. Up to two adults could be chosen for the main interview. The main interview will be conducted via video, in person, or by telephone. **What Will Happen During the Interview?** An interviewer will conduct the interview with each selected person using a computer. The interviewer will read the questions aloud and enter the participant's responses into the computer. The interview takes about 80 minutes to complete. People who complete the main interview will receive \$30 as a token of our appreciation.

**What is RTI International?** RTI is an independent, nonprofit research organization dedicated to improving the human condition. Our vision is to address the world's most critical problems with science-based solutions in pursuit of a better future. **What is the Substance Abuse and Mental Health Services Administration?** The Substance Abuse and Mental Health Services Administration (SAMHSA) is the agency within the U.S. Department of Health and Human Services that leads public health efforts to advance the behavioral health of the nation. Congress established SAMHSA in 1992 to make substance use and mental disorder information, services, and research more accessible. SAMHSA's mission is to reduce the impact of substance abuse and mental illness on America's communities. **What is the U.S. Department of Health and Human Services?** DHHS is the nation's principal agency for protecting the health of all Americans and providing essential human services. The mission of DHHS is to enhance and protect the health and well-being of all Americans.

All information collected for this study will be kept confidential and used only for statistical purposes. To help keep information about you confidential, we have obtained a Certificate of Confidentiality (CoC) from the DHHS. This CoC adds special protection for the research information about you. The privacy of the information we collect about you will be very carefully protected.

## FAQs

Questions	Possible Response
What's the study about?	The study asks questions about mental health, substance use, and other health-related topics. This important study provides up-to-date information on a variety of mental health conditions in the United States and explores connections between mental health issues and services.
Who is sponsoring this study?	This study is sponsored by the Substance Abuse and Mental Health Services Administration (SAMHSA) within the U.S. Department of Health and Human Services.
What is RTI International?	RTI International is a nonprofit research organization dedicated to conducting research that improves the human condition.  Located in North Carolina, RTI performs various types of laboratory and social research for government and industrial clients.
Why me? Why this house?	Your address was randomly chosen to represent thousands of households across the nation.  Once an address is chosen, no other address can be substituted for any reason. This practice ensures that the data represent the many different types of people in the United States.
How did you get my phone number?	IF YOU ARE PLACING OUTBOUND CALLS TO RESPONDENTS TO COMPLETE THE HOUSEHOLD MEMBERSHIP LISTING: RTI did a cross-reference search in publicly available sources to identify phone numbers associated with the selected address. RTI is calling to ensure that the members of the household have a chance to participate in the study.  IF YOU ARE PLACING OUTBOUND CALLS TO SELECTED SCREENING RESPONDENTS: The person who completed the household membership listing provided your name and contact information.
Will my answers be kept private?	Absolutely. No answers will be connected with any individual and your name will never be identified with your answers. Our interest is only in the set of all responses.

Dear (AGENCY CHIEF EXECUTIVE):

The Substance Abuse and Mental Health Services Association (SAMHSA) has awarded RTI International a cooperative agreement to conduct the Mental and Substance Use Disorder Prevalence Study (MDPS). The study will examine the prevalence of serious mental and substance use disorders and include clinical interviews with a national sample of adults living in households and a national sample of adults in prisons. In addition, clinical interviews will be done with adults in state psychiatric hospitals, jails, and those staying in homeless shelters located in New York City, rural North Carolina, and suburban Seattle, Washington. Outreach to agencies with jurisdiction over the non-household facilities will begin in [FILL DATE] and clinical interviewing will begin in [FILL DATE]. Data collection will last approximately 10 months.

Dear [TITLE.] [NAME]:

I am writing to encourage you to support and participate, if applicable, in an important and innovative study funded by the Substance Abuse and Mental Health Services Administration (SAMHSA).

As the federal agency in the U.S. Department of Health and Human Services (HHS) responsible for leading public health efforts to advance the behavioral health of the nation, one of SAMHSA's missions is to identify critical gaps in information and address these gaps. As part of these efforts, we recently awarded a cooperative agreement to RTI International (RTI) to conduct the **Mental and Substance Use Disorder Prevalence Study (MDPS)**, an innovative and timely study that aims to better understand the prevalence of substance use and mental disorders in the United States.

