Final, Version 1.1

CMS Qualified Entity Certification Program

For CMS Use Only

Introduction to the QECR DSR

The [Centers for Medicare & Medicaid Services](#) (CMS) Qualified Entity Certification Program (QECR) (also known as the Medicare Data Sharing for Performance Measurement Program) enables organizations to receive Medicare Parts A and B claims data and Part D prescription drug event data for use in evaluating provider performance.

Organizations approved as Qualified Entities (QEs) are required to use the Medicare data to produce and publicly disseminate CMS-approved reports on provider performance. QEs are also permitted to create non-public analyses and provide or sell such analyses to authorized users. In addition, QEs may provide or sell combined data, or provide Medicare claims data alone at no cost, to certain authorized users.

Under the QECR, CMS certifies QEs to receive these data and monitors certified QEs. As part of the Data Security Review, or Phase 2 of the overall certification process, the organization must complete the following attestation review, titled as the QECR DSR (formerly known as the QECR Data Security Workbook).

The QECR DSR follows a tailored framework modeled after the CMS [Acceptable Risk Safeguards](#) (ARS) *Version 3.1*, and provides a roadmap to compliance to ensure that CMS data is adequately secured and appropriately protected.

In addition to completing the QECR DSR, please upload the following context documents into the secure QECR Salesforce Portal:

- An updated Data Flow Diagram with annotations documenting the flow of CMS data within your proposed environment, which includes flow between physical locations and partner environments. An example diagram has been provided in the QECR Phase 2 Toolkit located at https://www.qemedicaredata.org/apex/Phase_2.
- If you are utilizing any vendor(s) (e.g. Cloud Service Provider (CSP), colocation facility, data management vendor), an executed Business Associate Agreement (BAA) between your organization and the vendor(s) that demonstrates an understanding of the nature of data being stored, processed, and transmitted to/from the vendor(s).
- Policy and procedure documents as support for the following five families: Access Control (AC), Identification and Authentication (IA), Media Protection (MP), System and Services Acquisition (SA), System and Information Integrity (SI).

To complete the QECR DSR, the QE organization must:

1. Provide organizational details, key contacts, data storage information, and relevant data breach incidents in Sections A, B, C, and D.
2. Complete Section E by attesting to each security/privacy control question by selecting “Yes,” “No,” or “N/A.” Please provide a narrative statement justification in the rationale section for each “No” or “N/A” answer.
3. Complete Section F attesting to the understanding of shared responsibility and completeness of information within the DSR.

In preparation of completing the QECR DSR, it is recommended that the QE organization:

- Collaborate with their institutional information security and privacy officials (i.e. the Chief Information Security Officer, Technology Officer, Privacy Officer, System Manager, et al.);
- Collect organizational policies that discuss or mimic ARS security control families (e.g. access control policies, awareness and training policies, audit & accountability policies, etc.); and
- Collect any other organizational policies and/or procedural documents that outline relevant security and privacy baselines.

For any questions on specific controls or protocols when completing the QECR DSR, please contact your organization’s assigned QECR Program Manager.

QECP DSR

A. QE Organization Information

Directions: The Qualified Entity (QE) is the organization that has primary oversight of the research project. The QE may or may not be the entity that stores the identifiable CMS data, but remains responsible for ensuring that controls are in place and operating effectively for all parties, including data custodians and/or collaboration partners.

Please identify the organization(s) participating in the QECP application. Note which physical locations will store the identifiable data, which organizations will access identifiable data, and if remote access to the data will be allowed.

*NOTE: CMS will allow only one entity to store identifiable CMS data. This section reflects this requirement by having the data stored **either** with the **QE** or with a **Data Custodian**.

QE	<Insert QE Name>	Store Identifiable Data <input type="checkbox"/> Yes <input type="checkbox"/> No Access Identifiable Data <input type="checkbox"/> Yes <input type="checkbox"/> No Remote Access <input type="checkbox"/> Yes <input type="checkbox"/> No
Data Custodian	<Insert Data Custodian Name or Not Applicable (N/A)>	Store Identifiable Data <input type="checkbox"/> Yes <input type="checkbox"/> No Access Identifiable Data <input type="checkbox"/> Yes <input type="checkbox"/> No Remote Access <input type="checkbox"/> Yes <input type="checkbox"/> No
Collaboration Partner 1	<Insert Partner Name or Not Applicable (N/A)>	Access Identifiable Data <input type="checkbox"/> Yes <input type="checkbox"/> No Remote Access <input type="checkbox"/> Yes <input type="checkbox"/> No
Collaboration Partner 1 Address	<Insert Partner Organization Address>	
Collaboration Partner 2	<Insert Partner 2 Name or Not Applicable (N/A)>	Access Identifiable Data <input type="checkbox"/> Yes <input type="checkbox"/> No Remote Access <input type="checkbox"/> Yes <input type="checkbox"/> No
Collaboration Partner 2 Address	<Insert Partner Organization 2 Address>	

B. Key Individuals

Directions: Please identify key individuals for the QE organization.

Program Owner	<Insert Program Owner Name>	Responsible for overall management and oversight of the program. The main point of contact for the QECP.
System Security Officer	<Insert System Security Officer Name and Title>	Individual with overall security responsibility for the data and information systems used in the project.
Privacy Officer	<Insert Privacy Officer Name and Title>	Individual with overall privacy responsibility for the information used in the project.

C. Data Storage Location(s)

Directions: The following section refers to the physical locations under direct control of the QE or Data Custodian where identifiable CMS data will be stored, processed, or accessed. It also includes the name(s) of the individual(s) responsible for each site's **physical security**. Consider Data Centers, Work Sites, and Offsite Storage Locations (e.g. records management, offsite backup storage).

QE	<Insert QE Name>
QE Address	<Insert QE Address>
QE Physical Security Contact(s)	<Insert QE Physical Security Contact Name(s)>
Data Custodian	<Insert Data Custodian Name>
Data Custodian Address	<Insert Data Custodian Address>
Data Custodian Physical Security Contact(s)	<Insert Data Custodian Physical Security Contact Name(s)>
If Utilizing a Cloud Service Provider (CSP)	<Insert Name of Product Being Used (e.g. AWS US East, Azure Government, etc.)>

D. Data Security Breaches

Directions: Please report any data security breaches that your organization has experienced during the last 10 years. This would include all data security incidents involving unauthorized access or disclosure of Protected Health Information (PHI) and/or Personally Identifiable Information (PII). Also include any unresolved incidents from previous years. Copy the table if multiple incidents need to be reported.

N/A. Our organization has not experienced any data security breaches during the last 10 years.

Incident 1

Incident Date	<Insert Date of Incident>
Source (Internal or External)	<Insert Internal or External>
Name of Organization Where Incident Occurred	<Organization Name>
Breached Data Type	<Insert PHI or PII or Both>
Description of Incident	<Describe Event>
Number of Records/Individuals Affected	<Insert Number Affected>
Description of Resolution	<Describe Resolution Taken>
Resolution Date	<Insert Resolution Date or Pending if in process>

E. Security and Privacy Controls

Directions: The following security and privacy controls are based on the CMS [ARS Version 3.1](#). For each question, please attest to whether or not your organization has implemented the listed control, focusing on the system(s) that will contain CMS data. If “No” or “N/A” is selected, please provide rationale at the end of each sub-section.

1. Access Control (AC)

AC-1	Does your organization: <ol style="list-style-type: none"> a.
