

Burden Statement: This information is being collected to assist the Substance Abuse and Mental Health Services Administration (SAMHSA) for the purpose of program monitoring of *Communities Talk to Prevent Underage Drinking* initiative. This voluntary information collected will be used at an aggregate level to determine experiences with program events and underage drinking prevention activities. Under the Privacy Act of 1974 any personally identifying information obtained will be kept private to the extent of the law. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. The OMB control number for this project is 0930-0288. Public reporting burden for this collection of information is estimated to average 10 minutes per encounter, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to SAMHSA Reports Clearance Officer, 5600 Fishers Ln, Room 15 E57B, Rockville, MD 20857.

Communities Talk to Prevent Underage Drinking Survey

INFORMED CONSENT STATEMENT

On behalf of the Substance Abuse and Mental Health Services Administration (SAMHSA), one of its contractors called ICF Next invites prevention specialists working individually or as part of a coalition to fill out this survey. A coalition refers to any group of individuals or organizations working together. This survey asks about your possible experiences with *Communities Talk to Prevent Underage Drinking* and how your community might be carrying out evidence-based strategies to prevent underage drinking. Evidence-based strategies have been evaluated and found to have positive effects on the intended audience. The survey will last no more than 10 minutes. Your participation is completely voluntary. You can stop at any time. Refusal to participate will not affect your employment, funding for your work, or result in any other penalty or loss of benefit. The research team will collect everyone's answers and then download them into a file that excludes everyone's name and contact information. Your survey answers will be stored in a password-protected folder and will be summarized with the answers from everyone else in a report. The report will not identify you. Your thoughts are very important. They will help SAMHSA improve how it supports community-based prevention efforts. If you have any questions, please contact Genevieve Martinez-Garcia, Study Administrator, at info@stopalcoholabuse.net.

By continuing, you are consenting to participate in this survey on behalf of your coalition or you.

NOTE: As you complete each page of the survey and click the right arrow, data entered will be automatically saved. This feature allows you to return to the survey to make changes or finish completing it. You will be allowed to return to the survey until the last question is answered.

Please answer each question by marking one of the answer choices. Some questions allow you to mark more than one answer. If you don't find an answer that fits exactly, choose the one that comes closest.