MDPS, also known as the **National Study of Mental Health (NSMH)**<sup>1</sup>, will provide important information on the prevalence of mental illness and substance use across the U.S. adult population residing in households. The study also includes data collection in non-household settings to better understand the prevalence of these disorders among populations that are harder to reach, including those residing in state and federal prisons nationwide and in homeless shelters, jails, and psychiatric hospitals across three sites in New York, North Carolina, and Washington. This study fills a gap in our existing knowledge and surveillance efforts, and it is critical for increasing our understanding of these disorders and conditions.

RTI recently contacted your [FILL agency/facility] regarding MDPS data collection efforts. I am writing to assure you that RTI is authorized to conduct the study and to encourage you to participate in this innovative, timely, and important research. The learnings from this study have the potential to inform many future efforts in behavioral health surveillance, research, and treatment.

Please feel free to contact [nsmh@rti.org](mailto:nsmh@rti.org) if you have any concerns or questions regarding this study or RTI's request.

Sincerely,

## National Study of Mental Health

The National Study of Mental Health (NSMH) is a research effort to understand how many adults in the United States have mental and substance use disorders. This study is led by RTI International in collaboration with Columbia University/New York State Psychiatric Institute, Duke Health, Harvard University, the Treatment Advocacy Center, the University of Chicago, and the University of Washington. The NSMH is a cooperative agreement to RTI by the Substance Abuse and Mental Health Services Administration (SAMHSA) within the Department of Health and Human Services.

### Goals

The primary goal of the NSMH is to provide national estimates of mental health and substance use disorders among U.S. adults ages 18 to 65. These include schizophrenia, schizoaffective disorder, bipolar disorder, major depression, posttraumatic stress disorder, obsessive-compulsive disorder, generalized anxiety disorder, and alcohol, benzodiazepine, opioid, stimulant, and cannabis use disorders. The study is also designed to estimate what proportion of individuals with mental and substance use disorders receive treatment. A secondary goal of the NSMH is to consider the best research methods for doing studies like this in the future. Study findings will help determine the treatment and service needs for mental health and substance use disorders and inform policies and service funding decisions.

### Rationale

Mental and substance use disorders are significant public health problems with substantial unmet treatment need. Despite calls for improved estimates of these problems, critical methodological gaps remain. Two gaps are particularly important: the lack of accurate estimates of the most seriously impairing disorders in household populations, such as schizophrenia; and the exclusion of the incarcerated, homeless, and hospitalized non-household populations from national estimates. The NSMH is designed to fill these gaps. The study will include interviews conducted by clinicians to assess complex and impairing disorders. Interviews will be conducted with (1) a national household sample; (2) a national sample of incarcerated individuals in federal/state prisons; and (3) samples of individuals residing in homeless shelters, state psychiatric hospitals, and jails in a large urban area, a more rural community, and a suburban metropolitan region. Areas and facilities will be chosen based on their particular characteristics and relevance to meeting the study objectives. Interviews will be completed in English or Spanish. Data will be kept confidential. Names of individuals, facilities and agencies will never be released nor linked to the data.

### Household data collection

The NSMH household sample will include approximately 6,000 clinical interviews. These interviews will be completed by video conference, telephone, or in person. Study team staff will identify eligible respondents in households in chosen areas across the country and selected adults will be asked to complete a short screening instrument. This screening instrument will help the study team identify individuals at risk for mental and substance use disorders to prioritize for a clinical interview.

### Non-household data collection

The NSMH non-household sample will include approximately 1,200 clinical interviews. In federal/state prisons, homeless shelters, state psychiatric hospitals, and jails, facility records will be used to select potential respondents. **All interviews with individuals from these non-household settings will be conducted by video conference, telephone, or in person.** Clinical interviews of adults will be completed with approximately 500 prison inmates, 500 shelter residents, and 200 patients; screening interviews of adults will be completed with approximately 200 jail inmates.

The study is being conducted over three years, beginning in October 2019. Year one is devoted to planning; year two to data collection; and year three to finalizing data collection, generating the estimates of mental and substance use disorders, preparing final reports, and delivering final data sets to SAMHSA.

Dear <Title> <Last Name>:

I am writing to introduce to you the upcoming **Mental and Substance Use Disorder Prevalence Study (MDPS)**, also known as the National Study of Mental Health (NSMH), that has been funded by the Substance Abuse and Mental Health Services Administration (SAMHSA) and will be conducted by RTI International (RTI) in collaboration with Columbia University, Duke Health, and the University of Washington<sup>1</sup>. Our efforts will increase understanding of the prevalence of serious mental health and substance use disorders among adults living in households and adult prison populations. In addition, the study will focus on such disorders among adults in state psychiatric hospitals, jails, and those staying in homeless shelters located in New York City, North Carolina, and Washington.

