State Based Marketplace (SBM) Quarterly Data Submission: Data Collection Template for Reporting Outcomes

This document describes all data elements included in the quarterly SBM Data Submission. Additional information about the data elements and submission process can be found in the Submission Guide

Generally, data elements in the SBM Data Submission are specific to the individual marketplace (not SHOP) and to medical qualified health plans (QHPs), not stand-alone dental (SADP) or vision plans. Exceptions to this rule are clearly labeled.

All fields in the SBM Data Submission should be populated (i.e. no null values).

Questions about the data elements should be directed to Carly Rhyne (Carly.Rhyne@cms.hhs.gov), Nick.Sukachevin

(Nickom.Sukachevin@cms.hhs.gov) or Dena Pushkin (Dena.Puskin@cms.hhs.gov) within CCIO's Division of State Policy and Market Analysis.

QHP Eligible Application Submission- By Type of Assistance

Description: Data used to report on QHP eligible (both subsidized and unsubsidized) in the SBM (not SHOP) by type of assistance. Do not include information for SADPs. This metric is intended to capture all recorded types of assistance. Assistance may be provided with submission of application for QHP enrollment or with selection of a QHP. CCIIO recognizes that some assistance is provided but not recorded, and therefore cannot be reported. Also, not all states have each of these types of assistors. CCIIO does not distinguish between certified and non-certified assistors; they are considered equivalent for the purposes of this layout. Individuals may have more than one type of assistance. If so, report all types of assistance for each individual. Additional information about assistance types in the glossary.

QHP Eligible-Any Assistance + QHP Eligible- No Assistance= Together these data elements should describe the universe individuals determined QHP eligible by the SBM during the reference period
Unit: Number of Individuals

Population Included: Both individuals that were given a positive eligibility determination during the reference period but discrepancies must be resolved (i.e., in an inconsistency period) and individuals that received final eligibility determination.

Source for Data Breakouts: Most recent eligibility determination.

First Reference Period: 11/15/2014 - 3/31/2015

Appeals

Description: Data used to understand status of appeals and report mean and median time to resolve appeals. Appeals of all types related to the SBM or SHOP marketplace are included in this metric (e.g., exemption from coverage, eligibility for financial assistance, level of assistance, special enrollment period, small employer eligibility for SHOP, etc.). Include appeals related to Stand-alone Dental Plans (SADPs). Data breakouts are specific to individual-level appeals. SHOP appeals may be included in the total but not in the data breakouts.

Some individuals may contest the marketplace's decision and their appeal would receive a second consideration (for example, by an administrative law judge). In that case, the SBM should consider the contested appeal to be distinct and new submission of an appeal.

Unit: Number of Appeals

Population Included: Appeals submitted within the reference period. If date of submission is unavailable, use date of initiation of appeal. Includes only appeals managed by the state; excludes appeals managed by federal government.

Source for Data Breakouts: Most recent eligibility determination.

First Reference Period: 11/15/2014 - 3/31/2015

If the data are believed to be reportable in the future, but are not reportable at the time that the data are submitted, enter "-888" to indicate the data are not available.