**As the designated MDPS Point of Contact for <## facilities under your jurisdiction:> [INSERT FACILITY NAME(S)], your help is critical for carrying out this timely and important study.**

Working with a member of the MDPS study team, we would appreciate your assistance to:

- Identify the best dates and times for study activities to take place at [each/the] facility;
- Provide facility-specific information if available (e.g., population count, population with serious mental illness or substance use disorder, time needed to escort study team staff to interview locations); and
- Collaborate with study staff as needed during the data collection to facilitate activities in accordance with the approved procedures.

---

*Interviews can be conducted by video conference, telephone, or in person.*

---

More information about this study can be found in the enclosed printed materials, including|

- An overview of the logistical and data collection process (NSMH Research Summary); and
- FAQs for facility staff.

Please feel free to contact [LM NAME], RTI's MDPS Logistics Manager for your facility, at [LM EMAIL] or [LM PHONE] to provide the contact information of someone from your staff who can assist in coordinating the interviews. You may also contact [LM NAME] if you have any questions about the study procedures or schedule.

[FILL IF JAIL OR PRISON: In the past, your office may have been contacted by staff from RTI regarding the Bureau of Justice Statistic's National Inmate Survey (NIS). Please note that the NSMH is not related to the NIS or to the Prison Rape Elimination Act in any way.]

Thank you for your assistance.

Sincerely,  
[SIGNATURE]

Heather Ringeisen

## NSMH FAQs Facility Staff

### **[Federal and State Prison Facility FAQs; State Psychiatric Hospital Facility FAQs; Homeless Shelter Facility FAQs; Jail Facility FAQs]**

#### **What is the National Study of Mental Health?**

The National Study of Mental Health will generate up-to-date information on mental illness [**HOSPITAL, SHELTER:** , alcohol and drug use,] and other related health issues in the United States. The information can be used to help ensure that treatments and programs are available to all those who need them.

#### **What do the interviews involve?**

A member of the research team will first describe the study to the <inmate/patient/resident> and ask if they want to participate in an interview that will last approximately [**PRISON, HOSPITAL, SHELTER:** 90 minutes.; The interview will include questions on mental health conditions and treatment, tobacco use, (**HOSPITAL, SHELTER:** alcohol and drug use,) participation in public assistance programs and health care coverage, and socio-demographic characteristics (e.g., race/ethnicity, income, housing).; **JAIL:** 15 minutes. The interview will include questions about the inmate's general health, emotional and mental health, and any difficulties that they may be experiencing or have experienced before.]

#### **Why should this <prison/hospital/shelter/jail> participate?**

[**PRISON:** Approximately 50 state and federal prisons were selected for this study using scientific sampling techniques; no other prison can take the place of this facility.; **HOSPITAL, SHELTER, JAIL:** <Four hospitals/ Eighteen homeless shelters/ Six jails> were selected based on their proximity to our three collaborating organizations: Columbia University/New York State Psychiatric Institute, Duke Health, and University of Washington. This <hospital/shelter/jail> was one of those selected.] The information <inmates/patients/ residents> from this facility provide during the interview will help inform mental health treatment and service needs throughout the United States.

#### **How will <inmates/patients/residents> be selected to participate?**

[**PRISON, HOSPITAL, JAIL:** The research team will randomly sample approximately [**PRISON:** 20 inmates; **HOSPITAL:** 100 patients; **JAIL:** 50 inmates] from a roster/list of <inmates/patients> at the facility one week prior to the start of data collection. The process used to select <inmates/patients> works like a lottery or drawing names out of a hat. <Prison/Hospital/Jail> staff will be notified which <inmates/patients> are selected before the data collection effort begins. [**SHELTER:** We will select approximately 45 residents from this shelter. The research team will work with the facility to determine the best method to select residents. For example, residents might be selected from a list of residents or beds or, if a list is not available, as they arrive at the shelter throughout the day of data collection. Regardless of the method used, the process used to randomly select residents will work like a lottery or drawing names out of a hat.]

#### **Why should <an inmate/a patient/a resident> participate?**

Each individual selected to participate in this study can provide information that will help people who may need health-related treatment and services. No one can take the place of a selected <inmate/patient/ resident>.

### **When and where will the interviews be conducted?**

The research team will contact the facility to discuss data collection logistics, including: (1) whether data collection should be done virtually (i.e., by web or phone) or in person and (2) the types of areas within the facility that would be suitable for conducting interviews. Designated interview areas need to be private—so that the interviewer and <inmate/patient/resident> cannot be overheard—and still within facility staff’s line of sight to meet facility security requirements. **[SHELTER:** Depending on space availability, these interviews may be conducted at the shelter or at a nearby off-site location, such as a public library or social service agency office.] Data collection will take place sometime between December 2020 and December 2021; study staff will work with a facility point-of-contact to determine the specific dates. **[SHELTER:** Interviews will take place on days of the week and times of day that best fit the pattern of resident stays at the shelter.]

### **[PRISON, HOSPITAL, SHELTER, (NOT JAILS): Who will conduct the interviews? What credentials, training, and clearances do they have?**

All NSMH clinical interviewers either (1) have a master’s or doctoral degree in clinical or counseling psychology, social work, or a similar field, (2) are currently enrolled in a doctoral program in one of those fields, or (3) have a medical degree with a specialty in psychiatry. In addition, each interviewer has experience performing clinical assessments with highly impaired populations and has been certified to work on NSMH after completing a 40-hour training and conducting practice interviews with patients. Finally, each must pass various background checks, including Federal, state, county, and multijurisdictional criminal conviction searches going back at least 7 years and sex offender registry searches. Each interviewer will also pass any additional state or facility-specific checks that may be required prior to interviewing in the facility.]

### **[HOSPITAL: Will patient administrative health records be needed?**

With the patient’s consent, the research team will request administrative health records and work with hospital staff to determine the most suitable process for obtaining the records. All information will be kept confidential and no information from the records will be connected with the patient’s name.

To comply with HIPAA requirements, the research staff will administer a two-step consent process with the patient. The first step will include information about the purpose of the study and the patient’s participation and involvement in the interview. The second step will include asking for the patient’s consent to allow the study team to obtain administrative health records and include the following points: (1) the purpose for requesting administrative health records, (2) the right to refuse, and (3) how the data will be treated. When consent is provided, the researcher will ask the patient to sign a record release form. A patient may participate in the interview but refuse to release their records.]

### **What are <prison/hospital/shelter/jail> staff asked to do?**

*Prior to data collection:* **[PRISON, HOSPITAL, JAIL:** Facilities will be asked for a current roster/list of **(PRISON:** adjudicated inmates in the prison.; **HOSPITALS:** patients in the hospital.; **JAIL:** inmates in the jail.) The research team will use the roster/list to randomly select <inmates/patients> for participation in the study.] **[HOSPITAL:** This roster/list will not contain patient names. It will instead list study identification numbers that correspond to patient hospital identification numbers maintained by the facility.] To ensure the interviews are conducted smoothly and with as little disruption as possible to normal <prison/hospital/shelter/jail> operations, a facility point-of-contact will be asked to provide the study team with logistical information about the facility (e.g., **[SHELTERS:** number of beds,] schedules, hours available for interviewing) before the data collection effort begins.

*During data collection:* On the days when the study interviews take place, facility staff will escort or direct <inmates/patients/residents> to and from the designated interview areas and provide security and supervision throughout the data collection. **[HOSPITALS:** In addition, a patient’s medical provider, counselor, or case manager will be notified by the study researcher in the unlikely event of significant patient distress.

*After data collection:* Based on protocols approved by the hospital, administrative health records for consenting patients will be provided via secured electronic or paper means, or during onsite review by a member of the research team. The process will be implemented twice. The first request will be sent to the hospital 2 months after the data collection and cover those patients who have been discharged during that period. The second request will be sent no later than December 2021 and cover all other patients who consented to the records release (regardless of discharge status).]

# *Mental and Substance Use Disorder Prevalence Study*

## **Summary of the Clinical Interview Questionnaire**

This is a summary of the *Mental and Substance Use Disorder Prevalence Study* and the types of questions which are asked during the interview. As you review this document, note that not all participants will be asked every question as the interview varies based on each person's experiences. Furthermore, participants can always refuse to answer any question during the interview.

### **Section 1: Interview Overview**

#### **Demographics and Study Overview**

This section consists of questions about the participant such as his or her age, sex, and gender identity, relationship status, education, and employment.

#### *Sample Questions:*

- ▶ What is your date of birth?
- ▶ What is your highest completed level of education?

### **Section 2: Disorders**

#### **Current and Past Psychological Difficulties**

In this section, the interviewer asks about any mental health problems the participant might have had.

- Schizophrenia
- Schizoaffective disorder
- Major depressive disorder
- Generalized anxiety disorder
- Bipolar I
- Post-traumatic stress disorder
- Obsessive compulsive disorder
- Anorexia nervosa
- Alcohol, benzodiazepine, opioid, stimulant, and cannabis use disorder

#### *Sample Question:*

- ▶ In the year since (ONE YEAR AGO), has there been a period of time when you were feeling depressed or down most of the day, nearly every day?

#### **Hospitalization History**

In this section, the interviewer asks about hospitalization for psychological, drug, or alcohol problems.

#### *Sample Question:*

- ▶ Have you ever been hospitalized for psychological problems or a drug or alcohol problem?

#### **Suicidal Ideation and Behavior, Other Problems in Past Year**

In this section, the interviewer asks suicidal thoughts and behaviors, and the experiences associated with the thoughts and behaviors.

#### *Sample Question:*

- ▶ Have you ever thought about taking your own life or just going to sleep and not waking up, or thinking that you would be better off dead? (Tell me about that.)
- ▶ Have you had any problems in the past year other than what we've talked about so far?

### **Section 3**

#### **Cigarette and E-Cigarette Use**

This section consists of questions about the participants' use, and frequency of use, of cigarettes and e-cigarettes, inpatient hospitalization, and housing assistance.

*Sample Questions:*

- ▶ Have you ever smoked part or all of a cigarette?
- ▶ Did you smoke part or all of a cigarette during the past 12 months?

**Treatment**

This section asks questions about the participants' experiences with inpatient and outpatient counseling, medication, and mental health, emotional, and behavioral treatment, in addition to inpatient and outpatient hospitalization for drugs and alcohol, medication usage, and health insurance coverage.

*Sample Questions:*

- ▶ Have you ever received professional counseling, medication or other treatment to help with your mental health, emotions, or behavior?
- ▶ During the past 12 months, have you received inpatient or residential treatment, that is have you stayed overnight or longer to receive professional counseling, medication, or other treatment for your mental health, emotions, or behavior at any of these places?
- ▶ During the past 12 months, did you take any medication that was prescribed by a doctor or health care professional to help with your mental health, emotions, behavior, energy, concentration, or ability to cope with stress?
- ▶ Are you currently covered by any kind of health insurance, that is, any policy or program that provides or pays for medical care?

**Section 4**

**Socio-Demographics and Background**

This section includes questions about marital status, ethnicity, race, education, student status, military status, employment status, and household income, and other similar topics.

*Sample Questions:*

- ▶ Are you now married, widowed, divorced, separated, or have you never married?
- ▶ Are you currently attending a college, university, or trade school either full-time or part-time?
- ▶ Not counting minor traffic violations, have you been arrested or booked for breaking the law during the past 12 months?
- ▶ Did you work at a job or business at any time last week?

**Section 5**

**Living Situations**

This section includes questions about the participants' living location outside of his or her current facility (i.e., prison, jail, homeless shelter, psychiatric hospital) and length of stay within the facility.

*Sample Question:*

- ▶ During the past 12 months, before your current incarceration, in which state did you live in for **most of the time**?

**Final Section**

**Conclusion**

This section includes questions about the participants' comfort with the interview, contact information for possible follow-up, and general feedback, among other topics.

*Sample Questions:*

- ▶ What is an e-mail address you are likely to have should we need to contact you again?
- ▶ Did you have any feedback you would like to share regarding this interview?

[CITY], [STATE] [ZIP]

Dear [TITLE.] [NAME]:

On behalf of the Substance Abuse and Mental Health Services Administration (SAMHSA), I would like to express our gratitude for your assistance in implementing the Mental and Substance Use Disorders Prevalence Study/National Study of Mental Health in your facility/ies. The study is dependent on the cooperation of agency and facility leadership and staff, and we appreciate the time, resources, and guidance provided to us as we worked with you on this important, challenging study.

Specifically, we appreciate all that AGENCY AND FACILITY NAMES did to accommodate the team of interviewers, from our early conversations about logistics to providing the interviewers with everything they needed during the data collection effort, as well as to support your staff and residents/inmates/patients throughout the data collection process.

If you would like to share your feedback on the logistics process or speak to us about how data collection went in your facility/ies, please contact Tim Smith, the Mental and Substance Use Disorders Prevalence Study/National Study of Mental Health Non-household Team Lead at RTI International, at [nsmh@rti.org](mailto:nsmh@rti.org). Otherwise, I would be happy to discuss other aspects of the study with you.

Sincerely,

*Thomas Clarke*

**[Federal and State Prison Inmate FAQs; State Psychiatric Hospital Patient FAQs; Homeless Shelter Resident FAQs; Jail Inmate FAQs]**

**1. What is the National Study of Mental Health?**

The National Study of Mental Health will gather up-to-date information on mental health [**SHELTER, HOSPITAL:** , alcohol and drug use,] and other related health issues in the United States. The information can be used to help make sure that treatments and programs are available to all those who need them.

**2. What am I being asked to do?**

[**PRISON, HOSPITAL, SHELTER:** You're invited to take part in an interview about your general health, emotional and mental health, and any difficulties that you might have experienced. You will also be asked about your background, for example, your race, income and participation in public assistance programs, housing, and healthcare coverage and treatment you have received in the past.]

[**JAIL:** You're invited to take part in a short interview that asks questions about your mental and emotional health.

You may also be asked to participate in a second interview after you get out of jail that will ask questions about your general health, emotional and mental health, and difficulties that you may have experienced. This second interview will also ask about your background, for example, your race and ethnicity, income and participation in public assistance programs, housing, and healthcare coverage and treatment you have received in the past.]

**3. Why should I participate?**

Because you matter! The information that you can share might help you or those who may need health related treatment and services. No one else can take your place.

[**JAIL:** You might be asked to take part in a second interview after you get out of jail. If you are chosen and participate in that part of the study, you will receive a \$30 electronic gift card or \$30 in cash at the end of the interview.]

**4. How did I get selected for the study?**

You and others at this <facility/hospital/shelter> were randomly chosen from a list of <inmates,/patients,/residents or as you arrived,> just like a lottery or drawing names from a hat.

**5. Where will the interview take place and how long will it take?**

[**PRISON, HOSPITAL:** The interview will take place at this <facility/hospital>; **SHELTER:** Depending on available space, the interview will either take place at this shelter or at a nearby location like a public library or social service agency office,] [**PRISON, HOSPITAL, SHELTER:** where you and the interviewer can talk without being overheard. The interview usually takes about 90 minutes to complete. Your interview may take more or less time depending on your answers.]

[**JAIL:** You will be asked to take part in one or two interviews. The first one will take place at this facility where you and the interviewer can talk without being overheard. This interview usually takes about 15 minutes.

If you are chosen for a second interview, a member of the research team will contact you after you get out of jail. That interview will be done by phone or take place where you're living at that time or some other place nearby. That interview usually takes about 90 minutes to complete, but your interview may take more or less time depending on your answers.]

**6. [PRISONS, SHELTERS, JAILS (NOT HOSPITALS): What if I don't have any mental health issues?**

The information we collect from you is still very important. We hope to learn how many people have a mental health condition or related health issue, and how many do not. So, we need hear from all kinds of people.

While some questions ask about mental health, other questions ask about different kinds of health issues and other topics. You do not need to know anything about mental health conditions to answer the questions.]

**6. [HOSPITALS ONLY: Will anyone see my health records?**

If you give your permission, the hospital will release some of your health records to our research team. Your name will not be included with the information gathered from your records. Information from your records will be added to the answers you give during the interview.

You can take part in the interview even if you don't give permission for us to receive your health records.]]

**7. Who will see my answers [HOSPITALS: to the interview questions]?**

You cannot be identified through any information you give us. Your name will never be connected to your answers. Your answers will be combined with those from the other study participants. We are legally required to keep all your answers confidential.

**8. Do I have to participate? What if I do not wish to answer a question? [HOSPITALS: What if I do not want my health records reviewed?]**

No, it is completely voluntary. If you decide to participate, you can refuse to answer any question that you do not want to answer. Your decision to participate or not will have no effect on your treatment at this [PRISON, JAIL: <prison/jail> or affect your legal status or any decisions regarding your release.; HOSPITALS: hospital. You can take part in the interview even if you don't give permission for us to receive your health records.; SHELTERS: shelter or your receipt of any federal, state, or local assistance.]

**9. How was this <prison/hospital/shelter/jail> chosen?**

[PRISON: We randomly selected around 50 state and federal prisons across the country. This prison was one of those selected.; HOSPITAL, SHELTERS, JAILS: We chose <four hospitals/18 shelters/six jails> that are close to our three collaborating organizations: Columbia University/New York State Psychiatric Institute, Duke Health, and University of Washington.; HOSPITAL: This hospital is one of the four.; SHELTER: This shelter is one those 18.; JAIL: This jail was one of the six selected.]

**10. Who is collecting the information?**

RTI International, a nonprofit research organization, is collecting the information. RTI is not connected to this <prison/hospital/shelter/jail> in any way.

## COVID Risk Form Nonhousehold

### **Important Information about COVID-19 and Your Participation on the NSMH**

This document contains important information about COVID-19 and how participating in research may impact you. COVID-19 is the disease caused by a newly identified type of coronavirus. Study participation will include talking face-to-face with an NSMH interviewer. If the interviewer who conducts the interview tests positive for COVID-19 in the future, the state or local health department or their agents, for the purpose of contact tracing, may reach out to the facility to gather information about people who were at the facility on the days the interviewer was there. Please be assured that if this occurs, none of the answers you provide during the interview will be shared.

**How is COVID-19 spread?** People can catch COVID-19 from other people who have the virus. The disease spreads mainly from person to person through small droplets from the nose or mouth, which are spread when a person with COVID-19 coughs, sneezes, or speaks. It is also possible that people can contract COVID-19 by touching a surface or object that has the virus on it, then touching their mouth, nose, or eyes.

**What are the symptoms of COVID-19?** Symptoms of COVID-19 may include:

- Fever or chills
- Cough
- Shortness of breath
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Symptoms typically appear 2-14 days after exposure to the virus. It is possible that individuals with the COVID-19 virus will not display any of these symptoms. You can find more information at <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html>.

**What are some ways to reduce the risk of getting or spreading COVID-19?**

- Regularly wash your hands for at least 20 seconds with soap and water or alcohol-based hand sanitizer.
- Maintain at least 6 feet between yourself and others.
- Avoid going to crowded places where you are more likely to come into close contact with someone who has COVID-19 and it is more difficult to maintain physical distance.
- Wear a mask that covers your mouth and nose when you go out in public or have in-person contact with someone from outside of your household.
- Avoid touching your eyes, nose and mouth. Your hands can transfer the virus to your eyes, nose or mouth. From there, the virus can enter your body.
- If you are not wearing a mask and need to cough or sneeze, cover your mouth and nose with a bent elbow or tissue.

**What happens if someone gets COVID-19?** People with COVID-19 may have a wide range of symptoms—ranging from mild symptoms to severe illness. **Older adults and people who already have serious medical conditions like heart or lung disease or diabetes seem to be at higher risk for developing complications or dying from COVID-19.** Although vaccines and limited treatment options have been identified, they may not be readily available in your community or to all individuals.

**How do I know an NSMH interviewer does not have COVID-19?** Unfortunately, there is no guarantee that an interviewer does not have COVID-19. This is because individuals can have the virus but only have mild symptoms or even no symptoms of COVID-19 at all. However, interviewers have promised to take their temperature every day and are not allowed to work if they have a fever. Interviewers have also promised that they will not conduct in-person data collection if they or any members of their household show symptoms of or have been diagnosed with COVID-19.

**What steps are interviewers required to take to keep me and others safe?** While at the facility, an interviewer is required to use hand sanitizer frequently and must wear a mask to help reduce the likelihood that he or she could give you COVID-19. The interviewer will not have physical contact with you.

**Do I have to wear a mask if I want to participate?** Out of an abundance of caution, and for the protection of those involved, interviewers and participants are required to wear masks during all interviews administered by an employee of RTI International. This requirement is based on current science and is consistent with best practices for people interacting during this COVID-19 pandemic, in particular when indoors and/or in close contact for more than 15 minutes. The interviewer has a disposable face mask available that they can provide to you at your request.

**Do I have to touch anything to participate in the interview?** Yes, but objects you will touch during the study will be for your use only.

**If you have additional questions about your participation in the NSMH, please call 1-833-947-2575.**
